I, for one, don't care how any other ham got his certs. I got mine
through hard work and effort. I compete against my station, the
bands, propagation, and ME. Those who choose to cheat know their
story. I look forward to receiving my last 6 QSLs. Two from a yet
unworked P5, two from an as yet un-licensed 7O and the worked but
still unconfirmed 3Y0C and YI9OM. Not many thrills left for me but I
still get a kick out of adding a new one on RTTY.

Happy New Year all and good DX.

Dean

One web site that I can not find again stated that his work comes first and whenever time is available - Ham radio. Also, I believe it stated that power is only available for two hours a day.

I can't find the site again to verify my story and make sure I'm accurate but it's on the net somewhere.

Maybe and maybe not. Probably not, unless it is a big move.

With well designed radios and outside antennas you shouldn't hear the computers.

For instance, My HF rig is setting directly under a 19 inch monitor and directly over the computer (which has the cabinet removed.)
Directly to the left of the HF rig is another computer (bout 3 to 4 inches from the rig) and the monitor for that rig is adjacent to the one over the rig.

There is a third computer and monitor about two feet to my left. That computer also has the cabinet off.

All three are networked and the router sits adjacent to the computer that is just to the left of my HF rig. The ISDN router sits under the network router.

My Antenna tuner is to the right of the HF rig and the coax cables run together with the various lines from the computers. My VHF/UHF rig is adjacent and to the right of the antenna tunner and the spare HF rig is above the VHF/UHF rig and just to the right of the 19 inch monitor.

Oh...The henry 2K4 is immediately to the right of the UHF/VHF rig.

An HT setting on the desk will hear the computers.
The VHF/UHF rig which is connected to an outside antenna does not.
Running a full KW does not bother the computers.

I have taken no special precautions in either keeping the RF out of the computers, or the RF inside the computers from getting out (covers off the

two)

What I have found is that the modem I had prior to going with the ISDN connection was a really bad radiator where the HT was concerned and could be heard as much as 20 feet away. It was still not heard by any of the base station equipment.

Currently the station is not grounded except through the AC line.

That is due to a back hoe catching my ground system and pulling the whole thing out through the basement wall. At least they didn't get the rig, but they sure made a mess of the one part of the basement wall and cracked it almost to the foundation in one spot.

Unfortunately I could buy one whale of a *nice* station for what it's going to cost to repair that basement wall next spring.

Probably one of the reasons is the fact that digital dignatures, their verification, software setup, updating databses etc. is far from being a trivial task. It needs understanding of computers, cryptography and involves a process of completely restructuring the DXCC department. Given the fact that most of the people involved in the verification process right now are hardly computer wizsrds, it is clear that it will take quite some time before the ARRL is technically capable of handling these details with the kind of ease that is necessary to meet demands of all applicants.

For those outside the USA (and perhaps a few within) -- USA Districts can be a puzzle - so made up a map of USA Districts at URL:
http://ac6v.com/images/USA.gif

A mysterious fact about Montana and Wyoming as far as ITU Zones is concerned is:
W7 Montana ITU 6 (excluding Montana east of 110W) (ITU 7 Montana east of 110W),
Both are CQ 4.

W7 Wyoming ITU 6 (excluding Wyoming east of 110W) (ITU 7 Wyoming east of 110W)
Both are CQ 4.

Be aware this map was made by an AMATEUR (me) -- but comments and corrections are welcome -- flames will be extinguished!!

More maps and districts of other countries at URL:

http://www.io.com/~n5fc/notebk_ant.htm
http://www.io.com/~n5fc/dctl_ant.htm
http://home.earthlink.net/~mwattcpa/antennas.html

Can anyone here comment on the compact HF antenna designs at the above web pages? How can the notebook antenna have a high radiation resistance (and thus high efficiency) from 40m to 10m?

How does one figure out the radiation resistance for a particular antenna design?

Some updates to the 3Y0C web site and a few other items found through a
quick [15 minute] web search:

Bouvet Island Dxpedition 2000
http://www.qsl.net/zr1dq/3y0c.htm

"Shuttle Astronaut Dr Chuck Brady N4BQW is on a scientific expedition to
Bouvet Island where he does duty as a scientist and medical doctor and
seized the opportunity to activate amateur radio with his callsign
3Y0C..."

Chuck Brady N4BQW - NASA Biography
http://www.qsl.net/zr1dq/3y0c-06.htm

Species Composition: Fur Seal, Arctocephalus gazella
http://polarmet.mps.ohio-state.edu/ASPIRE_99/seals/science/fur.htm

"...NATURAL HISTORY: Adult males arrive at rookeries from October
through early December... Females give birth from late November through
late December..."

The World Factbook 2000 - Bouvet Island
http://www.odci.gov/cia/publications/factbook/geos/bv.html

Bouvet Island Geography 2000

http://www.photius.com/wfb2000/countries/bouvet_island/bouvet_island_geography.html
---

Notice that this is the time when the new seal pups are born and all on the island would be quite busy. Bouvet has Norwegian National Park status.

Let's all just be glad that Chuck is able to get on the air at all and have a New Year's resolution to quit our bitching and moaning and spend time on the radio looking for DX :-)).

Cheers

Jason,
The first antenna appears to be a shortened, loaded dipole.
Used with a tuner, and depending on the tuner used, It could
probably be loaded on bands 40 - 10 meters.
The second and third antennas, again depending on the tuner
used, probably could be used on 40 - 10 meters.
Would any of these three antennas work well? Depends on
what you call 'well'. Better than nothing, yes. Better than
anything approaching a 1/4 wave or 1/2 wave antenna, not even
in your dreams. It would be nice to 'discover' a very small
antenna for the lower HF bands, but these don't qualify.
'Doc

13. Re: WANTED: comments on compact HF antennas

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-02 12:16:31 UTC

Source record: 18368
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx

When discussing antennas, 'small' means small in comparison with the wavelength they will be used at. An antenna which has its longest dimension less than say 1/8th wavelength can be considered small.

Radiation resistance of most antennas increases in proportion to Square(Length/Wavelength) where Length is usually the longest dimension. Sometimes it may increase according to the 4th power of Length/Wavelength depending on an antenna's geometry.

But the most important characteristic of small antennas of any sort is power radiating efficiency. They all have poor directivity gain.

Efficiency = (Power in)/(Power out).

Radiation resistance, Rr, is only half the story. Its actual value doesn't matter. It varies greatly from one antenna to another.

The other half of the story is Loss resistance RL. This consists of conductor resistance + ground loss resistance. Again its actual value doesn't matter. It varies greatly from one antenna to another.

What REALLY matters is the RATIO of one to the other because -

Efficiency is given very simply by -

Rr/(Rr+RL) * 100 percent.

The Magloop is the most efficient amongst small antennas. Its radiation resistance is very small, perhaps only milli-ohms, but by using a copper tube 1 to 3 inches in diameter the conductor loss resistance can also be made very small. By mounting it a few feet above ground and away from other structures the induced ground loss can be made negligible.

A Magloop can have a useable efficiency even when its diameter is only 1 percent of a wavelength. Download program MAGLOOP4 from website below and obtain some performance figures.

But to be correct, do you think the height above ground
should be included as one of a magloop's dimensions ? The
feedline has to be at least as long as height.

At least for receiving antennas, you can get away with ones that are about a millionth of a wavelength long. Witness those wristwatches that set themselves daily via WWVB which is on 60 KHz, or 5 km wavelength. You just can't carry around 2.5 km of antenna around with you all the time... I guess I'm impressed by the simplest of things.

23. Sangean ATS-818 Mods & Antenna Zapping Questions

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-03 15:58:35 UTC
From: mcotton@gte.net
Message-ID: <3a534ba6.3701789@news.gte.net>
Source record: 18378

After badly botchng the repair job to replace the static-zapped FET transistor in my old Radio Shack DX-390, I've relegated it to the scrapheap and bought a used Sangean version (ATS-818) on eBay.

Once I take delivery, I intend to:

1.) Locate diode D29 and snip it, thus performing the anti-muting modification as I understand it...Do I understand it correctly?

2.) Snip the leads to the tiny chirping tweeter next to the speaker to remove the chirping sound that annoys my wife when I'm tuning...

3.) Solder a lead to the circuitboard where the whip antenna makes contact, so that I can attach a longwire antenna I have running through my attic. Is this location on the circuitboard correct for using a longwire?

4.) Solder a lead somewhere inside to attach my groundwire that runs outside to a stake driven in the ground. Any recommendations exactly where inside this should be soldered?

5.) I would like to put some sort of protection in place to prevent the FET being blown out by another static zapping. I've seen some different ideas on this, but would like something really simple so I don't destroy this radio like I did the DX-398. I read one where it said to simply put a 10K resistor between the radio and the ground. Any ideas on this?

Any and all responses are appreciated.

Mark

24. Network Unavailable on DX Monitor???

http://www.io.com/~n5fc/notebk_ant.htm

The zigzag antenna design at the above URL led me to wonder if zigzag radials are a viable option. I also read somewhere that radials do not even have to be symmetrical. I also read that the use of many 1/16 wavelength radials can still yield respectable performance.

Are zigzag radials a viable option? If so, less space is needed for the antenna (especially important for apartment dwellers like me). Furthermore, the wire radials are less cumbersome to deal with.

I find it hard to believe that people have room for 1/4 wavelength radials for vertical antennas on 160m, as this means 130-foot radials extending outward from the antenna. The zigzag design of the notebook antenna sounds like a possible solution for apartment dwellers who need radials for a short vertical antenna.

So how important is it that radials be straight? While I am certain that deviation from straight radials reduces the effectiveness of the antenna ground, I am not certain whether this reduction is slight or gargantuan.

But can an effective radial be made of helical conductors? As I have pointed out before, my Cliffdweller slinky dipole stinks. Exactly why is a helical antenna design inefficient? (As a BSEE graduate, I'm not that afraid of equations.) And what makes a particular radial set more effective than another set given the same number and length of radials?

I keep hearing about the use of a counterpoise, or a length of conductor connected to the ground (of the transmitter, tuner, and/or antenna) terminated by an insulator at the far end.

Are zigzag wire counterpoises (whether used as radials for a wire antenna or as an RF transmitter ground) viable solutions? Again, a zigzag configuration takes up less space and is less cumbersome to work with. Again, I refer you to:
http://www.io.com/~n5fc/notebk_ant.htm

I have been told to use a 1/4 wavelength wire counterpoise as an RF transmitter ground if the cold water pipe and the 8-foot buried metal rod are not viable solutions.

What happens if I use a shorter counterpoise? How much less effective is such a counterpoise as an RF transmitter ground? (This could be an issue at lower frequencies.)

What happens if I use a longer counterpoise? Can you use a counterpoise designed for 40m (33 feet long) on 10m (which would be a full wavelength long)? Would a long counterpoise be even more effective? Or would it radiate unwanted RF?

What happens if I use multiple counterpoises?

Better than no radials. Yep, the mass of radials at the base of the
antenna the most important place, so many short radials will do pretty
well. Zig zagging is no real problem. Not as good as straight, but much
better than none.

I string mine out just about any old way. I don't have 130 ft straight
line, so I have them run along the fence lines, around the base of the
house, along the lawn, etc. Most are making turns somewhere.

A helical antenna needs capacitance at the end to work well. A slinky in
itself does not satisfy this. Add a fairly long wire leader to each end,

in addition to the coil part , and I bet it comes to life. I use quite a few helical antennas for mobile, but all use long stingers. A must for decent performance. And if you dump the narrow windings and put a larger lumped coil in, all the better. MK

Hello Jason,

Lay your radials straight or bent, of no particular length
or depth. For a given amount of wire prefer more short
radials to a few long ones. Stop when you get to about 6
radials, do some listening tests on known transmissions, add
another 2 radials, do some more listening tests. If you
can't detect any difference in received signal strength
between 6 and 8 radials fire up the rig and call CQDX.

Download program ENDFEED in a few seconds from the website
below.. Not zipped up. Run immediately.

Judge the relative radiating efficiencies of vertical or
inverted-L antennas used with a differing number of radials
of differing lengths shallow-buried in different types of
soils.

This little, easy to use program will also tell you the
inductance and capacitance settings of the T or L-network
needed to match the feedpoint impedance to a 50-ohm
feedline.

To home-brew your own tuner or loading coils download
program SOLNOID2. It's so easy !

And if you've ever wondered how a tuner + coax + balun +
twin-line + dipole + ground works, download program VARNEY.

Makes handbooks, annuals and magazines obsolete.

I have in fact seen people spiral radials. Was just reading an old
article where the guy did just that to fit a small area. Yep, I guess a
fractal radial would work too. MK

Or if you have a "one-sided" card put the call of the station you worked in the "QSO with..." box then flip the card over and in BIG letters write "VIA XY5ABC" and when you build the alpabetical stack to send to the outgoing buro flip that card over so that the "via" info is the front and put it in the que based on the via call. Works just fine....

The whole idea behind the radials, if I remember correctly, is to provide a
low loss return path for the signal... so a spiral, if we ignore any coil
effects, should be more efficient since it covers a greater area than
straight radials...

42. Electronic QSLs - From the ARRL

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-05 16:17:50 UTC
From: david.corio@adelphiacom.com
Message-ID: <3a55f0d0.69335400@news1.news.adelphia.net>
Source record: 18398

In an email I just received from the ARRL DXCC department, I
was told that any form of electronic QSL will not be accepted for DXCC
or WAS credit.

To confirm this I asked if this referred to the claiming
station faxing or emailing the cards to ARRL, or the claiming station
receiving them via electronic means (eQSL) and submitting them in the
normal fashion.

I was told that if a station receives QSL cards electronically
and prints them out, and then submits them in the usual fashion, they
will not be accepted for credit.

Nothing was said about any future plan to accept electronic
QSLs.

For myself I plan to keep the electronic QSLs and follow up
with regular snail-mail cards.

Sorry Mario,

The lowest resistance, lowest inductance and lowest
impedance between two points occurs on a straight wire, ie,
a true radial.

A tight spiral of wire is an RF choke and a waste of good
copper.

The one I saw was a real loose spiral. More of a maypole looking setup.
And more spiraled at the ends of the radials than at the base of the
antenna. MK

I noticed on the zr1dq website that it indicates "dxpedition". I know they didn't mean that in the traditional sense, but others may not...

Good info Reg, and there is also a maxim that 'radials need not
be longer than
the antenna is tall'.

However, a less than tight spiral of wire is a loading coil.
About a year ago there was a shortened dipole with end hats
made out of spirals. It appeared to be an OK design to me.
It offered some end-loading inductance along with end-to-end
capacitance. I've been thinking of trying it for a vertical.

Please send to all scanner enthusiasts, SWLers, and hams that you know in the US & Mexico:

==>ESCAPEES MAY HAVE STOLEN RADIOS; HAMS ASKED TO MONITOR

According to news reports, the seven Texas prison escapees still at large and now wanted in connection with the murder of Irving, Texas, police officer Aubrey Hawkins, KC5USI, also may have stolen radios from a Houston Radio Shack store. The radios are said to include Amateur Radio 2-meter H-Ts as well as Business Radio Service (programmed for 156.400 MHz) and Family Radio Service (462.5625-467.7125 MHz) radios.

Hams have been asked to monitor these bands and report any suspicious activity any hour of the day to the Huntsville Command Center, 936-437-6735, and to their local law enforcement agency. Police advise that anyone spotting these suspects not try to approach them but contact local authorities immediately.

More information on the escapees is at http://people.txucom.net/tdcj-iad/

From what I hear, high winds keep blowing down antennas. He must also use generator power for the amplifier, and the generator does not run full time. Sleep schedule is supposedly 2000-0400 UTC, but Chuck obviously doesn't get his full 8 hrs every 'night'.

For what it's worth, here's how I lucked into a QSO: Early in his stay, he would sometimes show up around 0100 UTC on 20m. Around that time on 12/29, 14.195 and vicinity was very crowded with the usual long pathers. One of the supporting web sites indicated he might appear from time to time on 14.260, so I just planted my VFO there, hoping that if he came on the air, .195 would be too crowded for him. About 10 minutes later, blam! There he was, calling QRZ with a decent signal, and I was first in the log for that run. Pretty exhilirating for a barefoot Left Coaster, even though it was 99% luck.

I guess the lesson is to study the bulletins and the operating patterns (and propagation to your area with the help of the ZS6DN beacons). Then keep twiddling through your rig's memories at the most likely times on the most likely bands/freqs. For this operation, cluster spots are good primarily for historical purposes. For your best shot, you've got to be "there" where/when he starts his short operating bursts. Like the 'old days'.

GL to all from one less sig in the 20m pile.

Chuck was on the air for several periods today, 1/6/01, and he explained his operating strategies and conditions to K4VUD and others to pass around. Here's what I heard during their 10 min QSO:
1). Chuck is very motivated to get as many in the log as possible and he does have vast dxexpedition experience (KH5, etc.) so he knows how to operate split and go by the numbers, etc. (He was responding to complaints that at times he wasn't operating split and chaos ensued).
2) His work schedule is very demanding and on most days he can only squeeze 10 minutes at a time, during breaks, to get on the radio. He explained he'd rather get on for 10 mins and get a handful of folks in the log, than not get on at all.
3). They have only one working generator. It is not as effective in charging their batteries as they had hoped. It uses more fuel than expected. It is their only power source for two more months, so they must conserve fuel, operating it a max of 45 mins a day. And it has a leak in the crankcase! This limits Chuck's time on the air so as not to draw the batteries too far down. He kept saying, "We are on survival mode" when it comes to power.
4) Given that it takes 5-10 mins sometimes to get split operation flowing once a dxpedition starts up on the air, Chuck feels that it's not always worth it if he only has that much time to operate; so he is often running simplex til he gets called back to work. When he has longer periods to operate, he will work split and by the numbers.
5) He is completely aware of the frustration that many are experiencing. He too is facing challenges, especially with wind and antennas, and especially the massive pileups. He asked for everyone's patience; he is trying his hardest to get on the air as much as possible during demanding circumstances.
My own thoughts: this explained a lot about what is going on down there and Chuck's unique dxpedition. Clearly it is a one man operation in extreme conditions. He's got a job to do and he's fitting ham radio in as much as he can. If we on this end of the pileups listened more, shouted into the mike less, and were more patient and civilized, more of us will get into his logs during his limited operating periods.
Best 73s to all and GL in the pileups, de John, K7JY, Seattle.
(If this note gets relayed to you Chuck, please note that up here in the Pacific Northwest we're only hearing you around 0100 utc on 20 meters).

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KA1GJ, NC1L & DXCC, N7NG/1, KF2TI, WB2YQH/WB2RAJ & The 599 DX Report, W3UR & The Daily DX, K4AVQ, N4AA & QRZ DX, WA4FFW, N5FG, WF5E, K8NA, K8YSE, KE9KD, CE6TBN, EA3BT, EI6FR, ER1LW, HP1AC, I1JQJ/IK1ADH & 425 DX News, IN3QBR, JA3MZB, JH6RTO, LA5HE, PS7AB, PY7ZY, YS1RR and ZS5BBO for the following DX information.

3D, CONWAY REEF (Update). According to Raymundo, YS1RR, the planning for the Conway Reef DXpedition is progressing on a "fast track". Operators YT1AD, YU1RL, YU1NR, YU1FW, YU7AV, YU6AO (YZ7AA), YS1RR, Z32AU and Z32ZM are expected to operate from here (refer to OPDX.482/488) from February 19-28th. Their callsign will be announced on February 18th. They have announced the following suggested modes and frequencies:
CW - 1825, 3505, 7003, 10104, 14020, 18020, 21020, 24896, 28020, 50105
SSB - 1835, 3795, 7075, 14195, 18145, 21295, 24945, 28495, 50125
Digital - 1835, 3575, 7035, 14075, 21075, 28075
SSTV - 3723, 7035, 14230, 21340, 28680 kHz
* ADDED NOTE: Receiving frequencies will be 5 to 30 kHz higher than transmitting frequencies. Additional information will be given during operation time. QSL via YT1AD: Hrane Milosevic, 36206 Vitanovac, Yugoslavia. Raymundo reports that as in all DXpeditions, they are short of funds and your donations will be very helpful to make this operation a great success and any small or big donations are welcome. Donations can be sent to YS1RR: Raymundo Rodriguez, P.O. Box 32, San Salvador, El Salvador or to VIPSAL 682, P.O. Box 02-5364, Miami, FL 33102-5364, USA. Please visit the Conway 2001 Web Page at: http://www.kragujevac.co.yu/3d2
This is under construction and will be updated frequently.

3D2, FIJI. From the Conway Reef update press release above, the operators will operate from here as 3D2AD, 3D2AU and possibly other individual callsigns after their operation on Conway between March 1-6th.

3E500, PANAMA (Attention Prefix Hunters!). Cam, HP1AC, informs OPDX that the "Radio Club de Panama" has obtained a special permit from the

Panama Government Radio Dept. Office so any amateur radio operator in Panama during the month of March 2001 will be able to use the special prefix 3E500 (Three Echo Five Zero Zero). This special prefix is to commemorate the 500th year anniversary of the Discovery of the "Isthmus of Panama" in March 1501 by Don Rodrigo de Bastidas. An example is Cam's callsign (HP1AC), he will be using 3E500AC (Three Echo Fivehundred Alfa Charlie). A special QSL will be issued to confirm all QSOs during the month of March 2001. QSL Manager will be HP1RCP, Radio Club de Panama, P.O.Box 10745, Panama 4, PANAMA.

3G, JUAN FERNANDEZ (Attention Prefix Hunters!). Look for Pat, CE1VLY, to be on the air from Juan Fernandez (SA-005) as 3G0Z the last week of January 2001. Activity will only be on 10 meters. QSL via home callsign.

3W, VIETNAM. Tom, 3W7CW, was active over the weekend on 30/20 meters CW. Check around 14006 kHz between 1530-1630z and 10103 kHz 1630-1800z. QSL via SP5JTF.

3Y, BOUVET. Chuck, 3Y0C, was heard over the weekend on 40 meters SSB for about an hour on 7052 and 7062 kHz between 0400 and 0515z. He was also heard on 20 meters SSB Saturday and Sunday, as well as 12 meters on Friday. His activity may seem short, but this is due to his work schedule which is very demanding, and on most days he can only squeeze 10 minutes in at a time during his breaks to get on the radio. So please be patient with him Chuck understands the high demand for Bouvet, and remember, he is only a one man operation. The following press release below will explain it more.
QSL Manager Mac, WA4FFW, reports that he spoke with 3Y0C on 01/06/01. Chuck has been off the air the past few days because a storm blew down antennas again. Time and weather allowed him to get the beam up 25 feet today. He has the vertical repaired, but because of a storm closing in, he will not put it up until after the storm clears. They have developed an oil leak in the generator, and attempted repairs have not been successful. They can use it but only for 2 hours a day which is sufficient to charge the batteries. He is unable to use the linear without the use of the generator. Chuck will be on as many bands as possible and explains that one of the reasons for such short runs sometimes is that he is trying to work a few stations between other duties to provide as many contacts as possible. He wants to remind the DX fraternity that he is aware of the need for Bouvet Worldwide. However, he is on an official scientific expedition, with specific duties, not a DXpedition. He is trying to give the world as many contacts as the situations there will allow. Because he is on at various times, he has been available to all parts of the world. What must be recognized is the fact that he is not on the same time each day, nor is he always on the same length of time because of his duties. Mac, WA4FFW, also announced that the QSL address for the 3Y0C QSL cards is as follows: Mark McIntyre, WA4FFW, 2903 Maple Ave., Burlington, NC. 27215 USA. Mac advises that some cards have already arrived. He asked earlier that they not be sent until "this announcement". None have been opened, but he states that he hopes those already received have sufficient postage based on the new postal rates, otherwise they will be returned

via bureau. He also would like to inform the international community that the cost to mail a QSL to a foreign country has increased as well effective January 8, 2001. Mac reports he will not have logs until Chuck returns in March, so no QSLs can go out until he has arrived back stateside. Mac said that the delay in announcing the address was to allow the implementation of the new US postal rates. This was done so everyone would have the correct return postage preventing their direct card being shipped via the bureau. He said the reason was based on the postal increase and not that he was moving. He would like to inform all that he has no plans to relocate his antenna farm by moving as he read on the internet was the reason.

7Q, MALAWI. Look for Harry, G0JMU, to be active as 7Q7HB during the month of February. His activity is planned for SSTV, PSK31 and operations on the WARC bands.

7X, ALGERIA. Mohammed, 7X4AN, has been active on 10 meters CW/SSB between 1330-1600z. Watch around 28010 kHz and between 28400 and 28500 kHz. Also, watch around 7001 kHz after 2130z. This past weekend Sadek, 7X4LS, was spotted around 28475 between 1530 and 1600z.

A2, BOTSWANA. Barry/ZS1FJ and Gerald/ZS1GRM are planning to be active from here starting around 1800z, Sunday, January 14th and continuing until late Saturday the 20th. They have requested the callsign A24DX, however, they are having difficulties with the authorities who want them to use the callsign A24/homecall. Activity will be on all bands, mostly SSB on frequencies which will not interfere with the 3Y0C operation. Therefore, suggested frequencies are 28450, 21270 and 14270 kHz at the appropriate times for propagation. On 40 meters they will transmit at 7080 kHz and receive split between 0300-0400z, listening to stateside stations for advice on what frequency to use to suits them. The same will be applied to 80 meters. Barry states that if there should be a demand, they will be active on the WARC bands (18145 and 24950 kHz). They will use an A3S and G5RV antenna with the max power output. They plan to be on from 0300z until, probably, 2200z. QSLs to ZS1FJ.

A5, BHUTAN. Very few QSNs were reported on the Johnson family over the past weekend. Activity by Glenn/A52GJ and son Mark/A52MJ was almost nill. However, Glenn's daughter Melissa/N0MAJ was issued the callsign A52YL and was spotted in the RTTY contest. QSNs report very few takers. According to "The Daily DX" Melissa (16 yrs. old) is the very first YL license from Bhutan. Glenn's wife, Vivien, also has a license, A52VJ, and his other son Paul is A52PJ.

D6, COMOROS (Update). Josep/EA3BT and Nuria/EA3WL have informed OPDX they have only a few days left before they travel to here to be active as D68BT and D68WL (Please refer to OPDX.486). Activity is expected to be between Janaury 13-28th. They state the following: ".... we are really working hard packaging everything and trying not to leave anything. Due to the great demand in 50 MHz, Santa has brought us an antenna for 6 meters. You can see it in the Picture album at our web page (http://www.qsl.net/ea3bt), where you'll be able to find some more pictures of the preparation. Before

leaving, we'll send a new E-mail with all the operating frequencies, and about the pilot to whom you'll be able to send all requests and information interesting for us. If nothing wrong happens, the logs will be also available daily at our page....."

DXCC NEWS........
DXCC is pleased to announce the addition of a 17 Meter Single Band DXCC award. Applications for this award will be accepted beginning January 2, 2001. 17 Meter DXCC certificates will be dated but not numbered. 17 meter credits will also count toward the DeSoto Cup competition for the year 2001. If you do not know what credits you have on 17 meters, you may contact DXCC for an update prior to applying. This will help avoid duplicates and additional costs. If you have web access and can handle ADOBE (.pdf) files, contact DXCC at dxcc@arrl.org for a copy of your record. If you do not have web access, please send a note to DXCC along with 1.50 USD for postage or an SASE with 1.50 USD in postage. For further information, please contact DXCC at: dxcc@arrl.org

MACAO (XX9). Last week we reported that a petition was filed for the possible removal of this DXCC entity. OPDX has learned that plans are on their way to prevent the Macao removal situation. Reports indicate that the national Amateur Radio Society on Macao is applying to Region III for IARU membership status. For this reason, DXCC will continue the grace period for Macao until a firm direction is established, either an ITU resolution of the prefix problem, or the likelihood IARU membership. Theoretically, if the DXCC were to remove Macao and then add it again to the list, everyone would have to work it again. STAY TUNED!

DX-CENTRAL (New Look!). Kelly, KE9KD, reports that after a long overdue redesign, he has finally managed to get the new DX-Central Website online. You will find some of the same features as the old site with improved functionality, and you will find some new features as well. He still has several enhancements to put in place, it's just a matter of finding a little time. For those of you that have links, software or other things that used pieces of the DX-Central website, you will want to update your code. If you have not been to the site in a while, feel free to drop in. The address is: http://www.dx-central.com

IOTA NEWS.......
AS-056. Masa, JA6GXK, will be active from Danjo Archipelago (Meshima Island) between Janaury 8-14th. This is not a DXpedition and he will be active in his spare time. His planned operating schedule is as follows:
January 8th - 0100-0800z and 1000-1100z
January 9th - 1000-1400z
January 11th - 1000-1100z
Janaury 12th - 1000-1400z
January 13th - 0100-0230z
January 14th - 0100-0800z
Suggested frequencies are: 14260 or 21260 (both +/- 10 kHz).
QSL via only the Bureau.

NA-213. (CORRECTION). Last week it was reported that the "Magnolia DX Association" was going to be active from Dauphin Island in late February. We states that Dauphin Island was in Alaska, this is incorrect. It is a part of Alabama.

JW, SVALBARD. Rag, LA5HE, informs OPDX that he will once again be active as JW5HE in early February. Look for him to be active on the lower bands and the WARC bands. QSL via CBA.

P4, ARUBA. Start looking for Alan, K4AVQ, next weekend as P40AV. He will be there Janaury 13-21st. He states that he will start on 10 meters, if open, and then work the lower bands. Suggested frequencies are: 28500, 28495, 21300, 14155, 14205, 14255, 7150, 3535-45 and 1825. Alan will also try to accommodate special requests for CW and Phone on any band needed when the traffic is low. He will also listen for QRP and Mobile stations. QSL via: Alan B Caplan, 14020 140th Court, Apple Valley, MN 55124-9422 USA.

PY0S, ST. PETER AND ST. PAUL ROCKS. "QRZ DX" reports that a group of Brazilian DXers from Recife, have received permission to operate from here beginning February 7th and operate until approximately February 15th. The dates may vary due to the long voyage. Operators will be Jim/PY7XC (team leader), Fred/PY7ZZ and Cicero/PY7ZY. The team of operators are providing their own transportation, and there will be no limitations on their operating times. Activity will be on 160-10 meters CW, SSB and with the possiblity of RTTY and 6 meters. The callsign and QSL Manager will be announced later along with further details. The team is looking for donations from clubs and individuals. Contributions can be sent to: Bill Smith W9VA, 1345 Linden Ave., Deerfield, IL 60015, USA. Bill is the acting coordinater for this operation on behalf of the Recife DX Group and can be contacted via E-mail at: w9va@aol.com
In event the operation is cancelled, all contributions will be returned.

QSL INFO AND NEWS.....
Declan, EI6FR, reports that those awaiting QSLs for the Westnet/Saltee Dogs Groups EJ7NET operation from Inis Meain (Aran Islands EU-006), which took place in June 2000, is glad to say all QSL cards for all stations appearing in the log have been dispatched to the bureau. QSL cards for those stations in countries without bureaus have been mailed directly to the callbook address where available. All direct requests have also been answered. He apologizes for the delay and is looking forward to working you again from another EI/GI island this coming summer.

Slawa, ER1LW, active as ER2000L during the period of December 1-31st (2000), requests0 to have QSL cards sent to the following address: Lysy Wiacheslav, P.O.Box 112, Chisinau, MD-2012, Moldova.

Claudio, ET3VSC (IV3VSC, ex-DJ0PN), reports that he has confirmed all QSLs for all QSOs through October 21st (2000). All have been sent via the different QSL Bureaus (Most through DARC or the USA Bureaus).

Seiji, JH6RTO, informs OPDX that, for all operations performed by him in 2000, the log search Web page is now available at: http://www.bekkoame.ne.jp/~m.mats/mj5aja_input.htm This includes his MJ5AJA (Jersey) and M0RAA(/TF/PJ7/VP9) operations. Go directly to this page because its top is written in Japanese, unfortunately. According to his QSL/Web manager, Masanori/JH6VLF, all the direct QSLs have been replied to. Seiji will return to Japan this February to restart his operations in Japan and in Marianas as JH6RTO and AH0R, respectively.

Ciro, PY7ZY, reports that all direct QSLs received for his operations on Itamarac Island (PY7ZY/7 - SA-046), Itaparica Island (PY7ZY/6 - SA-023) and Tinhare Island (PY7ZY/6 - SA-080) were sent. If by chance you sent a direct QSL and didn't receive a card, it is because Ciro didn't receive your QSL. He states it is OK to send an E-mail with the details of QSO, for a log check to: py7zy@qsl.net

S2, BANGLADESH. Stig, S21YJ, was heard this past weekend on 14190 kHz around and after 0200z. QSL via SM4AIO.

SPECIAL DFH ACTIVITY..... Look for ZV3F and ZW3F to be active from Fort Dom Pedro II (DFH RS-03) January 20-21st and from Fort Duque de Caxias (DFH RS-01) March 24-25th. Both are valid for the "Historical Fortifications Award" (DFH). Activity from both will be on all HF bands, SSB and CW. QSL Manager is PY3UR.

Look for ZX7R and ZX7CW to be active from Reis Magos Fort (Natal/RN), January 26-28th. Activity will be on 160-6 meters, SSB/CW/RTTY. QSL via PS7HF: Fabio Hoelz, Rua Serra Formosa NR 8054-E, Natal/RN, 59068-140, Brazil.

SPECIAL MILLENIUM CALLSIGNS. Be looking for the special Spanish callsigns EF2XXI and ED2XXI to be active to celebrate the new 21st century. Activity is expected to last until January 15th and will be on all bands and modes. QSL to EA2RCF via the bureau or direct. QSL only RTTY/PSK31 QSOs via direct to EC2ADR: Roberto Garcia, P.O. Box 647, C.P. 01080, Vitoria-Alava, Spain.

SU, EGYPT. SU3AM was heard this past weekend on 12 meters on 24950 kHz between 1300 and 1400z. QSL via DL1FCM. Said, SU1SK, was active on 21280 kHz from about 1345z to 1520z.

TD0, GUATEMALA. "The 599 DX Report" reports to look for the special event station TD0G to be active January 26-28th, from the ancient Maya town of Yasha. Activity will be on 80-15 meters. There was no QSL route given.

V7, MARSHALL ISLANDS. Jeff, KA1GJ, will be operating from here as V73GJ, Janaury 16-26th. He states that he will be on business, so operations will be limited to a few hours per day. He plans to be active mostly on CW. QSL via his home callsign, KA1GJ.

XW, LAOS. Mauro, IN3QBR, informed your editor that he and Fabry, IN3ZNR, continue to be active as XW3QBR and XW3ZNR until January 12th. Last Monday he wrote that they are active for more than 15 hours at day on all bands

(exl. 160m). He also states that they have had a some contact with U.S. East Coast stations on 80 meters. Their goal is to make more than 15000 QSOs, however, he does state that their time is limited during the evening hours. Over the past weekend a lot of time seemed to be spent on 10 meters CW/SSB and 80 meters.

It now costs $0.80 per ounce. So, one green stamp ought to be sufficient.

A little more explanation might be good. It used to cost $0.60 for
1/2 ounce, about two cards and $1.00 for a full ounce, about 6 cards.

There is no 1/2 ounce rate now, and the full ounce rate is $0.80, so
for 3 to 6 cards, it's actually cheaper. And IRC's are worth more
now, anywhere from the $0.80 redemption value to the $1.75 cost of
buying one.

I am organising a Portland on the air weekend and would like to hear
from interested parties from all "Portland's" around the world. I know that
there are quite a few in North America so please get in touch if interested
so I can organising. I live on the Isle of Portland in Dorset, England and
think it would be a good event to get us all on air for a weekend friendly
contest
with certificates for working all of them etc. If you or your club are
interested please let me know the best dates during the summer and I will
set a date
soon.

If that is from a recent QSO it is probably a broken call for JW0HR who has
been on recently. Here are the recent spots for that call .
I did find three spots for JW0JR from year 2000 but no record of this op in
either QRZ or Buckmasters database.
Also got no hits on any JW0JR from a search on The Daily DX website

K3ZO 14167.0 JW0HR 0217 06 Jan 2001
JF4AIS 14170.0 JW0HR 0225 06 Jan 2001

83. TI Mail Costs

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-10 01:56:33 UTC
From: ti2dll@email.com
Message-ID: <93gfgf$a0nuo$1@ID-7470.news.dfncis.de>
Source record: 18338

Hi all,

Saw someone post information on mail costs in the US, thought I'd pitch in with the costs for Costa Rica.

Currently mail costs for QSL cards (envelope w. card under 20 grams) are:

70 colones to North & Central America and the caribbean.
90 colones to South America & Europe.
100 colones to Africa, Asia and the Pacific.

A single green stamp will cover the cost to anywhere in the world without any trouble.

IRCs are also accepted, and a single IRC is also enough to send a QSL anywhere in the world.

If you use stamped envelopes, be sure to take into consideration that the local postal service will only accept costarrican stamps, and be sure the stamps you stick on the envelope cover the mailing cost. Otherwise it ends up being loss of a stamp, since the post office normally doesn't deal in denominations small enough to complete the missing amount.

BTW, the bureau is also fully functional to and from Costa Rica.

The QSO was on 26DEC00 on 14246 2350GMT. I would swear he said JW0JR, but
I have been known to be wrong once or twice in my life.

Thanks for information

95. Which callsign server is better?

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-11 13:17:21 UTC
From: ti2dll@email.com
Message-ID: <93kbp0$aodht$2@ID-7470.news.dfncis.de>
Source record: 18349

Hi,

Which callsign server do you consider to be the most adecuate and most updated?

My personal experience has been that buckmaster makes its updates more frequently and has a better variety of callsigns. Several unusual callsigns I have been unable to find on qrz I can find on buckmaster, complete with QSL manager. Even my own callsign is fully updated on buckmaster, while on QRZ it still lists outdated information, even after several update attempts...

98. ADXO gets a Facelift

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-11 14:15:47 UTC
From: Bill@ng3k.com
Message-ID: <9026527C1wfeidthiscom@216.200.68.12>
Source record: 18203

Announced DX Operations: http://www.ng3k.com/Misc/adxo.html

ADXO is a collection of tables containing information about special Amateur Radio DX and contest operations and I've given it a "new millennium" face-lift. The HTML pages that constitute ADXO are now derived from a flat file database. The HTML pages themselves are generated using a series of Perl programs. Much of the day-to-day updating ("new" icon processing; transfer of items from current file to archive; etc.) now occurs automatically shortly after midnight ELT each day. This means that you'll see a new version of the ADXO pages at least once a day.

In addition, views of the data sorted by DXCC-entity and callsign are now available:

http://www.ng3k.com/Misc/adxod.html
http://www.ng3k.com/Misc/adxoc.html

It's also possible to see the data sorted by end-date:

http://www.ng3k.com/Misc/adxoe.html

Clicking on the corresponding ADXO table-header column will also take you directly to these alternative views, so there's no need to bookmark the URLs.

ADXO items whose dates of operation coincide with the current date are highlighted with a different color background. This is especially useful in the DXCC and callsign views.

The date field has been subdivided into "Start-Date" and "End-Date". They now have a more structured format which should be a little easier to read. This change was necessary to facilitate the automated updating.

Links on ADXO pages are checked daily, using "linklint" and corrections are made regularly.

You can also read a new "About ADXO" page that explains some of its features:

http://www.ng3k.com/Misc/aboutadxo.html

This page is a work in progress and I plan to add further material to it. User suggestions for topics to be treated are most welcome.

The new version depends heavily on Cascading Style Sheets (CSS) for its formatting. All ADXO pages have been validated and meet W3C standards for both HTML and CSS. Nevertheless, browser support of CSS, although improving, is still somewhat uneven, especially in older browsers. Users who experience difficulty with the new pages may want to try a plain, inornate version of ADXO which can be found it at:

http://www.ng3k.com/Misc/adxoplain.html

This will work very well for users of the lynx browser too. Of course, it lacks the frills of the table/CSS version.

ADXO is still accessible through the NG3K mirror sites too:

http://www.cpcug.org/user/wfeidt/Misc/adxo.html
http://www.his.com/~wfeidt/Misc/adxo.html

As always, comments and suggestions are most welcome and may be sent to:

Bill@ng3k.com

73,

Bill/NG3K

I have to agree with the two opinions above. Buckmaster starts a
little slower for me, but has more calls, and is apparently more
accurate.

Saw some posts on the origin of 73 and the misuse 73's. From an article
at URL:
http://ac6v.com/73.htm#73

The bottom Line:
"Over the years from 1859 to 1900, the many manuals of telegraphy show
variations of this
meaning. Dodge's The Telegraph Instructor shows it merely as
"compliments." The Twentieth
Century Manual of Railways and Commercial Telegraphy defines it two
ways, one listing as
"my compliments to you"; but in the glossary of abbreviations it is
merely "compliments."
Theodore A. Edison's Telegraphy Self-Taught shows a return of "accept my
compliments."
By 1908, however, a later edition of the Dodge Manual gives us today's
definition of
"best regards" with a backward look at the older meaning in another part
of the work
where it also lists it as "compliments."

Most agree that since 73 is plural -- 73's is a misuse of the term.

Hi, All.

I'm going to be trying my hand at a mini-dxpedition to YV at the end of the month. A little searching on the web reveals that one aspect that might be of interest to some is the fact that I'll be on Los Roques for one night, which is apparently IOTA SA-035.

Since I'm just bringing along a rig on a very short vacation, I won't be on the air much, but if you need Los Roques, you should be able to find me on Saturday, 27 January (Sunday 28 January UTC), probably around 0400 UTC or 1000 UTC. I'll probably be somewhere near 7040 CW or 7075 SSB. Feel free to call me on CW even if I'm on SSB, and I'll be glad to switch over to CW to give you a report. I'll just have a dipole strung up someplace, but I should be copiable in North America.

I believe my call will be YV5/W0IS, although I'm not positive on the number. (If anyone knows for sure, please let me know!)

Also, I'll probably be on the air Friday night (Saturday UTC) from Caracas.

Please QSL to my home address or via the W0 bureau.

TNX & 73,
Rick W0IS

PS: Please reply to clem dot law at usa dot net. I don't check the deja account very often.

> best.

This may be true, but it's not a web site, and it's only updated every
six months, which means the US data is likely to be out-of-date, with
people changing their callsigns. It's especially embarassing to send
a QSL to a Silent Key address, because the callsign's been reassigned.
Although there's a waiting period before reassignment, apparently the
callsign may not be removed from the databases during that period.

I'd rather say the only way would be educating "so called experienced
DX-peditioners" where and how to operate !

I'm thinking, actually, of going to Heard Island for a while but I'm not
sure what tactics to employ. Maybe something like some recent south Pacific
operations with its web site and operating schedule but I guess I'll have
to split US amateurs by license classes.

How about this:

*** 23. Nov. 2001 2106 - 2214 UTC 14.026.95 - 14.029.32 USA - east
coast - general class - 100w - Kenwood equipment ONLY !!!

*** 24. Nov. 2001 1408 - 1511 UTC 21.102.55 - 21.105.91 Yugoslavia,
Serbia only (YU1) - C class - 100w - Yaesu equipment ONLY!!!

The QSL route will be announced in my will and to get QSL card you have to
supply verified photocopy of your transceiver purchase (to confirm you used
radio specified above) and your annual tax record from 1972 - 2000 to prove
you haven't bought any amplifier. You also need to supply your city council
confirmation that you haven't caused any TVI during 2001 which proves you
haven't used someone's else's linear ! ###

= conditions apply (I'll think of them later)

The only problem is an animal monster, what may I use on Heard Island ?
Penguins have been used on Macquarie so it would be to boring having another
penguinator ! Or Kevinator :-)

A-ha, there's a special, very rare, sort of a cold water shark, called
Terry. Terry the terrible, :-)) Terrynator ! :-)

See you on the air from the Heard Island, take a looooooong holiday and
listen... listen... listen .... even if I call you - you just listen...
listen ...

:-)))))))))))))))))))))

Apparently the pratt will only be qsl'ing via E-MAIL !

This clearly shows the vast heights of his intelligence, since the ARRL will NOT recognize e-qsl's for DXCC or any other award.

Neither will anyone else...!!!

And what about the folk who qso'd with him in good faith, and who don't have e-mail facilities ?

Always thought he was an idiot.

122. QUESTION: 18-foot wire vs. 20m Hamstick

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-14 17:42:34 UTC
From: jason_hsu@my-deja.com
Message-ID: <93soe9lsj1@nnrp1.deja.com>
Source record: 18226
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx

Why am I not having better luck with a wire antenna?

I enlisted the help of two local friends this morning to test the performance of a 20m Hamstick that I borrowed and an 18-foot wire (mostly straight).

I used the same counterpoise, tuner, and radials. Both antennas were outside. The Hamstick was on the patio of my first floor apartment, and the wire was draped along the wall a foot or two above the ground.

The hamstick had the radials clamped to the magmount. For the wire antenna, I ran coax to an SO-239 connector. I tied a 22-guage wire to the SO-239 (a bigger size didn't fit through the tiny hole in the inner conductor of the SO-239 on the side opposite to the coax. I used a wire connector from Home Depot to attach the 18-foot wire (14-guage) to the 22-guage wire. I clamped the radials to the PL-259 connector on the coax. I ran the wire antenna horizontally along the outer wall of the apartment building.

Based on my small sample, the two antennas are a dead heat. One friend (a few blocks away) found the Hamstick to be slightly better. The other (several miles away) found the Hamstick to be slightly better. I noticed both times that I could get a better match (and thus more power due to the power-limiting circuitry in the transceiver) for the 18-foot wire than for the Hamstick. The 18-foot wire had an SWR around 1.2 to 1.5 and power around 30-40 W. The Hamstick had an SWR around 2.0 to 2.5 and power only around 10 W.

Which antenna should have outperformed, the 8-foot Hamstick or the 18-foot wire? From what I have heard, the 18-foot wire should have trounced the Hamstick due to its sheer length and lower SWR (which allowed for MORE power output).

What gives? At 20m, why didn't the 18-foot wire antenna with HIGHER power and LOWER SWR trounce the 20m Hamstick with LOWER power and HIGHER SWR?

jason_hsu,
Considering the low height the wire was at, I'd say
the Ham stick should 'beat' it, even at a lower power
level. You should be able to tune/match the Ham stick
and get better performance than your getting. You might
also run the 'wire' vertically to see if it does better
than it is. (More radials should help too)
'Doc

Ohio/Penn DX Bulletin No. 494

The Ohio/Penn DX PacketCluster
DX Bulletin No. 494
BID: $OPDX.494
January 15, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1VV, KF2TI, W2DEC, WB2YQH/ WB2RAJ & The 59(9) DX Report, W3LEO, W3UR & The Daily DX, N4AA & QRZ DX, WB4PVT, WD4NGB, AC6V, K6IPV, K8YSE, KU9C, 9V1YC, CE6TBN, DL5EBE, DL7AFS, EA3AJI, EA5KB, G3XTT, JQ1SUO, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, SM0AGD, UU6JM, VE3EXY, VK3TZ, YS1RR and Arja Laine for the following DX information.

IMPORTANT NOTICE (Time for you to write to MSN.COM). Your editor was informed this week by our ISP provider that MSN.COM E-mails are being banned and will no longer be accepted on the "NSHORE.ORG" system. This is due to the large amount of "spam e-mail" that comes to "nshore.org" every day. This has grown to the extent of no longer being just an annoyance, but actually dangerous to the ISP systems. After much thought and discussion with other system administrators, that, because the ad-ministrators of "msn.com" are obviously unwilling to even talk (i.e., to even respond) to inquiries, to "nshore.org", my ISP is going to join several other ISPs from permitting any E-mail address that contains the domain name "msn.com" in it from coming onto his system. In other words, until such time as "msn.com" can guarantee them that significant measures are taken to prohibit the originating/mailing/relaying of this "spam email" from that corporation, users interested in any of the services provided by "nshore.org" are going to be required to acquire mailboxes on other systems (e.g., "hotmail.com" or "juno.com", etc.) What this means for subscribers and individuals who send info for the OPDX is that if your E-mail address ends in "msn.com", you will no longer be able to send email _to_ "nshore.org", but you will continue to receive email _from_ "nshore.org", such as the OPDX Bulletin. It is HIGHLY recommend if you need to send me any DX info from "msn.com", PLEASE send it to: kb8nw@arrl.net (until a change takes place). If you want to unsubscribe from the OPDX, you can send an unsubscribe message (with your msn address after the word unsubscribe) from another system or send me a message to the "ARRL.NET" address, and I will do

it manually..... 73 de Tedd KB8NW

3C1, EQUATORIAL GUINEA. Erik, SM0AGD, reports that he will be visiting Malabo, Equatorial Guinea, from January 23rd through February 5th. This will be on Bioco Island, IOTA AF-010. Eril was active from the same location in 1975 and 1989. His amateur radio licence has been granted and will be issued after his arrival. So, currently his callsign is not yet known. Erik is calling this an old-fashioned, small-scale DX-operation: Just one operator, low power and no directional antennas. He will be active on all HF bands, 160-10 meters using CW, SSB and RTTY, running only 100 watts into a vertical and wire antennas. High power is not allowed, but the location is good and should help somewhat. His QTH will be at the same old Hotel Bahia where he was staying in 1975 with a free view of the northern hemisphere over The Gulf of Guinea. Erik intends to spend some time in the CQWW 160m Contest on January 26-28th, and also in the BARTG RTTY Contest the same weekend. His friend Jan, SM5DJZ, has agreed to act as a pilot and will be able to QSP information in both directions. Jan's E-mail address is: djz@swipnet.se
This operation is sponsored by Northern California Dx Foundation. QSLs go to his home callsign SM0AGD.

3C0, BOUVET. Chuck, 3Y0C, was heard over the weekend mainly on 20 meters on 14260 kHz between 2345 and 0030z. However, there were a few on 75 meters on 3772 kHz around 0245z. During the past week, he was also heard on 17/15/12/10 meters. An update from the WD4NGB Web page states the following from the island: "Murphy has struck again at Bouvet. They had a avalanche there this week along with the other bad weather, that killed a lot of the seals. That put their already very busy schedule on overload. The other news is they have been informed that the ship will be back to pick them up earlier than planned. They were given the date of March 2nd as the latest pickup date, but it could be as much as 2 weeks earlier than this." For up-to-date info and a new set of pictures from the island, check out the Web page: http://www.qsl.net/wd4ngb/3y0.htm

3D, CONWAY REEF (Update). According to Raymundo, YS1RR, the planning for the Conway Reef DXpedition continues, and you can see the Conway Reef 2001 Licensee Authorization from the Government of Fiji on the Web Page at: http://www.kragujevac.co.yu/3d2/licence/licence.htm
He also mentions donations/contributions are NOT coming in for this operation. So far only 150 USD have been sent (from Korea only), none from Europe/Japan/USA.
Nenad, VE3EXY, reports that once the team including Raymundo, YS1RR, are on their way to Conway, the only contact will be by the radio, and the source of info will be at the following Web site:
http://www.magma.ca/~ve3exy
Currently the web page just repeats the info, and provides the link to YU site. This site will be more interesting during the DX operation.

4U, ITU HQ. Plently of activity from this one over the past week. There were operations on 80/30/20/17/15/12/10 meters CW/SSB. Keep an eye on the clusters for spots. QSL via CBA or the bureau.

4W, EAST TIMOR. 4W1CW and 4W1UN were heard active this past week. 4W1CW was heard on 24907 kHz and 4W1UN was heard on 10106 kHz, both between 0200-0230z.

9M6, EAST MALAYSIA (Also possibly V8). From a press release, Don/K6IPV and Dave/W6AQ, will operate from the Hillview Gardens Resort Club radio station, 9M6AAC, between February 10-22nd. Their personal callsigns will be 9M6IPT and 9M6AQT, respectively. This time frame covers the ARRL DX CW Contest. The duo will not know whether they will be blessed with a special contest callsign or not, but they will announce the callsign to be used before the contest. Also, since they have missed out on Spratley (9M0) for this trip, they are hoping that they may be able to get over to Brunei (V8) for two or three days maybe for contest operations from there instead of Hillview Gardens. QSL route/s are to be announced in due course. (The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.)

A5, BHUTAN. The whole Johnson family, Glenn/A52GJ, wife Vivien/A52VJ, son Mark/A52MJ, son Paul A52PJ and daughter Melissa/A52YL, was heard active this past week. Glen was heard active on 80/40/30/20 meters, mostly CW, but some SSB on 20 meters. Mark was active on 80/20/10 meters mostly SSB, but with some 80 meters CW. Paul was heard mainly on 20/10 meters SSB. Vivien and Melissa were active on 20 meters SSB.

A52A VIDEO IS HERE! James, 9V1YC, informs OPDX that the A52A Bhutan video is now ready! If you've ever wondered what Bhutan is really like from the inside, or how it feels to be behind an opening day pileup at the #2 most-wanted, then you might be interested in this one. By request, Jim threw in lots more SSB pileups this time, but also included plenty of scenery, people, music, and background info on this absolutely beautiful country. For those that enjoyed the videos from FO0AAA and ZL9CI, this latest addition should be a treat. (And you just might hear *your* QSO in there, too). The video is 60 minutes. Available on VHS (PAL or NTSC). All digitally filmed and edited, and mastered to Digital Betacam. For more information, go to the Web page at:
http://home.pacific.net.sg/~jamesb

AX, AUSTRALIA (Attention Prefix Hunters!). Tony, VK3TZ, reports that for those of you who missed the "AX" prefix during the Olympics games, it is customary for the Australia Communications Authority (ACA) to permit all Aussie amateurs to use the "AX" prefix on Australia Day - January 26th each year. If you chase WPX prefixes and need this one, there should be quite a few VKs using the AX prefix on that date. Tony adds, "When I can confirm details I will send the exact times, sometimes its the whole weekend, sometimes (last few years) just the 26th only."

CE0X, SAN AMBROSIO ISLAND (Update). Marco, CE6TBN, Team Leader for the CE0XT DXpedition to San Ambrosio Island during the second week in February, reports that the team will use the following suggested frequencies:
CW - 1827.5, 3504/3524, 7004/7024, 10104, 14024, 18074, 21024, 24894, 28004 and 50105 kHz
SSB - 3795, 7075, 14195, 18145, 21295, 24945, 28495 and 50120 kHz
RTTY - 7030, 14080, 18055, 21080, 24920 and 28080 kHz

FM - 29400 kHz
The 6 Meters Beacon will be on 50.105 MHz. It will repeat every
30-45 seconds. The team states that "they will probably listen on the
same frequency, using the squelch of the rig to cut the noise down. When
a signal break the squelch, that is a sign to get someone onto the 6
meter rig and begin making QSOs. We probably will run the beacon at 50
watts so that the rig doesn't get hot." A new team member was added.
Mike Mraz, N6MZ, will replace Mario, CE6NE. Mike has been active from
many locations, such as: 9M6OO (Spratly group) 1999, 9M6AAC 1999, BV0DX
1999, KH9/N6MZ 1998, ZK1XXP 1997, (Expedition of the Year at Dayton 1998)
VK0IR Heard Island 1997, (Expedition of the Year at Dayton 1997) TO0R
(FR5) 1997, FT5XL 1997, VR2WO 1997 and CQWW/CW SV5/N6MZ 1993. The following
pilot stations have been chosen for the CE0XT operation:
North America - Dr. Bill, K6GNX, - E-mail: bavery@telemetry.com
Japan - Yosi, JA3AAW - E-mail: ja3aaw@sannet.ne.jp
Europe - Still has not been chosen.
DXpedition Web page for updates and info is: http://www.qsl.net/ce0xt

CQ MAGAZINE INTRODUCES "The CQ Millennium Award".....
CQ magazine is introducing a special operating award for the year 2001
to mark the start of the new millennium. "The CQ Millennium Award"
recognizes anyone who meets the minimum requirements for any of CQ's four
permanent operating awards, minus the QSL cards, during calendar year 2001.
Hams and short wave listeners may qualify for "The CQ Millennium Award"
in one of the following four ways during the calendar year 2001 (0000z,
January 1, 2001 to 2359z, December 31, 2001):
1) Work stations in 500 U.S. counties -- The basic level for the
USA-CA Award
2) Work 100 countries -- The basic criterion for the CQ DX Award
3) Work one station in each of the 40 CQ zones -- The Worked All
Zones basic qualification.
4) Work either 400 prefixes mixed-mode or 300 prefixes single mode
(CW or SSB only), as required for the CQ WPX Award.
Applications should include log extracts showing the information required
by the standard award rules, in the format required by the standard award
rules, plus a 6 USD processing fee (12 USD outside the US).
ADDED NOTE: There will be special recognition for those who qualify on
the basis of more than one award program's requirements. Full details are
published on page 15 in the January, 2001, issue of CQ magazine. For rules
and forms go to the CQ website: http://www.cq-amateur-radio.com/

D6, COMOROS. Josep/EA3BT and Nuria/EA3WL became active from here on
Saturday, around 1530z, as D68BT and D68WL. However, information from
their pilot station state that upon the duo's arrival, it was raining
cats and dogs and they only could build the 3 element beam for 10-15-20
meters and had only 1 station active running only 100 watts. By the time
you read this, they hope to build the 40-80 and 6 meters antennas and
have the second station active. Their suggested frequencies are:

CW - 10103 and 14025 kHz
RTTY - 14083 and 21083 kHz

SSB - 3795, 7052, 14195, 18145, 21195/21295, 24945, 28495 and 50110 kHz

In order to receive feedback from the DX community, the following pilot stations have been selected. You can get in touch with each pilot of your area/zone:
Europe and Central/South America:
Pere Galimany, EA3AJI - E-mail address: pilot_d68@ea3aji.com
North America:
Dr. Bill Avery, K6GNX - E-mail address: k6gnx@telemetry.com
Japan, Asia & Oceania:
Yuki Deguchi, JI6KVR - E-mail address: ji6kvr@orange.ocn.ne.jp
Periodically information will be sent through the main DX reflectors. Remember that the logs will be posted daily, along with additional information and pictures posted by Xavier, EA3BHK, at the following web page: http://www.qsl.net/ea3bt

D68C, COMOROS DXPEDITION. Don, G3XTT, from the "Five Star DXers Association", has sent out another huge press release (Bulletin #4) stating the forthcoming D68C DXpedition to the Comoros (active from about 8th to 28th February) is less than four weeks to go! This press release brings you the latest news, including some information about the technical innovations they will be using on the trip, and news of a series of awards for working D68C. So, their suggested operating frequencies:
CW - 1822, 3502, 7002, 10102, 14022, 18072, 21022, 24892, 28022, 50102
SSB - 1842, 3795, 7052, 14195, 18145, 21295, 24295, 28495, 50145
RTTY - 3570, 7035, 14085, 21085, 28075
PSK31 - 14071, 21071, 28071 kHz
Also - 28MHz FM: 29580; 6m beacon 50.090. Also remember that they will be working the main satellites. The D68C Web Page continues to be updated with the latest news. To remind everyone, the URL is:
http://www.dxbands.com/comoros
The complete press release will be sent to all OPDX InterNet Subscribers as an addtional bulletin.

DX HOLIDAY WEB SITE (The Ultimate Dxpediton Resource!). The following Web site offers a starting point for people looking for a QTH for a DXpedition, Contest Expedition, or IOTA Expedition!. The site lists Rena-a-QTH, Ham Friendly Villas, Radio Clubs, etc. There is information on places to operate from over 100 countries, with additional DXpedition resource information covering: Picking your DX destination, licensing, travel documentation and money matters, health, emergency , weather issues, announcing your DXpedition, equipment packing tips and many other topics. Check it out at: http://pages.prodigy.net/k2kw/qthlist/

EZ21, TURKMENISTAN (Attention Prefix Hunters!). Start looking for amateurs in this country to use the special prefix EZ21 to commemorate the new Millennium. EZ21BO was spotted on 10112 kHz around 2100z and EZ21A around 14242 and 14266 kHz after 0230z.

IOTA NEWS.....
AS-117. Look for JA2HMD/2, JA2JTN/2, 7N2JZT/2 and JQ1SUO/2 from Hatushima Island between February 10th and 12th. Activity

will be 160-10 meters CW/SSB. QSL via home call or CBA.

EU-180. Look for club station UU4JXM to be active from Kosa Tuzla Island during the CQWW 160 Meter CW Contest as UU7J/P. The team leader of the expedition, Andy, UU6JM, will arrive from Kerch on January 23rd and will be active as UU4JXM/P. Activity will be mostly during the evening time on 160-20 meters CW and SSB. Andy has indicated that weather conditions don't permit operations on 15-10 meters. Antennas will be a Delta Loop, GP and Beverages. Operators UU0JM, UU4JMG, UU8JK and maybe UU2JQ will join Andy/UU6JM on January 26th. The QSL Manager will be UU8JK: Alex Kotovskij, p.o.box 57, 98312 Kerch, Ukraine. Please note: UU6JF is not the QSL Manager for UU4JXM/UU7J.

J2, DJIBOUTI. "The 59(9) DX Report" reports to look for David, F5THR (ex-6W1AE, TL8CD), to be active from here as J28EX until January 2002. Activity will be on 160-10 meters. He is going to have a 4 element beam up for 6 meters. QSL via FB1BON: Patrick Brochet, P.O. Box 522, 85305 Challans CX, France.

KH9, WAKE ISLAND (also V7). Look for Bruce, AC4G, to be active as AC4G/KH9 from here February 9-27th. Activity will be on all bands with an attempt on 6 meters if he can get an antenna up in time. Reportedly, Bruce already has antennas on the island and will be using a Yaesu FT-847 for SSB and CW. He will be working on the island and will operate only during his spare time. He has plans to participate in the ARRL CW DX Contest and the CQ WW SSB 160 Contest. QSL via AC4G: Bruce Smith, 1056 Old Railroad Bed Road, Taft, TN 38488.

KH0, MARIANA ISLANDS. Look for JQ1NGT and JI1EFP to be active as KH0/JI1EFP and KH0/JQ1NGT from Saipan between February 16-19th. Activity will be on 160-6 meters on CW and SSB. The two operators plan to participate in the ARRL CW DX Contest either as Single Op or as a Multi-Single entry. QSL via JQ1NGT: Kenji Sekine, 3-4-7 Honcyo, Fukiage,369-0115 JAPAN.

OH0, ALAND ISLANDS. The Aland Islands contest station OH0Z will be active on both modes in the ARRL DX Contest as a single-op/all bands entry. Pasi, OH1MM, will operate the station on CW and Ari, OH1EH, on SSB. QSLs via OH1EH: Ari Korhonen, Kreetalank. 9 A 1, FIN29200 Harjavalta, Finland. For more info on the OH0Z station, check the Web page: http://www.qsl.net/oh0z

QSL INFO AND NEWS.....
Steve, KU9C, reports that QSL cards for the 4W/K7BV and 4W/N6FF East Timor operation are expected to be in his hands by February 1st, and will begin hitting the mail box immediately. Steve states, "I expect to have most of them out within a few weeks, and all received by the end of February should be in the mail by March 1st. If you didn't apply enough postage due to the recent US postage rate change, do not worry....I will put the required stamps on the envelope to make sure they don't get held up in the mail process. The card is a full color

one...and I hope you enjoy it.....It's a beautiful picture of the QTH at sunset......so you can see what Dick/Dennis had to look at before working you on the low bands that evening!"

A61AJ QSLs. Bernie, W3UR, DX Editor and QSL Manager, reports the following: "Recently I have had many requests as to what the situation is on the A61AJ QSL cards. I am currently waiting for Ali to order new photo QSL cards. All direct (3,098) and bureau (13, 109) requests have been entered into the computer logs. Once Ali orders the QSLs and I receive them from the printer they will be quickly sent out. Please be patient during this transition time. By the way I am unable to except e-qsls or e-qsl bureau requests. For those who have not done so already please QSL to: A61AJ, c/o Bernie McClenny, W3UR, 3025 Hobbs Road, Glenwood, MD 21738 USA. Please do not send second requests as this just slows the whole process down."

Bernd, DL2DXA, reports that he has received more then 400 direct requests for both DL2DXA/HI9 and DL2DXA/CT3. He states that he has received the QSL cards from the printer, and you should be seeing cards in the mail soon.

Pepe, EA5KB, informs OPDX that he is the QSL Manager for the following stations: TG9AAK, TG9AMD, CO8EJ, CO2FN, CO3JR and CM6QN. He has all the logs. Please QSL to him via the Bureau of Spain or direct to his CBA.

QSLs for YJ0AYL/AZG and A35YL/ZG. Babs, DL7AFS, reports to expect your direct QSLs within the next 2 weeks. More then 2500 oversea and 1500 European requests were sent and include 1 of 4 full colored QSLs. QSL cards will be answered as they come in now. Babs mentions that they have kept nearly 250 requests in a cardboard box that were without postage, or had only 1 USD return postage for oversea mail. Babs states, "Remember please, the oversea postage is 1.60 USD or 3DM or an IRC. We will be waiting 3 months or so to send these QSL cards via bureau. European postage is 1.10 DM or 1 IRC." ADDED NOTE: Babs, DL7AFS, is still QSL Manager for the following past operations: C50YL, C53HP, S79YL, S79ZG, S79FAG, EA6/DL7AFS and EA6/DJ7ZG.

R1, ANTARCTICA. Look for Nick, UA3YH, to be active as R1ANM from the Amundsen-Scott Base starting on/around January 15th through February 15th. R1ANW, Mirny: the operator after Wally's departure will be Slava Vasilkov. Slava worked as RX1OX/FJL from Franz-Joseph-Land before. He is a good CW operator. QSL should be via DL6YET.

SPECIAL EVENT. Bob "Whitey" Doherty, K1VV, President of the Marconi Radio Club, W1AA, informs OPDX that the Marconi Radio Club will celebrate the 98th Anniversary of Guglielmo Marconi's First Transatlantic Radio Trans-mission between Cape Cod Massachusetts and England. The Marconi Radio Club will operate from Cape Cod using the call sign W1AA/CC. "CC" was Marconi's first call sign for his transatlantic Cape Cod Station long before the existence of the FCC and issuing of call signs. The Marconi Radio Club will operate two High Frequency amateur radio stations on CW and Phone

and one on 2 meter FM. Hours of planned operation are from 1200z through 2200z, January 18, 2001 on the 20 through 10 meter bands. DX stations QSL via the W1 Bureau and W/K stations to the W1AA Callbook address with an S.A.S.E. Operation will be from a former Coast Guard Life Boat Station close to the original 1903 Marconi Transatlantic Radio Station site within the National Sea Shore Park, as almost all of the original 1903 Marconi station site has been carried away by beach erosion. Look at the W1AA web page for photos of the site and additional information at:
http://personal.tmlp.com/k1vv/w1aa/event2001.html

SPECIAL EVENT. Look for special event station "W3I" to be active from Mount Airy, MD (30 miles North of Washington, DC), on January 20, 2001 (1400-2400z). Activity is to celebrate the 54th U.S. Presidential Inauguration. Suggested frequencies are [+/-]: 7.240, 14.240, 21.320, 28.420, 50.140 and 144.140 MHz. For QSL card, send your QSL and SASE to: MADRAS, P.O. Box 2468, Wheaton, MD 20902 or via bureau to W3LEO.

SPECIAL EVENT. Be looking for the "Challenger Middle School ARC", KI6YG, in San Diego, CA, to be active January 28th, from 1430-2400z. This activity is to commemorating the 15th anniversary of the Space Shuttle Challenger Tragedy. Suggested frequencies are: 14.250, 21.350, 28.350, 146.52 MHz. QSL to: Challenger Middle School ARC, 10810 Parkdale Ave, San Diego, CA, 92126.

V7, MARSHALL ISLAND. Bruce, AC4G, will be active from Kwajalein Island as V73CW before going to Wake Island (see KH9 above). This will be during the last week of January. Activity should be on all bands. QSL via AC4G: Bruce Smith, 1056 Old Railroad Bed Road, Taft, TN 38488.

VU, INDIA. According to Jose, VU2JOS, the VU stations can operate on 30 meters until 1830z January 31, 2001. OPDX found the following stations active on 30 meters:
VU2BGS - 10105 kHz at 1245z and after 0200z.
VU2JOS - between 10105-10110 kHz as early as 2200z and as late as 0200z.
VU2TS - 10104 kHz at 1230z.

YV, VENEZUELA. Rick, W0IS, will be going on a mini-DXpedition here at the end of the month. Look for activity from Caracas beginning late Friday evening, January 26th. He will travel on Saturday for one day and expects to be active for one night from Los Roques (SA-035). Look for him to be on the air Sunday, January 28th, probably around 0400-1000z. Activity will probably be somewhere near 7040 CW or 7075 SSB. Feel free to call him on CW even if he is on SSB, and he states that he will be glad to switch over to CW to give you a report. He will just be using a dipole. He believes his callsign will be YV5/W0IS, although he is not positive on the number. Please QSL to his home address or via the W0 bureau.

Good advice as I too get pretty good results this way. I have two dipoles
90 degrees apart from each other as viewed from above. One is a W9INN
5-band trapped dipole and the other a homebrew 17M dipole. They are both fed
with a common RG-8x feedline through a W2AU balun.
Great performance on the 6 resonant antennas and only a 3:1 match on 12M so
with this combo also work 12M giving me a 7-band setup.

I have a link to W9INN antenna info on the Ham Radio Links page of my site.
281 DXCC countries on this setup and counting!!

While most any length wire dipole can be externally tuned to get one on-the-air a non-resonant wire antenna such as that suffers in that it has a random radiation pattern. I submit that a resonant dipole with all other factors being equal will outperform it's random length counterpart broadside to the antenna. Also with resonant antennas it is usually no-tuner or rig internal-tuner compatible. Much easier than twisting knobs on an outboard antenna tuner and referring to a cheat sheet whenever one changes bands.

>Why am I not having better luck with a wire antenna?
>

If I understand your description correctly, the wire was horizontal.
I'll assume the hamstick was vertical. And the test was done with
'local' guys, ground wave. For ground wave signals to be best,
both antennas have to be the same polarity - either vertical or
horizontal. If your friends antenna is horizontal, and yours is
vertical, there's about 20db of loss from the difference.

If both of your friends are using vertical antennas, the hamstick
should be better at both locations.

Do the same test with somebody far away so that antenna
polarity doesn't matter and you might see different results.

Not to mention that 2 feet above the ground bolted to a wall
isn't exactly what would normally be considered a good location
for an antenna......

I presume Europeans; Americans and Japanes do not want to support a
dxpedition that operates outside the license rules.

Abubaker's normal call is 5A1A. Every year, on the anniversary of the Libyan revolution, he uses a special call where the last 2 numbers are the anniversary of the Revolution.

By the way, contrary to what some may say, Abubaker is a good QSLer if you follow his instructions, and have some patience. I even received a QSL from him once for one of the "anniversary" operations where I did not even send a card first.

I'm delighted to hear it, but I should tell you that the only details given out
on this side of the Atlantic - from VK0MM himself apparently, and published
on various DX News sources - was that ONLY e-mail qsls would be issued.
He also stated that if the ARRL wouldn't recognise them then that was their
problem, not his !

Where did you get your information ??

Dave:

The following link to the VK0MM web site indicates that QSL cards
(direct) will start to be available in late January (no mail address
yet posted) and that excess money sent will be donated to Australian
charity. No buro cards will be answered.

http://www.geocities.com/vk0ld/QSLVK0MM.html

I take this to mean paper QSL cards will be issued in response to
direct paper QSL cards submitted with greenstamps.

AX0LD cards are available from CWSP in Brazil. If the
Brazilian post office doesn't steal your incoming donation.

VK0LD cards are not available, and will never be available,
unless you want an eQSL. Which makes totally no sense,
because if you followed his wishes (didn't work VK0MM
because you already worked VK0LD), you are never going
to get a card.

VK0MM route is supposed to be announced in January,
but if we know Alan, he's not done making you jump
thru the hoop yet......

http://www.geocities.com/vk0ld/qslinfoX.html

Please pass this information around. Some of us are getting
tired of hearing people ask.... He had you monkeys by the
nuts the whole time he was down there, now he continues
to squeeze your nuts. Isn't DXCC just SO much fun ???

You probably won't get any cards in your hand, as he has made it very
clear that you are taken out of the logs if you make more than 2 QSOs.
I seriously doubt that you have worked him on 5 bands, since as far as
I recall he only operated on 17, 20 and 30 meters. But I'm prepared
to be corrected.

Source record: 18060
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.homebrew

Dear fellow hams

A couple of weeks ago, there was an item on this newsgroup about someone looking for a voicekeyer. I then said I was thinking of a design for using the PC's soundcard and printerport (LPT) to implement a voicekeyer.

Several OM asked me to publish all this as freeware, so apparently there was some minor interest in this small homebrew project.
Well, it's done and if anyone thinks he can use it, feel free to download it. I designed the hardware for my TS-850, so using it on other rigs means you have to do some research yourself.

I think the hard- and software speak for themselves, you should, however, have your own software to record wav-files.

I'll try to answer all questions. Let me know what you think of it, and if I should change or add some functionalities.

Read all about it in the homebrewsection of my page:

Cool!

I did a Deja News search for my call, and discovered that I made it into a DX bulletin!

Unfortunately, since posting this information, my travel plans have changed a bit, and I won't be on the air from Los Roques. But I should be on the air from Caracas Friday, Saturday, and Sunday, the same approximate times (late night or early morning local time, which is UTC-4)

73,
Rick W0IS

Hi,

If you would like to connect to the UK (and world) packet cluster network
you can telnet to:-

gb7ujs.shacknet.nu 7373 (for port 7373)

or if you prefer the IP numbers

212.56.64.198:7373

There si also a neat java telnet application on my website that will allow
you to connect directly within MicroSoft Internet Explorer.

Check out my website for some stuff for sale also.

73 and enjoy de Bob G4UJS

It's quite possible I worked a slim of course, VK0MM was pirated numerous
times - have to wait and see what appears.
As to the other point, you were taken out of the log if you worked him more
than once on the *same band and mode*.

Unless he changed his mind on that as well... !!

1. SWR doesn't tell you anything about an antenna's performance. All it tells you is how close the feedpoint impedance of the antenna is to the rig coupled to it. And since you're using a tuner, what you're measuring is simply the match between the tuner and the rig.

2. Neither one of these antennas has an ideal isotropic radiation pattern, and the proximity to the house didn't help much either. No doubt neither antenna was performing in an ideal manner. But the hamstick comes a lot closer to having a useful and predictable radiation pattern.

That doesn't necessarily mean it works on all platforms. If it uses the
Microsoft "dialect" it won't work on other platforms -as in this case.

Jason,

First of all making measurements of a 20 meter antenna over a path length of a 'few blocks' means you are really measuring the near field radiation, not what you want.

Now about your questions. Your Hamstick is a full quarter wavelength on 20 meters compressed to 8 feet by winding the wire around a fiberglass pole. You attached radials to the mag mount base. The wire is a half wavelength on 20 meters. End feeding it means you have a high impedance for the feed point! Your tuner was fortunate enough to resolve the situation!

Connecting wires using wire nuts is iffy at best. What you want and need for antenna work is good solid connections, low resistance connections. The resistance added by your connections shows up in the SWR, That is probably why you saw a 2.5:1 SWR for the hamstick.

To properly compare antennas at HF you should have a way to switch between the antennas very quickly. Get them both tuned properly, and make a contact. Ask the other ham if he will mind listening when you change antennas. Do this several times over long path lengths, and you will have a better answer.

I'd like to add a slightly different opinion.

A few blocks away is well into the far field. From a simple antenna like a dipole or Hamstick, the far field begins at well under a wavelength (20 meters in this case) from the antenna.

I've used wire nuts for many years to connect antenna wires, both inside and outside. If they didn't provide a low resistance connection, your house would catch fire, since they're widely used in house wiring.

Finally, I agree with the advice to switch rapidly back and forth between antennas. But instead of relying on reports from other stations, simply compare the antennas when listening. There are a number of good reasons for this. One is that you don't have any idea what size the other station's "S-Units" are. They might be anywhere from 2 to 6 dB -- a big difference. Another reason is that signals can fade from one antenna to the other, giving one an advantage at one moment, while the other will look better a couple of minutes later. By listening, you can average out these changes. And you can also do a lot more comparisons from a lot more directions, since an observation takes less time than a QSO. By listening, you can compare antennas on signals from stations you're not able to work. With a simple step attenuator, you can make decent quantitative comparisons in dB if you're so inclined -- or you can calibrate your S meter for the same purpose.

You'll probably find one antenna to be better in some directions and at some distances and the other better at the others. If one is better in all directions and at all angles, it's probably poorly matched or there's some source of loss in the system.

: rig coupled to it. And since you're using a tuner, what you're measuring
: is simply the match between the tuner and the rig.

Not true. All it tells you is the ratio of the feepoint impedance of the
antenna to that of the characteristic impedance of the transmission line.

If using a tuner, and the meter is between the rig and the tuner, then
the SWR only tell you how well the tuner matches the transmission line.

The match of the rig to the transmission line is immaterial.

To add just one more snippet of info - the radiation and near fields are of equal intensity at 1/(2*Pi) or about 1/6th of a wavelength from the radiator.

At a distance of 5 wavelengths from the radiator the near field is about 30 dB weaker than the radiation field and can be ignored.

Of course not. But the discussion was about VSWR, not about coupling power
into the coax.

I worked this station in 1994 and received a QSL. He never submitted
documentation to the DXCC desk, so the QSL did not count.

I do not know his current status, but I doubt he is able to get an
official license from YA.

That's what we do over here in the DX newsgroup, we couple
LOTS of power into the coax.....

Just getting back on the air. Want to send QSLs to QSL Managers with self addressed return envelope. How do you figure return postage. As an example, a QSL to Germany seems to cost 80 cents US but don't know how much US postage to place on a return envelope. Or can I use US postage on a return envelope from Germany?
Thanks
WA6OGO

SB DX @ WW < KB8NW $OPDX.495
Ohio/Penn DX Bulletin No. 495

The Ohio/Penn DX PacketCluster
DX Bulletin No. 495
BID: $OPDX.495
January 22, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters, AA1M, AD1C, KF2TI, N2WB, WB2YQH/WB2RAJ & The 599 DX Report, W3UR & The Daily DX, K4HB, K4WLS, N4AA & QRZ DX, WD4NGB, K8GG, K8YSE, N8BJQ, KU9C, W9VA, W0IS, CE6TBN, DL2VFR, DL3APO, DL5AXX, DL5EBE, DL9NEI, F5CWU, F5NOD, GW0ANA, HB9PL, OE3MZC, OM3LZ, UA2FM, VE3EXY, VK3TZ and ARRL Letter for the following DX information.

3D2, CONWAY REEF (Update/Change). Hrane, YT1AD, reported that the 2001 Conway Reef DXpedition will start a day earlier than planned. The team will go via Hong Kong instead of Kuala Lumpur, and the DXpedition will start on February 18th at 08:00 local time, or on February 17 at 2100z.

3G0, EASTER ISLAND. Norbert, DL9NEI, informs OPDX that a joint Chilean and German DXPedition will activate Easter Island between March 4-19th. Operations will be on all HF Bands mostly on CW/RTTY, on lower bands and the WARC bands. The callsign used will be 3G0Y. Look for the latest information still under development, that is happening now and during the operation on the following Web site coming soon at: http://www.qsl.net/3g0y QSL via DK7YY.

3Y, BOUVET. Chuck, 3Y0C, continues to be active in spite of the problems that keep developing. As this bulletin was being prepared Sunday morning, a short review of updates from the WD8NGB Web page reports that another big storm hit the island January 18th and snapped the antenna mast and smashed the beam. Chuck has managed to repair the beam and erect it on the shortened mast, but will try to get the beam higher in to the air. Chuck tried to take the photographs from the roof of the shack, but the wind speed is so high that he cannot stand upright on the roof. He will try again when the weather improves. The generator's engine continues to cause problems. The engine is not designed for extreme weather conditions and has allowed the crankshaft bearing seals to freeze and loose their sealing ability. The lubricating oil leaks past the seal and slowly drains. The leaking oil has to be captured, strained and returned to the engine. About 95% of

the oil is being recovered, however, they took enough oil for maintenance functions, not for leaks. Because of leaking, battery charging is thus extended from 2 hours to 4 hours at a time. Another problem is also reported by Chuck. It is now very unfortunate that his solid-state linear amplifier has failed, and he has been unable to find out the reason of the failure. Now for good news. The time set aside to listen for Asia and Oceania has paid off. Chuck on Saturday, around 0600z on 20 meters, worked many JAs and VKs. He will try this for the next few days, and these areas are to look for Chuck starting 0600z on 18130, 21295, 28495 and 14195 kHz. Also, it was mentioned that some RTTY operations will begin next week. For the complete/unedited up-to-date information mentioned above, check out the Web page: http://www.qsl.net/wd4ngb/3y0.htm

8Q, MALDIVES. Mike/OE3MZC and his wife Barbara/OE3YCB will be active from here February 7-21st, as 8Q7MZ and 8Q7BZ, respectively. Mike tells OPDX that they will be active from the Island of Kuredu during the first week and the Island of Velavaru during the second week. Activity will be on all HF bands, mainly around the IOTA frequencies on SSB. There will also be 6m, SSTV and PSK31. Mike informs us that this will be a holiday DXpedition, so please allow them some time for snorkeling as well as traveling from one island to another. For the latest news, check their Web site at: http://www.qsl.net/oe3mzc/

A4, OMAN. During an installation and commissioning of trunking communic-ations system in Oman by two Slovakian radio operators, Stefan/OM3RG and Miro/OM3LZ, will be active from the desert. This is thanks through the help of A41LZ, the Omani Amateur Radio Society which permitted their operation. Activity is now through January 25th (or 27th). Suggested frequencies are:
CW - 3535, 7015, 14035, 18080, 21035, 24900 and 28035 kHz
SSB - 3790, 7080, 14250, 18150, 21250, 24950 and 28550 kHz
They will use one TCVR with linear PA and vertical/wire antenas mostly during the evening hours. QSL direct to OM3LZ.

A52A BHUTAN VIDEO REVIEW (by KB8NW). James, 9V1YC, has done it again! I have just viewed the A52A video over the past weekend and I would have to say James has made another "**** Four Star Video". This high quality enlightening and educational video is a must for DXers. In James' video (as in all his videos) he mixes the sites and sounds of Bhutan which are breathtaking. OH YEA, the bus trip to the Pine Wood Hotel was great! Strap on your seat belts FOLKS! I personallly would like to thank James for the ride and view of Bhutan. For more information or to order a copy of this video, go to the Web page at:
http://home.pacific.net.sg/~jamesb

AX, AUSTRALIA (Update.... Attention Prefix Hunters!). Tony, VK3TZ, reported last week in OPDX.494 that the "AX" prefix will be aired once again by all Aussie amateurs on Australia Day - January 26th. The following times for the use of the AX prefix are for the 24 hours commencing 0000 hours local time for each state:
VK1/VK2/VK3/VK7 1300z January 25th to 1300z January 26th

VK4 1400z January 25th to 1400z Janaury 26th
VK5 1330z Janaury 25th to 1330z Janaury 26th
VK6 1600z Janaury 25th to 1600z Janaury 26th
VK8 1430z Janaury 25th to 1430z Janaury 26th
VK9N/W/X/Y/VK0 Various, since time zones are varied.

CE0Z, SAN AMBROSIO ISLAND (Update/Change). Marco, CE6TBN, Team Leader for the DXpedition to San Ambrosio Island during the second week in February, reports that "in an unusual determination the SUBTEL (Sub Secretaria de Telecomunicaciones) has changed the prefix to CE0ZT (from CE0XT)...." This due to a new Chilean rule stating San Felix and Juan Fernandez's prefix is now CE0Z.

D6, COMOROS. Josep/EA3BT/D68BT and Nuria/EA3WL/D68WL continue to be very active on all bands until January 28th. Due to a bad Internet connection, the logs will be posted every 2 days instead of every day. If you want to see new pictures and logs from the DXpedition, look every day at the following URL address on the Web sites:
http://www.qsl.net/ea3bt/Comoros-Picture_of_day.htm
http://www.qsl.net/ea3bt/index2.htm

DAYTON HAMVENTION 2001 DX DINNER. The Southwest Ohio DX Association is pleased to announce the Sixteenth Annual DX Dinner to be held on Friday, May 18th, 2001 at the Crowne Plaza Hotel, Dayton, OH. There will be a cash bar at 6:30 PM and dinner at 7:15 PM. Tickets are 32.00 (USD) and must be purchased in advance. Groups wishing to sit together must order as a group. A table seats eight. Please make your check or money order payable to SWODXA and send an SASE for ticket return. Seats will be assigned in the order that requests are received. Seats will be assigned on 11th March 2001. Seating is limited. Please order tickets from: Steve Bolia, N8BJQ, 7354 Thackery Rd, Springfield OH 45502. For information on the dinner, check the Web page: http://members.aol.com/SteveB4622/
Or contact Steve Bolia, N8BJQ at (937) 788-2803 or via his E-mail address at: n8bjq@erinet.com

DX MAGAZINE'S 100 MOST WANTED! Carl, N4AA, Editor of QRZ DX, reports that the results of "The DX Magazine's 100 Most Wanted Survey" for the year 2000 have been posted to the Web site (under "DX News") at:
http://www.dxpub.com
A complete breakdown by continent and USA time zone is included in the January/February issue of The DX Magazine. As it stands, the top ten are:
1 - P5, North Korea 6 - KH5K, Kingman Reef
2 - VU4, Andaman 7 - YA, Afghanistan
3 - BS7, Scarborough Reef 8 - VP8/SS, South Sandwich Island
4 - 3Y/B, Bouvet 9 - 3Y/P, Peter I Island
5 - VU7, Lakshadweep 10 - 7O, Yemen

DXCC NEWS. Submittals for the ARRL DXCC Honor Roll are due March 31, 2001. For more information, contact ARRL DXCC Manager Bill Moore, NC1L, via E-mail at: bmoore@arrl.org

FO/FO0/M, FRENCH POLYNESIA AND MARQUESAS ISLANDS (Update). Peter, DL3APO, informs OPDX that the callsigns for the upcoming FO and FO0/M DXpedition are now approved, and the German team will be using the CEPT license FO/homecall. So, look for FO/DL1AWI, FO/DL5XU and FO/DL3APO to be aired January 27th through February 28th (Please refer OPDX.491 -- Oh, remember to wish Peter a happy birthday on FO). The group has received a 2nd antenna in addition to the LP 5 from TITANEX - the V 160E vertical with tuning unit for the lower bands. They will also have two linear amplifiers with them. "The preparation is going well", states Peter and Wil, DJ7AA, will be their pilotstation. For more info, check Web page: http://www.radioklub.de/cgcg

FS & PJ8, ST. MARTIN and ST. MAARTEN. Bob/AA1M, Jim/W1HL and Mike/W1USN will be operating from both French and Dutch sides of this island. Look for them to sign PJ8/homecall and FS/homecall from February 27th through March 6th. QSL AA1M and W1HL via AA1M CBA or bureau. QSL W1USN to CBA or bureau.

GERMAN ISLAND AWARD/GERMAN IOTA. Ric, DL2VFR, informs OPDX that information on German IOTAs and the "Most Wanted German Islands" can be found in the weekly IOTA activity news on the Web page: http://www.iota-post.com The "Most Wanted German Islands" is based on applications for the "German Island Award" (tnx DL2MX/DL5RFF) and was based on the checkpoints for DL, HB, OE, I, IT9, IS0, T7, W4, W5 and, W6 (tnx DK1RV, I1JQJ, W9DC). The "German Island Award" links are available in German, English, French, Italian and Danish language.

IOTA NEWS.....
OC-136. Tony, VK3TZ, will be travelling to Phillip Island for a few days and will try to be active when he can during this trip. His suggested operating times are from about 0900-1200z and 2100-2200z, on the IOTA frequencies 14260 and 21260 kHz. This will only be a 3 day trip on January 24-27th. Tony states that this is not a radio orientated trip, so do not expect too much operating time nor a good signal. Operation will only be 100 watts into a dipole or vertical. He mentions that he may try to log into the Southern Cross DX net (on 14226.5) in the evening (0900z) and the 14226.5 net during his mornings LP about 2000-2100z.

KP2/NP2, U.S. VIRGIN ISLANDS. Look for the "Battle Creek Georges", W8UVZ and K8GG, to be operating from St. Croix for the CQWW 160M CW Contest. They will be active from January 24-30th. Before and after the contest they will use the callsign KP2/K8GG with an emphasis on the lower and WARC bands. During the contest they will use the callsign NP2S. QSL NP2S contacts direct to Martha Golden, NP2S, POB 1276, Kingshill, Saint Criox, VI 00851 USA. QSL KP2/K8GG via K8GG.

MD, ISLE OF MAN. Operators DL4ALB, DL4LQM, DL4WG, DL5AXX, DL5LYM and DL8WAA will once again be active from the Isle of Man, February 12-19th. They will be a Multi-Two entry in the ARRL DX CW Contest. Before the contest they will be active on 160-10 meters including the WARC bands, mainly on CW with some SSB and RTTY. Callsigns will be MD/homecall. QSLs

goes to the operator's homecall. QSLs for the February 2000 operation of MD/DL3OI has to be directed now to DL5AXX (via eMail-request, bureau or CBA).

PIRATE STATIONS REPORTED. There have been several pirate stations active over the last few weeks. Most noteable P25BH, VP8SSI and YA/RW6AC. Also, there has been reports of pirate operators using the callsign 3Y0C on CW and on 50 MHz. Also, OPDX was duped last week in reporting that 4W1CW and 4W1UN were active. They too are pirates.

PY0S, ST. Peter AND ST. PAUL ROCKS (Update). Bill, W9VA, reports, "Plans are moving ahead on schedule for the DXpedtion to PY0S in early February, 2001. All government permissions to operate from the Rocks are in hand, and the callsign PW0S has been issued. The team will leave Recife, Brazil, on February 2nd, arriving on the Rocks on February 7th, intending to operate for five or six days. This is a long open ocean trip and dates may vary. The operating team is led by Jim Faria, PY7XC, who previously operated from the Rocks in 1978 as PW0PP. Other operators are Fred/PY7ZZ and Ciro/ PY7ZY. All have previously operated from Fernando de Noronha and various Brazilian IOTA islands. Operation will be on 160 through 6 meters, CW and SSB, possibly RTTY. Steve, KU9C, has joined the team as QSL Manager. Financial support from clubs and individuals is most welcome."
Contact Bill, W9VA/PY0ZFO, for more information at: w9va@aol.com

QSL INFO AND NEWS.....
IMPORTANT NOTICE! Victor, UA2FM, informs OPDX that due to the new Russian Post Rules (Item "d", Para.123):
"123. The mail will be returned if:
d. If the NAME of adressee who is the subscriber of the P.O.Box, is not shown or if shown wrong."
These Rules are in force starting 1 January 2001. Victor states, "So please put name first, not the call, if you write to any Russian ham. As for RW2F@RK2FWA or UA2FM, please put neither call, nor "UA2 Contest Club", nor "Petrovo Radio Club" but Victor Loginov, P.O.Box 73, Kaliningrad, 236000, Russia. In case you send us QSL direct, please keep in mind that our postmen love 'green stamps', they have little knowledge about what IRCs are, but can destroy your letter with IRC as well. So we earnestly recommend you to send RK2FWA@RW2F cards via DK4VW instead."

HOW MUCH DO I SEND? Hal, K4HB, informs OPDX that he has put together a list of countries which require more than 1 US Dollar for return postage to the U.S. and Europe. For those who send DX stamps, Hal has a list of countries that had a postage hike during January. He also has information about Russia's dramatic increase in postage rates. Hal states that he doesn't get his information from individual's in the DX countries. Instead, he compiles the information from government and other reliable sites, also he uses input from "Bill Plum's Airmail and DX Supplies". Hal doesn't claim to be 100% accurate, and he states this on his Web page, but he believes the information on his Web page is as close as it gets. The URL address is: http://www.k4hb.com

Click on "Foreign Postage Rates" near the top. Hal's site is also linked from "Rod's Super Site" at: http://www.ac6v.com/irc.htm

QSL Cards are still at the printers for the "Flordia DXpedition Group's (FDXPG)" 2000 Guadeloupe DXpedition (October 24-31st, 2000). CARDS WILL BE MAILED AS SOON AS THEY ARRIVE FROM PRINTERS. William, N2WB, reports that it is a very nice Multi-Photo, Multi-Color QSL card. The QSL information is as follows:
FG/N2WB via direct to N2OO FG/W9AAZ via CBA
FG/W4WX via CBA FG/KR4DA via CBA
All QSL for FG5BG (for the CQWW SSB CONTEST 2000) "ONLY" go via Bob, KR4DA)

Gil, F5NOD, reports that around 8000 FR/F6KDF/T QSLs were sent out to EU, NA, SA, AS and OC. He states if you don't receive your QSL card, don't resend another request yet (save your money..). They have around 2000 QSLs that have to be processed yet, so maybe yours is still inside that batch. Next sending will be early in February. Gil states, "Anyway, don't worry, all qsl will be sent!!"

It has been reported that Lothar, DJ4ZB, will close the logs at the end of March 2001 of his following DXpeditions:
A35ZB (Oct. 1994) ZL7ZB (Feb/Mar 1997)
ZL7ZB (Feb./Mar 1995) ZM7ZB (Jan/Feb/Mar 2000)
T32ZB (Sep/Oct/Nov 1995)
QSL cards can be sent until the end of March 2001 to:
Lothar Grotehusmann, Quaekerstrasse 35, D-13403 Berlin, Germany

R1, FRANZ JOSEF LAND. R1FJV was been keeping the folks happy on 160/80 meters lately between 2300 and 2400z. Check around 1830 and 3505 kHz. Also, check 17 meters around 18077 kHz after 1000z. QSL via UA3AGS.

SPECIAL EVENT (Marconi). Look for two special event stations to be active from "Niton Radio" (GNI) and "Lizard Radio" (GLD) during the "Double Marconi Centenary" celebration January 21-23rd. The event stations will sign GB100GNI and GB100LD. Suggested frequencies are: 3650, 7060, 14200, 18150, 21200 and 24950 kHz. More details are available at the following Web site: http://www.needlesradio.org.uk/ (Check "Latest News")

TY, BENIN. Operators Flo/F5CWU, Thierry/F5MOO and Didier/F5AOV will be active from here August 9-31st. Activity will be on 160-6 meters, CW/SSB and the digital modes. They are currently waiting at this time for their licenses and to see what restrictions will apply. They plan to leave France with Quads antennas for 20m to 10m, verticals for the lower bands, a yagi for 6m and a 500 watt amplifier. Flo informs OPDX that they are looking for your needs from Benin. Please advise them on what bands, modes or any comments you have for them via the following E-mail address:
f5cwu@wanadoo.fr
Also, visit their Web site for the DXpedition (under the item TY-2001) at: http://perso.wanadoo.fr/f5cwu

UA0, ASIATIC RUSSIA. Valery, UA0ZC, in Kamchatka, in Zone 19, can usually be found on 20 meters CW around 2200-2400Z and 80 meters CW around 0630-0730z. QSL only direct to the following address, not to the one listed in the 2001 Flying Horse CallBook which is incorrect. The correct address is: Valery A. Makarov, P.O. Box 6, Petropavlovsk, Kamchatsky 683000 Russia.

VP5, TURKS AND CAICOS ISLANDS. Look for Jerry/WB9Z, Don/K9NR, Billie/K9QT and Howard/AK9F to be active this week, January 23-27th, signing homecall /VP5. Their activity will include the CQWW 160M Contest as a Multi/Single entry signing VP5F. QSL via home callsigns. Listen for instructions on the QSL info for VP5F.

XV, VIETNAM. Torsten, XV9TH, was heard on Sunday on 28466 kHz between 1200-1300z. QSL via SK7AX. Also, heard during the past week was XV2J on 7012 kHz between 1100-1130z and on 21012 kHz between 0100-0230z.

YI, IRAQ. YI1BGD was heard over the past week on 10 meters around 28415 kHz between 1300 and 1500z. The operator's name was Rodger. The operator made a brief apprearance on 12 meters after 1500z on 24942 kHz. Rodger states to QSL via G0MMI.

YV, VENEZUELA (Change in plans!). Rick, W0IS, will be going on a mini-DXpedition here next weekend, and informed OPDX that he will not be able to go to Los Roques (SA-035) as a side trip. Instead, he will be on the air from Caracas Friday, Saturday, and Sunday, beginning late Friday evening. Activity will be late night or early morning local time, probably around 0400-1000z. Operations will probably be somewhere near 7040 CW or 7075 SSB.

ZD7/ZD8, ST. HELENA AND ASCENSION ISLAND. Glyn, GW0ANA, Chairman of the Barry Amateur Radio Society, informs OPDX that on March the 19th, 4 members of Barry Amateur Radio Society (B.A.R.S.), Rich/GW4BVJ (CW op), Sheri their logistics manager, Doug/G0WMW (CW & SSB op), Glyn/GW0ANA (DATA & SSB op), will be flying down to Ascension Island. They intend to operate on all bands and various modes (i.e. 160-6 meters - Modes: CW, SSB, RTTY, PSK31, SSTV, MFSK, Heilshriber). They will be on Ascension for 8 days then it's off to St. Helena were they will again repeat the operation as on ZD8 using as many modes as possible. They will be on St. Helena for 15 days before returning to Ascension and then home. The callsigns are at this moment being finalized, so Glyn will tell us once they have confirmation. They also intend to be active on the Lower Frequencies (LF) bands as there is a need for LF QSOs from both of these islands. Doug, G0WMW, has built a "Dragon Special", a 75 foot vertical, which should give them a great signal at 1000 feet ASL on both islands and a amp on the bottom. The other antennas are Force 12 beam, phased twin Butternut verticals, and a GAP Triton together with a beam for 6 meters. Richard, GW4BVJ, is at present designing a web page for the DXpedition, and once completed it will be released to the DX community. QSL manager for both islands is Glyn, GW0ANA. Glyn states, "The object of this DXpedition is to commemorate the passing of a 100 years of Morse Communication from these islands. As once in the southern latitudes they were the communication hub for our far flung 'British Empire' using nothing but 'Morse Code'. So in keeping with us honouring the operators of old we will be spending more

time on CW and Data modes then normal for the most DXpeditions." This
DXpedition welcomes any financial support from the DX community, and if
you would care to make a contribution please send it to Glyn, GW0ANA,
in any call book. All contributions acknowledged.

> return envelope from Germany?
> Thanks
> WA6OGO

In order to supply return postage, you must affix postage of the returning country. IOW, you need German postage on the return envelope. There are several places where you can buy foreign postage stamps, such as Bill Plum Stamps and Supplies.

12 Glenn Rd
Flemington, NJ 08822

908 788 1020
908 782 2612 (fax)

he maintains a wide variety of foreign postage at reasonable prices. He also has great airmail envelopes that meet Euro standards.

There are several others but I've been using Bill for a number of years.

Or, you can throw in a couple of green stamps ($1). Right know it's about $1.90 US for a German airmail stamp.

It varies somewhat, but a green stamp will take care of most countries. Germany has sky high rates. 3 DM works out to nearly US$2, so managers in that country need that much, even if they cross a border and post it for less--a common practice. Be fair and reasonable.

Message-ID: <3A6B9C1F.262A0524@hiwaay.net>
Source record: 18251

Rod-

The news release I received from the FCC described this in detail. They defined callsign "groups" and, within groups, callsign "blocks". To quote them,
Group A contained all 1x2, most 2x1, and most "A" prefixed 2x2 callsigns

Group B contained most K, N, and W prefixed 2x2 callsigns

Group C contained all 1x3 callsigns

Group D contained most K and W prefixed 2x2 callsigns

Group E contained WC, WK, Wm, and WT prefixed 2x3 callsigns.

This applied to the contiguous US. Territories had different rules.

Hams could request an upgrade from a lower group to a higher one. Generally, Extras were entitled to Group A, Advanced to Group B, and Generals and Technicians to Group C.

Calls were assigned within groups in sequence of blocks. Block 1 was K#xx, block 2 was N#xx, block 3 was W#xx, block 4 was AA#x, block 5 was AB#x ...
These were followed by 2x1's beginning with K, 2x1's beginning with N, 2x1's beginning with W, 2x2's beginning with AA through 2x2's beginning with AK. Then came with Group B.

If this is not confusing enough, I can send you a xerox copy of their news release.

Two sources for mint airmail stamps

William J. Plum
12 Glenn Rd.
Flemington, NJ 08822-3322

Send Bill a note and he will mail you his "package" of stamp prices, how he accepts payments, etc. He does not have a presence on the Net. I REALLY recommend his European Air Mail "Cover (send out to the DX)" and "Return (the envelope with your address)" Envelopes. The return envelope fits in the "Cover" without folding and also puts another layer of paper over your greenstamps(s) to hide them.

JAMES E. MACKEY, K3FN
PO BOX 270569
WEST HARTFORD, CT 06127-0569

Jim has a presence on the Net at:
http://www.net1plus.com/users/ryoung/index.htm

Once you establish an account with him you can email your stamp orders (no minimum) and pay by check once you've gotten them. Very convenient. He also has the Euro Air Mail Envelopes but they are much more expensive than Bill's.

200. ARRL DX Contests: Announced Operations

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-23 12:50:02 UTC
From: Bill@ng3k.com
Message-ID: <90324ABA8wfeidthiscom@216.200.68.12>
Source record: 18255

The NG3K "Announced Operation" tables for the 2001 ARRL DX Contests (CW & SSB) are now available. They can be found at the following URLs:

CW - http://www.ng3k.com/Misc/adxc2001.html
SSB - http://www.ng3k.com/Misc/adxs2001.html

The tables may be sorted by either Callsign (the default) or by DXCC entity. To sort by DXCC, just click the "DXCC" link in the table header column. If you're already viewing the "by DXCC" page, you can return to the "by Callsign" version by clicking the "Call" link in the table header column.

New listings for significant (M/M or less common DXCC entities or Zones, etc.) operations will be appreciated. Send full particulars to:

Bill@ng3k.com

Please include:

1. Whether the operation is for CW, SSB, or both.
2. Callsign to be used in the operation
3. DXCC Entity
4. Intended class of entry
5. QSL route
6. Operation Web page URL, if available
7. E-mail contact for further information
8. Dates of additional operation outside the contest
9. City or locale from which the operation will take place
10. Callsigns of the operator(s)
11. Other operation details likely to be of interest to other DXers and Contesters (e.g. QSL address if not commonly available, power level, antennas, etc.)

The announcement tables will be updated as new information is received or discovered.

Hmmm. It may sound a bit extreme but consider that when I guy goes on
an expedition for the sole purpose of handing out contacts (I assume
that is the case here although I don't actually know) he should be
prepared to answer QSL requests.

There could be a very good reason for not responding that could be
clarified by some communication, telephone or otherwise. On the other
hand, I have an unlisted number too, although I freely give it to
fellow hams.

Dr OM,

Can you use German stamps in the US? Of course not, so why do you think that you can use US stamps in Germany or any other place outside the US?

IMHO, the best thing you can do is to enclose an IRC (International Reply Coupon) which can be exchanged in any country for the relevant return postage. An IRC is better than a USD bill, since the postage from some countries to the US is more than a dollar.

Whenever I have received envelopes with stamps from countries where I have been on the air, the postage has ALWAYS been insufficient.

Besides that, it is probably troublesome for you to find all those different stamps, so better avoid all the hassles and buy IRCs at the nearest post office.

Good luck!

Well. from time to time I get letters from the US with US postage
stamps an the return envelope! Quite amusing!

My address (DK4VW) is used for direct QSL exchange with clubstation
RK2FWA/RW2F Kaliningrad : mail drop - then private forwarding to UA2.

There is a very high risk, that in some countries underpayed postmen
are stealing green stamps, so in Russia.

Keep in mind, that via "DL-callsign" does not always mean, that the
return letter is send from Germany, especially for ex USSR area.

In case RK2FWA/RW2F: Sending an return envelope with DL stamps works
also, but then your letter has to be forwarded back from UA2 to a
german postbox. This take an extra time.
The return postage has to be payed in Kaliningrad - we can manage to
do it with IRCs or green stamps.
By the way: German postmen do not risk their job by stealing single
dollar notes from letters, registred mail is not necessarry.

Amen, Walter. Anybody that calls on the phone for a QSL card is a sick
puppy.....

Somebody from Europe called me on the phone one morning, he didn't
want a QSL, he had just worked me on 160 and he was so excited that
he wanted to make sure it was me :-)

Amazing what gets some kids blood pumping.

Nobody is obligated to answer any QSL cards. They do it because
they want to, not because they must. 1998 was three years ago.
Maybe the guy has family problems. Maybe he's not a ham anymore.
Maybe he's dead.

Or maybe he's like me. Maybe he's tired of people who can't LISTEN
to instructions on the air, can't find the right QSL info even when
it's published a hundred places. I have a QSL manager that does an
EXCELLENT job. Every time I get on the air I give his call every two
or three QSO's. But still people send cards direct to me, not to my
manager. So I put them in a big box. And once in while, like every
three or four years, I answer them. If I wanted to answer QSL cards,
I wouldn't have a QSL manager, now would I :-)

Where we got the idea that sending QSL cards is an obligation, I have
no idea......

214. Odd Police Action

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-25 05:06:27 UTC
From: Paul Schiemer <schiemer@magicnet.net>
Message-ID: <nqOb6.11014$SI.570496@iad-read.news.verio.net>
Source record: 18269

Due to close proximity to a race track I often go over to watch AND listen. It really adds a new dynamic when your scanner gives you the driver/crew comm. [try it sometime!]

On my way home my old sports car started to run poorly.
I pulled over on a lonely two lane, well off the road, emergency flashers on while I fumbled under the hood.
A female police officer soon pulled up behind to 'check things out'.
I explained it was a distributor problem... blah, blah, blah.
She watches me bungle for a while then steps back to the drivers window to look inside my car.
She radios for backup. Asks me to stop what I'm doing, step over to the curb.

After a short wait two more police cars pull up. The three of them talk for a while, then come over to me, asking for my drivers license. One of them does the field investigation (radioing in my DL number, etc.), while the other two look around in my car with their flashlights.
Finally they approach me to ask what all that electronic stuff is on my passenger seat. (to include an AOR 1000, TEC 7 frequency counter, DC power supply, Sennheiser headphones)

I wasn't that forthcoming with info, asking instead what business of it was theirs? (I know, not a good idea, but it was way out of their realm.)
Seems they considered these things "burglary tools", and I may be a "suspect". "In what?" I ask. "It doesn't matter, you just answer the questions." was the reply. At one point they even threatened to confiscate the equipment under the RICO act! sheese!

Have you heard of anything so weird?
I left, unscathed, and without giving them any details. I did switch on the AOR and locked onto their freq. to hear them exchange a few quips about the 'incident'. They weren't laughing about it, just making wise cracks.
What a bunch of baloney, ain't the airwaves free?? Just mark this off to ignorance? [don't worry, I'm steering clear of that little burg from now on!]

What we have here is a failure to communicate. IF, I repeat IF, one or more persons go on a DXpedition with the express purpose of putting a needed QTH on the air, shouldn't they have some sort of obligation to respond to incoming QSLs?

Or should everyone strive to work them just to stroke their inflated egos?

I can understand your predicament, however, look at it this way. How many times have you been a "new one" for a beginner who doesn't know the ropes. He may be as excited as can be to have made the contact and is dying to get your card. I 'm not suggesting that he call you on the telephone but I am suggesting that you need to make allowances for this.

A couple of days ago I got a card from a JA via direct airmail. No envelope, no IRC or anything. I need another JA card like I need a hole in the head. Hell, I have JA confirmed on two meters. But you know what, I will send him a card via direct air. I'm know that you or I can't do that in every instance, but I figure that my card will be special to him for whatever reason.

I'm am certainly not a rare DX station but I operate high power on 2m and have been active during a number of sporatic E openings where I work dozens of stations all in the same area. If it happens to be a grid I already have confirmed, should I fail to QSL?

I'll get off my soapbox now; got to go make out a QSL for 3Y0C. I'll put in a personal note telling him that he is my second astronaut QSO, the first was W5LFL in the space shuttle. He QSLed 100% although

admittedly he made fewer than 350 Qs. How about that. Even a W5 is a rare one to somebody <g>.

No. Not unless their personal life allows it, and the card has an
SASE. Bureau cards not included. Nobody has to answer bureau cards,
rare or not.

But as I said before, things change. Most hams have real life to deal
with. I'm getting ready to move half way around the world, worry about
all the logistics, scheduling movers, selling the house, etc. I got
two QSL cards in the mail today. But answering them can't delay
all the real life things I have to do. People have priorities, at
least most people do. So if the two guys who sent me a card
(cuz they are too dense to figure out who my manager is) don't
get one back this week and they need to run around calling me
an SOB cuz they didn't, so be it. When I get to the other end,
I have a new business to run, and a million other things to do.
All of which are going to put ham radio WAY BACK on the back
burner. My can't get enuff of that DX stuff days are over. So
answering cards from 3 years ago will probably never get done.

>Or should everyone strive to work them just to stroke their inflated
>egos?

In certain cases, yes. VK0MM comes to mind for some reason. All
rare DX stations don't have a problem putting their hats on. Some
do.

>I can understand your predicament, however, look at it this way. How
>many times have you been a "new one" for a beginner who doesn't know
>the ropes. He may be as excited as can be to have made the contact
>and is dying to get your card. I 'm not suggesting that he call you

>for this.

Usually, if he's that excited, I take the time to explain the ropes.
One guy wanted to send me a card, but didn't know where to
get GUAM stamps so I could send him one back.

>A couple of days ago I got a card from a JA via direct airmail. No
>envelope, no IRC or anything. I need another JA card like I need a
>hole in the head. Hell, I have JA confirmed on two meters.

That's the only band I don't have JA confirmed on. 4,000 times per band. Another root cause of the QSL dilema. JA's are programmed to send a card for EVERY QSO they make, irregardless if they need one back or not. If I work a JA in CQWW, and then he dupes me three more times over the weekend, he'll send me four cards. I used to unpack incoming cards from the JARL, with 60 cards from the same JA all in a pile, all 60 QSO's with five different hams in Guam, and all on 15 meter SSB. If DX stations only had to answer cards from people who REALLY needed a card, they'd ALL be more responsive.

>I'm am certainly not a rare DX station but I operate high power on 2m

I hope your cat can still have kittens :-)

> Even a W5 is a rare one to somebody <g>.

Therein lies the problem. Rare. Because of the fact that Joe Ham lives on an island somewhere, and he's the ONLY ham on the island, he's automatically expected to live up to a different set of standards that have been invented by our sub culture. He is expected to spend more time on adminstrative tasks, and at the post office, than he does on the air.

Rare Joe Ham is not supposed to get on the air and BS with his buddy for a hour. He's supposed to knock out contest style Q's whenever he has a free moment for ham radio.

Rare Joe Ham is not supposed to worry about the amount of funding his job provides and distribute it accordingly between his family and his hobby. He's supposed to answer all QSL cards received, no matter how they got there, and no matter how much it costs him to do so.

Rare Joe Ham is expected to do a lot of things that regular Joe Ham isn't. The funny part is that regular Joe Ham is the guy that expects him to be super man.

Used to be, Rare Joe Ham was an SOB if he didn't answer cards. Used to be, we'd all wait patiently for a year or two for cards. Now, with the instant gratification of the internet, Rare Joe Ham is an SOB if he doesn't have online logs and answer all cards in a week :-) This internet stuff is making us all crazy - go look at the French guy's 'BLACK LIST'. Bunch of JA's and K's on it. If you worked the U.S. or Japan and didn't get a card, get over it. Go work somebody else :-) Think the rarest place he can't seem to get a card from is England.

Too bad we can't fix this 'rare' problem, get back to the days when all hams were just other hams, and talk to each other on the radio for an hour without pissing somebody off. If there ever were those days in the first place.....

Personally, I have had enuff of this DX stuff, so I quit.
If you want a KH2D QSO, you'll have to figure out
which island I'm on (won't be Guam), and find me surf
fishing on the beach to have one. And I don't have any
EYEBALL cards, sorry :-)

That was your first mistake, Hommie. ALWAYS be nice to
the police. I would expect that a lot of bad guys use scanners,
etc. in their everyday work, so seems like a reasonable question
she asked. Maybe if you'd have showed her your ham ticket,
you'd have wound up with a date instead of backup....
You know how crazy women are about hams :-)

>Have you heard of anything so weird?

Yeah, two years ago they were having elections at the University. That same weekend we were having a big meeting at the club, so naturally I was tuned into my local repeater and was ocasionally exchanging QSOs with other hams in the area.

I'm sitting down, doing nothing special, when this girl sits beside me and starts eyeing my 23R. When I pressed the F-Dwn to switch from 146.880 to CH0 she became extremely annoyed and accused me of interfering with their frequency ("we've been watching you all day and you've been interfering over and over and sending information to the other people"). When I wouldn't give her any additional information on what I was doing she became even more annoyed and started yelling at me. So I took out my ham ticket, and she became even *more* annoyed and said she was calling the police and having me arrested.

I don't think I've ever laughed so hard in my life... some people just don't get it I suppose. BTW, I checked out their frequency later on and they were working around 150, so I doubt there was a problem with harmonics.

What you should have done is invited them all to take a closer look and
start explaining what everything is and what every little button does, and
start telling all the fun scanning anecdotes you know of. After 2 minutes of
hearing tech jargon, they'll be begging you to shut up and leave them alone
:)

Professional burglars and robbers typically use police scanners to keep track of where the police are. One practice is to for one or two guys to go into a place and rob it while the driver sits outside listening to the scanner. If he hears the police dispatched to the place they are robbing, he signals and the inside guys break it off and they are gone. Ditto for night-time burglary.

Perhaps there had been a number of burglaries and they suspected the burglars were using scanners.

Instead of asking them what business is it of their, perhaps the smart thing to do would have been to whip out your amateur license and explain to them what you are doing -- tune to a local repeater freq and let them listen to the innocuous chatter there.

Virginia prohibits radar detectors. I have an antenna mount that clips onto a window, roll up the window to hold it in place, and attach a rubber duck. I use that with a handheld lying in the seat. Officer saw it one day in an interstate rest stop and asked me what sort of radar detector that was -- and his mood was not real happy. I explained to him what was going on, showed him my ticket. Turns out he had an uncle who was a ham and that was the end of that.

222. 80m noise and distortion

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-25 16:42:01 UTC
From: jason_hsu@my-deja.com
Message-ID: <94pl0mlak1@nnrp1.deja.com>
Source record: 18277
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.misc

(NOTE: This may be a dumb newbie question.)

The good news: You need not let your bad QTH (even a ground floor apartment with no trees or bushes close enough for complete stealth) stop you from operating on HF, even at 80m.

I just tried 80m at night recently. To my surprise, I could hear a few S9 stations. Despite the fact that I was using an 80m Hamstick with only short radials clamped to the magmount (8 straight 3-foot radials, 8 straight 5-foot radials, and a few tight zigzag 9-foot to 18-foot radials), a few stations could hear me, albeit just barely over the noise and distortion.

The bad news: noise and distortion.

80m has a noise level of S4 to S5. 10m and 20m are nothing like this. The noise floor is hard-pressed to break out of S1 on these higher frequency HF bands.

LSB signals were also very distorted on 80m. Even some of the S9 signals were difficult to copy.

The noise and distortion were heavy despite the fact that there weren't any major storm systems for hundreds of miles around here. I can only imagine what it must be like on 80m in the summer.

So how do you deal with the noise and distortion on 80m? My inefficient antenna system (though it can probably be improved considerably with more of the 18-foot and longer radials) seems to be the LEAST of the issues. A more efficient antenna would improve the S-meter readings, but it wouldn't address the issue of the noise floor or the distortion.

Is this where those special DSP and narrowband SSB filters come into play? If 80m is brimming over with noise and distortion in the winter, how can anyone work 80m in the summer (when there are more thunderstorms as well as other factors increasing the challenge)? Was I simply unlucky enough to operate on a night after an explosion of solar activity?

Generally yes Steve. See QSL Tips and advice at URL:
http://www.ac6v.com/qslmisc.htm

For countries with a fair number of Hams -- I use the ARRL Bureau Outgoing Bureau. For a DXer, it is worth the ARRL membership just for the Bureau Service - but one gets a lot more of course.
http://www.arrl.org/qsl/qslout.html

With QSLing "By The Burro", sooner or later you will get a card from France, Italy, Germany, England, Brazil, Argentina, Australia, etc. At first it is tempting to send a QSL card to say Japan -- but they are the best QSLers in the world -- a bureau card is almost a guaranteed return. Get in a DX contest and you will receive hundreds from the JA's.

At 2 to 3 dollars a country -- DXCC can be upwards of $300 (Honor Roll $1000) so I use the ARRL bureau when possible --- $6.00 per each pound of cards --approximately 150 cards weigh one pound.
http://www.arrl.org/qsl/qslout.html
Also check out the ARRL Incoming Bureau - URL:
http://www.arrl.org/qsl/qslin.html

For rare countries such as most african nations, lesser ham populated South America, Islands, etc. postage is definitely in order. Be careful of sending Green Stamps to some countries where US currency is prohibited. See URL:
http://www.ac6v.com/qslmisc.htm

For any DX or DXpeditions with overseas QSL managers, also include postage and an SAE. You can help the managers a lot by reading the QSL tips for methods -- mentioned above. For example, envelope sizes are an issue.

For a stateside manager, an SASE - but I always include a green stamp to help them with printing the cards, etc.

Domestic QSLing is usually with an SAE, but give the small states like RI, WY, etc --- postage - an SASE. There are only a 2,343 Hams in RI and 1,598 Hams in Wyoming and they are swamped with requests both from the USA and Overseas.
Good QSLing

Up here among Minnesota fishermen, LOTW means "Lake Of The Woods".

Perhaps it will soon mean something else, reading the following excerpt from the minutes of the recent ARRL BoD meeting.

"Mr. Roderick updated the Board with regard to the ARRL's Logbook of the World project, the name given to HQ's electronic confirmation initiative. He said the project is moving along well with final specifications due from consultants shortly. Logbook of the World, using applied security methods, is intended to be integrated into existing and proposed HQ systems to provide various electronic benefits including award updates, QSO confirmation, image product creation, scientific and research material, and other member benefits through an interactive Web-based interface."

Wow- good reading, and a ton of info. Thanks, its just what i
was looking for. I'm currently not active in contesting, maybe
after i speed up my code a bit. So, I just have a couple of QSLs
to send to Canada. Are IRC's the best way to go? Or would
i be better off supplying canadian postage (if i can find it) ?

Hi again Steve -- one green stamp or one IRC should be sufficient for
Canada, you can also use the Burro for Canada.

International Postage Stamps from many nations, envelopes, etc are
available from K3FN -- see URL:
http://www.net1plus.com/users/ryoung/index.htm

There are lots of SSB contests and you don't have to "be" in the contest
to make contacts -- see LA9HW Contest Calendar at URL:
http://home.online.no/~janalme/hammain.html
Just give the proper report -- usually 59 then your state or zone or
whatever is required in the rules -- Rules at LA9HW as well. Contesters
will love to get the contact. Jump in.

By the way -- best to give your callsign when posting here - not
necessary but nice to know who you are. Don't see you in QRZ by name
either unless you are N9XBJ??

Thanks - Yeah, but it seems the "buro" is more for bulk QSL'ing, right?
I'm just talking about a couple here. SSB Contests? Hmm, to be honest,
i have only worked SSB once, and that was in 1994 during field day,
right after i got my license. All of my HF work has been CW since then
(and that's not saying much, since i took a 5 year break from ham radio).
Its probally more accurate to say that i've been working exclusively CW
since my "return" to ham radio this year (2001). And yes, N9XBJ, I am...
upgraded from TechPlus to General just a week ago. I've worked 10
states and 2 countries (on 40m) since 1/1/01 (my return to ham radio)
and i'm loving every minute of it. The regulars in r.r.a.* have been
extremely helpful, and you're no exception. tnx again!

232. 7Z1AB May-Sept,'98 QSL?

Newsgroup: rec.radio.amateur.dx

Anyone know who operated the Saudi embassy station 7Z1AB between late May and September of 1998?

The QSL manager for 7Z1AB, Jim-KN4F states that he only has logs to May 20th, 1998 at 18:04Z and that another "unknown" operator, possibly a "W4"? made QSO's between late May and September, when the equipment was sold due to the embassy having no more hams there.

Any information would be appreciated for a route to obtain confirmation of these QSO/s

Steve -- thanks for your callsign and past experience -- it will help me and others in formulating answers, for example now that we know you are a CW type -- won't recommend SSB -- hi hi. Congrads on the upgrade, great timing -- the sunspot cycle is up.

The ARRL Burro will send out as few cards as you send including VE's-- quote "
A package of ten (10) cards or fewer sent in a single shipment costs only $1.00. But requires ARRL Membership - highly recommended.
With the new New postal rates for USA DXers: International Reply Coupons (IRC) increase from $1.05 to $1.75 starting January 7, 2001. A one-ounce letter sent air mail to any world destination (except Canada and Mexico) will cost 80 cents. A two-ounce air mail letter will cost from $1.55 to $1.70, depending on the destination. So 10X $1.75 + 10X $1,55 = --- well you get the picture as compared to $1.00 + postage to CT.

In a single contest weekend, you can easily work 40 to 50 new DX countries. My best has been 98 DX countries in one contest (can't break that 100 barrier - hi hi, many do however). Toward the end of the contest - in the last 12 hours or so -- you can hear the Caribbean and South American stations calling CQ with few or NO takers (they have worked em all!) and at that point many start to send slower CW. CW speed is not a big deal. Usually one can copy their call sign at any speed -- so you'll know when they come back to you. Just return your report with TU and thats it. By the end of the contest your CW speed will improve considerably -- jump in you'll like it. Set your computer for sending your callsign at 13 WPM and increase it until you can't discern the dits and dahs and the whole series takes on a musical ring. You'll soon copy your call at very high speeds - your ready for a contest.

An idea I've always used Steve -- for domestic -- is during a QSO ask
"exchange QSL's or QSL with SASE, SAE????
Then you know if the other operator needs postage assistance. Wyoming has
always asked me for an SASE in my 7-Band WAS quest.

Many DX stations will reply "QSL Via the Bureau". That way the can respond in
bulk with minimum mailing hassle. Some will state QSL via CBA -- Call Book
Address (since there are 680,000 hams in the US -- we flood the world's
countries with QSL requests -- so I always include return postage in any DX QSL
direct or via the CBA unless they state otherwise.

Actually, 80 meters can be quiet enough for QRP signals. I have made QSOs on 80 meters with power as low as 10 milliwatts, so the station on the other end had a real quiet band.

You are correct; a better antenna will let you hear more signal, and more noise. Filters can help, sometimes, but going from 2700 Hz to 1700 Hz, about the narrowest you can manage on SSB, will gain you only about 2 dB. IF the noise is broadband and "white," the denoising function of some DSP filters may help some, but for the most part, denoisers make a somewhat noisy signal sound nicer, but don't really help with the ones that are buried in noise.

You didn't say what the noise sounds like. If it is pure "white" noise -- just a hiss, and pretty steady, it is probably coming from a switching power supply. If it has a noticeable "buzz" to is, 120 Hz in the US, it is electrical in nature, and could be power lines, a nearby fluourescent light, etc., to name just two examples. If it occurs in crashes, it is probably lightning.

Your solution depends on the source. If is coming from a device in your own home, entirely a possibilty, then finding that device is the surest way to go. Operate your receiver from a 12-volt battery if you can and turn off circuit breakers and find out if it goes away. If it is coming from a neighbor's house, you can do the same if you have a cooperative neighbor. (The rules are pretty clear; such a device may be legal -- until it causes harmful interference). If moving your antenna outside gets the antenna farther away from the source, that may help.

Many noise problems stem from power-line problems. Under the rules, power companies are expected to fix problems. Some do; some don't. ARRL has had some successes with power companies that receive our letters; others ignore us. Some of those that have ignored us have received letters from the FCC, under a cooperative agreement between ARRL the FCC. More ARRL contact is coming, especially when I can clear a backlog of cases. (ARRL has a help-wanted ad for an RFI engineer on its web page). Start by reading the info at http:/www.arrl.org/tis/info/rfi-elect.html and then contacting your power company.

If the source is pretty much a "point source," a noise-cancelling filter, such as those made by MFJ and JPS may help. These devices can get up to 50 dB of noise attenuation, but are tricky to adjust and need to retuned every 10-20 kHz or so. See:

Many folks might percieve noisy signals as "distortion." I know the Lab's distortion meter doesn't know the difference. :-)

Lasr time I checked, we have a President. He's a Yale and Harvard
Business School grad and smart enough to become President of the
United States and leader of the free world. (Note to the
unenlightened: Leader of the Free World (LFW) is the title given to
the person that has the power to rob the public treasury and spread
the largess to the begging countries of the planet.)

If the LFW and his predicessors had not engaged in this process for
years, I could afford an FT-1000 and Henry 8K for each band and have a
six element Yagi on 160.

On the other hand, if we hadn't, Yaesu would be hammering out Samari
swords and who knows what would have happened to Dr. Yagi.

No, you have to take Utah too. I am fully aware that there is a world
outside our borders. I live 100 km from our border with Mexico and
and it seems that most of its citizens, as well as several countries
in Central America and China are trying to sneak across our border.
Why is that?

Isn't Blair hanging on by a thread? As I recall the Prime Minister
with the most balls in the past half century was a woman.

I believe that the US is one of the leading producers of "aluminum" in
the world so we can pronounce it any way we want. The Russians might
make some too but they pronounce it even worse. When you start making
in England you can call it whatever you want.

>

>cars, you will understand what we mean.

How can an Englishman talk about American car being no good. I live
in the desert and an old girlfriend of mine had a Jaguar XK-140 that
would die if we had three drops of rain. You guys must have brought

them out to drive on the one day a year it didn't rain over there.

But they've improved; they're made by Ford now. <g>

I drive an American (actually it's built in Canada) Chevrolet Camaro SS that will blow the doors off any German car costing three times as much. I also drive a Chevrolet pickup truck that will tow a Mercedes SUV uphill while he's trying to drive downhill.

Damn I'm glad I sold my Chrysler stock just after Daimler took over. Look what a mess they've made of it.

240. HamCall Free Service

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-26 02:56:37 UTC
From: "Charles P.L. Stokes" <wb4pvt@worldnet.att.net>
Message-ID: <FH5c6.9716$cN.622055@bgtnsc07-news.ops.worldnet.att.net>
Source record: 18295

For your information.
Buckmaster HamCall notification service is free till Feb. 28, 2001, see text below for more inormation.
WB4PVT

HamCall Notification Service: Registered HamCall users can take advantage of our HamCall Notification Service. If you look up a call on our callsign server at buck.com/call and it is not found in our database, the HamCall Notification Service will ask you if you wish to be notified when the callsign is found. All you must do is enter your HamCall User Name and Password and your request will be stored and automatically checked every day. When we add the callsign to our database, you will receive a courtesy email announcing the callsign has been added and also providing you a link to the HamCall callsign lookup site. Each time you request a notification you will be shown a list of other requests you have made that are currently outstanding. http://www.buck.com/haminfo.html

241. TVI 6 Meters

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-26 03:04:24 UTC
From: "David J. Moge" <n1rzb@mailops.com>

In brief, I have a multi element TV antenna with a amplifier connecting to 4 televisions. The house lot is laid out in such a way that it's very hard to string antennas up with out having them in close proximity to the TV antenna. Cable is not an option. Satellite is possible but would like to keep regular TV antenna.

At Christmas I found a Six Meter rig under the tree.(MFJ 9406 SSB/CW 10 Watts) which my wife gave me. I put up a dipole to try it out and to my surprise it works quite well. With a antenna tuner I have a 1.3:1 SWR.

My wife hasn't stopped yelling at me sense. Every time I key the mike or try out CW the TV's go blank. I have tried a HI PASS filter but that doesn't do much good at all.
My HF rigs cause no problems at all. I do have a good RF ground

WHAT AM I DOING WRONG??? HELP!!!

Any comments and suggestions would be gratefully appreciated.

Thanks

Anybody using broadband antenna amplifiers are just asking for
trouble. If it has a frequency response something like 47 .. 860 MHz,
then there is no wonder that it is going to saturate :-).

Are you absolutely sure you need amplification for VHF channels ?
Wouldn't it be sufficient to put a UHF only amplifier directly after
the UHF antenna and just use a passive summing network to connect the
VHF antenna into the downlead ?

If this is not possible, but Band I is not needed (channels 2 .. 6 in
the USA), put a high pass filter around 150 MHz immediately in front
of the preamplifier.

If Band I channels are required, put a 50 MHz notch filter immediately
in front of the amplifier and make sure the amplifier has a good
metallic cabinet so that your transmitted signal does not go directly
into the amplifier.

You can make a good inexpensive notch filter by placing a 1/4 wave (on your 6M operating frequency) long piece of coax, shorted on the far end, across the input to the amplifier.

What good will that do ? I thought a 1/4 wave translated a short to an open.

What is your SWR without the tuner?
All the suggestions I just read are good. Especially the Amplifier
part and the stub idea.

Try getting the swr nice and flat without a tuner.

There is NO REASON a tuner should be needed on a 1/2 wave coaxial fed
dipole. Unless your operating way off its frequency. And if you are,
that in itself will contribute to the TVI problem.

tmdc > looking but have not had much luck.

Depending on the length of your intended stay, there may be no need to
ask for a temporary or guest license. Canada as well as France have
applied the recommendation T/R 61-01 of CEPT which means that they
(and other countries) mutually recognise their full amateur radio
licenses, and one may operate from the other country for up to 3 months
prefixing one's callsign with the appropriate country prefix and
suffixing it with /portable or /mobile (I would, for instance, sign
in Denmark OZ/DL2LFH/p).

See for instance http://www.ero.dk/doc98/Official/Pdf/TR6101F.PDF -
and if you want to stay longer, consult
http://www.qsl.net/oh2mcn/license.htm or the REF: http://www.ref.tm.fr/
for more information.

Try "Information on licensing abroad for radio amateurs by OH2MCN" at URL:

http://www.qsl.net/oh2mcn/license.htm
I can't read French -- so don't know what it says at URL:
http://www.ref.tm.fr/

I know for USA Hams there is a CEPT agreement with France -- see URL:
http://www.arrl.org/FandES/field/regulations/io/cept-list.html
For Canada the CEPT agreement is covered at RAC Page:
http://www.rac.ca/cept.htm

I operated under CEPT when I visited Italy last year. Worked fine except
for my limited Italian, but many spoke english - so i could find the best
Pizza place -- hi hi.

CEPT is European Conference of Postal and Telecommunications
Administrations
URL:
http://www.arrl.org/FandES/field/regulations/io/#cept

Have a great trip

OPEN on the far end!

Best use a piece of 'large' coax. I've used 3/4" cable TV hardline.
It's notch is wide enough that you should cut it low in freq. to keep
from killing any TV2 signal. Cut it for 49 - maybe 48 mcs --- you
can always cut long coax shorter, but you can't cut short coax longer.

Make that 1/2 wave and you might see a notch :-) on that frequency
(and remembering to compensate for the velocity factor) if you are
using shorted stubs.

A 1/4 wave _open_ stub could also be used, but it is harder to tune.

That is not true of ZD9. The official website of the islands list it at
overseas territories. Plus, there has been a documentary on the islands
a couple of weks ago, which explicitly mentioned that their inhabitants
do not have the full British citizenship. Oh well.

Postage from Canada to the U.S. is now 60 cents (Cdn) -- coincidentally, and possibly for the first time, the same nominal face value as postage from the U.S. to Canada, recently increased from 48 cents (U.S., of course). Your suggested strategy is exactly the same as mine, in reverse. I buy US stamps from the USPS philatelic service for use on SASEs. The USPS charges $6 S&H per foreign order, so it pays to order in quantity, but not so many that you don't use them up before the next rate increase! :(

Depending on the QSLing habits of the Canadian ham you are sending a card to, he might actually prefer a loose 60 cent U.S. stamp that he can use on an SASE to another U.S. ham or QSL manager. At today's exchange rates, it's worth about 50% more than the Canadian return postage. If you do that, you should explain what you are doing so he doesn't think you expect him to use the U.S. stamp on your return envelope; it's for his own return envelope to someone else. And whatever you do, don't stick a U.S. stamp of any denomination on your own SAE; that will be useless to him.

Try feeding the dipole so that it has balanced RF current.
use a Balun or make a pawsee stub at the feed point
a Dipole if cut right is about 70 ohms so SWR 1:1.3 is about
OK with no tuner (the PA in the rig should handle this with out
shutting down)

In brief, I have a multi element TV antenna with a amplifier connecting to 4 televisions. The house lot is laid out in such a way that it's very hard to string antennas up with out having them in close proximity to the TV antenna. Cable is not an option. Satellite is possible but would like to keep regular TV antenna.

At Christmas I found a Six Meter rig under the tree.(MFJ 9406 SSB/CW 10 Watts) which my wife gave me. I put up a dipole to try it out and to my surprise it works quite well. With a antenna tuner I have a 1.3:1 SWR.

My wife hasn't stopped yelling at me sense. Every time I key the mike or try out CW the TV's go blank. I have tried a HI PASS filter but that doesn't do much good at all.
My HF rigs cause no problems at all. I do have a good RF ground

WHAT AM I DOING WRONG??? HELP!!!

Any comments and suggestions would be gratefully appreciated.

Thanks

Hi

Cutting a stub to the correct length is like playing Russian roulette.
The alternative is to cut the stub shorter than the calculated length
either quarter or half wave and use a small trimmer capacitor. Use one on
the input to the Amp and one on the out put as well. My experience
suggest that most on the damage occurs in the TV set mixer.
you can locate a stub if necessary at the TV set as well. I have had a
good results with co ax and trimmer it is very easy tune. After a while
you can simply guess the length of coax and tune the trimmer.
Regards Alan
VK3ry

270. Novice needs antenna help

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-27 16:33:38 UTC
From: mep3k@gateway.net
Message-ID: <20010127113338.23612.00001128@ng-fa1.news.gateway.net>
Source record: 18124

Hello Everyone,

I'm hoping someone will be kind enough to guide me through the correct procedure for antenna set-up.

I have a portable Sony ICF-SW7600. I have tried the built-in telescope, reel and even the Sony manufactured external AN-102 Compact Active Antenna. None of these are sufficient to pick up the multitude of stations I should be getting. I live in the southwest US and have read that signal reception is not the best by comparison to other locations.

Some of the short wave handbooks I have recommend stringing up a copper wire antenna. So, for $14 I went to Radio Shack and bought a 75ft copper antenna wire, with 50 ft insulated lead in wire and window feed-through strap and insulators.

I don't even know if this is the right thing to use, but thought I would try it for $14.

Until I read further that if improperly set up I could end up frying my $200+ radio circuitry - and not even know it.

So there is my first question - Is this antenna going to help and is it safe (for the radio) to hook up?

All remaining questions assume a "yes" to the first question.

Will it matter how high or in what direction I situate the copper segment?

My radio does not have external feed terminals, so I don't know how I would ground it - any advice?

Should I use test/jumper leads to connect the insulated lead wire to the radio's telescope antenna, or via the external antenna jack?

Also, in learning what little I have learned about antennas from my independent reading, antenna length is determined by the band you are interested in picking up signals in (half-wave length formula), this being so, if there are several bands I would be wanting to listen in on, it seems you would need multiple antennas of varying lengths - whats is the practicle way of managing this issue?

I'm sure there are other issues that I have not anticipated so anyone willing to respond is welcome to address concerns I have not thought of.

My apologies in advance is my questions are beneath the level of this newsgroup. I didn't find a charter to determine appropriate questions for the group.

Thanks for any help everybody.

Mike

Dave, the 6 meter band's fundemental frequencies fall close to the
video portion of the television
signal. Plus, you're probably experiencing what is known as fundemental
overload. Your tv's are
acting like a receiver for your nearby 6 meter transmission. The tv's
don't have the proper
filtering to filter it outand reject that signal. The FCC sees Amateur
to non-amateur interference as not necessarily the fault of the
amateur. Usually, it's the fault of the manufacturer of the consumer
electronic device for not puttting in the proper filters and shields.
If there are no supurious emissions
from your station, then fundemental overload is the culprit. The ARRL

RFI book may give you some ideas on fixing the problem.
Did you try choke filters ont he tv(s)? That amplifier may be letting
in extra signals, too.
Good luck.

>So there is my first question - Is this antenna going to help and is it safe
>(for the radio) to hook up?

It will probably help. It is probably safe. If you are a reasonable
distance from any radio stations, it *is* safe. (if you're within a mile of
a radio station - including a ham or CBer but not a cellular, police, or
fire tower you *might* not be safe)

Static electricity is a risk but there's a way around that. Rather than
plug the wire into the antenna jack, wrap it around the radio's built-in
antenna. (*without* removing the plastic insulation first)

>Will it matter how high or in what direction I situate the copper segment?

The higher, the better, but even a foot or two is worthwhile. (provided you
don't trip anybody!) The direction will make a difference but it's hard to
predict without knowing the exact locations of conductive obstructions (like
trees, buildings, etc.) and the exact height above ground. It will also
vary considerably with frequency. I wouldn't worry about it.

>My radio does not have external feed terminals, so I don't know how I would
>ground it - any advice?

Again, don't worry too much about it.

>Should I use test/jumper leads to connect the insulated lead wire to the
>radio's telescope antenna, or via the external antenna jack?

Wrap the insulated lead wire around the telescoping antenna.

>this issue?

This is important for transmitting. It isn't very important if you only
want to receive. If you really do want to have half-wave resonant antennas
for several bands, you can simply connect them in parallel to the same
leadin wire. But again, I don't think it's a big deal.

>My apologies in advance is my questions are beneath the level of this
>newsgroup. I didn't find a charter to determine appropriate questions for the

In theory rec.radio.shortwave would be a more appropriate group but I doubt anyone's going to flame you for an honest question. (besides, r.r.s is about 90% flamewar these days anyway!)

Another bleater that feels he needs five newsgroups to make a point.

We all know Morse testing is going to disappear, we all know it will take
3-10 years to do so. So your problem is whether to study or moo.

Dick N&#65533;BK with apologies for the crosspost

Let us assume that the interference is really being caused by your very strong 50MHz signal getting into the antenna amplifier via the input connection (I'm sure that this will be the main cause, but it may not be the only problem). However, what you essentially want is lots of attenuation 50 - 52MHz, and as little as possible elsewhere. However....

Using coaxial stubs CAN be very effective, but there are several serious problems with simply adding a simple o/c quarterwave or s/c halfwave stub across the input of the wideband amplifier. These include:
1. The width of the notch will be so wide (even with the lowest-loss coax you can find) that you will also kill the TV low-band (Ch2 - 55.25MHz - will, of course be the worst affected).
2. As well as having a notch on 50MHz, here will be notches at odd multiples of 50MHz (if quarterwave) and all multiples (if halfwave). This may make a bit of a mess of several other TV channels.

The obvious solution to the width problem is to make the notch narrower. With stubs, you can do this by cascading similar stubs, each separated by a quarterwave of coax. This will also greatly increase the depth of the notch. A single stub will give you a notch of 25 to 30dB, and two stubs will increase this to nearly 60dB (I doubt if you'll need anything like this). However, this will not change the 'harmonic suck' effect (although these sucks will also be narrower).

You cannot eliminate the multiple harmonic sucks, but you can move them around so that they do not fall on those frequencies which you want to receive. You can do this (for example) by adding capacitors or inductors in the appropriate places (I won't go into this here).

You will probably be better off with a circuit using only capacitors and inductors. However, there will need to be more to it than the simple equivalent of a single coax stub. I have a typical circuit in mind, but you would have to calculate the values or do some 'jiggling' to values obtained by means of 'inspired guesswork'!

Having said all this, I'm sure that you are not the only one having trouble with 6m hitting TV (antenna amplifier or not). I wouldn't be surprised if there are several off-the-shelf filters which are purpose-made, and don't cost too much. If not, let me know - I'll move to the USA and set up in business!

73,
Ian.

Dave -

Traditionally, 6m has been the best way to get the "Worked all channel 2's" award. Various low and high pass filters, even (maybe especially) those that are effective on HF tend to be ineffective on 6m. The main problem is that 6m sits right in the middle of what would've been TV channel 1. TV sets tend to have RF front ends that are very poor in terms of strong adjacent channel signal performance. Also, TV's are usually poorly shielded (how many 15KHz harmonics can you count?) so 6m will be picked up by the power wiring and the TV circuitry itself!

What to do? I can't say what if anything will work for you, but here are a few things to try. I'm assuming that your 6m rig is clean, so my suggestions all apply to the TV system. 6m harmonics should not be much of an issue even if present because they impact only one VHF TV channel (11 I think). The basic goal here is to reduce the 6m signal strength at the TV's, TV amp and TV antenna.

1. Move your 6m dipole as far from the TV antenna as possible. The dipole is physically small (10' or so long), so this ought to be easy to do.

2. Keep the 6m and TV ant cables as far apart as possible. You say that you get an SWR of 1.3:1 WITH a tuner? Better to adjust the 6m dipole so that you have a low SWR *WITHOUT* the tuner, assuming that you're feeding the dipole with coax. If this turns out to be the problem, a "current choke" balun at the dipole may also help. If you're feeding the dipole with twinlead, you need to be more careful about what is near the twinlead's path from the antenna to your radio. In either case, the idea is to prevent the 6m antenna feedline from radiating.

3. Orient the 6m dipole so that the TV antenna is directly off the end of the dipole. Putting the TV antenna in an antenna null is the simplest way to reduce the 6m signal level at the TV antenna.

4. Choke/filter the AC power lines feeding the TV amplifier and the TVs. Radio Shack (and others) sell a ferrite core for this. I think they're fairly inexpensive - $3 for 3 or so...

5. Build quarterwave stubs tuned to 6m and install them at the antenna inputs to the TV amp and the TVs. This will selectively reduce the 6m signal level to the amp/TVs. It's possible that the only one you'll really need is on the TV amp - assuming that it's the only box being overloaded. If channel 11 is used in your area, the stub may also affect it. If so, the stub may not be a good idea. (BTW, the halfwave stub

suggested elsewhere would also affect the 2nd harmonic of 6m. Lucky for you, 100MHz is not a TV channel. Unlucky if you're using the same antenna for FM broadcast!)

Good luck. Enjoy 6m!

Actually the online logs are a big help to us all, since it keeps down on the "insurance" contacts. Giving many more people the chance of getting through for the first time.

CW Antennas are just fine...

CW does have some relationship to antennas. Cannot antennas be optimized for use in the CW band segments, so...

I'd like to see designs for CW optimized yagi's and such...

>b) not a real ham band anyway. Give the radio back to
>your wife and tell her to get you a real radio. Tell her
>if she ever comes home with six meter junk again you
>are gonna take her out behind the barn.....

I sure dont understand that reply. 6 Meters is certainly a ham band and can be a very fun ham band at that. Try working some aurora or meteor scatter on 6 meters some time. Try to get WAS or DXCC or even 300 grids on 6 meters, especially with 10 watts and a dipole.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters, ARRL Letter & W1AW DX Bulletin, N2CY, WB2YQH/WB2RAJ & The 599 DX Report, W3UR & The Daily DX, N4AA & QRZ DX, WD4NGB, AC7DX, K8YSE, N0JK, CE6TBN, DL3TD, EA3AJI, EA5KB, F6AJA & Les Nouvelles DX, HA0DU, HK3JJH, HK6DOS, LU1DZ, PA3GIO, RA3SL, RA0FF, SM5DJZ, UA9XC, UA0MF, VK3EW and VU2JOS for the following DX information.

3A, MONACO. Laura, 3A2MD, is usually very active on 80 meters. Look for her on 3506 or 3798 kHz starting 0630z. She was also heard on 20 and 10 meters CW on 28031 kHz at 1330z or on 14033 kHz at 1500z working USA on long path. Frank, 3A2MW, is also active. Check 18135 kHz around 1000z or 14188 kHz around 1200z.

3C1, EQUATORIAL GUINEA. Erik, SM0AGD, is now active as 3C1AG until February 5th. He has been active on 80/40/30/12/10 meters CW and 20/15 meters RTTY. A report from John, SM5DJZ, indicates that Erik is using his normal AP8 GP, and has put up a dipole for 30 meters which later he will be changing into a 160 meter dipole. Erik has also promised some SSB activity, but his primary mode is CW. Erik has been very well taken care of by Alan/3C5I and his XYL, and they meet almost every night.
Suggested frequencies he intend to use are:
CW - 1825-1830, 3500-3510, 7000-7010, 10100-10110, 14035, 18085, 21035, 24905 and 28035 kHz
SSB - Around 14195, 21295 and 28495 kHz
RTTY - 14080, 18100, 21080, 24920 and 28080 kHz
QSL via his homecall SM0AGD. His pattern of operating last week seems to be the following:
10/12/15 meters - 0930-1730z 40 meters - 0200-0330z
20 meters - 2030-0130z 80 meters - 0430-0530z
30 meters - 0330-430z

3D2, CONWAY REEF (Update). Hrane, YT1AD, reported that the 2001 Conway Reef DXpedition needs 2 more operators for CE0ZT DXpeditions. If interested,

please send E-mail to: ce6tbn@dxpedition.org

3V, TUNISIA. A YL operator was heard at the controls last week from 3V8BB on 20 meters. Listen for Zaida to show up on 14260 kHz starting around 1100z and staying as late as 1400z.

3W, VIETNAM. This entity continues to have activity from it. 3W6AR was heard on 21274 kHz from about 0015z to 0100z. Hau, 3W6LI, was heard from Saigon on 28475 kHz around 0930z. QSL via IK2DUW.

3Y, BOUVET. Chuck, 3Y0C, continues to be active but mainly on 20 meters. However, he does show up once and awhile on 80/40/17 meters. From the WD4NGB Web page, Chuck's Icom PW1 amp is still not working, but support guys have been in daily contact with the Icom reps in Japan trying to find the problem on the PW1 amp. They are sending information back and forth daily on the results of many tests. Chuck's beam is repaired, and back up. He is still trying to make up some new antennas. The Hexbeam is the only one of the originals to be in one piece. It has been repaired, but the vertical was not repairable. He has put some low band wire antennas up and will work on them as time permits. Chuck has been very busy and in his spare time, he will try to get on RTTY within the next 2 days. Chuck has one more glitch in the RTTY software to correct, but it looks good.

A5, BHUTAN. The Johnson family (A52GJ, A52MJ, A52VJ and A52YL) will be active until February 2nd. Glenn, A52GJ, seems to be active the mostly. He has really been hitting the lower bands at various times lately. If you miss this activity, you will have another chance to work another operator. Look for Dimitri, RA9CO, to be active as A52CO March 15-21st on all bands CW and SSB.

AP, PAKISTAN. Bob, AP2JZB, has been calling CQ for stateside stations on 17/12/10 meters also daily between 1300-1430z. Check around 18125, 24950 and between 28470 and 28510 kHz. QSL via K2EWB.

C9, MOZAMBIQUE. Hans, C91CU, was active this past week on 14165 kHz for over an hour starting around 1715z.

D2, ANGOLA. Gabriele, D2EB, was heard on 15/10 meters this past week between 1700 and 1800z. Check 21333 and 28495 kHz. QSL via I3LLH.

D6, COMOROS. By the time you read this, the D68BT and D68WL will be QRT (expected at 1200z, Sunday, January 28th). Their estimated QSO count is around 24,000 QSOs in the log (with dupes, around 32,000). Check the following Web pages for more information:
Picture - http://www.qsl.net/ea3bt/Comoros-Picture_of_day.htm
Album Pictures - http://www.qsl.net/ea3bt/Comoros-Pictures_Album.htm
Log Search - http://www.qsl.net/ea3bt/Comoros-Logs%20Angl%E9s.htm

ADDED NOTE: If you missed working this operation, do not worry. A very large operation will be taking place between February 8-28th. Look for D68C to be active on all bands and modes.

FG, GUADELOUPE (Also KP4). Hiro, JA2EZD, who has been active throughout the Caribbean (FM/Martinigue, J6/St.Lucia, J7/Dominica) the last few weeks should be active from here as FG5BG. He is expected to leave here and head to Puerto Rico (KP4)in early February. Most of his activity has been on CW on 80/40/20/15/10, but there has been SSB. QSL via XW2A.

HK0, MALPELO ISLAND. Pedro, HK3JJH, sent a message to your editor in Spanish which I tried my best to translate. Pedro reports to OPDX that he is planning a DXpedition to Malpelo for which he has "corresponding permission". There were NO dates given. However, he is look for some help (green stamps) for this project. He plans to be on the island for a month and will be active on 80/40/20/17/15/12/10 meters SSB and possibly RTTY. Credits will be given to any individual or organiztion that helps or endorses his project.

IOTA DXPEDITIONS BY BERT. Bert, PA3GIO, informs OPDX that he is going to be very busy activing IOTAs this year in the Caribbean, Central America, India Ocean and the Tasman Sea. Here is his planned schedule:

March 11-16th - Bert, PA3GIO, will be active as V31GI on Southwest Caye, Glovers Reef, Belize (NA-180). Activity will be on 80-10 meters SSB only (check the usual IOTA or DX frequencies. QSL preferable by the Bureau to PA3GIO.
Website: http://www.pa3gio.nl/ca/southwest/
Mirror USA: http://www.qsl.net/pa3gio/ca/southwest/

March 28th through April 2nd - Bert, PA3GIO, will be active on Saba Island (NA-145) as PJ6/PA3GIO/m. Activity will be on 20-10 meters SSB only (IOTA or DX frequencies). QSL preferable by the Bureau to PA3GIO.
Website: http://www.pa3gio.nl/ca/PJ6/
Mirror USA: http://www.qsl.net/pa3gio/ca/PJ6/

September 8-14th (Exact dates depending on flights) - Bert, PA3GIO, will be active as VK9CQ from Cocos Keeling (OC-003). Activity will be on 80-10 meters SSB only (IOTA or DX frequencies). QSL preferable by the Bureau to PA3GIO.
Website: http://www.pa3gio.nl/VK9CQ/
Mirror USA: http://www.qsl.net/pa3gio/VK9CQ/

September 15-22nd (Exact dates depending on flights) - Bert, PA3GIO, will be as VK9XV from Christmas Island (OC-002). Look for activity on 80-10 meters SSB only (IOTA or DX frequencies). QSL preferable by the Bureau to PA3GIO.
Website: http://www.pa3gio.nl/VK9XV/
Mirror USA: http://www.qsl.net/pa3gio/VK9XV/

October 9-15th (Exact dates depending on flights) - Bert, PA3GIO, will be active as VK9LO from Lord Howe Island (OC-004). Activity will be on 80-10 meters SSB only (IOTA or DX frequencies). QSL preferable by the Bureau to PA3GIO.
Website: http://www.pa3gio.nl/VK9LO/

Mirror USA: http://www.qsl.net/pa3gio/VK9LO/

** ADDED NOTE. Bert adds that since January 17, 2001, he has mailed 20000 direct and bureau VK9CQ and VK9XV QSL cards. You can see what the VK9 QSL card looks like at his Web site: http://www.pa3gio.nl/

IOTA NEWS.....
AN-006. Paul, UX2HO, will once again be active as EM1HO in February from the Antarctic, from the Vernadtsky Base on Galindez Island. He will be active on all modes and bands (WARC and 6m included). QSL via I2PJA direct or bureau.

AS-025. Operator Yuri, RA0FU, is now active from the Island of Kunashir (RR-15-05) and will be active until January 31st. He will use an Icom 756PRO and R7 antenna. QSL direct to: Yuri Burykh, P.O. Box 12, Yu-Sakhalinsk-23, 693023 Russia. Detailed information is expected to appear on the "Asia DX Window-HF WebCluster" at: http://dx.bgtelecom.ru

AS-062. Alex/RU0LM will once again be operating as RU0LM/0 from Shikotan Island for about two month. His activity may begin next week or early February. QSL via UA0MF: Mike Filippov, P.O.Box 20, (not 29), Vladivostok, 690021,Russia.

J2, DJIBOUTI. Jean, J28NH, has been active lately on PSK31 on 10 meters on 28121 kHz around 0645z and 20 meters on 14080 kHz around 1700z. He has also been heard on 12 meters SSB on 24955 kHz around 1345z.

J3, GRENADA. Willi, DJ7RJ, is now active as J3/DJ7RJ until February 3rd. Over the last few days, he was heard on 80/40/20/15/12/10 meters CW/SSB. Check 80/40 meters after 0200z as late as 0800z, 20/15 meters after 1900z and 12/10 meters after 1330z. QSL via DJ7RJ.

KH9, WAKE ISLAND. Start looking for Terry, K7ASU, to be active from here as K7ASU/KH9 until February 24th. His activity will be mostly on PSK31 and with some CW. QSL via K7ASU.

NEW DXNL EDITOR. Lothar Wilke, DL3TD, Chairman of the DARC Committee for DX and HF Contesting, has announced a new editor for the DARC DX Newsletter. The editor will be Karlfried Henrichs, DL1EK, who is a well-known person within the DX and contest community. The first DARC DX Newsletter edited by DL1EK will be published during the first week of February. You can reach Karlfried via his E-mail: dxnl@darc.de

QSL INFO AND NEWS.....
David, VK3EW, reports that direct QSLs cards for the special event station, AX3OLY (VK3), active during the 2000 Olympic Games, will be going out or should be received shortly. Also, if you are in the log and did not send a card you will receive a special QSL via the Bureau shortly. The AX3OLY station achieved a QSO total of close to 1800 in 102 DXCC Countries in around 27 hours of the total operating time. QSLs for AX3OLY go to VK3WI.

Alan, VK8AV, was active as AX8AV on January 25-26th. Remember January 26th was Australia Day. QSL via UA9XC. Log search can be found on the Web site at: http://dx.komi.ru/ua9xc/ax8av.htm

Pepe, EA5KB, informs OPDX that he is now the QSL Manager for the following stations: CX5AO, CX2AQ, CO8CY and CE2LZR. He has all the logs. He states to please QSL via the bureau or direct to CBA.

Jon, N0JK, reports that he has received the QSL cards from the printer for his FG/N0JK operation, and they should be going out this past weekend. His FG/N0JK activity took place at the end of November where he was active on 6 meters and was in the CQWW CW Contest. More info can be found on the Web page at: http://communities.msn.com/6mdx

Oscar, HK6DOS, (QSL Manager for CO6XN) reports that the cost of the air mail postage increased in Colombia. To U.S.A., Canada, Central and South America it has gone up 60% and to Europe, Asia, Africa and Oceania 65%. One dollar is not enough to answer one QSL card. The note of one "green stamp" is a low denomination, and he can't change it for the real value. He states that it is better to send an IRC or two dollars. QSL cards that arrive without IRC or two "green stamps" will be answered via bureau.

Ron, AC7DX, informs OPDX that he has taken over the chores (from NU4N) as QSL Manager for the following stations: KL9A, KL7FH, WL7KY and KL1SLE.

The "Far East Island DX Club" (FEIDXC) has begun to send QSL cards out for the RK0FWL/p DXpedition (July-August 2000) from Moneron Island (IOTA AS-149). If you have not sent for the card, but are planning to, REMEMBER to send it to: Eugene Popov, P.O.Box 79, Yu-Sakhalinsk-10, 693010, Russia. It MUST have a name under the new requirements by the Russia postal service or the mail will be returned. The RK0FWL/p Web site with a Log Search, Photos and information on the island, can be found at: http://dx.bgtelecom.ru/shams/as149.html

Stations ZX7R and ZX7CW that were active over the past weekend from Fort King Magicians in Natal, Capital of Rio Grande do Norte State-RN (PS7), get QSLed via PS7HF: Fabio Hoelz, P.O. Box 974, Natal - RN ZIP: 59041-970, Brazil, South America.

S2, BANGLADESH. The "ARRL Letter and DX Bulletin" states John, KX7YT, is active from Dhaka until February 1st as S21YV. His activity will be on 20 meters only with operations on SSB, PSK31, MFSK16, and possibly CW and RTTY. He will be looking for stateside stations between 0100-0200z and 1500-1700z. He has been alternating days on 14195 kHz SSB and 14071 kHz on PSK31. QSL via KX7YT. Core says he will apply for an extension of operating authority and hopes to be back in Bangladesh in April as well.

SPECIAL EVENT. Only a few days left to work ZY3WSF which is active during the World-wide Social Forum (FSM) (taking place now through January 30th) for the first time, in the city of Porto Cheers, state of Rio Grande do Sul, Brazil. Activity is expected on 80-10 meters CW/SSB. QSL via PY3FBI ONLY DIRECT. Gilberto is NOT A MEMBER OF THE BUREAU.

TT8, CHAD. Two stations were active this past week, TT8FC and TT8RH. TT8FC was 7012 kHz between 0245 and 0430z. QSL via EA4AHK. TT8RH was heard on 20/15 meters CW. Activity on 15 meters was between 1030 and 1345 on 21020 kHz and 20 meters on 14010 kHz after 1600z. QSL TT8RH via F8BBT.

V2, ANTIGUA. Chuck, N2CY, will be operating here from February 27th through March 4th, and expects to sign as V26CY. He will be an entry in the ARRL SSB Contest, but expects to be on the air prior to the contest on all bands including the WARC bands, SSB and CW. QSL to his home call N2CY.

VP8, FALKLAND ISLANDS. Paul, VP8DBQ, has been active on 20/15 meters between 0930z and 1030z. Check 21297 and 14250 kHz. QSL via M1AIB.

VU EMERGENCY COMMUNICATION. A major earthquake hit India last week and the following information was provided by Jose Jacob, VU2JOS: "Members of National Institute of Amateur Radio (NIAR), VU2NRO, Hyderabad have established HF/VHF stations in the earthquake affected areas of Gujarat for providing emergency relief communications to the Government. Our main frequency is 14.160 Mhz. The callsigns are VU2LIC, VU2MYH, VU2LFA, VU3RBN..... Other local and out station Hams are also active." So, it is requested that all international amateur radio operators please stay clear of 14160 kHz and 7023 kHz until further notice.

YJ, VANUATU. Currently Sigi/DK9FN and Bernhard/DL2GAC are active as YJ0AFN and YJ0ABS, respectively, until February 10th. They do hope to activate some of the rare IOTA islands if they can solve transportation problem. Sigi is active mostly on CW, and Bernhard on SSB. Sigi is trying to work Europe on the low bands around his sunrise (there were 80m CW spots around 1700z). QSL YJ0AFN via HA8FW and YJ0ABS via DL2GAC.

288. Screwdriver antenna for apartment

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-28 23:02:38 UTC
From: jason_hsu@my-deja.com
Message-ID: <9528eagcs1@nnrp1.deja.com>
Source record: 18143
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.misc

Some of the questions I have include:
1. Can I use one if I only have 8 feet of clearance on the small patio (8 feet wide, 8 feet tall, 6 feet wide) outside my sliding door? Is it possible to mount the antenna at a slant? I want to hear about any creative solutions from you.
2. What type of mount/tripod would be appropriate? (I don't have a railing.)
3. How quickly can I assemble and disassemble the antenna? (For stealth and security reasons, I need to remove the antenna when I am not operating.)
4. Which versions (original DK-3, ElectraSlide, etc.) of the Screwdriver are most appropriate for me? What advantages do the more expensive versions have over the original? Can some versions (like the D&K KH-600 HF MOBILE ANTENNA) really operate on 160m?

SOME BACKGROUND:
I am seriously considering a Screwdriver antenna for operating HF from my ground floor apartment (no big trees or bushes close enough to conceal wires and keep them out of the way of people or dogs passing by). A mobile antenna would be less cumbersome to work with than a big wire antenna. The Screwdriver seems to be the best antenna for me.

I have had modest success with Hamsticks I am borrowing, but I know that Screwdrivers are more efficient. Also, Screwdrivers are multi-band and are easier to tune (due to the automatic tuning aspect). Has anyone used a Screwdriver antenna for non-mobile operation?

I was considering a Texas Bugcatcher, but I am not sure about the quality of the version from Texas Radio Products, and the version from GLA Systems is too expensive. Screwdriver antennas are almost as efficient, and several versions sell for near or below $200.

Message-ID: <3A7527F9.AA2D9EF4@oio.net>
Source record: 18144
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.misc

jason,
1. Yes, probably, to both questions. Just have to try it
and see.
2. Your imagination is your only limit. How about a large
flower pot, fill it with concrete with a pipe standing up
in the center of it. Mount the screwdriver on a pipe that
would fit into the one in the pot. Paint the concrete
green and leave it on the patio. (tell them your plant died)
3. Beats me, just depends on how much you practice (LOL).
4. I think 'which' antenna you choose would be more a matter
of how much you want to pay for it. The 'High-Searas'(s) are
nice, but I don't think they're worth the cost. Up to you...
4A. 160 meter operation is going to depend on the length of the
'whip' you use, and if you use a capacitive hat. It's
certainly possible.

'Doc

291. 8ZB ?

Hi All,

I worked 8ZB during the CQ 160m CW contest, I know it's a Saudi Arabian
callsign, but anyone know
the exact location of the operator ?

Many thanks!

MikeT ...

Ps: Already checked all the callsign search engines and found nothing :(

Depends on where "this" is. I'm reading it and posting this
reply in rec.radio.amateur.policy which IS "the place".

It's too bad that the message headers don't indicate which
group the message being replied to was read from.

(This will be my last crosspost to the other groups about CW,
though.)

What you need to understand is that Jim is a dyed in the wool
Code Nazi (not to be confused with a member of the National
Socialist Party) and 6M can be accessed by the unwashed scum
(no code techs) thus is not a "real" ham band. In the late great code
debates Jim could often be found berating the codeless vermin now
he contents himself with carom shots at bands.

In Jim's defense he lives in a long way from polite society
and suffers from prostrate problems--yes Jim I meant to spell
it that way.

And that's the rest of the story.....

BTW ^ is real close to Channel 2 the local Fox affiliate I restrain
myself during the football season.

Just when you think it's safe to look under a rock,
whatta you find ?

Gerald McPOP !! Nice to see you are still alive, and still
worried about what's in the other boys pants..... Things
slow over there in REC.RADIO.RANT&RAVE or did you
finally buy a radio so you are ready to work some Deee-X ?

Anyway, six meters has nothing to do with CW, McPOP.
Six meters is your basic boring, wait for a six months to
work the same guy you worked six months ago, and
screw up every TV in the neighborhood whlie you do it
band. Seem some of us just figured that out :-)

It's a good band for people who can't expand their
horizons to things as big as WAS - lot's of Grid Squares to
work. About as much fun as talking to guys like you on
a VHF repeater.

So did you get your Extra Lite ticket yet McPOP ??

Got your baby monitor all hooked up so you don't miss
any of that exciting six meter action ??

Yep, about as much fun as getting laid by a hooker with AIDS.

> Try to get WAS or DXCC or even 300 grids on 6 meters,
> especially with 10 watts and a dipole.

I doubt seriously that it's humanly possible to stay awake that
long. But if it blows your dress up, go for it.

Don't bother. It's about the crappiest site I have ever seen. Let's stick to AC6V's site, because he knows what he's doing and what the DXing community wants: Information and not crappy, eyehurting advertisements.

But thanks for the link anyway, it's good to have a comparison between a good site and a really crappy one. So far I thought that no one could beat old Charles in terms of lacking contents and crappy design, but our friend from Belgium sure went past him all the way long.

Hi!

He wasn't signing DK8ZB, just 8ZB ????

I asked for the call 3 times, he definately sent just 8ZB ... very
strange.
Never mind, it was great fun anyways!

I don't think I've ever worked some many stations in such a short period
on 160m :)

Cheers!

MT.

So you are working with a "gain challenged" antenna system.

> always get trodden on by european stations

Damn. Must be your antenna. Which on the other must perform so
unbelievably, extremely, outstandingly well that

a) you dig out stations that no one else can copy
b) you work somehing no one else has ever heard of
c) you work something doesn't even exist
but d) it outperforms the rest of Europe in what cannot have been
anything but a murderous pile up from the troddy fellas.

Surely, you have outsmarted them all.

The P40AV cards are going out now. I received cards back from my 97, 98 operation just two weeks ago from the P4 bureau. These were sent to Aruba instead of the correct address. I am also in the process of sending these out the same way received.

JA cards have been sent for the stations asking for direct.

Many US cards sent without SASE so these will be sent through the bureau also.

Interesting opinion.
Plenty of extras on 6 meters, the extras who had to pass 20 wpm.
Plenty of "died in the wool" CW operators on 6 meters also. Who thankfully
shot down the recent proposal of doing away with CW sub band there.
As for real DXers, try working DXCC or WAZ on 6 meters, not an easy task.
I tried it on 6 meters after I worked 5 band DXCC and 5 band WAZ on HF with
all home brew antennas and 100 watts.
You were right about one thing, it can be a while between openings, nothing
wrong with being ready for when they happen.

An updated version of ClusterBuster2000 is now available at:

http://kh2d.net/software/

New features include:

Select displayed DX spots based on continent of sender.

Filtering of spots by DXCC prefix.

CT Interface - for feeding cluster spots to CT's TNC port.
Also can be used to feed spots to a Logging program
with a TNC port.

Select displayed DX spots by mode - CW or SSB.

Alarm text - makes noise if a specified text string is found
in a DX spot or announce message.

ClusterBuster2000 also incorporates radio control for Icom,
Kenwood, Kachina, TenTec Pegasus, and some Yaesu
radios.

Demo software is available for downloading. The 800x600
screen version demo runs for 25 minutes.

The Kachina version of ClusterBuster2000 is available from
Kachina Communications, Inc. and may be download from
the Kachina web site at:

http://www.kachina-az.com/news.htm

Thanks for the help Jim. I was at a loss to explain to this original poster just how much of a Jackass you are but you with this response have done so most eloquently.

I thought a "real DXer" such as yourself would have the ability to work some rare stuff of the most difficult band but I guess you just aren't as good as you think you are. Oh Well I guess you better leave 6M for the real men.

Watch out for those Brown Snakes.

Gosh Jim,

Do you just open your mouth to change feet?

Under US rules which would be in effect in Guam
50 to 50.1 MHz and 144 to 144.1 are reserved for CW only.
A recent FCC ruling upheld this rule not allowing
even narrow band data in these two sub-bands.

Now perhaps you will entertain us with a rant how
6 and 2 meters are not "real ham" bands.
This one is a good solid 10 on the putz meter.

And a recent FCC ruling upheld that Morse code challenged
morons (like you) can get extra tickets too, but that doesn't
mean you deserve any respect from the rest of us.

McPOP, go find me an amateur band segment where
CW is NOT allowed. CW is allowed on any band anywhere.
Hence there are no CW subbands.

Not that it would matter to you, cuz you probably don't
have a real radio yet anyway.

Go play in traffic in .POLICY where you belong. Yes, 144mhz is
a great band. Keeps the handy talky geeks like you busy so
the rest of us can enjoy HF.

I doubt anybody in this newsgroup is interested in you
rehashing See Double You, so go away before you piss the
DX'ers off.

319. ChipSwitch & Uniden HR2510 ONLINE MANUALS! *>FREE<* PDF

Newsgroup: rec.radio.amateur.dx
Date: 2001-01-31 16:33:19 UTC
From: Karl Vesterling <kjv@adelphia.net>
Message-ID: <j7Xd6.525$cm3.80119@news1.news.adelphia.net>
Source record: 18174
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.cb

For those of you who have purchased an HR2510 or Chipswitch and need a manual to it... Here's where to get downloadable versions of them *>FREE<* !

You will need the Adobe Acrobat viewer.

ChipSwitch Manual
http://kjv.homeip.net/~hr2510/html/chipswitch_information.phtml

The link to the manual is at the top of the page, just to the right of the Adobe Acrobat logo. You'll note a lot of care has been taken in putting together this ChipSwitch manual. It closely resembles the original manual for the HR2510. If you have sold a radio with a chipswitch, you may want to print out a copy for the person who purchased it instead of searching for the original manual. This one is by far easier to read and understand.

HR2510 Manual
http://kjv.homeip.net/~hr2510/html/radio_service.phtml?manufacturer=Uniden&model=HR2510

Click on the link above, then scroll down and you'll see the online version of the manual.This one is a bit larger than the Chipswitch manual as it's a series of bitmaps instead of text typed in. In the future I may decide to make a combination owners manual for the HR2510 and the Chipswitch and combine them into a single document. But for now they'll be two separate documents. Be prepared to wait a long time for this download if you are on Dialup.

**NOTE: The original HR2510 manual had the schematic in tri-fold fashion on the back of the front cover page. Because it didn't scan well, and most printers can't print out the detail (IE, anything inkjet) I decided to leave it out. Plus the fact that you'd need paper larger than 8 1/2" X 11" (Letter Size). So if you're looking for the schematic don't bother to download this manual, it's not included in it. Thought I'd mention it before anyone got disappointed.

We are looking for other manuals!!!!!

If you have an owners manual to a popular older model radio (Cobra 2000, or some such other radio) and it's in nice condition please contact lbridge1@juno.com (Doc's Wife) for information. What we would like to do is start to add on-line manuals to radios on Doc's site. We'll gladly pay for the shipping to and from yourself, and will have the manual back to you in a very short time.

Please, no manuals for newer models that are still in print. We're not out to step on the manufacturers toes here, we're just out to help the CB and Amateur community gain easy

access to otherwise scarcely available documents.

As amusing as your personal experiences are Jim, most of us don't know what its like to get laid by a hooker with aids so that doesn't lend anything to the conversation. You obviously must pay for any sex, so most readers have no point of reference incommon with you. Yep, your comment is pointless in this forum Jim.

Jim are able to communicate without your repressed sexual desires taking over?

> 73, Jim KH2D
> Grids Are For Kids - Real DX'ers Work Zones.

BAWAHAHAHAHAHA! Sure Jim. If you didn't have a KH2 call one wonders if anyone would talk to you. I take that back, if those hookers with aids you pay for have a license I bet they would. They better considering the bucks you have dropped on them, eh? BTW, How many KWs you running big DXer? Yeah, its tough getting those zones with 1000's of watts during the solar peak! Even harder when you have DX clusters to wet nurse you!

No Jimmy, I don't frequent .POLICY and I have no issue with CW either way. You seem unable to post anything close to reality. Your little world seems in turmoil, no wonder you are jealous of folks on 6 having a good time. Poor bitter little boy.

BTW, I am not your "Boss" Jimmy. If I were you would have been terminated long ago. Or at least given a medical release.

Brag some more about those "ZONES" worked with high power during the solar peak. How impressive...not.

Bye Jimmy!

326. rec.radio.old.farts

Has this group changed from rec.radio.dx to rec.radio.old.farts?

Or possibly rec.radio.old.farts.who-like-to-argue?

Geezus fellahs! Get a grip and talk about DX!

Take the arguments to .policy or .misc

Ask your ISP to sponsor you with a rec.radio.old.fart.subgroup...

Imagine the possibilities!

r.r.o.f.argue
r.r.o.f.bitch/complain
r.r.o.f.rant
r.r.o.f.damn.whippersnappers
r.r.o.f.real.hams.luv.cw
r.r.o.f.20.meters.is-my-life

and my personal favorite,

rec.radio.old.fart.get-a-life!

Whew!

Now lets get back to DX...

Anyone heard 3Y0C lately?...

Gary, WG7X

Good Day Jim,

Sorry, Brown Tree Snakes, I defer your expertise in this area.

Thanks so much for showing all of us just how closely you are in
touch with your inner child as demonstrated by your increasingly
immature posts.

Perhaps I missed it, did you address the mistake you made
about there being no CW sub bands? No, I didn't think so.
Would you care to? No I didn't think so.

I can't wait to see your reasoned mature reply to this missive.

Please confine you witty retorts to the newsgroup I don't want
or need your schoolyard nonsense in my mailbox. If it makes you
feel better you can thumb your nose at me.

Given this inspiration perhaps you can think up a new name to
call me; perhaps even, dare we hope, one that makes some sense.

Well, Glenn, I hate to bust your bubble, but I've probably worked
more people on six meters by accident than you have on purpose,
for whatever that's worth (nothing probably).

But let's change the program. I'm not sure you are a ham,
because I haven't seen your callsign, but let's do this.

I don't like six meters. I've given a number of reasons why I
don't like six meters. I'll be happy to elaborate on why I
don't like six meters, if you are interested.

You've done nothing but attack me, because either you DO
like six meters, or you don't like me. In turn, I've responded
to your attacks.

So let's discuss this like big boys. What it is about six meters
that you DO like ? Or are you not interested in discussing your
opinons (or hearing anyone elses opinions) because you are
just looking for a keyboard duel, like old McPOP is ? Never
mind the CRT psychoanalysis of my world, try to attack the
subject at hand instead of attacking anybody with opinions
that don't conform to yours.

Do you have an OPINION on six meters that you'd like to
share with us or are you just a Wayward Keyboard Warrior
looking for somebody to argue with ?

Yes, somebody sent me a WAV file of Bernie dragging him
off 80 meters to go to 30 meters... But I've never heard
him on the radio, his lack of antenna system coupled with
my lousy antenna probably account for that. But then
again the guy up in Saipan with the big tower hasn't
heard him either.

Closest we've come to hearing him is a KH6 making a JA
list on 20 meters to work him.

But we don't mind. We wanna save some DX for later,
if we work everything right now, we won't have anything
to do but argue with the kids in .POLICY.

Nothing I said about you requirtes a ham license Jimmy-Boy.

> I don't like six meters. I've given a number of reasons why I
> don't like six meters. I'll be happy to elaborate on why I
> don't like six meters, if you are interested.

Here let me recap your brilliance for you Jimmy-Boy. Your reasons:

1."not a real ham band anyway"
2."It's a good band for people who can't expand their horizons to things as
big as WAS - lot's of Grid Squares to work."
3."About as much fun as talking to guys like you on a VHF repeater"
4."about as much fun as getting laid by a hooker with AIDS."

Yes that really shows you for what you are doesn't it Jimmy?

> You've done nothing but attack me,

Like in your reply to me and I quote "........with pinheads like McPOP."
Wrong again Mr. Pot.

> because either you DO
> like six meters, or you don't like me. In turn, I've responded
> to your attacks.

I made no attacks Jimmy. I questioned your spew if that is what you mean. You bragged about your experience with being "laid by a hooker with aids." That's you talking not me Jimmy.

> So let's discuss this like big boys. What it is about six meters
> that you DO like ? Or are you not interested in discussing your

> that don't conform to yours.

Wrong again Jimmy. I questioned your spew, turned your own words back to you in questions and all I get in return is this whine.

> Do you have an OPINION on six meters that you'd like to
> share with us or are you just a Wayward Keyboard Warrior
> looking for somebody to argue with ?

I think 6 meters is great. So is every other band above and below. I use all of them that I can. Only an ignorant person suffering dearly from low self worth would get on and say crap like: "not a real ham band anyway" or "It's a good band for people who can't expand their horizons to things as big as WAS - lot's of Grid Squares to work." or "About as much fun as talking to guys like you on a VHF repeater" or "about as much fun as getting laid by a hooker with AIDS.". Do you recall what raving idiot spoke those words? Now get up on your little soapbox and talk about opinions and attacks Jimmy-Boy. You keep making that dunce's hat look bigger and bigger on your head.

Glenn

332. Radio stations on 8000m peak expeditions?

Hello!

A bit off topic may be, but please help! This is posted also in
rec.climbing!

Next year there is a Bulgarian expedition on K2, first from my country
there. I have to tackle the question with radio communications, but
unfortunately there are to many variables :-(

Any info is appreciated! I will try also some radio-amateur groups.

Have you been to such expedition? What kind of radios did you use?
Model, maker or at least some specs (power, frequency)?

What about batteries? I guess the new LiIon are the best for cold
places.

In the base camp what kind of transmitter? Antenna?

Are there any special models for exp. use?

How long do you use a handy? Always on?

Anybody know of special regulations in Pakistan?

Thanks in advance!
Kalin.

From what I've read in that dumbass "Morse replacement code" forum, you've got a

fairly decent sense of humor. Now, what I can't understand is, how does one person with a fairly good sense of humor get to be so vitriolic and downright offensive dealing with somebody who made an honest mistake copying a call? It's not like he killed your grandmother or anything - he simply miscopied a call. Is

that reason enough to berate him publicly? What gives? When you started dxing, were you a top-of-the-line dxer right away?

AFAIK,the open 1/4 wave cable is a short circuit for the concerning frequency.Though he should take the frequency of the tv-channel for the 1/4 wave calculation.

wrote:

>I think 6 meters is great.

That's a pretty broad statement, but we'll take it at face value,
and try to continue this nicely, or get it over with. I don't a) care
if you have or call sign, or b) need to know what it is, I was
just wondering if you did/didn't have one cuz I figured if you
didn't you hadn't been operating on six meters too much.

You are obviously mad about something, or don't understand
sarcasm. One or the other. But doesn't really matter. Things
like "Grids are for Kids, Real Hams Work Zones" are intended
to be funny, but obviously you don't think so :-)

Personally, I don't like six meters because:

1. I find it very boring compared to the HF bands. It's a band
that requires a lot of patience waiting for openings, and when
openings do occur, you'd better be close to the radio because
they usually don't last very long. I don't have the time, or the
patience (or a baby monitor) so I use my radio time for other
things.

2. I live on an island in the middle of the ocean, surrounded
by water, and there are no land masses in the immediate
vicinity that have ham populations. This cycle has not
materialized like the last one did, so when we do get six
meter openings, about all we can work here is Japan or one
or two guys in Hong Kong. On a lucky day we hear a VK or
two. I'm sure if I lived in New Jersey, or where ever you do
that I'd hear more people on six with short skip. But out
here it's a bust.

3. When we do get openings (to JA) I can work 150 to 300
stations usually before the band goes away. But with computer
logging, I find I'm working a very small percentage of 'new'
guys - guys I haven't already worked on six meters. So I find
that even when the band is open, and even when I have
people calling me, it's unproductive time because I'm giving
signal reports to guys who already worked me a half dozen
times on six meters. I can only assume they are bored, so the
same old DX is better than no DX at all. I don't mind sitting
in here for two hours passing out signal reports so somebody
can get a 'new one' but it's nuts to work the same guys,

over, and over, and over. Be nice if I was TALKING to them,
but I'm not. Just JA1xxx 599 TU QRZ. Waste of time.

4. I'm tired of pileups. I'd rather have an interesting conversation
on the radio with someone that has common interests, but
when there is a language barrier (I don't speak much Japanese)
that's tuff to do, so if I want to chat, other bands are a much
better choice. I've heard North American signals on six meters
one time in sixteen years...

5. I find it rather silly for hams to sit on one band, ten meters
in this case, 28.885 to be exact, waiting for a DIFFERENT band
to open so they can 'work' each other on the OTHER band.
One of the things we are supposed to learn, as hams is to
choose the right band/time of day to communicate with a
desired distant location. If I want to talk to V73AT, and Tim
is on 10 meters, and we can hear each other, why should
we bother checking six meters every six minutes to see if
we can hear each other on that band, as opposed to just
having our chat on 10 meters and getting it over with ?
I understand the 'new one' logic, but since I don't collect
QSL cards and don't need any awards, that aspect doesn't
interest me either.

The guy who originally started this nonsense, by finding a six
meter radio under the Christmas tree, was obviously a new
ham.

I think six meters is a very bad choice for a new ham because:

1. It's by far the best band we have to destroy the neighbors
TV picture. Unfortunatly, the guy in the radio store didn't
bother to tell the new ham's wife that when she was
shopping for Christmas presents.

Sure, there are tuned stubs and filters and moving
antennas around and torroids and a million things you can do to
try and fix TVI, but 'new' hams don't usually understand all
that, and shouldn't be expected to, because they are 'new'.

Having your neighbor banging on your front door screaming
about his TVI is not necessarily a good experience for a new
ham, especially if he has no idea how to fix the problem. It
might make him gun shy - maybe he'll think that ALL the ham
bands are going to make the TV next door go nuts.

2. Since it's not a band that's alive and active any time of
the day or night, finding someone to talk to on six meters
is a challenge, depending on where you are I guess, and
since most 'new' hams don't have a grasp as to what to expect
in all situations, and shouldn't be expected to, I could
imagine that a new ham could easily become bored with
a week or two of nothing coming out of his radio but

hiss.....

One of the problems we face today, or so I keep hearing, is getting new people interested in amateur radio. If we get a new one, probably would be a good idea to try and keep him interested, and I can't imagine sitting and listening to a six meter radio hiss for an hour after dinner every nite is gonna do that. I would imagine that a new ham would have a lot more fun on 20 meters or 15 meters or 10 meters for the simple fact that the reason he hooked up the radio and put up the antenna is because he wants to TALK to somebody, and his chances of doing that on a daily basis, at whatever time of the day he has to spend on ham radio, are much greater on those bands than on six meters. After hams have been hams for a while, they develop other interests - building stuff, playing with ham software, etc. But most new hams wanna TALK.

Six meters may be a 'great' band for someone like you, because you've been around long enuff to know what you are getting into - possible TVI problems, long waits for infrequent openings, etc. But 'new' hams have been told they are gonna 'Work The World On Amateur Radio', and have no idea what to expect, so six meters, in my opinion, sucks as a band choice for a new ham.

Anyway, that's my opinion on six meters, as if you care. If you'd like to expand on the 'it's a great band' theory, I'll be glad to read your opinion with an open mind. Maybe you can change my opinion.

If you want to continue the argument, send your comments to me via email so we don't bore the troops any more than we already have. I check my email about once a week and I'm always open for suggestions as to what to tell my psychologist is wrong with me, and you seem to be just full of them.....

One of things that amazes me about Usenet is that there always seems to be somebody around that can sense severe personality defects in other people by reading fonts on computer screen. You obviously aren't a medical professional, or you wouldn't let something as trivial as this newsgroup get your blood pressure up. You also obviously aren't smart enuff to figure out that if you sit here and type bullshit about me for the rest of your life, it only makes me laugh.

If I walked out of my front door and tripped over you, Glenn, I wouldn't know who you were. So where you get the idea that I would care in the least little bit about what you think of me just totally amazes me.

Your chain has been yanked. Live with it.

Anyway, if you wanna type about six meters, go for
it. If it'll make you feel better to tell me about all my
mental problems, send me an email. I can always use
a good laugh. Have fun on the Magic Band.

Maybe we should make Usenet a ham band. We
could call it the Tradgic Band......

Oh, stupid serious me. I got it now! So telling someone that "you will realize that dxing is not your cup of tea", along with cynical comments of "outsmarting them all" is supposed to be stand-up comedy!!!
Well, I guess if you consider that Tom Green, Paulie Shore, Adam Sandler and Howard Stern are considered great comedians, this all of a sudden becomes hillarious.

Too bad he wasn't able to hit him in the face with a microphone. That would have been a riot.

As you know, K2 is a very dangerous mountain to climb; some say that is
more difficult that Everest. There are a number of books on
climbing Mount Everest that have the actual radio equipment used
on the climb. Perhaps the K2 books, which are less frequent, may have
the same. Since this is a life threatening mountain, I would check
with those people who actually climbed K2 or Everest and determine
what they used for communications between base camp and the climbers
and between the climbers. Also find out any difficulties they had
with the equipment/antennas etc. Check several sources.
GET THE BEST; LIVES MAY DEPEND UPON IT.

Try reading the whole paragraph rather than the first 5 words Jimmy, here
I'll repost it for you.

I said:

"I think 6 meters is great. So is every other band above and below. I use
all
of them that I can. Only an ignorant person suffering dearly from low self
worth would get on and say crap like: "not a real ham band anyway" or "It's
a good band for people who can't expand their horizons to things as big as
WAS - lot's of Grid Squares to work." or "About as much fun as talking to
guys like you on a VHF repeater" or "about as much fun as getting laid by a
hooker with AIDS.". Do you recall what raving idiot spoke those words? Now
get up on your little soapbox and talk about opinions and attacks
Jimmy-Boy."

Never answered my question possibly due to your inability to justify your
rude comments but the soapbox rant was on like I commanded. :-)

Glenn KB7PKC

BTW: Big DX tip for you Jimmy. To operate on 6 meters you don't have to
stare at the radio and listen to white noise for hours on end. Some of us
can monitor the band and do other things. Wow!

Hi!

Yup, but to be honest I'm really not too bothered.
This was the first 160m contest I'd taken an active part in, but by the looks
of
some of the messages in this thread I'm really not welcome ...
I'd been told it was a band for the miserable old bastards, but I didn't
beleive it, perhaps
it was true after all ???

It's a shame, radio is a great hobby, I can see why it is in decline though
if the older
generation treat new comers in this way ...

Cheers anyways ...

Obviously you are one of those old miserable giffers ...

Lets put the story straight here ...

Firstly, I never claimed to be a great DXer, I enjoy radio as a HOBBY, nothing else.
I usually find most radio amateurs to be a pleasure to talk to, even if I do make a mistake every now and then, after all none of us are perfect, not even you !

Trying to copy down a BADLY sent callsign at high speeds using morse code isn't easy, but AT LEAST I TRIED!
I guess you are one of these miserable old sods who would prefer the "younger generation" to stay on the internet and not venture into radio ?
Perhaps this is why the younger generation of today feel uneasy going on the radio ?????

Have you ever though about encouraging people rather than taking such a negative approach, you'd be amazed at the results!!

I use mainly all valve equipment, homebrew antenna systems in a VERY small garden, 10m long by11m wide, could you do better ???

Now, if you have nothing sensible or constructive to say then may I suggest you book yourself in
for a sense of humour transplant, we are in the 21st centuary now, NOT the stone age !

Regards ...

I don't own a microphone, so that would have been hilarious indeed.

But if you want to reason with me, here we go: If someone goes on the
band and wants to work something, I *expect* him to know what he's
doing. I *expect* him to use his brain. If not, he's prone to be made
fun of.

Done.

Apart from the fact that you take this way too seriously. Be a good pal
and work some DX with us Yooropeans ;-)

I would suggest that you confer with several manufacturers, letting them know your intentions. They know their equipment's limitations; they've probably assisted in every possibly installation that exists. Also, their corporation name will be riding on the success or failure of their equipment, so they'll hopefully do their utmost to ensure a successful outcome. You might even be able to work out an agreement with one of manufacturers -- they donate their best communication gear for the climb in exchange for the publicity of it having done the job.

I wish your team a safe return! They'll be in my thoughts and prayers.

Hrmpf... Not all of us are created equal, contrary to what the US Constitution says. What if the guy just started dxing? Following your logic, not one of us should be able to do anything at any time whatsoever for fear of being ridiculed. So you have your Catch 22: if you want to do something, do it right, but you can't do it right without practice, and practice often involves being wrong. I know some top-of-the-line dxers back home who, after receiving their first ham license ever, proceeded to call CQ DX on 80 meters in the middle of the day. A lot of them would have quit had they been ridiculed. They hadn't been, and so they became first class dxers.
My point is the following: Mike hasn't done anything wrong - he *miscopied* a call. Now, I don't know about your experience of the bands, but in my book, miscopying a call is a misdemeanor waaaaay below all those QRM-ers, pile-up policemen, QSL-card rip-off sellers, band hogs, breakers, poor dx-traffic handlers, cheating contesters, phony QSL printers, legal limit power abusers, work-rare-dx-under-ten-different-calls operators, lousy spellers, two-foreign-language-word-speaking dxers, etc.

Here's an example not unlike yours from that forum: if someone with two prosthetic legs goes into the street and starts walking, I *expect* him to know what he's doing. I *expect* him to use his brain. If not, he's prone to be made fun of.

> Apart from the fact that you take this way too seriously. Be a good pal
> and work some DX with us Yooropeans ;-)

Can't. Currently in the process of searching for a house and installing a tower (in that order). So I'll CU on the air sometime in the summer. I make a solemn promise not to miscopy any calls.

Yup. And a week ago, we told him that, and told him whom we thought he really worked. But since Usenet is like the Energizer Bunny, it keeps going, and going, and going.....

I think the cause of this discussion is the fact that today it seems that many people are doing a lot of the 'work' in DX on the internet instead of the radio. Pre 'work' doesn't seem to bother anybody. Post 'work' does.

Used to be, if you worked 8ZB on 160, you'd drop a card in the bureau for him, and two years or three years later, you'd get it back from the HZ bureau, marked 'NO SUCH CALL' and you'd say Oh Well and go look for another HZ to work on 160.

Today it's very common to see people post lists of calls on the internet after a contest: "I worked the following guys during CQWW and can't find QSL info for any of them. Can somebody help." Once he's figured out, based on post contest replies via the internet, what the correct calls are he really worked, then he runs looking for online logs to see if the DX got HIS call right so he can send his QSL for a 'new' one.....

What Mike does when he finds out whom he really worked is Mike's business - he has to develop his own morality when it comes to DX or anything else.

But the melding of the internet with amateur radio has caused the development of trends that are contrary to the way that we 'used' to do things, so they don't sit well with some of the more 'traditional' DX'ers.

Some guys even view the use of DX clusters as 'cheating'. But when you think about it, they are really a handicap :-)

Until we get to the point where we no longer determine the level of our fellow hams manhood based only on how many postcards he has in his shoebox, we will always have these type of discussions.

HI
i ues a Screwdriver off the back of my moble home it works very will
it stick up pass the top of the roof it is only up abt. 6ft. of the
grownd so i can take it down for use on the VAN . i thank one of the
reason it work so good is the hold moble home is the grownd plan steel skin.
to take off just undo power plug (power for tunning Ant.) amd lift off
I thank you would need some kind of grownd plan a long wire or some
thing

366. bizarre band noises?

Newsgroup: rec.radio.amateur.dx
Date: 2001-02-04 04:38:56 UTC
From: k7jy@aol.com
Message-ID: <20010203233856.20024.00000540@ng-cf1.aol.com>
Source record: 17920

Anybody know of a tape that might identify peculiar noises heard on the bands? I've been a ham for 35 years and I've often wondered about some of the truly weird noises I sometimes hear. I'm not talking about the weird ones we make- like rtty or slow scan tv- I know those (sometimes I create those!). I mean the whooshes or the ones that cruise up the frequencies, etc. Or the ones created by certain medical equipment, etc. If anybody knows of a recording that identifies some of these I'd be most grateful if you passed the info along to me. Thanks and 73, de John, K7JY, Seattle.

367. Capacitance hats

Newsgroup: rec.radio.amateur.dx
Date: 2001-02-04 05:33:01 UTC
From: jason_hsu@my-deja.com
Message-ID: <95ipieaak1@nnrp1.deja.com>
Source record: 17921
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.equipment

I understand that capacitance hats are a loading scheme used to work low frequencies with a shortened antenna. Capacitance hats are more efficient than inductive loading coils but aren't very practical for mobile use (due to the impact of the wind).

My questions:
1. How close to the top of an antenna must the capacitance hat be? Does it have to be at the very top, or can it be several inches below the top?
2. If I buy a Screwdriver antenna, can I use a shorter whip antenna combined with a capacitance hat if the longer whip makes the overall antenna height too great? (I live in an apartment, and I am interested in buying a Screwdriver antenna.)
3. Can I buy a capacitance hat from vendors?
4. Are there formulas that one can use to calculate various performance parameters of a capacitance hat?
5. What are the ramifications of different capacitance hat designs? Designs include a single wire, disk, circle with spokes, and spider webs.
6. How do you build a capacitance hat? I imagine that various mechanical issues (supporting all the conductors, keeping the capacitance hat from sliding down the whip, etc.) come into play.

Fair enough. At least *I* have an excuse for banging on the keyboard instead of chasing dx: I am temporarily QRT due to a search for a good tower spot (i.e. house). Why anyone else would waste time on the newsgroups in the sunspot cycle peak, is beyond me.

> I think the cause of this discussion is the fact that today it
> seems that many people are doing a lot of the 'work' in DX
> on the internet instead of the radio. Pre 'work' doesn't
> seem to bother anybody. Post 'work' does.

That is a valid point, too. However, this case still doesn't seem to be about a gross ham radio misconduct or a violation of some secret ham code. We're talking probably an unexperienced part-time ham operator who wanted some information about a HZ station he believed he had QSO-ed. And I quote "I worked 8ZB during the CQ 160m CW contest, I know it's a Saudi Arabian callsign, but anyone know the exact location of the operator ?"

So, he wasn't really trying to patch up a broken call after the fact, was he? And even if he was, so what? Ham radio is about enjoying a hobby and pursuing it for one's own pleasure. Whoever is going to cheat is only cheating himself.

> Used to be, if you worked 8ZB on 160, you'd drop a card
> in the bureau for him, and two years or three years later,
> you'd get it back from the HZ bureau, marked 'NO SUCH

> to work on 160.

Used to be. Nowadays we have PC's and the Internet and I for one prefer it this way. I consider them very useful tools that allow me to enjoy my hobby much more than before. Why keep paper logs and multiplier sheets when computers can do it for us? Why wait for three years to find out you worked a ghost when Internet can tell you that today?

> Today it's very common to see people post lists of calls
> on the internet after a contest: "I worked the following

And how is that different from a DX cluster? How about call lists and dx-nets?
You don't even have to hear the dx you're "contacting", let alone copy his
callsign. All you have to do is guess the report.
On the other hand, I've heard some people comparing dx-nets to "shooting fish in
the barrell". If that is the case, then what is running 3 kW into a stack of
four monobanders 150 feet high? Sportsmanship?

> What Mike does when he finds out whom he really worked
> is Mike's business - he has to develop his own morality when
> it comes to DX or anything else.

Precisely. It's just that a negative approach never helps - it only alienates
people. I think we all agree that the last thing ham radio needs is to become a
closed group of geezers talking about "good old times" while trying desperately
to drive everyone else away. Once we achieve that status, it's the beginning of
an end. No fiber optics and digital cable in every home is going to keep us from
losing all of our bands, one at a time.

> But the melding of the internet with amateur radio has
> caused the development of trends that are contrary to
> the way that we 'used' to do things, so they don't sit
> well with some of the more 'traditional' DX'ers.

As I said, you bring up valid points, but no amount of bitchin', moanin' and
complainin' is going to solve legitimate problems. I know there are legitimate
problems and I don't pretend I have answers, but the "8ZB" case is not one of
them.

> Some guys even view the use of DX clusters as 'cheating'.
> But when you think about it, they are really a handicap :-)

Yes, they are, unless you had one of those setups I described above, but then
you really wouldn't need a dx-cluster, would you?

I used a 2 feet diameter hat some years back. It was constructed from
#6 solid copper wire. A 2' diameter circle of #6 with 6 #6 spokes in
a hexagon configuration. It retained its shape very well up to... uhhhh...
whatever the freeway speed limit was ;-) It did deform a little when it
encountered a low flying tree at 50mph, but was not difficult to repair
once we stopped...

I dunno, but I have heard the same sort of signal here in southern
California. It can be a real problem when it drifts onto a frequency where
I am trying to hear what another station is saying.

FYI
I was watching one of those Everest/K2 shows and one shot showed someone holding an Icom IC-T2H that was on 146.50 Mhz.

Ohio/Penn DX Bulletin No. 497

The Ohio/Penn DX PacketCluster
DX Bulletin No. 497
BID: $OPDX.497
February 5, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters, ARRL Letter & W1AW DX Bulletin, WA1YTW, W2LO, WB2YQH/WB2RAJ & The 599 DX Report, W3UR & The Daily DX, N4AA & QRZ DX, WB4PVT, WD4NGB, K5OVC, N5FPW, AJ6V, K6IPV, K6RO, K7BV, K8YSE, W9VA, WB9GYT, CE6TBN, CT1BNW, DL2VFR & IOTA-POST, DL4FP, F5NOD, F5SGI, G3XTT, G4XTA, GW4XXF, HK3JJH, I2UIY, I1JQJ/IK1ADH & 425 DX News, JA3MZB, PA5ET, S53R, V51EK, VE3NQK, VE7DP, VK4FW, VK0MM, YO3FWC, YS1RR and YT1AD for the following DX information.

EDITOR'S COMMENTS. There's so much DX activity and information there is not enough time and space to print it all..... Enjoy it all! de Tedd KB8NW

2000 CLINTON B. DESOTO CUP WINNER. The "ARRL Letter"reports that Bob Eshleman, W4DR, of Midlothian, Virginia, is the winner of the Clinton B. DeSoto Cup for 2000. The DeSoto Cup is a new ARRL award being presented for the first time which recognizes the station that's on top of the DXCC Challenge List as of September 30th each year. The Cup will be presented in May at Dayton's "DX Dinner" sponsored by the Southwest Ohio DX Association.

3D2, CONWAY REEF (UPDATE/DELAY). Hrane/YT1AD and Raymundo/YS1RR report that the Conway Reef DXpedition with 8 operators, 5 Yugoslavians, 2 Macedonian and 1 Salvadorean (YT1AD, YU7AV, YU1NR, YZ7AA, YU1DX, Z32ZM, Z32AU and YS1RR), will be delayed for 3 days. The delay is because YS1RR's visa for Fiji is still in process in the Fiji Embassy in Washington DC. Their departure now will be on February 17th, arriving Fiji on February 19th, and they will leave for Conway Reef on February 20th. They will arrive on the island February 21st later in the afternoon and hope to start operation on February 22nd at 0800z. On Conway Reef there will be 3 stations with 1KW each, using two 3 elements beam antennas for 10, 15, 20 meters, and 12, 17 meters. Vertical antennas will be used for the low bands, all running simultanously. The modes will be SSB, CW, RTTY, PSK31, SSTV, and the operation will last until March 1st, when they will head back to Fiji

on March 2nd. They will operate from March 2-8th from there with the callsigns 3D2AD, 3D2AU, 3D2NR, 3D2RR, 3D2ZM, 3D2AV,3D2AB and 3D2FW. For more details, check the following Web page: http://www.kragujevac.co.yu/3d2

3D2, CONWAY REEF (Second Operation Postponed). It has been reported that the Scandinavian DXpedition to Conway Reef planned by Mats/SM7PKK and Nils/SM6CAS, which was scheduled to take place April 5-24th, has been postponed. This due to some personal commitments by two of the team members.

3Y, BOUVET. Finally, good news to report from here. Reports indicate that Chuck's, 3Y0C, diesel generator is "FIXED". Chuck said they found a problem with the compression release. He will continue to collect info about the propane conversion just in case of more trouble. They will be able to get back to normal now and will be putting up new wire antennas for the low bands and some RTTY with a fully charged laptop. The other thing that this affects is that Chuck will be able to operate for more hours a day now instead of 30 minutes to a hour at a time because of weak batteries. However, the Icom PW1 amp is still dead.

4W, EAST TIMOR. Dennis, K7BV, provided information to OPDX about the rather dramatic drop off in activity from 4W since Dick, N6FF, and Dennis had the pleasure of operating from a wonderful temporary QTH provided by Thor, 4W6MM. Dennis states, "A recent E-mail from Thor, informs us that he was transferred out of Baucau right after we departed. He is now stationed in Oe Cusse, the small enclave to the west of East Timor proper that is completely surrounded by West Timor. He has his rig with him but only a 15 meter dipole two meters high for an antenna; a radical step-down from the 220' tower in Baucau. He has managed only about 100 QSOs under the current situation."
He also mentions, "Little has been heard from Ross 4W6UN; probably indicating he is as busy as ever carrying out his responsibilities to the UN mission in Timor Lorasae." ADDED NOTE (From Dennis): "Thousands of full color QSLs for our 4W/K7BV and 4W/N6FF operation will be in the mail within the next week. The story/photos of our trip will appear in an upcoming issue of DX Magazine." ADDED NOTE: Thor, 4W6MM, was reported this past weekend on 15 meters CW around 0500z and 0900z.

5U, NIGER. Look for operators Silvano/I2YSB, Paolo/I2UIY and Marcello/ IK2DIA to operate from here, February 27th through March 12th. Their callsigns will be issued after their arrival on the site. They will use separate callsigns for SSB and CW/RTTY/PSK31. Also, they will put on the air up to 3 stations when possible, operating from 160-10 meters on CW/SSB/ RTTY/PSK31 and on 6 meters on CW/SSB. QSLs for both callsigns will be OK via the Bureau or direct to I2YSB: Silvano Borsa, P.O.Box 45, 27036 Mortara (PV), Italy. A web page has been activated at:
http://digilander.iol.it/i2ysb/
There will be on-line logs and pictures available during their activity.

9H, MALTA. Karl, DL4FP, reports that there will be activity from February 15-18th using the callsign 9H3DLH (instead of 9H1DLH). QSL via DL4FP.

9M6, EAST MALAYSIA. Don, K6IPV, reports that plans are now finalized for their trip to Hillview Gardens Resort (9M6). Don, K6IPV/9M6IPT, will arrive at Hillview on the morning, local time, of February 11th. Since there is a complete station awaiting his arrival, he should be on the air that day, probably during the night to working stateside and Europe. Dave, W6AQ/ 9M6AQT, will arrive on the morning of February 14th. He will be bringing his Yaesu FT1000MP - MARK V, which they will use in the contest. Don mentions that he will make a stopover in Perth, Western Australia, for five days before going on to Hillview (around February 6th). He should be on the air from VK6XA's QTH, using VK6IPV. Don and Dave expect to operate more SSB than CW before the contest since neither of them claims to be a "hot shot" operator. They do anticipate using PSK-31 as well. They will do their best to correctly log every callsign that they can get and hope that the contesters will be patient with them as they will work toward accuracy rather than rate. They will operate the contest as a Multi-Single/Low Power entry. QSL via W6ORD, good in all callbooks and data bases for the last four years. Please do include SAE and sufficient postage for direct cards. Others will go by Bureau.

A5, BHUTAN. The Johnson family has left here (a day earlier than expected), but before leaving, Glenn, W0GJ (A52GJ), informed the DX Community that there are 7 new hams (nationals) with 10 meter privileges. Be on the lookout for them.

AP, PAKISTAN. Robert, S53R, informs OPDX that thanks to extensive help from "Pakistani Amateur Radio Society" and Tariq, AP2TJ, he will be active from the AP2ARS (ARS club station) from Islamabad. Activity will be almost 100% CW. He plans to be active from 40 meters up including WARC bands, mostly during the weekends due to work commitments. QSL should go to S53R. Robert adds, "In a very short period I'll be travelling to EZ, EY, EX and UK and will certinly try to do some radio from there too."

BQ9, PRATAS ISLAND. It was reported in the "425 DX News" that Paul, BV4FH, reports an operation as BQ9P is scheduled to take place from here March 6-15th.

C6, BAHAMAS. Gary, KI6T, is expected to be active February 13-18th as C6A/KI6T. He will also be active as C6AGS in the ARRL DX CW Contest. QSL both callsign via KI6T.

CE0Z, SAN AMBROSIO ISLAND (Update). Marco, CE6TBN, Team Leader for the 2001 San Ambrosio Island CE0ZT DXpedition, reports that a new team member has been added, Joe, KO4RR, (E30GA, K5K and T32R operations). He also mentioned that the CE0ZT San Ambrosio DXpedition will take part in the ARRL CW Contest February 17-18th, as a Multi-Operator/Single TX entry. The QSL Manager for CE0ZT (San Ambrosio San Felix group) is CE6TBN for outside USA and N6MZ for the USA.
CE6TBN - Marco A. Quijada, P.O.Box 1234, Temuco Chile
N6MZ - Michael Mraz, 15526 SE 50th St, Bellevue WA 98006-3611 USA

CQ, PORTUGAL. Cupido, CT1BNW, informs OPDX that he will operate during the next CQ WPX RTTY Contest, February 10-11th, using the special event callsign " CQ2CE ". The event is " Porto 2001 ", the Capital European

of culture. QSL only direct to: P.O.Box 4143, 4461-901 Senhora da Hora, Portugal.

CU8, AZORES ISLAND. Well-known DXer, Baldur, DJ6SI, was active this past weekend from Flores Island as CU8/DJ6SI. Activity was on 80/40/30/ 20/18/15/12/10 meters. Most of the activity was on CW and the WARC bands. QSL via his CBA.

D68, COMOROS. OPDX InterNet Subscribers will receive an additional bulletin containing the the latest and last update (very large) by Don Field, G3XTT, on the upcoming "Five Star DXers DXpedition" to D68. This contains info on the "D68C Awards Programme - SWLs", "Operating Patterns and Power Outages", "Contests Activity", "Pilot Stations" and their "QSL and QSLing Policy".

D68BT & D68WL ARE NOW QRT. Both Josep/EA3BT and Nuria/EA3WL are back in Barcelona as of Monday, the 29th. The final log count is more than 31,000 QSOs, and without dupes, they finally were 24,500 QSOs. The logs can be viewed at: http://www.qsl.net/ea3bt/Comoros-Logs_Angles.htm Josep's complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

DU, PHILIPPINES (IOTA Activity). Frank, VE7DP, informs OPDX that he will be here all during the month of February. He has been organizing with the "locals amateurs" in the Philippines to join him for several IOTA operations. The first one will be Polillo Island (OC-091) probably during the first part of this week. Roland/DU1KGJ (DX4RIG) and others wil be joining him. Other "targeted" islands are Lubang Island (OC-126), Batan Island (OC-092) and possibly a new unnumbered IOTA in the Luzon Coastal Island Group. Frank has meet with his partners last week, and they have decided on the following operating schedule:
OC-091 - Polillo Island. They will be active now through February 6th. Operators will be VE7DP, DU1KGJ(DX4RIG) and maybe 1-2 others.
OC-NEW - Activity from a new IOTA in the Luzon Coastal Islands Group is scheduled for February 8-11th. Operators will be VE7DP, DU1KGJ and memebers of DX1CW. They will applied for 4I1 prefix.
OC- 093. Batan Island. Activity will be scheduled for the last weekend in February. Operators will be VE7DP, 4F3XX, 4F1FZ and possibly others.
Frank, VE7DP, states more details will be forthcoming.....

HK0, MALPELO ISLAND. Last week (in OPDX.496) we mentioned that Pedro, HK3JJH, sent a message to your editor in Spanish which I tried my best to translate. This week I would like to thank both Rick Kissell, WB9GYT, and Mike Mattes, W2LO, who took the time to translate the message for me. Basically, I had the details right. Pedro is planning his next expedition to Malpelo, for which he already has the license. However, he did ask OPDX who he could contact about getting financial aid. Pedro states, "For example, the cheapest postage from here (Colombia) costs more than one American dollar." He receives only 80 American cents for an IRC, etc.... He will be on the

island for a month and won't be able to return sooner due to the lack of transportation. As mentioned last week, he will activate 6-10-12-15-17-20-40-80m SSB, I will try RTTY. Pedro states, " Of course contributors will be duly credited on the QSL card, it's also possible that I'll obtain a U.S. mailing address, to avoid a repeat of past problems with the mails. (I especially need a 6m rig with antenna, a lap-top, modem for RTTY.)" If you are interested in helping, let OPDX know and I will forward the message to Pedro.

HK0, MALPELO ISLAND. "The Daily DX" is reporting that a second operation is planned and scheduled to take place in April. Operators mentioned are: Jorge/HK5YBL, Jairo/HK5MQZ and Hiro/HK5QGX/JA8BWI. More details are forthcoming.

IOTA NEWS.....
AS-056. Masa, JA6GXK, will be active from Danjo Archipelago (Meshima Island), during the following schedule as follows: February 6-16th, February 27th-March 9th and March 21-30th. This is not a DXpedition. He will be active in his spare time. Suggested frequencies are: 14260 or 21260 kHz (both +/- 10kHz). QSL via only the Bureau.

EU-057. Andreas, DL5CW, will sign as DL5CW/p from Ummanz Island (GIA O-06), February 10-16th. Activity will be on CW/SSB on all HF bands. QSL via DL5CW.

EU-064. Jean-Marc, F5SGI, will be active as F5SGI/P from Yeu Island from April 14-21st. Activity will be mostly on CW, 80-10 meters. QSLs are sured via the bureau or CBA.

EU-129. Detlev/DL1RTW and Klaus/DL7UXG will sign homecall/p from Usedom Island (GIA O-013), April 2-4th. Activity will be on CW/SSB on 40-15 meters. QSLs via home callsigns.

OC-160. Bill, VK3FW, will arrive on Cumberland Island on February 6th for a possible 4 day stay. He states that this trip is work related, doing research for the "Enviroment Australia", so he will try to be active daily as time permits (mainly during his dark time hours). QSL direct via his home callsign with green stamps or IRC.

PJ2, CURACAO. Look for Larry/K6RO and Charlie/W6KK to be here from February 27th through March 5th. They will be active on CW and SSB and possibly RTTY. They will concentrate on the WARC bands before and after the contest. Larry, K6RO, will participate in ARRL SSB Contest as a SO/AB/HP effort using PJ2R. QSL PJ2R via K6RO. PJ2/K6RO and PJ2/W6KK via home calls.

PW0, ST. PETER AND ST. PAUL ROCKS. Team members of the St. Peter and St. Paul Rocks DXpedition (PW0S) have departed Recife, Brazil, on schedule on February 2nd, and expect to arrive on the Rocks about February 7th. It has been reported that a well-known Brazilian DXer Ely, PT7BZ, has joined the team. Operations are expected to be on 160 through 6 meters, CW, SSB and RTTY. QSL via KU9C.

QSL INFO AND NEWS.....
FR/F6KDF/T QSL UPDATE. "The QSLs are on the way", states Gil, F5NOD. Some are still being processed at their radio club F6KDF (around 2000 plus, but QSLs are received everyday). Gil states that he still receives many messages like: "QSL not received yet. -or- Have the QSLs been mailed???? -or- Did you receive my QSL ?". Gil will no longer answer these messages anymore. Next QSL sending will be at the end of this month or early in March.

NEW ADDRESS. Paul, G4XTA, the QSL Manager for 9G1BJ, 9G1YR, 9G1TM, VU3NSF and several rare UK callsigns, has informed OPDX that after living 18 years in the same place, he has a change of address. His new address is: Paul D.Godolphin, Pleasant View, Blencarn, Penrith CA10 1TX England.

Alan, K4AVQ, reports that the P40AV cards are going out now. He received cards back from his 1997 and 1998 operation just two weeks ago from the P4 bureau. These were sent to Aruba instead of the correct address. He is also in the process of sending these out the same way received. Alan mentions that JA cards have been sent for the stations asking for direct. Also, there were many U.S. cards sent without SASE, so these will be sent through the bureau.

QSL Update "Caribbean Tour 2000": Rob, PA5ET, reports, "We had many delays because of the holidays and many other reasons but the "Caribbean Tour 2000" QSLs (V26EA, V26ET, V26FM, V26WP, VP2MPA, 8P9JR, 8P9RS, 8P9JT and 8P9JU) finally arrived. As of the coming weekend and days after all direct QSLs will be mailed. As soon as all direct cards have been processed, the bureau cards will follow soon after. Direct QSLs can be sent to: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands."

V51ZSV, a special event station from Walvis Bay, Nambia, was on last week because the 500 kHz Wireless Telegraphy service from Walvis Bay Radio/V5W was officially closed down on the 1st February at 0900z. According to Hein Bertram, V51EK, the operation was to take place between January 26th and February 1st, CW only, operating around 14030, 21030 and 7030 kHz, depending on conditions. The station is situated on the premises of Walvis Bay Radio whose callsign had been ZSV until 1994 when they became V5W (hence the callsign).

VK0MM QSL INFORMATION. Alan, VK0MM, informs OPDX that the QSL Manager for VK0MM is Alan Roocroft, VK4AAR. QSL "DIRECT ONLY" to: Alan Roocroft, PO Box 421, Gatton, QLD 4343 Australia. Alan states "NO BURO CARDS". Alan is a well known and respected QSL manager, and he assures a turnaround of 24/48 hours once the cards are printed. The VK0MM card is in full color featuring the rare rockhopper penguin found at Macquarie Island. All excess proceeds from the QSLing process will be donated to "Camp Quality", a charity providing care for children with cancer and other terminal illnesses. Alan states, "The Australian postal system is efficient and secure, so please dig deep when mailing your cards." He also mentions that green stamps are preferred over IRCs. The log has been carefully checked, however if you receive "Not In Log" and are

CERTAIN that you had a QSO with VK0MM, then you should contact Alan direct at: vk0mm@yahoo.com
He will double check the original log in case of a typo. The QSL info page on the VK0MM website will be updated shortly with the above information.

T48, CUBA. "The No-Name DX-Group" will once again be operating from Santiago de Cuba this year. They will operating on 160 meters during the contest February 23-25th and the ARRL DX Contest in March 3-4th. They will also be operating on 20 and 40 meters as Multi-Op. It is hoped they will be active between the contests for prefix hunters. The logs will be posted on the "Kitchener Waterloo ARC" Web page at: http://www.kwarc.org
Click on the Cuban flag to go to the log site and follow the instructions. QSL via VE3ESE: Don Fisher, 48 Lucerne Dr., Kitchener, Ontario N2E 1B3.

VP5, TURKS AND CAICOS ISLANDS. Ed, AJ6V, will be operating in this month's ARRL DX CW Contest as VP5U from North Caicos Island in the single operator all band category. Look for him before and after the contest as VP5/AJ6V. QSL both callsigns to WA4WTG.

YK, SYRIA. The YK9A DXpedition is up and operating as this bulletin was being prepared. Reports from "The Daily DX" (again, as this bulletin was being prepared) indicated that the team has had some problems. The YK9A team arrived in Damascus, Syria, on February 3rd safely on schedule with about 90% of their equipment. Three of K9LA's bags didn't make it, but they hoped to pick them up on Sunday (the 3rd). Also, the report on Sunday, is that the team has lost contact with Bob, G4VGO. He was not present in Paris for the flight, and so far the team has not heard from him at all. They don't know why that is, but that means they have no FT-1000MP, or 1200W amp, 12V PS, or laptop. They now have to use the laptop which was used for the InterNet, for station logging. This will make the Internet access difficult. They will work out something. The team was a little out of sync with their schedule because they had to wait for the monitoring people which were not ready for them. The team will be active until February 12th. Activity will be on 160-6 meters CW, SSB and RTTY. Operators include Dick/N7RO, Bob/W4DR, Rosalie/N4CFL (YL), Carl/K9LA, Vicky/AE9YL (YL), Jim/W4PRO, Al/K3VN, Ali/JY4NE, Lee/VE7CC, Bob/G4VGO and the team leader Al/K7AR. There will be three stations active on the HF bands, with the fourth station monitoring 6 meter beacons and activity. Suggested frequencies are:
CW - 1815, 3515, 7015, 10110, 14002, 18085, 21002, 24905, 28002
SSB - 1840, 3790, 7047.5, 14145, 18115, 21195, 24935, 28295
RTTY - 14082, 21082, 28082 kHz
Check out the YK9A web site at: http://www.qsl.net/k7ar/yk9a_'01.htm
QSL cards will be handled by K9LA and may be sent via the bureau (outside of the US) or direct to Carl Luetzelschwab, 1227 Pion Road, Fort Wayne, IN 46845, USA. Cards will be available at the Dayton Hamvention.

YO DX HF CONTEST 2000 (Results). Ciprian, YO3FWC, reports that the final scores in the "YO DX HF Contest 2000" are now available on the "Romanian

Amateur Radio Federation" Web site at: http://www.qsl.net/yo3kaa

Z3, MACEDONIA. Zoki, Z31GB, informed OPDX that he has been signing Z33F since January 1st. He has been active on all modes and bands including the WARC bands. QSL via NN6C. Zoki states schedules can be made with him via his E-mail address at: z33f@freemail.org.mk

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

"the ones that cruise up the frequencies"
I found a strange one this week, and am clueless as to what it is. More
than once a day for the last 3 days, my BC9000 scanner has picked up a
signal around 50.4, and it is slowly dropping in freq. Don't know how high
or low it goes, but I've only heard it lowering in freq, for 20 minutes or
more, on more than one receiver. It doesn't seem to contain any data, etc,
it is just there, moving. If this IS common, please tell me more.
I'll have to check the page mentioned when I get some time to look it over.

True. What they used to do was make a ring of aluminum
with 4 "spokes" to couple it to the radiator. This way the
wind would blow thru it while mobile.

BTW - Don't forget that Art Bell returns tonite to late night radio.

see the URLs--> www.artbell.com and www.coasttocoastam.com

382. RADIO SHOW OFFERS $25 CASH FOR FIRST TELEPHONE QSL + OPINION FROM EACH COUNTRY!

Newsgroup: rec.radio.amateur.dx
Date: 2001-02-05 14:20:13 UTC
From: Hal Turner Radio Show <Hal.Turner@HalTurnerShow.com>
Message-ID: <95mcqt$pj3@dispatch.concentric.net>
Source record: 17937

Be sure to tune-in to the fastest-growing talk radio show in the world:

"The Hal Turner Radio Show"
Heard in 50+ countries around the world
Every Monday evening from 2300-2400 UTC
(8 PM - 9 PM Eastern US Time)
on WBCQ 7.415 MHz, short-wave
and simulcast live on the Internet at: http://www.HalTurnerShow.com

THE FIRST CALLER FROM EACH COUNTRY OUTSIDE THE USA WHO TELEPHONES THE HAL TURNER RADIO SHOW AND GETS ON THE AIR TO EXPRESS AN OPINION ON ANY OF TONIGHT'S TOPICS, WILL BE REWARDED WITH A $25 AMERICAN EXPRESS GIFT CHECK!

Tonight's topics: Jared Taylor of American Renaissance
exposes a grotesque scam by the US Dept. of Agriculture to pay billions to black farmers for "racism."

Also, hear about . . . . .

a) Mexicans in Los Angeles driving around with new, L.E.D. signs in their cars which read "F*ck You, this is still Mexico;

b) Anger over Christian Prayers that were given at the Inauguration of President Bush;

c) How homosexuals continue to prey on innocent children for their deviant lifestyle
d) The ongoing invasion of illegal and violent immigrants into America and other nations around the world.. . . . . and much more!

The TOLL-FREE Number to call in the US and CANADA to be heard on the air is 1-866-TALK169

Those OUTSIDE the US and Canada can call COLLECT - we will pay for the call ! Tell your local telephone company that you wish to make a collect call to the United States at Country Code 1, then 732-471-1713.

Remember, the show begins at 8:00 eastern US time, that's 2300 UTC Monday. Tune-in 7.415 MHz shortwave to listen and be sure to call-in first from your country!

Yippee! Worked 3B9FR last night and am looking for
QSL info. On the Web, I've seen both "direct" and
"via F6FNU".

In general, is there a "best place" to look for QSL info?

Thanks a lot!

Bruce K1FFX

Hi Bruce,

Nice email address :-) You need to visit Deja News and
get a FREE SPAM catcher....

There are about a million and sixty three places to look up
QSL info. Here's one:

http://www.qsl.net/pathfinder/WebClient/

Pathfinder is a program you can also download and install
on your computer and search various different places for
info if your prefer that over the web client.

If you go to:

http://www.ac6v.com

You'll find a whole lot more places to look, you can bookmark
the ones you like. Here's the specific page you can get
callbook info on (I found it by clicking HAM RADIO INDEX and
then Q from the main page):

http://www.ac6v.com/callbooks.htm

If it's ham radio related, and on the web, AC6V knows about
it, so it's a good place to start looking for anything.

Looking at the cluster spots, I see the kids are fighting over
3B9FR QSL's - one guy says DIRECT, another says F6FNU,
and another says NOT F6FNU.

The problem with a lot of online QSL info is it is gathered from
many different sources, and usually not verified, so it's not
always right. Look stuff up different places, then lick your
stamp and take your chances.

A source of always right QSL info is the GoList:

http://www.golist.net

which is a list maintained and sold (not free) by John, K1XN.
All the info on the list has been verified, and John spends a
lot of time making sure that it is correct. The GoList has been
the definitive source of QSL info for years. It's not expensive
and if you are serious about chasing post cards, it might be
a good investment.

And finally, a tip (from me). If you go into a bar, and meet
a really nice looking girl tomorrow nite, please ask HER what
her phone number is, because if you ask me two days later,
I might not know......

When you work DX, and you worked him because you
want a QSL, ask him. Never mind he's 'DX', never mind he
has a 'pileup'. Just say 'QSL INFO PLEASE ?'. Any good
DX operator that is working the masses will give his QSL
info every so often without being asked. But if you don't
hear it while you are trying to work him, just ask. 'DX'
guys, like 3B9FR, are hams like anybody else, and unless
they have a problem putting their hats on, they shouldn't
be bothered in the least by you asking. If he ignores you
or refuses to answer the question, he's either a SLIM
or an DX Nerd. So put him on your SLIM/Nerd list :-)

73, Jim KH2D

P.S. It's OK to ask in contests, too. I've done a lot of
contests from Guam, and it wouldn't be much fun for
me to do a contest if nobody called me. So if you give
me a point, I'm more than happy to tell you where to
get a card if you'd like one.

385. Yaesu MD-100 & FT-847 Audio Problems

Newsgroup: rec.radio.amateur.dx

I've been struggling with this problem for some time now. I guess I should of called Yaesu a lot sooner, or maybe they should of made this information known. (maybe they did?)

It seems that when the MD-100 mic is used with an FT-847, pin 5 and 7 need to be reversed. The operation is done at the bottom of the mic, NOT in the base or the plug to the radio. After reversing pin 5 and 7 I no longer receive complains about RF coming in with my signal. I think it was actually the electric noise from the fan at the back of the FT-847.

Good luck to all, mods are done at your own risk, so if your not sure how to solder send the mic to Yaesu for the operation to be done.

Reuben

Hi Bruce,

I worked 3B9FR on Aug 8, 1999 and I remember agonizing over where to send the QSL, just like you. Eventually, I sent it direct, I think to the Buckmaster address or something I found in DX Central. This sounds familiar:

Robert Gerard Felicite, 3B9FR
PO Box 31
Rodrigues Island
via Mauritius

and I think I added the "via Mauritius" based on someone's advice since 3B9 belongs to 3B8.

I got a card back in a reasonable time, 5 weeks or so. Sent SAE and one IRC.

73 and GL,
Kermit, AB1J

OK fellow DX'ers, little question from a beginning ham...

As a new DX'er, I encountered several DX stations giving me their call followed by "stroke number", like "SV2FPU / 8". This is pronounced as "... stroke portable eight".

So far so good, but when I enter this in my logging software (DX4WIN), like "xxx /P8", my log thinks the DX is in P8, which is... exactly: North Korea. I was amazed seeing this, imagine... Top of the pops in the Most Wanted charts... Some more information showed the DX was NOT in P8 **bummer** but on a Greek island...

I figured out a way round this in my log, but the question remains: what do the digits after the stroke mean? I know /P, /M, /MM... But what does the digit mean?

>http://www.qsl.net/on4cln/
>

Digit usually means call area.

When somebody says (speaks) "Kilowatt Hotel Two Dela Portable Eight"
it means KH2D/8, not KH2D/P8.

The P Phenomenon is only common in Europe. To the rest of us the
word 'portable' means '/' (slantbar on CW _.._.).

The number designates a call area. U.S. for example is divided
into 10 call areas, 0 thru 9. If W3xxx is operating in California, he
can sign W3xxx/6 (6 is California) if he wants to, but he's not
required to do so by U.S. amateur rules.

W3xxx in Guam signing "Whiskey Three Xray Xray Xray Portable King
Henry Two" would be W3xxx/KH2, and not W3xxx/PKH2.

I'm not sure if the /P thing is required in Europe by the rules or
not, Walter can probably tell you.

DL/ON4CLN/P is a bit redundant, as we kind of figure somebody
with an ON call operating in DL is 'portable', unless DL ran out of
DL calls and borrowed some from ON :-) But that's the way it's
done.

U.S. rules have changed over the years. Used to be, I KH2D moved
to Maryland (3rd call area) he was required to get a new call issued
with a 3 in it - so you could tell where U.S. hams were by the call.

3 used to be MD, PA, or DE. Now U.S. hams no longer have to
change calls when they move. So a 3 can be anywhere.

Then we got VANITY calls. Pick what you want. So somebody
in California (6th call area) can pick a 3 or a 2 or a 1 call.

U.S. hams are not required to sign portable anything anymore,
I don't think. So W3xxx can go anywhere a U.S. license is valid,
U.S., KP4, KV4, KH1-KH9, etc. and just sign W3xxx if he

wants to.

Also, used to be W3xxx in Guam would sign W3xxx/KH2.
Now he might sign KH2/W3xxx, if he wants to. But he
would NEVER sign KH2/W3xxx/P like people do in EU.

With all the possible combinations of / this and portable
that, it's very hard to write a computer program that can
resolve DXCC prefixes perfectly, every time, for every
combination imaginable. Some of them come pretty close,
but it's always a good idea to watch what your logging
program is going to save when the call has a / in it.

Forgot one thing, Franki:

> This is pronounced as "... stroke portable eight".

In Europe, maybe. But in the U.S. it would be either
"stroke eight" or "portable eight" but never as above.

Unless it's on a VHF repeater, then all bets are off :-)

On a repeater, it could "stroke moblie temporary AG
portable eight". So if you come to the U.S. and get
on two meters, the rules change :-)

Source record: 17956

Hello!

In Japan also it is very common practice to say the call area. For example,
JA8YBY/8 pronounced "portable 8" and meaning JA8YBY working portable in area 8 (Hokkaido island). Just saying portable is not a common practice. In Bulgaria, howewer, you can hear LZ2SAF/P as I work most of the time from the mountains. You don't need a call area.

So to sum up, no normal ham would use "portable" as a "P", so if you hear "portable <number>" think of "<slash> <number>".

73, GD DXing!
Kalin,
LZ2SAF/JA and KF6UTZ/JA

>So to sum up, no normal ham would use "portable" as a "P", so if you
>hear "portable <number>" think of "<slash> <number>".

Except on CW, where I hear it fairly often from European stations. (isn't
it required by the government in the U.K.?)

But yes, "portable" and "slash" are not used together; if you work a station
signing "/P" on CW or "slash portable" on phone, just remove the P or
"portable" before putting it in your computer.

And then, as KH2D says, double-check that your computer got the country
right.

(/M mobile stations and /MM maritime mobiles are also a problem. At least
they come up as England and Scotland so you don't think you've worked some
exotic rare country...)

Thanks to all for pointing this out to me...

Remark:

In Belgium, as small as it is, we don't have call areas, the numbers (ON4+5+6+7) indicate nothning more then foreigners with ON call, or sort of vanity call, or just simple and plain ON4... So /P means to ON4 "not in the regular qth as indicated on the licence"... We even have special receive special papers from the gouvernment to put in our wallet when we operate "/P" or "/M"

Thanks to all, I knew I could count on you!

Makes you wonder what high quality programming they must have that they
actually have to pay their listeners to phone in... :)

BTW, about a week ago I was listening around the bands with my FT840 to see
what I could find. I noticed that most SW broacasters would tune in on AM,
but there were some that did a better on the SSB modes. Is this just a quirk
in my equipment due to filtering and such, or are there SW broacasters that
use the SSB modes?

This really isn't what I've heard/read. I heard from ARRL reps at the Virginia Beach hamfest last autumn that they are actively exploring the issue and working out a secure way of handling electronic QSLs. In late December, in the "Daily DX", Bernie McClenny stated that we can expect to hear something about this from the ARRL soon and that the system might be in place by year-end. Given that Bernie edits a column in QST, I imagine that he probably has some pretty good inside info.

Well I use DL/ON4BAM/P every once in a while but more common is
DL/ON4BAM/M when cruising the autobahn...

Normally when logging if you input calls like that it should show the
DXCC as DL. If you put KL7/ON4BAM the logging soft should recognize
the DXCC as Alaska... the 'stoke portable' is less important.

I'm glad it's not a Dxpedition - the several thousand resident amateurs in Scotland might be a little miffed at some foreigner thinking that that their country badly needed activating!

Incidentally, WAB is a dead duck nowadays, don't waste your time 'activating the square'.

They said that two years ago. And they also said
the main objection to doing anything electronically
was that the large DXpeditions "generate too much
revenue" from QSL's and refuse to play. Simple
solution to that problem was given to the ARRL two
years ago also: If you go play DX in P5, you WILL
submit your logs electronically to the ARRL, or
NOBODY will get a click for working you. Problem
solved. Didn't take ten years to solve it.....

We don't need to waste time dreaming up 'secure'
methods for eQSL's. We don't need eQSL's:

1. P5 DXpedition sends their log to the ARRL.

2. You submit your P5 contact for a click, ARRL checks
the log.

Much simpler than sending 'secure' eQSL's all over the
place. Doesn't require a mainframe, only a PC.

If the ARRL 'works out a secure method' of handling
eQSL's, then they have to teach every ham on the
planet who intends on using eQSL's how the 'secure
method' works. Log submission only requires one
person to convert logs to a standard format, and
plop them into the database. No need to train the
troops. DXCC desk types in KH2D and P51DX and
either I'm in the log or I'm not. Project over. And
doesn't take ten years.....

How many hams use PGP signature or other security
methods on email now ? Very few. We can't assume
that all hams are computer literate, some still have
problems with regular old email, so why force them
to use something else they don't understand ?

If you want a paper card for your collection, you just
buy one from the P5 guys, like we've always done.

The ARRL is "working on it". Two years ago they
were "working on it". They deserve a big E for
effort..... It's 2001 already. The world is automated.
"Working on it" is no longer a good excuse.

No, MM/KH2D would be a SLIM operating from
Scotland, not me :-) If I was in Scotland, I'd be
playing golf, not playing radio.

Here's a question for you Walter. Why is it that
it used to be:

WB3IXC/KH2

but now it's always:

KH2/WB3IXC

???? I musta been sleeping cuz last cycle I sure don't
remember portable prefixes being in the front. I think
it has something to do with the EU /P you told us
about. Maybe we can blame that on CEPT. I worked
some guy last weekend in Alaska, KL7/KC8xxx. I asked
him why he was KL7/KC8xxx instead of KC8xxx/KL7
and he wasn't really sure why :-)

WB3IXC/KH2/P would definitly be weird. So we
shoved the KH2 to the front to make room for the
P ?

$$$$$. Green stamps. That's why.... Every time somebody works
some Deeee-X and shoves two bucks in an envelope and mails it
for a card, they are helping to insure it will never be done.

Instead of the ARRL telling us what to do, we should be telling them
what we WANT to do. But we can't. Because we are weak. We
place too much value on DXCC clicks.

If I went to P5 tomorrow and worked 80,000 guys, and required
$20 (U.S.) for a QSL card, everybody would SCREAM like hell. But
most of them would still send the $20. Cuz they need the click.
The ultimate importance in ham radio has been given to DXCC
clicks. So no matter what they cost, we'll buy one.....

There will always be paper QSL's for those who want
them, no matter what system we come up with for
electronic confirmation.

I've never 'wanted' QSL cards. But over the last 16
years, I got 40 or 50 thousand of them anyway. All
of which wound up in the local dump. I would have
much preferred to give the DXCC chasers a 'new
one' electronically as opposed to having them waste
their stamps and time and cards sending me QSL's.

Ed wrote
What do the letters QRP stand for? Thanks Ed
==========
Hi Ed -- QRP is not an acronym nor an abbreviation, it is a code first used by telegraphers, then by
wireless operators, then Hams

On 1st July 1913 the Q code finally became an official international information code,
updated as changing circumstances demanded to include new codes relating to such
matters as aviation and maritime.

Each Q-code (and there are a hundred or so) is not an abbreviation or acronym. And they
can take the form of a question or a reply. Thus QRP was
(strictly speaking still is) the
Q-code (in question form) for "Shall I decrease power?"
In reply form "I am decresing power" (sometimes with the power level e.g., 50W)

QRO means Shall I increase power? Or I am incresing power (level)

Hams have taken the liberty of using QRP to indicate a low power operation. The
commonly accepted max level of power for a QRP station is 5 watts and QRPp is one watt
or less.

If a ham is running maximum power 1500 Watts PEP, they will say
(taking more liberties)
they are operating QRO.

Other Q-Signals are (for comparison of no abbrev meaning or
acronym meaning)
QRT Shall I stop sending? Stop sending
QRU Have you anything for me? I have nothing for you
QRV Are you ready? I am ready.

Some cute acronyms made up by hams are
Quit running power
Quiet radio power
QSOs rarely possible
Queer radio people
None of these have any relation to the true derivation of QRP

Incidently, the long-distance low power record is held by KL7YU
and W7BVV using one
MicroWatt one millionth of a watt) over a 1,650 mile
Ten Meter path between Alaska and Oregon in 1970. This is the
equivalent of 1.6
BILLION Miles per Watt!!

More Q-Signals and history at URL:
http://www.wemsi.org/qsigs.html

So the short answer is QRP stands for nothing -- just a code made
up by some committee
90 years ago!

I haven't looked at it in awhile but I'm pretty sure the below is accurate:

D68: The country was originally under French control, and used the FH
prefix. At some point, the country was granted independence and the prefix
changed to D68. This action in itself would change the name and prefix but
not the DXCC entity status of the country.

Except.. that the people of one or two of the islands in the group didn't
want to be independent. They asked to remain under French rule, and France
kept them. Since there was now a difference in political administration,
these other islands were now a second DXCC entity. Since they were part of
the territory once known as FH, France left them with the FH prefix.

EA9/S0: Two different entities had used the EA9 prefix. (Ceuta & Melilla,
and Spanish Morocco) Spanish Morocco became independent as Western Sahara,
and changed to the (unofficial, as Morocco disputes the territory's
independence) S0 prefix. But Ceuta & Melilla remain under Spanish control,
and keep the EA9 prefix.

I don't know of any relationship between KC4 and T8.

QRP means low power transmission or transmitter and it's not a shorted phrase it's only part of the Q-Code.

Regards!

Ralf

Appreciate the informative answers from W9WI and KH2D. I read books and saw maps but was not sure and looked for someone who was more sure than I was. I worked FH and wondered whether to work, which, anyway, was easy ebcaus eof excellent equipment and skills of teh D68C expedition. But I missed S0 because I though that EA9 was same country.

I am amazed by the answer below. To be an instant expert in any area, you can advice to "Consult a map and re-read the book."

> can advice to "Consult a map and re-read the book."

Certainly not. But to be quite honest: Is it too much asked to get your homework done before you ask? A map would have revealed to you that the Western Sahara is nowhere near Ceuta or Melilla. The CIA world fact book would have revealed to you that there is no such country as Mayotte (for FH), but that there is an Islamic Republic somewhere in the Indian Ocean called the Comores. KC4 is Antarctica and a *little* off in relation to Belau. And your DXCC-book is completely outdated, plus it mentions the difference between country and entity.

Now, wouldn't it have been fun to "consult a map" and "re-read the book" and come up with the answer by yourself? Instead you chose to be pissed off at me for not having presented the answers to you on a silver platter. Oh well...

Source record: 17985

The MP and Mark V are very similar. The Mark V has the addition of RF pre-selector and interlocked pass band tuning and DSP but does not have the flexible selection of IF filters available in the M. Both have dual in-band receive.
The 1000D is older technology but still a very good tranceiver. It does not have DSP but does have dual receive with complete independence of band segment.
The Mark V is only available new(unless you just happen to get lucky) and run from $3200 to $3400 base price in the US without optional filters.
The MP has been running from $1800 to $2500 used depending on the filters and other options.
The 1000D has also been running in the same range.
I have owned all three tranceivers and presently just have the Mark V. I consider each one an improvement over the preceeding model but would consider buying either model but would probably buy the MP over the 1000D if price were the same. To me the extra expense of the Mark V is worth it especially in crowded high power interference situations. Good Luck

Here comes the silver platter:

Background on the Maidenhead Locator System:

http://www.geocities.com/Paris/8113/grid.html or
http://www.arrl.org/locate/gridinfo.html or
http://www.arrl.org/tis/info/HTML/grid-squares/grid.html

However, whatever you are looking for, this should be your starting
page:

http://www.ac6v.com and of course

http://ac6v.com/opaids.htm#GRID

Hope that helps.

Aw! Come on, Dave. Don't be such a misery. You'll have Leo (and lots of
others) thinking that the Scots are right unfriendly bunch who don't
welcome visitors. That's not so - or is it?

You will be surprised how little activity there may be from certain
places, even when the population is large. I never did get a QSL card
from Herefordshire in the days of 160m WABC!!

Have a good time, Leo (pity about having to use the 'MM' instead of
'GM'!).

73, Ian.

When in doubt, check the packet cluster logs. EA6/I1RSA was operating PSK on 14 Jan 2001 at 21070.8 MHz. Anything close to what you logged??

No problem Ian; always have a good time there. This will be my 7th trip in 2 1/2 years. The "MM" is certainly better than when I had to use "MM/W3LEO" - "What ship are you on OM?" "What's the prefix nmuber?" "My logging program won't take the call unless it's got a number." and so on........, HI.

And to Dave: I said "...not a DXpedition..." just to indicate that I wasn't going to be on all the time. And I've been surprised at the number of QSL requests I've received, particularly for 12 & 17 meters. Maybe not as many GM's get on those bands.

As to "...Incidentally, WAB is a dead duck nowadays..." -- I've had several hams who were still collecting WAB squares. Plus they have a web site:
Worked All Britain Awards Group [Revised 5 January 2001]
http://www.users.zetnet.co.uk/g1ntw/wab.htm

It may not be as active as it once was, but there is definitely still interest.

Cheers

Leo - W3LEO & MM0LEO

P.S. Dave: What's your callsign????

449. 4u1un qsl cards

I operated GB0SA in May of last year, and WAB info was definitely one piece of information requested, both 'phone and RTTY, and we were in the relatively populated Lake District.

73, doug
N6TQS/M0BPI
who now knows how to get WAB squares from his GPS.

What is the Principality of Seborga, anyway? I worked some T00 stations there several years ago and got some QSLs via the bureau. At the time I was operating pretty casually and wasn't keeping up at all on DX news. I never even knew what I worked. So what is it anyway? Where is it? Why is it?

Clueless in Massachusetts :-)

Thanks & 73,

Anyone used Microsoft Access data base for logging contacts and/or keeping track of QSL's for DXCC or other awards? I was starting to set up a data base, and thought someone might have some constructive suggestions.

Thanks & 73,
Paul AA6PZ

Use a real ham log instead of crufty software like Access. Logger comes
to mind. It has everything preconfigured to suit your means.

DXBase maintains its database in Access tables. You can read and modify
them with access or with the logging software.

I agree. While it can be done, why re-invent the wheel? There are a number of programs available from shareware on up depending on the depth required. I use Logic5 and recommend it to others. It can be rather intimidating to start, but once you get into it, very powerful. I learn new things about it all the time and its interactive capabilities, such as DX clusters, rig control.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters, AD1C, N1FOC, K2KW, WB2YQH/WB2RAJ & The 599 DX Report, W3LEO, W3UR & The Daily DX, N4AA & QRZ DX, WD4NGB, K6GNX, K6RO, N6RT, AF7O, NA7DB, K7BV, W7KNT, K8AV, K8YSE, NE8Z/HC1MD, W9VA, CE6TBN, CT1END, DL4KQ, F5NOD, F5PBL, F6AJA & Les Novelles DX, FM5GU, G3PJT, HB9BXE, HB9CRV, LZ1JZ, PS7AB, PY3DX, PY7ZZ, SM0GNU, UX0FF, VE7DP, VK4AAR, VK4FW, ZL2HU/ZL4HU and 4L1DA for the following DX information.

3B6, AGALEGA. Press Release Bulletin Nr. 12 (large) was released over the past weekend. In short, the team has added 4 new members, close to the maximum number of 20 operators. The new members are: Steve/N3SL, Stefan/SP9RTI, Leonid/4Z5FL and Antonio/CT1EPV. Other crew members are: Rene/HB9BQI, Christine/HB9BQW, Hans-Peter/HB9BXE, Hermann/HB9CRV, Cedric/HB9HFN, Karl/HB9JAI, Friedhelm/HB9JBI, Jacky/3B8CF, Luis/CT1AGF, Matthias/DL3KUD, Mart/DL6UAA, Jack/F6HMJ, Derek/G3KHZ and Ken/NK6F. Tom, 9A4DU, had to cancel his participation. He will continue his studies at Florida during the time the expedition will take place. The 3B6RF team is scheduled to arrive at Agalega on Thursday, May 3rd, and begin operations on Saturday, May 5th, for 14 days. OPDX InterNet Subscribers will receive the complete press release as an additional bulletin. The 3B6RF Web site is at: http://www.Agalega2000.ch

3W, VIETNAM. Claude, F5PBL, will be active from Ho Chi Minh City between March 22-30th. Activity will be on 15 and 10 meters, mainly on SSB, CW is also possible. A single/single entry will be made in the CQ WPX SSB Contest, the band is not yet selected. The exact callsign is not yet known. QSL via F5PBL, direct or via bureau.

3Y, BOUVET. Chuck, 3Y0C, continues to be active. According to the latest update (dated Feb. 10th) on WD4NGB's Web site: "Things have not changed a whole lot since the update on February 3rd. Chuck has been staying busy with his mission duties, trouble shooting equipment, and installing/ repairing antennas. He put up a 600 ft long wire to use on the low bands,

with counterpoise for for 160, 80 and 40m. These were destroyed by a storm the following day. Today, he completed installing dipoles for the low bands and will see if they will stay up. The Amp is still being worked on, and more information is expected from Japan on Monday to help determine what the problem is, and a fix or work around for it. Chuck has worked many on RTTY, but is taking a short break from it now since the equipment he is using on RTTY is having troubles. No update on the pick up date yet, so it still planed for the last part of February, and up to March 2nd. Will update as soon as I have anything more concrete. Chuck has been spending more time on the WARC bands lateley. He was on 12m with a HUGE EU pile up today..... Maybe the storms will allow the low band antennas to stay up more than one day. Chuck is still working CW by request only, on the same frequency as he is operating on SSB."

4I, PHILIPPINES (IOTA Activity/Update). Frank, VE7DP, informed OPDX early last week that the activity from Polillo Island (OC-091) as VE7DP/DU1 and DU1KGJ/p, made about 1600 QSOs in 2 days. However, propagation was poor, and they had problems with power interruptions between 2200-0200z and after 1700z. Over the past weekend, the Philippines locals and Frank organized an IOTA expedition to the unnumbered Luzon Coastal Island. They used the callsign 4I1P from the island of Marinduque. This island now has an IOTA of OC-244. QSL both operations via VE7DP or DX1CW. The next IOTA DXpedition will be to Batan Islands (OC-093), and they have applied for 4I2P callsign. Operation is to take place about February 24-25th. QSL via VE7DP or DX1CW. More info/details to follow.

6Y, JAMAICA (Update/High Schooling For DXing). The DXpedition University (DXU), the first of its kind to provide a training ground for energetic radio amateurs wanting to learn the foundational methods and tactics of DXpeditioning, is getting ready to hit the DXpedition trail. The group will be active from February 26th to March 6th signing 6Y8A or homecall/6Y5. Activity will be on all bands from 160-6 meters, mostly on SSB and CW though some PSK31 is possible. In addition to normal operations, the group will enter the ARRL DX SSB Contest with a Multi-2 entry. Operators will be Klein/WT6G, Mike/WA6O, David/K0COP, Tim/W6NS, Walter/N6XG, and Kenny/K2KW. QSL 6Y8A via WA4WTG, others via homecall. The group will have 4 stations with KW amplifiers on 160-6m, and use Force 12 vertical arrays for 160-6m. The DXU ops are learning the skills to run them with the best, so give them a call to help them improve their pileup skills! Questions go to Kenny, K2KW at: k2kw@prodigy.net
Also visit the following Web page for more info at: http://www.k2kw.com
There are 2 slots available if anyone wants to join the group.

9M0, SPRATLY ISLANDS (The UnDXpedition!). A press release by Darryl, AD7O, reports that the members of the "Central Arizona DX Association" are planning ("with NO fanfare and NO hype") their first "UnDXpedition". They will be operating from the Spratly Islands as 9M0M during the first week of March. Their interesting press release states:
" The UnDXpedition will have no more press releases until we return, and maybe not then. We could not find any pilots, no one understood satellite uplinking of logs, and nobody wanted to stick to any schedules.

There will be no sponsors of our radios, coax, amplifiers, or T-shirts, because we couldn't find any. All governments involved have taken a, - Who are these people anyway? - attitude. We did try to contact the San Miguel Brewery, but they didn't even call us back."
Operators will be Sally/KM5EP, Dennis/AF7Y, Jerry/WB9Z, Luis/XE1L, Darryl/AF7O and "unindicted co-conspirators" Dan/NA7DB and Mike/N7MB. Some of the above operators may enter the ARRL DX SSB Contest. They will operate from Sabah, Malaysia, as 9M6DBT and 9M6MBT for a few days before and after their activity on Spratly. They plan to operate CW and SSB on 80 through 10 meters. QSL the 9M6 callsigns via WN7J and the Spratly Island callsign of 9M0M via K7XN. A Web site has been set up for this operation at: http://www.xcvr.com/9M0M
The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

CE0, EASTER ISLAND. Several sources report to look for Arliss/W7XU and Holly/N0QJM to become active from here March 29th-April 9th. Reportedly, they will maninly concentrate on 6 meters.

CE0X, SAN AMBROSIO ISLAND (Bad News!). Early last week the team going here announced that they received some good news. The SUBTEL authorized the DXpedition to use the callsign CE0XT (their first choice) instead of CE0ZT. HOWEVER, on Saturday, pilot station Dr. Bill, K6GNX, reported:
"The team regrets to report that due to circumstances beyond their control regarding the boat transportation from Valparaiso to San Ambrosia the DXpedition must be canceled. Everyone is safe and well but very disappointed and they are returning home as soon as possible."

DAYTON HAMVENTION NEWS. According to the Dayton HamVention Web site, the DX Forum (and the Contest Forum) is going to be held this year at Hara Arena on Saturday in Room #4 from 8:30 AM until 12:30 PM. Check the Web page at: http://www.hamvention.org/forums.html

D6, COROMOS. The D68C operation is in full swing. Activity is on all bands and modes, and very easy to work. Activity will last until February 28th. QSL via G3SWH.

DX HOLIDAY WEB SITE HAS MOVED. Kenny, K2KW, informs OPDX that the DX Holiday, "The Ultimate DXpedition Resource", has moved to a new server. DX Holiday is a site that lists QTHs around the world where people have operated on DXpeditions, and provides information on how to contact the owners. There is information on Rent-a-QTHs, Ham Friendly Hotels, and Club stations. Please change your links to: http://www.dxholiday.com
The old site will be decommissioned in the near future at: http://pages.prodigy.net/k2kw/qthlist
The response and support for DX Holiday has been great, with new locations and information coming in all the time. In addition, the "Team Vertical", information on vertical antennas for DXpeditions and past operations, has been moved to Kenny's personal site at: http://www.k2kw.com

EO6, UKRAINE (Attention Prefix Hunters). Nikolay, UX0FF, informs OPDX that he is licensed to use EO6F, a special contest callsign that expires

at end of February this year. He states that he is the only one which has this prefix in Ukraine. His last CW operation with EO6F will be in the ARRL DX CW Contest as an All Bands/High Power entry. QSL via UX0FF: Nikolay Lavreka, P.O.Box 3, IZMAIL, 68600, UKRAINE.

FM, MARTINIQUE. Dan/IV3TDM, Max/IV3FHH and Luke/IV3JVJ, from the Pordenone gang, will hit the airwaves from here, March 17-23rd. Dan will operate on SSB, Max on CW and Luke on RTTY, also SSB. They will try to concentrate on the lower bands, and their target is to "generate the hugest pile-up of their lives". They should have a good signal, so please call them! The callsigns will be FM/homecall. All QSLs go to IV3TDM CBA. The Pordenone gang will operate from Clement's, FM5GU, station, and then join the FM5GU team for the CQ WPX SSB Contest.

FO0/M, MARQUESAS ISLANDS. By the time you read this, Wulf/DL1AWI, Mat/ DL5XU, Peter/DL3APO and his wife Birgit/DG0OBN should have moved from Rangiroa (OC-066) to Nuku Hiva in the Marquesas Island group. Look for them to be active until around February 28th. Reports indicate that they will sign FO/DL1AWI, although their earlier announcements stated that they would sign FO0/homecall. Activity should be on 160-10 meters CW/SSB and some RTTY, also probably SSTV. Online logs will be available via the Web page http://www.qsl.net/dj7aa/fo0
QSL their Marquesas operation via DL1AWI. QSL their Rangiroa operation via DL3APO. Addresses can be found in OPDX.491.

HC, ECUADOR. Dr. Rick, NE8Z/HC1MD, reports that Dr. Scott Olitsky, AC3A, will soon be active from Ecuador as AC3A/HC5. Scott will be on a medical mission to perform ocular surgery on children in Azogues, Ecuador, roughly between March 2-16th. During his off hours he will be active on HF, CW and SSB. Scott will also be active on 2m EME as AC3A/HC5 from the beautiful mountain home of Guillermo/HC5GL and his XYL Maya/HC5DX in Chaullabamba, Ecuador. Many members of the Cuenca Radio Club (HC5CRC) will be assisting Scott with his EME station setup. There will be an HF station manned by HC5PJ/Gerardo, HC5SF/Fausto and HC1HC/HC5/Alfredo on 14155 kHz during the EME operations. This may be the first ever EME operation from Ecuador. QSL via AC3A. Please contact Scott before his trip if you have any questions about the EME operation at: solitsky@acsu.buffalo.edu

IOTA NEWS.....
NA-203. Joel, HP7/F5PAC, was active from IOTA NA-170 last week, but told Jean, F6AJA, that he will be active this coming week-end from an island in the Los Santos/Herrera/Colcle Province Group.

OC-160. Bill, VK4FW (not VK3FW as reported last week - sorry), reports that he has postponed his operation to Cumberland Island due to transportation problems associated with equipment not arriving from Sydney. This operation centers around work commitments installing new monitoring equipment. New scheduled dates are February 11-16th. QSL direct only to VK4FW: Bill Horner, P.O. Box 929, Gympie, 4570, Australia.

OC-201. Bob, G3PJT, will be active as ZL4CC from Waiheke Island from March 8-13th. Although he will be active in the RSGB Commonwealth Contest, primarily on the 10th and 11th, he will be active for all/any takers outside the contest. His activity will be mainly on CW. QSL via his home callsign G3PJT, direct or via RSGB bureau.

SA-026. Paul, PY3DX (ex-PY3PAZ), informs OPDX that he is going to take his vacation from February 23rd through March 5th on Santa Catarina Island. He will operate mainly on CW (with some SSB) on all bands, but with special attention on the lower bands (80/40 meters) and some WARC bands as well. He states that his sunset on that island starts around 2200z and lasts until 2100z. He will use this time to call CQ on lower bands during the grayline for EU, NA and AF. The callsign will be PY3DX/p. QSL via home call or via bureau.

MM0, SCOTLAND. Leo, W3LEO, will once again be active from Portpatrick in southwest Scotland from about February 20th through March 14th. However, Leo states that this is once again a vacation not a DXpedition, and "time on the air will depend on the antennas, on propagation, and on when the nearby pubs are open, HI..." His callsign is MM0LEO and he plans to be in the ARRL International DX SSB Contest. He will use an Icom 706 (100 watts), a R-5 vertical [10, 12, 15, 17, 20 meters], and a 40-meter dipole [in inverted-V configuration]. He will try and get on PSK-31. QSL via his CBA (with SASE) or via bureau to W3LEO. Leo provided the following reference numbers: IOTA - EU-005 [Great Britain]; CQ Zone - 14; ITU Zone-27; Grid Square - IO-74ku and Worked All Britain [WAB] Square - NW-95.

NP2, U.S. VIRGIN ISLANDS. Dennis, K7BV, will be operating before and after the 2001 CQWW CW Contest as NP2/K7BV. He will use WP2Z during the contest. QSL all contacts with either call via KU9C.

PJ2, CURACAO (Update/Change). Last week we mentioned that Larry/K6RO and Charlie/W6KK would be active from here between February 27th through March 5th. Larry informed OPDX this week that his callsign was changed for the ARRL SSB Contest as SO/SB/HP entry. He will now be active as PJ2K instead of PJ2R (which has been already taken). Remember to look for them before and after the contest as PJ2/homecall on all bands CW/SSB. Larry states band country skeds is not a problem. His E-mail address is: k6ro@earthlink.net

PORTUGAL'S MOST WANTED. Carlos, CT1END, reports that the results of the Most Wanted in Portugal survey for the year 2000 have been posted to the Web sites: http://ct1end.freeservers.com and http://gpdx.netpower.pt

PW0, ST. PETER AND ST. PAUL ROCKS. On February 7th, at 04:30 local time, the motor-sail boat "OLD SMUGGLER" left for Fernando de Noronha with their destination to the St. Peter and Paul Rocks. On their way to the Rocks, they stopped on Fernando de Noronha and picked up another operator, Andre, PY0FF. The new operator bought with him a TS-60 for 6 meters that will be on the air 24 hours a day on that band with a 5 elements yagi. He also took along a complete SSTV station and another laptop. The PW0S

team arrived by the Rocks last Friday at 1300z, but landing was not possible due to high sea. The big waves were almost covering the rocks so they had to cancel the landing. Pictures of the high seas can be seen on their Web page. As this bulletin was being prepare, no activity has been reported. The team has decided to change its operating frequncies to avoid a conflict with the D68C operation. Suggested frequncies now are:

SSB - 3790, 7050, 14170, 18125, 21270, 24960, 28470 and 50115 kHz
CW - 1832, 3504, 7025, 10108, 14025, 18090, 21025, 24915, 28025 and 50095 kHz
RTTY - 14080, 21080 and 28080 kHz
SSTV - 14233, 21363 and 28683 kHz
They will have a 24 hour beacon operating on 50.006 MHz. QSL via KU9C. There is a web site with photos and info abt PW0S on: http://www.soutomaior.eti.br/mario

QSL INFO AND NEWS.....
NEW QSL INFO. David, 4L1DA, informs OPDX that QSL for 4L1DA and 4L0G should now go via DL7BO: Tom Hubert, PirolSTR.50, 12683 Berlin, Germany.

The FK8HC/P log for the operation from Tindu Island (DIFO FK-085) is now available (as of February 2nd) on the following Web page: http://f5nod.waika9.com/fk8hc_fk085.html

Jean Michel, F6AJA, reports that he has received the FM/F2JD card from the printer, and ALL direct request are mailed.

Tony, LZ1JZ, reports that he is the QSL Manager for Europe for OA4DKC. His address is: Anton Stefanov, P.O Box 43, Harmanli-6450, Bulgaria.

Alan, VK4AAR, has requested for the readers to be informed again about the following: "Please advise your readers AGAIN that, when QSLing VK's or to Australian managers, they should NOT send SAE's with Australian stamps unless they have access to the correct style of stamp for overseas destinations. This was originally to have been implemented on 1st Feb 2001 but has been moved back to 1st Mar 2001. Reply postage is gratefully received but PLEASE, PLEASE let US attach the stamps to ensure that mail will reach its destination. Finally, do NOT send cards for VK0LD to me (I do not have that log). Only VK0MM."

OUTGOING QSL BUREAU ANNOUNCES RATE INCREASE. "In response to the recent postal rate increase and price restructuring, the ARRL Outgoing QSL Bureau has announced new rates for this service. It is still possible to send ten cards for one dollar, but the twenty and thirty card rates have been discontinued. The new rate is $4.00 per each half-pound or portion thereof. This rate structure helps to cover the basic cost of handling the minimum number of QSL cards in a package while actually offering a price reduction for sending a half pound of cards (approx-imately 75 cards) which previously cost $6.00. The new rates will go into effect on March 1, 2001. The last Outgoing QSL Service fee increase was in January 1999."

S9, SAO TOME & PRINCIPE. John, W7KNT, informs OPDX that Tom, W7LUU, is now on the air as S92TX. Tom will be operating mainly on 10/15/20 meter SSB and some 6 meters soon. He has been overseas for the last 12 years with the State Department / Voice of America. His assignment just started in Sao Tome & Principe, and he should be there for about 2 years. QSL is via his QSL Manager W7KNT. ADDED NOTE: John also mentions that he will be there for about a month this fall or February 2002 of next year to work down the pileup's.

V2, ANTIGUA. Ed, N2ED, is expected to be active as V26EW from February 13-20th. He will also be active as V26G in the upcoming ARRL DX CW Contest. QSL via N2ED.

VP2E, ANGUILLA. Look for Ron/W8ILC, Don/N6JRL, Harry/AC8G, Ed/WD8MQJ and James/N8JE will be active as VP2EK from February 28th through March 7th. The group will be a Multi-Op entry in the ARRL DX SSB Contest. QSL via W8ILC.

XU, CAMBODIA. Frank, DL4KQ, informs OPDX that there will be activity from here by a German group between July 15th and August 3rd. Operations will be on all bands 160-10 meters including the WARC bands and 6 meters using linears. Modes will be SSB/CW and possibly RTTY/PSK31. A special emphasis will be on the low bands by DL4KQ. Exact callsigns are still unknown. More updated information will follow.

XX9, MACAU. Ulf, SM0GNU, will be operating as XX9TDX between February 12th and February 20th. Activity will be on all bands CW/SSB and possibly some RTTY. There will also be a SOAB effort in the ARRL DX CW Contest. QSL via SM0GNU (E-mail address: sm0gnu@swipnet.se)

YK, SYRIA. By the time you read this, the YK9A operation will be almost, if not, QRT. Press releases by Al, K7AR, sent out last week were basically stating they were doing the best they could with what they had. Al states, "Please keep in mind we are missing 3 ops and 2 amps and it is difficult to meet everyone's needs." They also had low line voltage problem. QSL via K9LA. Don't forget that the YK9A Web site is available at:
http://www.qsl.net/k7ar/yk9a_'01.htm
Also, pictures are available at: http://www.dailydx.com/yk9a.html

ZL7, CHATHAM ISLAND (ZK3, Cancelled). A press release by Ken Holdom, ZL2HU/ZL4HU, Group Organizer/Team Leader/QSL Manager for the Kermadec DX Association, announced this past week about a change in plans for the ZK3 Tokelau Island DXpedition. Ken reports, "After lengthy considerations and taking into account the very high number of DXpeditions that are being undertaken at present and those that are planned for the future, combined with the extremely high costs invloved in undertaking ZK3, we wish to advise with considerable regret that we will not be undertaking this DXpedition in July-August 2002 as planned. Our last DXpedition to ZL9CI in January 1999 was, according to all counts and responses, one of the most successfull DXpeditions ever undertaken and in order to keep the Kermadec DX Association reputation intact, we have decided to undertake a much smaller DXpedition to ZL7 - Chatham Isalnds in October 2002 to coincide with the CQWW SSB contest." All OPDX InterNet Subscribers will receive the complete press

release as an additional bulletin.

Here's something I have been thinking about and don't recall ever seeing any comments:
To correctly identify a station as "Mobile", does the vehicle actually have to be in motion? I find operating the radio,logging,etc. while driving to be somewhat awkward and potentially dangerous. I do most of my DXing from my car while it is parked somewhere.
This should be a good question for the detail-oriented.

>John, K7JY.

All the boys on the cluster say S0NY is Baloney.
Usually when a rare DX station's QSL manager doesn't
work in the callbook, that's a good indication you've
been had.

I don't know about Buckmasters, but QRZ.com doesn't
have a full JA callbook, I think the only JA's in it are
ones that have added themselves.

I'm not sure there is a full JA callbook online anywhere.
I have an extensive list of JA calls I've worked in
contests and on HF over the years, but JA2SON isn't
one of them.

So the answer to your question is: Maybe :-)

It seems to be working that way for ships, but not for airplanes. I once contemplated a similar question talking on 2m from a ski resort cable car.

OTOH, wouldn't it be simpler to just go home and dx?

While we're at it, how does one identify while standing on a state line with one foot in, say, California, and the other in Oregon? "Portable 6.5"? What if one has a prosthetic leg? And how about if one is standing on the Mexico-USA border? (Although, just standing there is something no one really does) What about if one drives a car on the deck of a ship? And how about if a UFO abducts that ship and I keep dxing until they start poking me with probes? Should I sign WA7AA/m/mm/am?

Yep, these are that kind of questions that keep me busy. I am a philosopher.

You should use Coordinated Universal Time, UTC (also known as GMT) for all DX QSLs. (really for domestic QSOs too) Use the date that goes with the current UTC time. (for example, right now it's 11:50pm Monday 12 February here in Tennessee -- that's 0550 UTC Tuesday 13 February. So if I was working a DX station instead of typing on this computer, I'd put "0550" and "13 February" on the QSL. On the other hand, if I'd worked a DX station at 11:50*AM* this morning, it would have been 1750UTC Monday and I would have put 12 February on the QSL.)

No a "mobile" station is one that can be operated while in motion (it does not have to be mounted in a vehicle). A "portable" station is one designed to be moved and operated at various "unspecified' locations while stopped.
cf FCC rules circa 1950 or so.
The logic behind these defintions will be more easily understood if you think back to the1930's and 40's. A time when
an R-390 was considered an extremely compact miniaturized piece of electronics and a complete "easy to move" portable station consisted of several boxes, an Xmtr and a RCVR each weighing a minimum of 75 lbs plus a dipole set plus a cabling set and a dynamotor/generator set.
Remember at one time

Again "mobile" and the call sign district of where the emitted signal is coming from. (i.e. it doesn't matter where the operator is located. Where is the antenna? California or Oregon?

It's difficult to find one logging program which has all the features
you need. I never found one; you have to compromise, or write your own.
For example my biggest problem with Logger is that it does not have
separate fields for comments, name and QTH, just one big comment field.

I settled on VQLog; http://www.vqlog.com/ .. cheap and quite good.

Hi Ken -- use UTC time for any radio contact anywhere (USA as well). UTC time and date can be had at URL:
http://www.time.gov/timezone.cgi?UTC/s/0/java
Accurate to within a few tenths of a second.

UTC is the time and date at Greenwich, England.
Your Ham Clock should be of the 24 hour variety (Military Time e.g., 1400 Hours, not 2:00 PM) and set for UTC time. MFJ and Radio Shack sell 24 hour clocks that are synched to the 60 Hertz line frequency -- pretty accurate -- but check against WWV at 10 MHz or the Internet periodically. Miltary read-out wrist watches are available also -- will give time and date in UTC.

When UTC rolls past 2400 hours (4:00 PM PST) -- it is the next day in UTC time (compared to the USA)
Example UTC rolls past 0000 UTC (midnight in England), the day changes - lets say to Tuesday -- but its still Monday in the USA - untill USA time reaches midnight. Very important point for Ham Logging. Log UTC date and time only.
Be sure your Ham clock is very accurate. Typically, DX stations and DX Managers will look for your contact at the correct time and if not within a minute or so, will give you a "not in the Log"

More about UTC (Zulu, GMT, GCT) time at URL:
http://www.aros.net/~yogi/zulutime.htm

The mobile installation should not have to be in motion, otherwise the "/M" designation would have to be changed every time the vehicle came to a STOP sign, traffic light, road block, accident scene, etc. However, if parked somewhere, and a wire antenna is strung to a tree or pole to improve reception/transmission then it is no longer "/M" because the entire unit cannot function in motion (unless going 'round in a circle (!)). 3Y0C has not been readable on 17 and 12 for the past few weeks in Atlanta.
They were up today at 1730Z on 12
and at 2030 on 17 but not even ESP. Must be a signal barrier to SE USA.
They seem to work W1-3, 8 ,and VE OK
but nothing at all here. I am down to a handful of countries needed on 17
so its serious. I would just like to say I
heard him on 17 but the best he has ever been is 57 on 20 at 0400Z. He is
Q2-3 on 40 and 80 (worked him theses bands)
and don't need on 15 or 10.

Anybody got any reasons why he always skips over Atlanta?

Dave K4JRB

Lousy propagation ?

Lousy antennas ?

Bad luck ?

Somebody made Chuck eat grits one time and he's avioding the
southern states on purpose ?

You haven't been going to church regularly, so God doesn't
want you to get a new click ?

But don't feel bad, Dave. And don't take it too seriously. 3Y0C is not
readable on ANY band at my house. Nobody I know here has even
HEARD him more less worked him. But life goes on....

What a funny problem! Chuck has not been readable in Northern/Eastern Europe
on any frequecy at all.
From starting his activity I heard him only one time on 20 meter with 5/3 when
Spaniards said on a DX Cluster: "incredible 59 +20dB".
When Chuck starts QRV at 2000 UTC bands from 20 up to 10 meter are rather
silent here. Have I any chance?
George, SP2BRZ

Many of the time clients that set your PC's time via a dialup atomic
standard also can and do compensate for the "inherent internet lag" thus
giving one a very high degree of accuracy.

EZ Walter. Software just figures out the time lag, and compensates for
it. Close enuff for ham radio. We just want these guys to log things
on the right DAY, never mind milliseconds....

If you hear that D68 guy again, work him on five bands with my
call. I can't hear him over here.

Very good suggestion, Joe. In a place like Guam, envelopes
do seal in high humidity - lots of envelopes I got with cards
had welded themselves shut at the post office. Not only
are the self sealers nice for humidity, but if a QSL manager
is answering a thousand cards, they save him a ton of licking
or wiping envelopes with wet sponge, which saves him time,
which means he answers cards faster...

Now if WalMart could talk the ARRL into electronic logs, we
wouldn't need ANY envelopes....

The variable lag can be calculated (with averaging) and compensated
for. There's a standard protocol called NTP for time synchronisation.

You guys with beams are turning them SE, instead of at Europe? :.)

A few weeks ago when we were helping Chuck get his RTTY gear going, I
was speaking with him daily on 20m, for about a week. He was
consistently S-9 from 2200-2300Z, and after 2300Z he quickly faded
away. The guys on freq from 5-land couldn't hear him till 2230Z, and
also had about an hour of excellent signal.

Eariler in his stay on Bouvet, Chuck was loud for much longer. That is
changing as the amount of darkness on the island increases .

509. PR: Log Windows sales for FY-2000 exceed that of AEA's in 1994, equal to 1995 sales

Newsgroup: rec.radio.amateur.dx
Date: 2001-02-15 15:30:18 UTC
From: Rick Ruhl <ricker@cssincorp.com>
Message-ID: <PzSi6.1832$466.119668@news1.atl>
Source record: 17864

CSS revives Log Windows from defeat and sees increase in TNC software sales.

Muscle Shoals, Alabama. February 14, 2001: Creative Services Software announced that FY 2000 sales of the Log Windows logging program exceeded the number of units sold by AEA in 1994 and equaled the number of units sold by AEA in 1995.

"This proves that there is still a market, abet a smaller one than other markets, for Ham Radio Software.", said Rick Ruhl, W4PC, President of Creative Services Software. "Many consider 1995 the year the Internet had a big influence on Amateur radio, and I think our 2000 sales show that many who went to the Internet have join the ranks of the Log Windows owners, due to our Internet enabling of the program."

CSS also reported that sales of its TNC products, Pacterm '98 and PkTerm '99 Preview 1.5, have seen increases since the addition of the PSK-31 mode. This enhancement allows use of the TNC to key the radio in PSK-31 mode, saving the ham a serial port, and having to change between programs to change the different modes.

The Log Windows product retails for $69.95 and upgrades from release 3.06.15 or earlier is $40.00.
Those who have purchased version 3.06.50 or greater will get this upgrade free. Pacterm '98 and PKTerm '99 retail for $79.95 and all products include free in-version up grades. They are available from dealers around the world, as well as direct from CSS.

Log Windows is owned by SCO, Inc and is maintained by Creative Services Software.

Creative Services Software is at http://www.cssincorp.com
The Log Windows homepage is at http://www.logwindows.com

Windows, Windows 95, Windows 98 Windows Me , Windows NT and Windows 2000 are Registered Trademarks of Microsoft Corporation.

510. Help : TS440S display fault

Newsgroup: rec.radio.amateur.dx
Date: 2001-02-15 19:51:01 UTC
From: gaetan horlin <cesgai@swing.be>
Message-ID: <3a8c33c3$0$19277$5a62924d@news.skynet.be>

Hi all and thanks for reading this message,

I own a TS440S and I have a problem with it. When I switch the power ON, the display shows many strange characters. Also, when pressing buttons on the keyboard or turning the tuning knob, there is no change; they just not respond.
The only solution to solve the problem is to switch it OFF and to switch it ON again while pressing the A=B button. So, a reset of the µprocessor is done and the transceiver works again but all the memory has been reset and lost also. I thought the problem comes from the reset circuit of the µP and I tried to do a manual reset instead but the problem was not fixed.
Once the transceiver has been reseted, it works fine all the time it is ON.
If one of you experienced the same problem, I should be very happy to know how you fixed it.
On the other hand, I also had PLL lock problems (dots on the display) which I could solve; if you want to know how, just ask me.

Thanks in advance for you help.

Great Joe....
You'll find a wealth of DX'ing tips and advice on The DX Page of my web site. For your situation you might want to make use of some of the DX nets that are quite popular. There is a list of them with their schedules on that same page. Good luck and see you on the bands....

73 / DX

PS
Might as well go for the beautiful DXCC certificate after you have 100 or more confirmed. It is a very nice-looking award and fits standard sized frames available at any Wal-Mart etc.

I have had some success picking up shortwave stations from around the world, but now I want to try to recieve some standard AM mediumwave broadcast stations in the USA. I am in Australia and according to a really old radio magazene you can do it. I was just looking for some recommendations and tips on doing this.

Also could someone suggest some high power broadcast stations on the west coast somewhere near LA or San Francisco?

David

DXers....

I worked two stations that I need QTH info for....

Don't know where they were located....

Here goes.....LU1ZA...20 Xll 1989....
LU1Z 05 l 1996....

Think they were South Orkney ...but don't know....

Please..any information would be appreciated!

Thanks...

Lou

523. Re: Dxing USA AM broadcast stations

Check out the NRC (National Radio Club) and the IRCA (I think that's the Int'l Radio Club of America). Both are big MW BCB DX organizations, with weekly/bi-weekly DX Newsletters, many construction articles and tech books all dealing with BCB DX'ing. There may be other clubs out there, too, but I do know first-hand about those two groups, having subscribed to their letters and ordered many of their books in years past. They both also have nice web sites.
I did build a Sanserino BCB Loop antenna from the plans in the IRCA manual, and it really works great! Good luck and have fun - there's a lot of info out there about MW DX'ing!

On 2/15 Chuch was between S2 and S7 on 24945 at 1730Z. He seemed to be working more W1,2,3, 8, 9 and even W6/7
finally he peaked at S7 and I worked him. #304 on 12 meters. I keep missing the last two openings on 17 as he does not stay long.
I worked 320 countries on 17 and 280 countries on 12 barefoot but have been using my Henry which loads to 600 watts out recently.
The gang have discovered 17 and 12..just wish we could stay at under 200 watts.

He has been S7 to 8 on 20 meters SSB the past few days and easy there. One guy worked him barefoot. I see reports that several in Europe say they finally heard him so I guess Chuck is able to work on his antennas. I need it on 160 and 17 to have all bands (don't yet work 6 or 30).

A dipole is a very efficient antenna and the W9INN antennas are very good.
Remember a beam is only a little better than one S unit
depending on height of each antenna.

But please stay away from the Dx nets. These are looked at in disfavor by
Dxers.

Where the beam starts to make a big difference is in sun spot minimums where
conditions are not as good as they have been the past three years. We are
on the down slope of this cycle with SF = 130 where it was 250 at the peak
and averaging 200 last year.

While some DX people may look at the DX Nets in 'disfavor' I heartily recommend them to folks that have low-power stations and no appetite for battling with jammers ,frequency cops, and lids found these days in most DX pileups and on the DX stations transmit frequency. More and more these butt-heads are following cluster announcements and changing the whole scope of what it really means to be able to work a DX station.

Moreover not all DX'rs look at them in disfavor. The current president of the Southern Cal DX Club and my DX mentor (N6KZ - Jim) does in fact - not - frown on the use of DX nets. His remarks are " work them anyway you can get them". I use the DX nets if there is a new country for me on the net. As I outline on The DX Page of my site I personally feel many DX net contacts are often times assisted contacts..but that is my personal opinion. If I honestly worked the DX on the net I don't care if then some net control op feels he / she needs to say ' good contact '.

In many ways the DX nets have a lot to offer...I rarely use them myself but for others they are ideal..... 73 / DX

Excuse my ignorance. But what's a lid?

And DX nets, who cares how you found him, so long as you worked him. People with huge antennas, huge linears and loads of time to search the bands may disagree, but I have none of those.

> Excuse my ignorance. But what's a lid?

The definition of a " lid " can vary widely and generally depends on the attitude of the person using the phrase. Assuming you really don't know it is most often used to mean an illegal non-licensed operator on the Ham bands, such as an illegal CB'r on 10M as an example.

Many times though Hams call other Hams lids if they personally do not approve of the other Hams operating practices or if the 'offending Ham' has made a simple honest mistake. The most recent usage I have heard was when a DX station announces he is listening 'up' and then right away some ' lid ' calls the DX simplex by mistake and not split. In that scenario you get instant dialog on-the-air between the lids and the frequency cops. That behavior annoys others and then they in turn become 'jammers' to drown out the arguments between the lids and the cops!

Anymore it is not simply a question of if your station and your own DX skills can work the DX to make a contact but more if you as an operator care to tolerate the 'rabid dog' mentality that pervades on the frequency. Many Hams continue to call the DX over and over whether there is a qso going or not. Another nice experience in working DX is when the DX is taking calls simplex and every station calling wants to be the last one heard by the DX. This constant calling simply perpetuates itself for maybe up to a full minute totally blocking any transmissions from the DX. It has become a real zoo.

Oh...and before I forget a new breed of frequency cop is now showing up. He mimics the split setup of the DX station and monitors the pileup giving out warnings and comments to the pile as he sees fit on the DX's transmit frequency. These frequency cops feel duty-bound to 'cleanup' the pileup and instruct everyone on just how to work the DX . Call the DX too often to suit one of these new breed of frequency cops and you'll get a personalized 'warning message' transmitted right on the DX transmit frequency....

It can be quite hilarious if it wasn't so sad..... 73 / DX

Wow! My 3 el beam must be super. It is usually more than barely one S unit
and my 100 watts seems to be received much better on the beam than the
dipole.

I still use dipoles on 40/80/160 but the beam is many times better!

Charles, have you seen your doctor recently? A sensibly trimmed quote with a reply below the quote? It makes the article almost readable. Not that I am complaining, but it is rather, ahem, unusual coming from you. OK, the .sig separator is still broken and the .sig too long and we have no idea who you are answering, but, hell, this can be disregarded almost as a minor offense.

Source record: 17897

If there is a more appropriate place to post this, let me know....

I am setting up my FM Dxing outfit, and I'm looking into building an RDS/RDBS module to augment my system.... Any info that y'all might have on this subject would be greatly appreciated. I've got the basic design down, just looking to flesh out the details....

I am going to prototype an external unit that can be interfaced with multiple tuners. It will only output one at a time, but I am going to sync it with my ant to tuner switch such that as each tuner is brought online, the RDBS module will switch to that tuners MPX signal. I currently have 5 tuners in my Dxing plan, but the module will be configured for up to six tuners... If the prototype works, I will be manufacturing a limmited run of about 100 units for sale.

Thanks...
Clay

>Also could someone suggest some high power broadcast stations on the west
>coast somewhere near LA or San Francisco?

David, the previous post lists 2 very good clubs here in the US for AM DXing.
The web page for the IRCA is:
www.geocities.com/heartland/5792
Another web page to look at for US and Canadian AM stations is:
http://www.radiostation.com/
Click on AM and search how ever you want to.
Also there is another newsgroup where there are many post about AM DXing, dont
let the word shortwave keep you from looking or posting in the newsgroup, it
is:
rec.radio.shortwave
Another group is AmFmTVDX.. I dont know how to subscribe to them.
Many people in Australia log North American and South American stations.
Also many here log stations from down there. Using wires or homebrew or
commercial loop antennas.
For north america, just tune every 10 khz... not 9 khz for stations. Also check
the new part of the band between 1600 and 1700 khz. Some of the stronger
stations that I can think of from the western US are.
KNX 1070 Los Angeles
KNBR 680 San Francisco
KEX 1190 Portland
KOMO 1510 Seattle
KOA 850 Denver
KSL 1160 Salt Lake City
KBOI 1140 Boise, ID
KTNN 660 Window Rock, AZ (English & Navaho)
KFI 640 Los Angeles
KOAL 650 Price, UT
KOBB 770 Albque., NM
WBAP 820 Ft. Worth, TX
WCCO 830 Minneapolis, MN
KRVN 880 Lexington, NE
KTWO 1030 Casper,WY
WHO 1040 Des Moines, IA
KRLD 1080 Dallas
KFAB 1110 Omaha, NE
KMOX 1120 St. Louis
WOAI 1200 San Antonio, TX
KSTP 1500 St. Paul, MN
KXEL 1540 Waterloo, IA
There are probably many Hawaiin stations you will hear also.
This should get you started, good luck

Craig N0BSA

Suppose a brand new ham pops up from P5 and calls his first CQ. How
long do you think he would last in the ensuing pileup (created by a
spot on the cluster)? He would simply be overwhelmed and probably
would go off and hide someplace.

If he shows on a net and gets a bit of help in dealing with the chaos,
what's the problem? The "real" DXers will look down their collective
noses I suppose, but I'll bet they'll be in there trying to get on the
list

Which brings up one of the downsides to the nets; you have to work two
stations to make the contact. First you need to work the NCS and then
work the DX. Propagation can be good to the DX but you can't work the
NCS. The other downside is the "help" that is sometimes offered to
make sure it is a "good contact." I don't approve of this one bit.

But then I know a local who is on the "Honor Roll" and who was QRT
after a divorce and yet was still working new ones. It pays to have
other "honorable" friends that can work 'em for you so you don't get
behind.

I once got a telephone call from another local "big time DXer", who
told me that I should send a QSL to TYA11 for a QSO that I made on
such and such band and time. This jerk thought he was doing me a

favor. Needless to say, I don't have that one confirmed.

A worse plague than DX nets are the packet clusters, IMHO. What is wrong with tuning the band and listening? To me that is "real" DXing. We (that's an editorial 'we', count me out) don't tune anymore, we let the cluster tune for us.

The packet cluster is so important now that DX clubs have been ripped apart arguing over them. I know, I was president of our local club when a discussion of who to link to, who to filter, and where to locate it popped up. This was so divisive that I resigned my membership and I haven't been back. I understand that the Central Arizona DX Association banned any discussion of clusters in its meetings.

I know guys that hear a pileup, drop in their call, get a report and then go off to the cluster to find out who they "worked." But they wouldn't get caught dead on a DX net. That's a crutch doncha know.

I don't know what this has to do with dipoles, but I couldn't resist.

Wes Stewart N7WS

Great remarks Wes.....

I do have a comment though.....what is so wrong with using DX clusters?
Is it any different than having your buddy call you on the phone to let you
know a ' new one ' you need is on-the-air? I see it as the same kind of
buddy system approach except the technology has improved.

Very good comments Wes. To me its like playing solitaire. If I cheat I know I didn't win but that I cheated to win. In the end you can have all the paper and all the awards but if you really didn't work them YOU REALLY know you didn't.

I don't care if its a cluster, tuning around, a contest or a net. If I work a station I did it. That's all that matters to me. It DX no matter what.

Glenn

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, WB2YQH/WB2RAJ & The 599 DX Report, W3UR & The Daily DX, WZ3AR, N4AA & QRZ DX, WD4NGB, K5RT, W5PF, K6IPV, K6KM, KH6BZF, K8PT, K8YSE, K9LSB, CE6TBN, CO8TW, DL1EK & DX News Letter, DL2VFR, DL7VOA, EI4GK, F6AJA & Les Novelles DX, F6EPY, FM5GU, GW0VSW, PA5ET, PY1NEZ, VE3EXY, VE7DP, VK3EW VK4AAR, VK0MM, XE1KK and ZR1DQ for the following DX information.

MESSAGE FROM EDITOR: Did you ever wonder "How many DXCC Countries/Entities were active last week?" and "Is it possible to achieve DXCC in a week?". Well now OPDX and Terry/AB5K's AR TelNet Cluster Network will have the answer for you every week? Look below:

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 11/February, through Sunday, 18/February there were 252 countries active. Countries available: 1S, 3A, 3B8, 3B9, 3C0, 3D2, 3D2/r, 3V, 3W, 3Y/b, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0A, CE0X, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FO/m, FP, FR, FR/j, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HM, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH1, KH2, KH4, KH5K, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0S, PZ, R1FJ, S0, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T31, T32, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, VU4, XE, XF4, XT, XU, XX9, XZ, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, and ZS.

OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity". OPDX would like to send a special thanks to Terry for his time and input for this new feature. Also, Terry and your editor (KB8NW) would like to hear your comments (and suggestions) on this new feature. Send them to: kb8nw@arrl.net

3A, MONACO. Reports indicate that the administration of Monaco has now authorized operations on 6 meters for amateur. This is after a 1 month test which proved that there was no interference to other services. Laura, 3A2MD, who is genrally active on all bands, is attempting to get something up for this band. Until then, look for her on 10 meters (28016 or 28446 kHz) between 0630-0700z and on 15 meters (around 21032 kHz) between 1000-1100z before she moves to 20 meters CW/SSB.

3B, MARURITIUS. Jacky, 3B8CF, can be found almost daily on 30 and 20 meters CW between 0230-0400z. Check around 10106 and 14027. QSL via CBA.

3B9, RODRIGUES ISLAND. Robert, 3B9FR, usually can be found on 15/17/20 meters between 1530-1930z. Check 14025, 18073 and 21295 kHz. QSL via CBA.

3D2, CONWAY. By the time you read this the DXpedition team will be gathering in Nadi, Fiji. It seems that there may be a delay due to one of team members did not get the U.S. visa, and had to travel a different way. The whole team will have to stay on Fiji until he arrives which will cause late DXpedition start (about 12 hours). Operation was expected to start February 22nd. Their final itinerary is posted on: http://www.kragujevac.co.yu/3d2/general/general.htm

3Y, BOUVET. Chuck, 3Y0C, still continues to be active more so than past weeks. He has been hitting almost every band CW/SSB. He is even taking requests for CW contacts after working him on SSB. Chuck was heard this past weekend on 28495, 21295, 18130, 14195, 10115 and 3772 kHz at various times. It was mentioned this past week on one of the severval "DX Reflectors" that Chuck is expected to leave Bouvet March 2nd (not firm) and arrive in Cape Town on March 7th.

3W, VIETNAM. Three stations were heard this past week. 3W2LI was heard on 28480 kHz around 0915z. Hans, 3W2LWS, on 14010 kHz between 1530-1700z (QSL via WA1LWS). His activity will last until March 6th. Tom, 3W7CW, was heard on 28007 and 14028 kHz between 1330-1400z (QSL via SP5JTF).

4H/4I, PHILIPPINES (IOTA Activity/Update). Frank, VE7DP, provided OPDX with another update on his and local Philippine ham activity. The activity on the Island of Marinduque as 4I1P made about 3800 QSOs from the new IOTA OC-244. This past weekend (Feb. 17-19th), operators VE7DP, DU1KGJ, 4F1FZ and 4F1OZ were expected to activate Lubang Island (OC-126) using the 4I1P callsign again. QSL to VE7DP or DX1CW. Frank states arrangements have been finalized for an expedition to Batan Islands (OC-093) on February 24-27th. Ten members of the DX1CW club will be participating and VE7DP will be one of the operators. The CW Philippines have applied for 4H2B callsign. QSL via VE7DP or DX1CW.

4S, SRI LANKA. Ernest/4S7EA and Nelson/4S7NE have been keeping the CW crowd happy on 30 meters (arond 10106 kHz). Look for Nelson around 1245z and between 1930-2015z. Look for Ernest between 2300-0100z, if not there check 20 meters on 14025 kHz.

8Q, MALDIVES. Mike, OE3MZC, continues to be active as 8Q7MZ until February 21st. Activity has been on 15/17/20 meters SSB between 1200-1700z. QSL via home callsign.

9M6, EAST MALAYSIA (Update). Don/K6IPV and Dave/W6AQ are now active from here as 9M6IPT and 9M6AQT, respectively. Over the past weekend, they were active in the ARRL DX CW Contest using the special callsign 9M6V. Activity is expected to last until February 22nd. There are no other updates on whether they will travel to Brunei (V8) for a few days. QSL the contest callsign and their individual 9M6 callsigns to W6ORD, good in all callbooks and databases for the last four years.

ATTENTION ALL DXERS.... Paul, K5RT, CQ WAZ Awards Manager, reports the following: "PLEASE do NOT send WAZ applications to K1MEM's address. Jim has been deceased for over a year now. WAZ applications continue to arrive at his QTH nearly every week. Please help us spread the word. We at CQ have tried very hard to make sure that the revised WAZ rules received a very wide audience since last January. The WAZ rules can be found on several national radio society web pages, in several amateur radio magazines and on CQ's own web page (in 7 languages even!). The URL for the CQ web site is: http:www.cq-amateur-radio.com
Once again, please help get the word out to the DX Community at large. Jim's widow should not have to be bothered with having to forward WAZ applications after this long a period..... DX is! Vy 73 Paul K5RT
CQ WAZ Awards Manager"

BQ9, PRATAS ISLAND. Reports indicate that Paul, BV4FH, has the authorization for another operation from here beginning March 6th through March 15th. There will be 8 operators on this trip: BV2OO, BV4FH, BV5CR, BX2AX, AA4NN, JA1AYC, RK3DT and W4NZC. QSL via KU9C.

CE0X, SAN AMBROSIO ISLAND. Mark, CE6TBN, sent out a brief statement this past week. He said, "I'm sorry but CE0XT is cancelled for transporting problem."

CE0Y, EASTER ISLAND. This will probably be the last week to work Dick/DJ2EH and his wife Ann/DL8NBH as CE0YEH. Activity has been on all bands including the WARC bands mostly on CW (with some SSB) at various times. Most of the SSB activity has been on 15/12/10 meters.

D6, COMOROS. The D68C team continues to be very active until February 28th. They have kept their promise to be active on all bands and modes. They were even heard on 10 meter FM. They are easy to find, usually begging for QSOs, and easy to work. They will probably break a QSO record. Last heard, they were over 61,000 QSOs.

EL, LIBERIA. Dickson, EL2DT, has been active on 21255 kHz between 0930-1030z. QSL via IK0PHY.

EP, IRAN. Hamid, EP3HR, has been active on 12 meters. Check 24950 kHz between 0900-0930z. QSL via I2MQP.

FM, MARTINIQUE (Update). Dennis, FM5GU, informs OPDX that FM5GU will participate in the 2001 CQ WPX SSB Contest in the Multi-Single category. The operators will be: IV3TDM, IV3FHH, IV3JVJ, FM5DN, FM5WD, FM5FJ and FM5GU. All QSLs should go to KU9C's callbook address.

FO & ZK, FRENCH POLYNESIA AND SOUTH COOK ISLANDS. Dominique, F6EPY, will be on a "South Pacific DXpedition" during the first fews of March. Look for him between March 3-7th, as FO/F6EPY (?), from Moorea Island (OC-046), French Polynesia. Also, look for him between March 8-16th, as ZK1EPY from Rarotonga Island (OC-013), South Cook (and possibly Aitutaki Atoll). Operations will be mainly on CW on 80-10 meters including WARC bands. Look for him 18 kHz from the lower band edge (7018, 10118, 14018....etc.). There is a possibility of some SSB, digital modes (PSK31, RTTY) and 6m SSB. Activity will be concentrated on European propagation. His equipment is a IC-706 MK2G, Butternut HF9V and 2 x 20m center feeded Zeppelin and a 3 element beam for 6m. A Web site is available at: http://perso.wanadoo.fr/dominique.auprince/SP_DXPED.htm

FO5, FRENCH POLYNESIA. F5DYD is now active as FO5RA from Tahiti for the next 2 years. He uses a FT-847 and a 2 element Quad antenna and seems to like 10 meters. Check 28560 and 28480 kHz between 1630 and 1930z. Also, look for him on 6 meters between 0700-1700z.

FO/M, MARQUESAS ISLAND. Wulf, DL1AWI, continues to be very active from here as FO/DL1AWI and is expected to be active until February 28th. During recent days, activity seemed to be mainly 30/40/80 meters CW. Watch these bands beginning around 0300z. QSL via DL1AWI.

H4, SOLOMON ISLAND. Bernard, H44MS, has been quite active lately on 12 meters. Look for him between 24937 and 24955 kHz starting around 1000z. He has also been active on 75 meters on 3799 kHz after 1100z. Also, watch 40/17/15/10 meters. QSL via DL2GAC.

IOTA NEWS.....
EU-002. Frank/DL2SWW and Ric/DL2VFR will be activating Aland Island from April 14-20th using the callsigns OH0/homecall. Activity will be on 160-6 meters on CW (mostly), SSB and RTTY. QSL via home callsigns. Detailed information can be found on the Web site: http://www.iota-expedition.com

EU-037. Frank/DL2SWW and Ric/DL2VFR will be activating Oland Island from April 21-28th using the callsigns SM7/homecall. Activity will be on 160-6 meters on CW (mostly), SSB and RTTY. QSL via home callsigns. Detailed information can be found on the Web site: http://www.iota-expedition.com

SA-028. Operators Carl/PU1NEZ, Zeca/PY1LVF, Pete/PY1NEW and Lima/PY1NEZ will activate Sao Sebastiao Island (Ilha Bela), located in the central coast of Sao Paulo State, March 15-19th. Operators will sign homecall/2. Activity will be on 80-10 meters CW/SSB including the WARC bands, depending on propagation. Suggested fre-

quencies are:
CW - 3530, 7030, 10115, 14040, 18098, 21040, 24920 and 28040
SSB - 3755, 7055, 14260, 18128, 21260, 24950 and 28460 kHz
QSL via home callsign or through the Bureau. Addresses are:
PU1NEZ - Carlos Guilherme Correa, 9/306 Presidente Backer,
24220-045 Niteroi, RJ
PY1LVF - Jose Luiz V. Fernandes, P.O. Box 18009, 20722-970
Rio de Janeiro, RJ
PY1NEW - Emanuel Tavares Filho, P. O. Box 100659, 24001-970
Niteroi, RJ
PY1NEZ - Rogaciano Lima C. Filho, 91/1101 Belizario Augusto,
24230-200 Niteroi, RJ

J2, DJIBOUTI. David/J28EX/F5THR and Jean/J28NH/F5NHJ, who are active from here, will activate Maskali Island (IOTA AF-053) next weekend. They will leave Djibouti around 1500 local time on Friday and they will come back on Sunday in the afternoon. They hope to be active on 80-6 meters.

J3, GRENADA. A two-week mini-DXpedition is planned for Grenada, the West Indies, by Dee/W1HEO and Paul/W5PF from March 30th through April 11th. Operations will be on 40-10 meters, SSB/CW. Special attention will be given to the WARC bands and the General-class portions of the phone bands. They will have two 100 watt transceivers plus a beam for 10/15/20 meters and inverted Vees for 12/17/40 meters. Their J3 callsigns will be assigned upon their arrival, but they are expected to be J3/W1HEO and J3/W5PF. QSL with SASE direct to the respective callbook addresses or via the bureau.

JD1, MINAMI TORISHIMA. JD1BCK has been active on 10 meters between 28433 and 28460 kHz, usually after 0230z but as late as 0600z. QSL via JM1TUK.

KH6 CONVENTION. Propagation Guru Lee, KH6BZF, informs OPDX that there will be a "HAWAII STATE AMATEUR RADIO CONVENTION" at Pearl Harbor, Hawaii, on Saturday, October 13, 2001. Lee states:
"WHO: Everyone Be there! WHY? Good warm weather and good fellowship! Please mark you Upcoming Events Calendars Early...we'll appreciate that fact. More will follow: Mid March, June, July and September updates."

MJ, JERSEY. Pete/K8PT and Craig/K3PLV will again trek to the Channel Island of Jersey and be active on March 14-20th. Emphasis will be on digital modes (CW/RTTY/PSK31). Operations will be on 160-10 meters with an emphasis on the WARC bands and IOTA frequency 14260 kHz. Please QSL via their respective home callsign.

QSL INFO AND NEWS.....
Juan, CO8TW, was active in this past weekend's ARRL CW Contest as a Single Band/Low Power (10 meters) entry. QSL via IZ8CCW. Log will be available at: http://www.qsl.net/co8tw/

The QSL Manager for EI9KLH (Kinsale Light House) reports that all direct QSL requests have now been dealt with, and all bureau cards received prior to February 1st have been responded to. The Manager

apologizes for the delay in dealing with the large volume of cards received.

Rob Snieder, PA5ET, informs OPDX that all direct QSLs for V26EA, V26ET, V26FM, V26WP, VP2MPA, 8P9JR, 8P9JS, 8P9JT and 8P9JU contacts are mailed. The bureau cards will be processed in the coming weeks. QSLs can still be requested via PA5ET: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands.

Bill/K6KM and Ginny/N6RER have just return from Norfolk Island and operated as VK9NOO and VK9NNN, respectively. Bill states to QSL VK9NNN and VK9NOO to K6KM or N6RER (same address). They want to have picture cards printed, so it will be at least a couple of months before they can start sending cards to the deserving. If you have an urgent need for a VK9NNN or VK9NOO QSL, Bill states, "Send us a SASE with 'URGENT' on the envelope and we will edit an old VK9LOO card for you. An e-mail follow up would be helpful."

Nat, WZ3AR, was active from Chinoteaque Island, VA (USI# VA-002S) over the past weekend. This operation counts for IOTA NA-083 (the VA State Group) as well as the very rare Accomack County, VA. All QSLs are via WZ3AR either direct or through the bureau. ADDED NOTE: Chinoteaque Island is often confused with Assateaque Island. Assateaque Island is a National Seashore that runs on the coast of both MD and VA less then one-mile from Chinoteaque at their closest point. Chinoteaque Island counts for NA-083 and Assateaque Island as NA-139. No WZ3AR/4 operation will be from Assateaque Island.

VK0MM QSL UPDATE: Alan, VK0MM, reports the following and requests to "PLEASE PASS ON AS YOU SEE FIT" the update:
1) Alan (VK4AAR) is presently flooded under with QSL requests... his turnaround time is thus likely to be a bit longer until the initial rush has died down. Alan (VK4AAR) requests the following points be noted which will speed up the QSLing considerably:
2) Please include a self addressed envelope.
3) Please DO NOT stick Australian stamps on the envelope. A Goods & Services Tax was recently introduced in Australia and Australia Post is now issuing new "International Only" stamps. The older "standard" Australian stamps being sent with some requests ARE NO LONGER VALID for postage in Australia.
4) Please DO NOT send Yen, Lira, Deutsch Mark, Marrka, Pounds, Roubles etc. etc. The Bank charges involved in exchanging these to A$ are considerable. If you want a VK0MM QSL card, then US$ or A$ ONLY please, or if you really insist, then IRCs (which MUST be franked at the originating office and MUST be less than one year old to be accepted by Australia Post).
5) For the umpteenth time, VK4AAR is NOT the QSL manager for VK0LD and does not have the log for this station, so please do not send cards to him. QSL for VK0LD is at: http://www.eQSL.cc/qslcard
Thanks & 73, Alan ... VK0MM

YK9A is now QRT. The group made over 27,000 QSOs during 7 days of operating time. Final statistics will be available on the web site by the end of the month. The team thanks the DX community for keeping the pileups going 24 hours per day, and it was a truly exciting event. They also thank their host Omar Shabsigh, YK1AO for his hospitality and friendship. The expedition would not have happened without his support, and that of the Technical Institute of Radio. QSL via K9LA.

SU, EGYPT. SU/ZS6WPX has been heard on 20/12/10 meters during the past week. Check between 28475 and 28490 kHz between 1330-1730z. Check around 24940-24950 kHz after 1100z and 14180 kHz after 1915z. QSL via ZS6WPX.

SV5, DODECANESE. Carl, GW0VSW, will be active as SV5/GW0VSW from the Island of Rhodes (EU-001), June 16-30th. Activity will be mainly CW on all bands 40-10 meters. Operation should be around 0500-1600z family permitting. The rig will be an IC-706 with dipole antennas. Look for Carl on the IOTA and QRP frequencies. QSL via homecall.

SV9, CRETE. Dick, G3URA, will be active as SV9/G3URA between February 22-27th. He reportedly likes CW, so watch for him, especially on 14035 kHz. QSL via G3URA.

T32, EASTERN KIRIBATI. The OK operators now active as T32RD will continue to be active until March 4th. Activity in recent days has been on 80/40/15/10 meters CW. However, they have been on the other bands and phone. Also, look for them on 6 meters (check 50105 and 50125). QSL via OK1RD.

T8, PALAU. Yukio, JA6ENF, is expected to be active this week as T88NF. He will be here on holiday (with his family) between February 21-26th. Activity will be mostly CW on 80-10 meters. QSL via CBA direct or JARL.

TR, GABON. Alain, TR8CA, has been active on 10 meters (around 28462 kHz) between 1530-1600z. QSL via F6CBC. Xavier, TR8CX, is another station who has been active but on 15 meters (around 21260 kHz) after 2130z.

XE, MEXICO. The Mexican "Radio Club Satelites, A.C.", XE1RCS, will be active once more in the CQ WW 160m Phone Conetst. Last year they obtained "Second Place World Multi Operator" category. They will be especially looking for Europe, Asia and Africa with improved antennas. QSL via XE1KK.

XX9, MACAU. There are only a few days left to work Ulf, SM0GNU, as XX9TDX. He will leave on the 20th. During the weekend, he was heard on 30/17/10 meters CW. QSL via SM0GNU.

No, he wouldn't. I can't blame you for not knowing, but hams from my local club have actually been to Pyongyang and met North Koreans, who are extremely proficient at morse code and other means of electronic communication.

Just as every other country from the former Eastern block, North Koreans have had to form brigades of people who in a paramilitary organization were trained to take part in competitions. High speed telegraphy was one of the disciplines; direction finding (and grenade throwing) is another one.

I'd rather have one of these guys run a pile up than most weekend net dxers.

Just like in most major contests, operator and QSL manager of 3V8BB in CQWW CW 2000 was Dr. Hranislav Milosevic, YT1AD, 36206 Vitanovac, Serbia, Yugoslavia, mailto:yt1ad@eunet.yu

By the way, EA5EYJ maintains excellent QSL manager lists for CQWW, CQWPX and IOTA contest operations. His web site is at http://www.arrakis.es/~ea5eyj/

I'm afraid VU40AJ was just a regular India, using a special prefix in 1987/88 for something or other. All VU2's were signing as VU40 (40 years of independence?). The only Andaman expedition at the time was VU4GDG in October of 1987. Ops were VU2TS, VU2CE, VU2CVP and others.

Source record: 17835
Cross-posted to: rec.radio.amateur.dx,uk.radio.amateur

I am coming back on the air after a break of nearly 20 years and need some advice please..

I am putting up a sloping vertical, trapped for use on 12m,17m,30m, 40m,80m and 160mtrs. Total length about 77 ft. (25mtrs -ish)

I have room for about 4 or 5 full size, quarter wavelength, underground (i.e. buried a few inches) radials on 160mtrs.
Please excuse my ignorance on this matter, but will the full quarter wave radials for 160mtrs suffice as a suitable radial system on the other bands, or should I also cut radials at quarter lengths on the other bands?

If I do need to cut other radials, can I spread them underground tied up with the 160mtr radials, or should they all be spread out as far as possible?? Is there any of the above bands which I need not cut radials for ? (e.g. because one of the other sets will resonate?)

Many thanks,

John
G4IRN.

Charles,

Well, maybe I am a little overboard on the cluster thing. It just
seems to me that too many guys rely on it completely to locate the DX,
turn the antenna and set the rig on frequency. (I think I read that's
all possible now)

I guess this could become a sell-limiting thing however, when
everybody becomes so dependent, there won't be anybody left actually
tuning the bands and able to spot the DX <g>.

In my previous comments about our disintegrating DX club, a lot of the
heartburn was over what filtering would be applied to the spots. To
me the advantage of spotting would seem to be not to locate a
particular station that I have current propagation to, but to see all
of the sports from everywhere so that I could get a feel for
propagation around the world.

Speaking of propagation, I highly recommend using the NCDXF beacon
system for checking it out. It is amazing to see how often there is
propagation to an area(s) and yet the band is "dead." Maybe we should
start "spotting" the beacons. Uh oh, maybe that's a bad idea. There
would probably be some guys who saw the spot and started trying to
work 'em. <g>

Hello Wes.
I have to admit you make some good points on cluster use. I have been a 'cluster user' for about 3 years now. Since that time my DXCC country count has really skyrocketed and a big part of that was the cluster spots. I do not reply just on those spots though...I also do the "search and pounce" mode too....
Sorry to hear your DX club having some unrest within itself.....

Source record: 17823

CU3FT asked for the QSL route of CN8VW:

> > ANY QSL INFO OF CN8VW PSE
> The dx-cluster data base says DL6FBL

I am sorry to say that this is wrong. DL6FBL is the chief organizer and QSL manager of the record breaking contest DXpeditions to Morocco by the Bavarian Contest Club. Their call signs were CN8WW and 5C8M, but not CN8WV. See for yourself at http://www.dl6fbl.de/cn8ww/.

CN8VW is OM Wardi in Laayoune. Neither the Callbook 2001 nor any of the major databases list a QSL route for him. On the packet radio network, I found the following address for CN8VW: P.O. Box 992, 70001 Laayoune, Morocco. I cannot say anything about the accuracy of that information, however.

73, Felix, DL5XL (N5BC).

Dan if it was CW -- probably a ZS - So. Africa. But ZI is allotted to
the UK.
ZBA-ZJZ United Kingdom of Great Britain and Northern Ireland
ZB, ZC, ZD, ZE, ZF, ZG, ZH, ZI, ZJ
ZB Gibraltar (ITU Zone 37 CQ Zone 14)
...... ZC4 UK Sovereign Base (ITU Zone 39 CQ Zone 20)
...... ZD7 St Helena (ITU Zone 66 CQ Zone 36)
...... ZD8 Ascension Is (ITU Zone 66 CQ Zone 36)
...... ZD9 Tristan Da Cunha (ITU Zone 66 CQ Zone 38)
...... ZF Cayman Is (ITU Zone 11 CQ Zone 08)
Have never heard a ZI on the air however.

If goofy prefixes cause puzzlement -- try the massive prefix list at
URL:
http://ac6v.com/prefixes.htm

I have tried the demo of this "Hamshack" software and really like it. I attempted to email the guy to register and email came back. Does anyone have any idea if this guy is still in business.

I would like to purchase the product before the demo runs out, but if this is no longer produced then I would like to get a hold of a valid serial number for it. I think its a great program and do want to purchase it.

Thanks 73

I agree with you Jim.

Logs on file at ARRL would do it. Apply for your country credit, their
computer checks your claim against the submitted log.
Skip all the paper unless someone really wants a QSL for the wall.
I take them to the dump also as what am I going to do with 20000 cards.

583. 4.332MHz or 8.664MHz crystal source needed...

Newsgroup: rec.radio.amateur.dx
Date: 2001-02-21 18:29:37 UTC
From: Clay Autery <nospam@noway.net>
Message-ID: <7LTk6.956$Gv.4735@news.inreach.com>
Source record: 17838
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,sci.electronics.design

I apologize for cross-posting, but I'm getting a little desparate.

I need a source for 4.332MHz and/or 8.664MHz (or 17.328MHz) crystals for an important project I'm working on. So far, I've found only one source (Thanks Francine!), but the prudent man never only has one source for a part. This is especially true when that source might have trouble delivering the quantity desired.

So, if you know a place or places that might have these specific crystal values, respond here or send me an email at cautery@montacnospam.com. Note: be sure to remove the "nospam" from the domain name.

I really need y'alls help here!

Thank in advance,
Clay

Well,
I have never used a packet cluster or DX net for my hard earned
DX contacts. Just spend my time listening to the radio and talking.
Not really into chasing the paper but when it comes it will come. I
have QSO's with Liechtenstein, Marshall Islands, Japan and Jordan
are just a few that I have.
I may not have the "big gun" station and use the nets but, this is
how I want to work my DX. Each person will work their DX the
way they want to work it. If it means using the nets so be it. Why,
because in this hobby each operator and do as they please within the
rules. There is no restriction on using cluster and nets for DXCC
and I have seen no clause on the application saying that you didn't
use any of these methods to find that rare one that is needed.

Hello Joe,
I have to agree with you 100%..... let each Ham do as they will within the FCC rules and let's all concentrate on unity and not petty bickering or ridicule about some aspect of this hobby. Yes...it - IS - just a hobby. Whether you make DXCC #1 Honor Roll or spend all your Ham days on 2M repeaters with your local Ham friends makes not one bit of difference.....

I enjoy chasing DX and I am enthusiastic about it also. I want to see how well my dipole station can do and so I use the DXCC country count as a barometer. Many , many other Hams could not care less about DX and that is fine with me.

586. About Bouvet Island

Newsgroup: rec.radio.amateur.dx
Date: 2001-02-21 20:15:44 UTC
From: jimmy john <jj@sandwitch.org>
Message-ID: <4A8A59F2BDCDD311BFC800508BA36AC8074F9112@www.premiersi.com>
Source record: 17841

I got curious about what the heck Bouvet Island was all about and found these:

The weather:
http://www3.calle.com/info.cgi?lat=-54.4222&long=3.3583&name=Bouvet%20Island&cty=Bouvet%20Island&alt=164

Background on the island:
http://www.btinternet.com/~sa_sa/bouvetoya/bouvetoya.html

Two interesting quotes there:

1. Nevertheless, Bouvet&#65533;ya can be considered the most remote island on the planet: now that sealing and whaling have ceased in the Southern Ocean, it is only rarely visited by man.

2. On September 22, 1979, a nuclear bomb test occurred between Bouvet&#65533;ya and Marion Island. No-one ever claimed responsibility for the test, though suspicion has fallen on South Africa. The test was detected by satellite, and radioactive debris was later detected by personnel at Mawson and Casey, Australian Antarctic Territory.

Anyone know where, exactly, on the island, Chuck is calling home?

>or should I also cut radials at quarter lengths on the other bands?

Once you bury the radials they are not resonant. You would be better
served by installing many more shorter radials than just four long
ones.

My friend Eric, N7CL, (quoted in Devoldere's book "Low-Band DXing")
has a rule of thumb that the tips of the radials should be no more
than 0.015 wavelength apart to approximate an ideal ground plane for
any given diameter.

Obviously, there are fewer radials required when the diameter (in
wavelengths) is reduced. As a practical matter, I don't see why any
of the radials should be much longer than the radiator.

If you used 25 meters as the radius for the radial field, then using
the N7CL rule, at 160 meters the tip spacing would be:

160 * .015 = 2.4 meters

the circumference of the circle is:

2 * pi * 25 = 157 meters

so the number of radials required is:

157 / 2.4 ~ 65

If this is too many to provide then another rule of thumb would be,
subtract 0.5 dB for every halving of the number, i.e. 32 radials would
be 0.5 dB less efficient. Similarly, shortening the radials to half
this length and keeping the number the same would result in a 0.5 dB
lowering of efficiency.

Please remember, these are not ironclad numbers, but rules of thumb to
give you a feel for the tradeoffs.

Welcome back!

Hello,

dxworld.com has areas for HF/6 & 2 DX spots, QSO's and links.

I like the information they have, but I didn't care for the html
interface. I wanted to change the format of the displayed data
slightly, use less screen real-estate and less bandwidth. So I came
up with this Java app to do the job. You can have multiple windows
with DX spots and QSO's going at the same time.

For more info and to download the jar goto:
http://www.dbbear.com/k0emt/ and select dxSpot

Check out http://www.dxworld.com/ to see the html spots
and many links and tips.

I don't keep up with this newsgroup on a daily basis, probably more like every couple weeks due to my work schedule. After reading this one though thought I'd better respond. Not sure how long ago it came in but I had a very bad experience with Texas Towers when buying a Yeasu FT 100-D. You'd think that after paying over a 1000 clams for something that you could expect better than "very" rude behavior from the salesperson. The red flag went up in my brain the first time I spoke to him, he was a little curt, but the other salesman had been so nice that I kind of pushed it to the back of my mind and figured he might be acting that way because I was a woman. Then after purchasing the radio and paying over 50 dollars to get it overnight, it didn't come in until Monday. I wanted it for the contest that weekend. I had payed $30 for over night and didn't get it. I also did not get the extra back. He flatly told me he had made one call to ups and he was not wasting anymore of his time calling again. Mind you I had just spent quite a bit of money. I told him that was a pretty bad attitude to take towards a customer and he wouldn't get anymore of my business if he wanted to act that way, his answer to me was I don't want any more of your business. Since then have had several reports from others of similar bad experiences so you might try another source for this antenna if you want one.
After that if you get it I'd love to hear from you how it works out. We have thought of buying one for similar reasons. Sorry so long, Thanks, 73' Kathy AC4LB

I haven't heard him at all! I've been listening on all bands too. A
mini-beam at 20' doesn't hack it for him (although I've worked 49 new
countries since November with it). At least I saw his picture in CQ.

Thanks for the heads up!

Such boorish sales people, I am afraid, can set me off pretty badly. That just happens to be one of the "buttons" that *can* set me off. I once called a local attorney's office looking for my own attorney. Instead, I got a particularly grouchy old buzzard who was, in the absence of my normal lawyer, filling in--and VERY unhappy about it. Upon asking very politely some questions, I felt I was under assault by a boar HOG! He was VERY rude, condescending, and even took a threatening tone with me as if he was quite put out because I disturbed his nap(?). I asked him, "Sir, are you having a bad day?", to which it sounded like I was assailed by a junk yard dog--ARF, ARF, ARF, WOOF, GROWL!!!

I hung up the phone and I felt it start. A feeling that begins almost in my feet and, like Old Faithful, rises to the top of my head! I was shaking like a leaf! Not from fear, but from RAGE! I grabbed my jacket and made for the car. I drove uptown and parked the car, then went into the offices of these attorneys. I was still mad, but not like I was at first. But I walked right into the old geezer's office, brushing past the secretary and I pointed my finger right in that old SOB's face and told him this: "Mr. Whitesides, if you worked for my corporation and even looked like you were going to talk to a customer the way you just got thru talking to me, you'd be out on your keister within the hour! Next, if you EVER, EVER talk to me like that again, you old buzzard, you had better file a flight plan because you WILL go on a short TRIP. I WILL bust you right in the mouth and send you skidding across the floor! You have an alligator mouth and a canary a**, and you're fixin' to write a check that canary a** can't cash!"

The old guy was rigid against the back of his leather office chair, knuckles whitely gripping the arms. I scared the dickens out of him! All during this diatribe, all he coud say was, "WHA--, WHA--, WHA--!" I also reported him to the local bar association which put a black mark on his record.

Now that WAS an ugly exchange that I probably shouldn't have engaged in. But. you know, that lawyer has been exceptionally nice to me ever since! LOL!

Best,

Jerry

Fellow Transmitter Hunters,

For those of you who have not yet heard, the first USA Amateur Radio Direction Finding (ARDF) Championships will take place in beautiful Albuquerque, New Mexico on July 31 - August 4 this year! This exciting event will bring in T-hunters from all over the U.S., as well as from around the world! In fact, the Chinese Radio Sports Association has indicated its intent to send a team to compete in this event, and we have received word that a team of ARDFers from Australia might join the fun, too! A 2-meter hunt, as well as an 80-meter hunt will take place during the Championships.

For those of you who DO know about the event, I would like to remind one and all that if you register for the 2001 USA ARDF Championships by ** MARCH 1st, 2001 **, you will receive a registration fee discount! There is only 5 days left to qualify for this price break before the deadline, so please consider registering soon!

Details about this wonderful Amateur Radio event, including an event schedule, information about Albuquerque, rules and a Printable Registration Form can be found on the world wide web at:

http://groups.yahoo.com/group/abqardf/files/web/index.html

We invite you to participate in this historical and extremely memorable and fun event. If you have any questions, please direct them to the core event planners at abqardf@egroups.com

73 and Good Hunting,
Brian, N5ZGT

Understand your frustration. I finally got him after making and putting up a "Moxon" wire beam for 20M at about 30'. Couldn't much more than tell he was on the air before that (with my poor 'ol dipole).

It's too bad his amp pooped out. And I thought I wanted a PW-1...

Such attenuators do exist. I have in the shack a 0-100 dB attenuator in 1 dB steps. It was manufactured by Pascall, UK, about 5 years back. I forget the price but it was quite expensive. Don't know whether the firm still exists. Built into a solid die-cast aluminium-alloy box.

Cable leakage does not increase with frequency - it decreases. Worst of all at DC and audio frequencies. Leakage occurs mostly at connectors. Use threaded types, not simple plug and socket. Impedance mismatch at connectors is no problem with attenuation measurements.

I have made measurements up to 160 dB at up to 5 MHz by comparison with variable attenuators. A 10 watt signal generator is needed. Without any extraordinary precautions it is possible to make measurements with an uncertainty of a few tenths of a decibel at 100 dB.

I have also made measurements with a precision of 0.001 decibels at frequencies up to 10 MHz. Such measurements are necessary to determining the loss vs temperature coefficients of components and systems when it is possible to vary the temperature only a few degrees C. A high precision is also needed when calibrating field attenuators against laboratory standards.

One thing I do is change the monitor to a different display pattern... It's very interesting, turn your radio volume up and chnage the screen to a DOS window and the noise dissapears... if you need your computer during radio, this obviously own't work... I would buy a good video cable and put a few RF chokes on it to pull down some of the real high transitions....

Good luck, Michael K3MH

I guess that it must be quite expensive if you really get such
accuracy as you later claim, even in a controlled constant
temperature.

I also suspect that the VHF/UHF performance is not that spectacular
and since the original poster did not specify the required frequency
range, I originally asked about it.

>Cable leakage does not increase with frequency - it decreases.
>Worst of all at DC and audio frequencies. Leakage occurs mostly at
>connectors. Use threaded types, not simple plug and socket.

DC and audio circuits generally have a much higher impedance levels
than 50 or 75 ohms used in RF circuits, so the capacitive coupling is
a much worse problem. At very low frequencies the coaxial cable does
not work properly as a transmission line, thus the isolation is not
very good. However, due to losses at very high frequencies, the shield
no longer act as a perfect conductor and you can get different
currents flowing on the inside and outside of the shield.

>I have also made measurements with a precision of 0.001 decibels at
>frequencies up to 10 MHz.

I guess that must be the readout resolution in some comparative
measurements but not an actual precision. A 0.001 dB voltage ratio is
115 ppm (0.015 %), so I wonder how this accuracy could be maintained,
especially if some real power levels are involved heating the
attenuator.

Absolute accuracy should not be confused with precision.

To measure attenuation within "a few tenths of a dB" (at any attenuation level) entails detecting a difference between two voltages which are a few percent different from each other. This is an easy job for any voltmeter. Errors are not due to the comparing voltmeter but to the measuring components, cables, connectors and layout.

Accuracy entails comparison with a local standard. There will be uncertainty in the local standard in addition to errors introduced during the comparison process. There will also be uncertainties introduced at each calibration level up to the International standard.

Precision is related only to local effects such as signal to noise ratios. It is relatively easy to detect a difference of 10 microvolts between two voltages of about 1 volt each. This corresponds to a precision better than +/- 0.0001 dB

I have a list of ' live ' telnet DX clusters you can go directly to from my
site. They're listed on The DX Page of my website which is listed below.
This feature works with any version of Microsoft Windows....

Charles,

This is a good list, thanks. Works nice. I was hoping for packet/VHF nodes,
but this works a little better.

BTW, Anybody use dxbase to hook to packet/internet clusters?

Hi Paul,

Precision, Resolution. These can be the same thing or different;
however neither are a statement of accuracy.

When my old Drake TR-7 VFO gets buggy, I might note some one at
47.1652 MHz and smile at the precision of that reading, and yet it is
off by 40 MHz (an errant 4 is showing). Lots of precision, lots of
error.

However, as your question lies dormant:
> I wonder how this accuracy could be maintained,
>especially if some real power levels are involved heating the
>attenuator.
which is a concern shared by any metrologist. The load is the
defining point of a power measurement. The load must be known and
with power applied - it changes.

The first, and simplest, solution is to over engineer the load's
ability to "DISSIPATE" energy. (sorry to scream in your ear, but
others here needed to hear that) That would suggest using a 100W
continuous service Dummy Load to measure 10W period limited power
measurements. Or simply measure the load under the power applied.

Attenuators, on the other hand, are not 100W and few are 10W devices.
Most are on the order of 0.1-5W. So, I presume you wonder how to get
one of these into the signal path of a 100W rig? You use a
directional coupler to tap a portion of the power (and you need to
know the portion, but accurate determinations are fairly simple) and

feed that tap through the attenuator and add the coupling loss (or that portion) to make a total.

In short, you have a 100W Source, a 100W Load, a 20 dB Directional coupler, a variable attenuator, an attenuator Load (how many miss this one?) and a detector. You can now read applied power at a 1W level instead of the 100W level. And you can measure the variation from that level with reference to your 100W reading to the resolution of the detector. Resolution or precision could run quite high. A measurements of change would also find high "relative" accuracy.

Relative accuracy means you do not need to know where you are, or where you started in absolute terms, merely how far apart they are. There is an interesting implication here in this subject. As we are interested in attenuation, any measurement of an attenuator is both "relatively" and "absolutely" accurate. This is one of Gary Peach's link pins to the absolute measure of received power.

What makes it work with any Win9x / WinMe / WinNt is that these operating systems have a built-in telnet client that opens when one clicks on a telnet link. It is installed by default so unless someone purposely uninstalls it " everyone " has it. I would guess most folks do not know they have a telnet client at their disposable.....

Have a nice day Peter.....

Yes I use telnet DX clusters with DXBase 2001. In that program simply go to File / Modify Hosts File and enter in the IP address or server name for the telnet dx cluster you want to connect with. I use ......

cluster.dx-central.com

In the hosts file. Then got to User Options / Internet and select the entry you just added. You'll also need to add the login name (callsign) and password (usually first name) you established when first logging into the cluster presumably from the list on my site. That particular cluster has great filtering and true worldwide participation.....post back if you need any further info.......

SB DX @ WW < KB8NW $OPDX.500
Ohio/Penn DX Bulletin No. 500

The Ohio/Penn DX PacketCluster
DX Bulletin No. 500
BID: $OPDX.500
February 26, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, NC1L, KP2L, N2CY, WB2YQH/WB2RAJ & The 599 DX Report, N3DQU, W3UR & The Daily DX, K4ZLE, K4VUD, N4AA & QRZ DX, WD4NGB, N5FG, W6CUA, K8YSE, W8EB, K9EL, KU9C, K0YR, 9A6AA, DJ7IK, DK1WI, DL1EK & DX News Letter, DL4KQ, DL7NFK, EA5KB, F5NOD, F6AJA & Les Novelles, GM0GAV, I2RFJ, VE3EXY, VE7DP, VK4CP, VU2JOS and ZR1DQ for the following DX information.

MESSAGE FROM EDITOR: Reviews on OPDX's new "DXCC COUNTRY/ENTITY REPORT" and "DXCC/Entities Chart of Activity" (for subscribers) were very favorable, even though, there were a few (not many) QSNs that were not reported right. As always, there were a few who were skepictal of the report. Especially the amount of activity that was reported. First let me say, last week's data was received just before going to print, and I was running behind and did not totally examine the report. Out of 252 DXCC/Entities reported, only 13 were questionable. Most noted were: 1S, 3C0, CE0X, FR/j, HM, JD/o, KH1, KH5K, S0, VU4, XZ, YA and ZD9. The main reason for these few QSNs showing up on the report is because of "BUSTED CALLSIGNS". Other added factors are "Pirate/Slim Reports" and individuals using the "DX" command to announce something (such as receiving a QSL card from KH5K) instead of using the "ANNOUNCEMENT" command on their local Packet/TelNet Cluster. I promise I will "do my best" to weed these out and delete them in future reports..... 73 and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 18/Feb, through Sunday, 25/Feb there were 241 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3D2/r, 3V, 3W, 3Y/b, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FO/m, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a,

HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH4, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, S7, S9, SM, SP, ST, SU, SV, SV5, T2, T32, T33, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VQ9, VR, VU, XE, XU, XX9, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZK3, ZL, ZL9, ZP and ZS.
PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3C, CONWAY REEF. Operators Raymon/YS1RR, Hrane/YT1AD, Branko/YU1FW, Ratko/YU1NR, Rasa/YU1RL, Gojko/YU6AO, Vojislav/YU7AV, Dragan/Z32AU, and Mome/Z32ZM were now active from Conway as 3D2CI until February 28th, before they leave for Fiji. The team is very busy but has had troubles. Their linears are down earlier, which obviously had an effect on the overall activity of the DXpedition, especially on lower bands. However, on Sunday, February 25th, they announced the linears were back in operation. They also reported that they were having big problems with waves (stating they are more than huge). The boat that was carring the food rolled over and sank. They said that it is very HOT, and members of the team were being sunburned. On Sunday they also mentioned that they were having problems with "birds". In spite of poor conditions, the team keeps busy all the time. Pileups are everywhere on any band. For more information and upto the minute (and I do mean upto the minute) bulletins, check the Web page at: http://www.kragujevac.co.yu/3d2

3W, VIETNAM. Claude, F5PBL, will be in Ho Chi Minh City from March 22nd through the 30th. He will be active on 10 and 15 meters, mostly CW. He hopes to participate in the CQ WPX CW Contest. He is waiting for his callsign. QSL via F5PBL.

3Y, BOUVET. Deon, ZR1DQ, reported on February 22nd, that there is "Good News" to all the operators who have not worked Chuck, 3Y0C. The ship to Cape Town is being delayed by pack ice, and the date of departure from Bouvet seems to be later than March 2nd. Meanwhile, look for Chuck during following schedule:
0300-0530z - working on 3.772 MHz and also looking on 1.837 MHz.
0530-0600z - working on 14.195 MHz to Russia and Europe via long path.
0600-1100z - working 14.336 MHz to JA, VK and ZL.

4U, UNITED NATIONS HQ. Jun, JH4RHF, is now in U.S. on business and is currently in New York. He will try to operate from 4U1UN during the next several days. He was active during the past weekend on 17/15/10 meters.

4W, EAST TIMOR. Thor, 4W6MM, was heard active this past week on 40 meters CW and 15 meters RTTY. Check around 7016 kHz 1030-1200z and 21085 kHz 0700z.

5W & ZK, WESTERN SAMOA AND SOUTH COOK ISLANDS (Change In Plans/Update). We have been informed that Dominique's, F6EPY, plans/schedule have been changed since OPDX.499 (Please refer to it). He will now operate as 5W0 from February 27th through March 6th instead of French Polynesia. He will be active from South Cook Islands between March 7-16th.

7O1YGF STATUS. We continue to receive E-mail requests about the status of this Yemen operation. So, OPDX asked DXCC Manager Bill Moore, NC1L, and he reports: "We still have not received documentation yet, but they still say that they will have it for us. We need to wait and see."

9M6, EAST MALAYSIA. Look for Peter, G4MJS, to be active as 9M6BAA from March 21st through April 4th. Bands and modes of activity were not mentioned. QSL via G4SHF.

A5, BHUTAN. Charly, K4VUD (aka A52UD), reports that Kesang, A51KC, a newly licensed ham in Bhutan, is willing to make skeds for 10 meters (where he can only operate SSB) via E-mail. Kesang's E-mail address is: sophun@druknet.net.bt
Charly recommends to strike now while winter propagation is still active. Meanwhile, A51AA has been on during the past week on 15 meters. The operator was Yesney. Check 21265 kHz between 1130 and 1400z. Activity by A51AA was also heard on 10 meters on 28480 kHz between 1030 and 1530z.

C5, THE GAMBIA. Mike/DL2OE and Hans/DL7CM are now active from here as C56/homecall until March 5th. Activity is expect to be on 160-6 meters CW, SSB and RTTY. QSL via homecalls.

D6, COMOROS. The D68C operation continues to tear-up the bands with a high QSO count. The D68C online log can be found at the following address: http://www.dxbands.com/comoros/logbook.shtml

EM, ANTARCTICA. Paul, UX2HO, is now active signing EM1HO. He is located at the Ukrainian Base on an Argentine Island in the Antarctica. He just arrived on the island two weeks ago and is active on HF with 200w and a vertical. He is also active on 6 meters with 100w and a simple dipole. He will be installing a 4 element yagi on six meters in the future. On HF, he will be on SSB, CW and the digital modes (including RTTY and PSK31). Paul will be here for one year. QSL via I2PJA.

FS & PJ7, ST. MARTIN AND ST. MAARTEN. Joe, W3HNK, and his XYL are taking a well-deserved few weeks from the snow in W3 land to enjoy the sun in FS/PJ7 land. While there, Joe will be active from both the French and Dutch sides of the island as PJ7/W3HNK and FS/W3HNK. His activity will include some operations during the ARRL SSB Contest. Look for Joe from February 27th through March 15th. PLEASE NOTE: QSLs for this operation go to KU9C.

H4, SOLOMON ISLANDS. Operator Loti has been activating the club station H44AA recently. He was heard on 21250 kHz between 1200-1330z. QSL to: P.O. Box G-11, Honiara, Solomon Islands.

II2, ITALY. Members of the "Saronno DX Team" will activate their ARI site in Saronno (Varese), Italy (JN45MP), during the ARRL DX SSB Contest, March

3-4th, using the special callsign "II2R". QSL via the Bureau or P.O. Box 37, SARONNO 21047 Varese, ITALY, or the QSL Manager I2RFJ: Ivano Rigoli, Via Spluga 3, 21050 GORLA MAGGIORE (Varese), ITALY.

IOTA NEWS.....
AF-059. After their activity from Maskali Island (AF-053) the operators J28EX (David/F5THR) and J28NH (Jean/F5NHJ) hope to be active from Sept Freres (Seven Brother) IOTA AF-059 at the end of March with the callsign J28CDX.

EU-112. Peter, GM3OFT, has obtained permission to put a station on Eilean Garbh (Shiants OH-18). This will be a 3 day operation during the period May 28th through June 6th. He hopes also to do other Outer Hebrides Islands (possibly 6-7, the more easily accessible ones!) during the 10 days before or after the Shiant event. Look for more details as arrangements get finalized.

EU-136. During the past weekend, Ewald/9A5ID was expected to activate the Island of St. Marko, in the Kvarner Group (IOCA CI-117, located in the north part of Adriatic sea, between main coast and the Island of Krk), for a few hours only on 40 meters SSB.

OC-129. Look for Arnold, LA7YX, to be active as DU5/LA7YX from Leyte Island until March 3rd. Activity will be on 80-10 meters (mostly on 3790/7050/14190/21290/28490 kHz). QSL via homecall.

SA-028. Look Carlos/PU1NEZ, Zeca/PY1LVF, Pete/PY1NEW and Lima/PY1NEZ to sign homecall/2 from Sebastiao Island (DIB-16), March 15-19th. Activity will be 80-10 meters CW/SSB. Suggested frequencies are:
SSB - 3755/7055/14260/18128/21260/24950/28460 kHz.
CW - 3530/7030/10115/14040/18098/21040/24920/28040 kHz.
QSL via the Bureau or direct to operator:
PU1NEZ - Carlos Guilherme Correa, R. Presidente Backer 9, apto. 306, 24220-045 Niter=F3i, RJ,
PY1LVF - Jose Luiz Vieira Fernandes, Caixa Postal 18009, 20722-970 Rio de Janeiro, RJ,
PY1NEW - Emanuel Tavares Filho, Caixa Postal 100659, 24001-970 Niteroi, RJ,
PY1NEZ - Rogaciano de Lima C. Filho, R.Belizario Augusto 91 apto. 1101, 24230-200 Niteroi, RJ.

KG4, GUANTANAMO BAY. Pick/WA5PAE and Jay/K4ZLE expect to be active from Guantanamo Bay, Cuba, as KG4IZ and KG4MO respectively from March 16-25th. They plan to work 160-6 meters, mostly CW, some PSK31 and even a little SSB (but 'nyet' nets). Jay will make an appearance in CQ WPX SSB Contest. Pick says he will slow down to 5 wpm at times for the new "Extras". :-) QSL via home calls.

MJ, JERSEY ISLAND. Bernard/K8PT and Craig/K3PLV will be active March 14-20th as MJ/homecall. Look for them to be on 160-10 meters, with an emphasis on CW, RTTY and PSK31 and the WARC bands. QSL via their home callsigns.

NEW DX SPOTTING RECORD! Terry, AB5K, from AR-Technology, reports:
Since August 1, 1999, we have run over 1 million spots on the AR-Cluster backbone. Thanks to all of the hub nodes, regional networks, nodes, sysops and users who have made this possible. The results from this past week's ARRL CW Contest were:
Saturday Sunday Peak Spots/Hr
Worldwide Spots - 11,544 12,387 700
U.S. Spots - 6,364 8,756 550

PJ7, ST. MAARTEN. Ron/ND5S, his wife Sue/KF5LG, Bil/W8EB and his wife Dorothy/W8DVC plan to be here over the next few weeks. Ron operated as FS/ND5S last week from the French side of the island and participated in the ARRL DX CW Contest. He will operate from the Dutch side as PJ7/ND5S until March 3rd. Bil, W8EB, will arrive on the island February 26th and will operate from the Dutch side as PJ7WB and will participate in the ARRL DX Phone Contest as Single Op/Low Power entry with the callsign of PJ7B. There will be daily skeds with these Michigan hams now through March 18th on the frequency of 14273 at 2030z. Look for them on all bands, 160-10 meters, CW, SSB and RTTY. All QSLs are via their respective home callsign. Check out their Web site at: http://www.qsl.net/pj8a

PSK31 AWARD. The Penn-Ohio DX Society (PODXS) has something PSK'ers enjoy working for. The "PODXS" has a free 070 Club PSK Award program available. For info about the "PODXS" and the 070 Club PSK Award, visit their Web site at: http://hometown.aol.com/n3dqu/podxs.htm

QSL INFO AND NEWS.....
During last weekend's contest, a group from the radio club in Las-Tunas, Cuba, was active with the special callsign T48K. The station was operated by CO8ZZ, CO8DM and others. QSLs will be managed by Erhard/DK1WI and/or Uwe/DL9US by the bureau or direct. Erhard states, "Please note, that the return postage needed is 1 IRC or 2 USD, for using Air-Mail. Using the 'Land-Way', 1 USD is enough."

EA5KB was active from the Castellon/Valencia Province Group (EU-151) this past week. QSL via EA5KB.

FR/F6KDF/T QSL STATUS. Gil, F5NOB, reports that 3000 more QSLs were mailed this past weekend. QSLs received this month and in January will be mailed next time (at the end of March). He still recommends NOT to resend QSL cards yet. If they received it, you will get it.

NOT THE MANAGER! Randy, W6CUA, reports he is receiving QSL cards for C21NI or HZ1AB. He is NOT the QSL Manager for these stations. The correct QSL Manager for HZ1AB is K8PYD. QSLs for C21NI go direct to him via his CBA.

The Magnolia DX Association was active from Dauphin Island, AL, (NA-143) as W4D this past weekend. QSL to W5UE (CBA) or via the W FIVE Bureau (P O Box 999, Wiggins, MS). Full details of the operation are available on their Web site at: http://www.mdxa.org

S2, BANGLADESH. Stig, S21YJ, still continues to be active for a few more weeks. He has been on almost daily on 14318 kHz between 1400-1500z. He will

take down his antennas in early March. QSL via SM4AIO.

SPECIAL EVENT. Look for special event station, VI3GP, to be active on Wednesday, February 28, at 1300z through Sunday, March 4th, at 1300z. This special event callsign will be operated by the Eastern and Mountain District Radio Club Melbourne (EMDRC). The callsign has been issued to commemorate the running of the 2001 Australian Formula 1 Grand Prix in Melbourne on Sunday, March 4th. QSL via the VK3 Bureau, or direct to the EMDRC (QTHR), with SAE and return postage. If insufficient postage is received, the Special Event QSL card will be returned via the Bureau.

TR, GABON. Xavier, TR8CX, has been active on 10 meter FM lately. Check around/between 29175 and 29235 kHz between 1200-1600z.

V2, ANTIGUA (Operation Cancelled). Chuck, N2CY, informs OPDX that due to an unexpected trip he must make for his work, he will have to cancel his plans to operate the ARRL SSB Contest from V26. Chuck hopes to be able to try again during another contest and to put V26CY on the air.

V4, ST. KITTS AND NEVIS. Look for Joe, VE3BW, to sign V47CA from April 9-24th. Activity will be on all bands, but he also plans to be on 6 meters too.

VK9M, MELLISH REEF. The VK9WI team who bought you Willis Island in May, 2000, are at it again! Team members are David/VK4ZEK, Alan/VK4BKM, Peter/ VK4APG and Harris/VK4CWT. They will be active on Mellish Reef on 80-6 meters, April 21-24, 2001. This trip is primarily a survey trip to help facilitate the planning of a larger "full-on" DXpedition back to Mellish Reef in either late 2001 or early 2002. The team plans to be on the reef for approximately four days only. There will be one HF station operating continuously along with one 6 meter station. Suggested frequencies are:
CW - 3504, 7025, 14025, 21025, 28025, 50105 kHz
SSB - 3799, 7085, 14195, 21295, 28480, 50145 kHz
Your pilots stations for this operations will be:
Bill Rothwell, G0VDE (Europe) mailto:BillRothwell@radioham.screaming.net
Adam MAURER, VK4CP (Rest of World) mailto:vk4cp@one.net.au
Please, no individual sked requests accepted. For the latest news on the VK9ML Mellish Reef Site-Survey/Activation in April 2001, visit the VK9ML Web site at: http://www.qsl.net/vk9ml

VP2V, BRITISH VIRGIN ISLANDS (Special Anniversary). To celebrate its 82nd birthday on February 26th, Bob Denniston, VP2VI, will re-create his first ever DXpedition on March 10-11th, on all bands, 160-10 meters. His first DXpedition was held during the ARRL DX Contest, the second weekend in March, 1948, from VP7NG in the Bahamas, lead by Bob Denniston, W4NNN, now VP2VI/W0DX. Denniston will re-create the original expedition conditions as much as possible, while operating from his Tortola QTH with 100 watts to 138 ft. and 66 ft. wire antennas and hand keying. The original expedition "Meissner Signal Shifter", 100 watt home brew amplifier, and Hallicrafters SX-28A will share the operating desk with contemporary gear. Some long-time friends have been invited to fill shifts during the 48-hour CW-only event. Look for them on 24 kHz up from band edges, except on the

WARC bands. A commemorative QSL will be available with a SASE to QSL Manager W6RKC: Rick Casey, 10640 Tabeaud Road, Pine Grove, CA 95665. For more information, contact Jim Livengood at: kp2l@arrl.net

VP8, FALKLAND ISLANDS. Look for 4 members of the GMDX to be active from the Falkland Islands (SA-002) as VP8SDX, between April 23rd and May 8th. The operators will be Rob/GM3YTS, Jack/GM4COX, Tom/GM4FDM and Gavin/GM0GAV. They plan to have 2 stations active. Their main focus will be on CW, LF and the WARC bands. QSL via GM4FDM. Further information can be found on the Web page at: http://www.hfdx.co.uk/vp8sdx

VU, INDIA. Jose, VU2JOS, reports that permission to use the following frequencies by VU Amateurs have been extended up to 1830z of July 31, 2001. Frequencies extend: 3790-3800 kHz, 10100-10150 kHz and 50.35 and 50.55 MHz.

XU, CAMBODIA. A small group of Germans (2-4 operators) will be active from here July 15th through August 3rd. The first 4 days will be limited to highband activities from Siem Reap (Angkor Wat). The all band activity will be from Sihanoukville on 160-6 meters (with an emphasis on the low bands), CW/SSB and possibly RTTY. So far only one operator's callsign has been confirmed, Frank/DL4KQ will be active as XU7ABR. QSL via DL4KQ. For updates, check the Web page: http://www.DL4KQ.de

ZK1, NORTH AND SOUTH COOK ISLANDS. Two members of the Bavarian Contest Club (BCC), Uwe/DL9NDS and Klaus/DL7NFK, will be active from these islands between April 28th through May 18th, as ZK1NDS and ZK1NFK, respectively. They plan to activate the following islands from the South Cook Island Group: Rarotonga (OC-013), Mangaja Island (OC-159) and Aitutaki-Island (OC-083). They will also activate Manihiki Atoll (OC-014) in the North Cook Island Group. Their equipment consists of two 400W PAs, a 1Kw PA, LP5, V80E vertical and some wires. There will also be a lots of activity on RTTY, PSK31 and MFSK16. QSL via their home callsigns. For up-to-date information and an online logs, check the Web site at:
http://www.dl9nds.de/Cook/cook.html

Still trying to locate a service manual. Exide sold the Charger line
three years ago to Midtronics. Midtronics state they never got the
Inverter line. Referred to Prestolite Wireless without success also.
The company will not support their equipment so I must turn to
Newsgroups for help. Might anybody out there help me? Please reply to
my email address. Thanks Don smith

I think it is nothing more than the continual eroding of our freedoms. Can't do this, can't do that, can't posess this and that, yada, yada, yada.

The one comment about the radar detector in Virginia (I believe) not being allowed to have radar detectors is just one more way to whittle down freedoms. Police running radar and issuing tickets is nothing more than a revenue generator for the state or local communities. It rarely has the effect of controlling speed. People that drive fast continue to drive fast.

Peter,

Are you free to type? Are your kidnappers out of the room? How often do they have a gun to your head forcing you to read and reply to Charles Johnston's messages? It must be awful. It makes me cherish my freedom even more knowing I can killfile or just plain ignore a poster. I feel sorry for you comrade. I have watched you for a long time forced to read and comment on so many of Charles Johnston's messages. It must be hell for you. Be strong!

Glenn

I have an old ZEOS Notebook 386 that developed dead batteries when I did not keep them on trickle charge. I carefully cut one of the 2 open and found that the batteries were standard 1700 mah cells that can be be obtained from various nicad sources and soldered together. I can sometimes restore the batteries if not hard shorted by zapping them, but zapped batteries never perform well after zapping, and must be kept on constant trickle charge as you can see from my webpage at http://www.ultimatecharger.com

I hate to bitch about expeditions because I'm not putting up the money. But the 3D2CI group have consistently shut down phone operation on 10 meters just when the window opens up.

Today and yesterday they QSYed to 28.020 just when the band was opening to North America. And, while I can copy 30 wpm for contact duration, my old fist can only put out about 20 wpm. Operating full QSK, I would hear him answering the next call before I got the first two digits of my call out.

Like I said, "bitch, bitch bitch

Sorry I sent the cw file by mistake before this one.
--
Ed Lyons

I have been searching for a simple program for awhile.
At this point in time, I am not very much interested in contesting.

Here are the requirements for me that I am looking for.

I can log date, time(utc),call signs , grid squares , address,
notes,etc..., and all the other standard stuff.

But what I am looking for especially is a feature that with the other
contacts grid squares, the program could calculate the distance between
me and him.

I am sure that there is a program that does this already.

Thanks in advanced!!

That's good. All these guys who go on vacation with a radio
should pay for their own vacation, you shouldn't have to
worry about financing it for them.

>But the 3D2CI group have consistently shut down phone
>operation on 10 meters just when the window opens up.
>
>Like I said, "bitch, bitch bitch
>
>Win/W0LZ

The cluster says their Acom amplifiers are all broken. Which is
probably good, because their license on their web page says
they aren't allowed to use KW amplifiers... Don't feel bad,
you aren't the only one bitching, the kids in EU are ready to
hang the 3D2CI guys, why I dunno.

Maybe they don't understand propagation, especially from
a place in the world they've never been before. Nobody at
the airport gives propagation exams when you buy a plane
ticket these days.....

We seem to have developed a preconceived misconception that
we are ALL supposed to work EVERY DXpedtion on EVERY
band and EVERY mode.

Check the numbers, and you'll notice that this cycle forgot
to show up. Maybe that's why you can't work them.....

Don't worry. Be happy. You'll survive without 3D2CI. Go
'work' something else......

Well, Glenn, think about it this way. Most people who read a
particular newsgroup do it because they are interested in
a particular subject.

Charlie seems to think there are 12,456 'new' hams here
every week, when in reality it's the same old guys that have
been here forever.

And not everyone has access to hi-tech stuff like your killfile.

And Charlie has simply bored us all to tears advertising his
web site.

We tried the nice way of explaining to Charlie how to get web
page visitors (add some CONTENT) but that didn't work, for
several reasons. Charlie doesn't seem to understand the
CONTENT concept, and he's usually heavily medicated (see
the FAQ page on his web site), so explanations of most
anything seem to go right over Charlie's head.

This happens to be a DX news group, and when Peter or
anyone else downloads the new messages, they probably
expect to see DX. CharlieSpam isn't DX.

So it's easy to understand how Peter or anyone else would
easily tire of Charlie's constant messages to visit his boring
web site.

Lots of messages here are posted that are 'off topic'. But
usually they are posted ONCE, so nobody beats up the
people that post them.

But Charlie is a hemorrhoid - you can smear a five gallon
bucket of Preparation H in his face and he just licks it off and
keeps coming back. You can't reason with Charlie, you
can't suggest things to Charlie, because Charlie is not on
the same planet as the rest of us (see the FAQ on his
web page). Being NICE to Charlie doesn't work. Being
NASTY to Charlie doesn't work (his doctor taught him to
say Thank You). Charlie is a lost cause. He's a special case.

Anyway, I'll think you'll find there are many more people
than Peter who are tired of Charlie.....

We could create a new newsgroup entitled rec.radio.charlie, and it would have more traffic on it than some other groups in usenet, even if Charlie himself was the only participant. I don't killfile anything here, but I sure can click through it. This is a perfect example of state government downsizing (lack of proper mental health facilities).

In all honesty, you will probably never find a service manual for that piece
of equipment. The manufacturer doesn't want the public to have them. I'm
going through the crap with APC. Good luck.

Worked all Pirate DXCC: Work 100 Pirate stations from different
DXCC-countries, send in 100 QSLs to the original license holder and wait
for the reply. It only counts as a valid WAP-DXCC if you receive a "not
in log"-notification. If you receive a valid QSL, despite the fact that
you have worked a pirate, you'll have to start all over again.

Alternatively: WAS on 1296 Mhz Moonbounce. Good luck with DC.

Fellow ARDFers/T-Hunters,

I would like to remind one and all that tomorrow (MARCH 1) is the LAST day to receive a $30 registration fee discount for the 2001 United States ARDF Championships! If you have not registered yet, please do so soon! All registration forms must be postmarked NO LATER than March 1st to receive the discount. So fill yours out and drop it in the mail ASAP!

Once again, the 2001 USA Amateur Radio Direction Finding Championships take place in Albuquerque, New Mexico from July 31 - August 4! T-Hunters from across the US, as well as the world (T-Hunters from China and Australia plan to compete!) are making plans for this event, which is open to ANY T-Hunting enthusiast from anywhere in the world.

More information -- and printable registration forms -- can be obtained by visiting the 2001 USA ARDF website at:

http://groups.yahoo.com/group/abqardf/files/web/index.html

Spread the word, and register today! Don't forget about the discount we are offering up until tomorrow (March 1st)!

73,
Brian, N5ZGT
2001 USA ARDF Championships Core Planning member

Yes the very expensive Netscape and Internet Explorer are rarely used in
this group. Yawn.
I suppose your brain would implode if you just ignored a post and didn't
read it, right?

> And Charlie has simply bored us all to tears advertising his

Peter does have the "hi-tech" stuff and could easily filter out Johnston's messages. He choose to act the victim and whine everytime. An ego thing. Just likje you and your weak explanation above.

And probably many more that are more tired of yours and Peters Old Timers Attitude that only your way is the right way. Your statement above is a look inside to your inner workings Jim. REAL UGLY at best. At least Charlie attempts to help where as Peter, you and a few constantly belittle folks for not thinking "your way". Yes, very ugly Jim.

Again, what caliber gun is at your head forcing you to read Charlie's messages that are so bad? You low-tech software doesn't show the author of the message you are about to read? What exactly is it that makes you read these messages?

Glenn

Well Jim that is nice and I was just explaining what a weak pathetic excuse you and your best buddy German are in your attacks on Charlie. It is one thing to expose people that are taking advantage of others or to call a jackass a jackass for attacking someone that seems to harbor no ill will towards other. The only thing Charlie has done is not follow the laws of nature and Ham radio according to the biggest pair asshole I have seen in a long time on Usenet.

You are a liar Jim from your first sentence on. A person "explaining that it's easy for me to understand why other people get bored with" wouldn't need to call him a "hemorrhoid" or say he is "not on the same planet as the rest of us" or you remark "He's a special case" among the other crap you and your butt buddy from Berlin spew unless you are really conversationally challenged . That is just a self important asshole talking and has nothing to do with "explaining that it's easy for me to understand why other people get bored with him.

The tip of the ice berg and something you might ask your doctor about is when you spew the line "Being NICE to Charlie doesn't work. Being NASTY to Charlie doesn't work" Says it all Jim.

Make some more excuses for your boorish behavior Jim. They are so thin and weak its almost scary you are willing to post your tripe trying to defend it. You must be a pathetic man with a more pathetic life. That's the least one could hope for to explain such bizarre behavior. If that isn't the case you are one sick puppy.

Typical Jim when he can't justify his childish actions.

> Wow. I'm impressed. Thank you for that excellent verbal lashing.

Is that what you call the truth Jim?

> You win again. You have slain me with your Magic Key Bored.

Glad to see you didn't deny being a liar Jim. Actually surprised but I guess
denial is the same for you. Can't wait to see what you do next to impress
Peter and try to make yourself seem important to the group.

660. QSL Card Maker

Newsgroup: rec.radio.amateur.dx

Does anyone know where I can find a simple program
to Print a few QSL cards?
Many thanks,
Bob

Two places to look - URL:
http://ac6v.com/dealers.htm#QSL

Also you can use Power Point to make cards

Also use a 35mm photo with an Avery transparent label for the call sign
and a white Avery label on the back for QSL info - see URL:
http://qrz.com/database?callsign=ac6v

MESSAGE FROM EDITOR: My wife and I would like to thank the many who sent congratulation messages on OPDX's 500th issue. We hope to continue to provide you with the up-to-date DX information each week best as we can. As long as the DX Community provides the info, we will continue to send it out..... 73 and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25/Feb, through Sunday, 4/Mar there were 243 countries active. Countries available: 1S, 3A, 3B8, 3B9, 3D2, 3D2/r, 3V, 3W, 3Y/b, 4J, 4L, 4S, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH3, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, S9, SM, SP, SU, SV, SV5, SV9, T31, T32, T33, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZF, ZK1/s, ZK2, ZK3, ZL, ZP and ZS.
There were 37 CQ Zones available during the past week.

CQ Zones that were not active are: 2,3,4
There were 51 ITU Zones available during the past week.
ITU Zones that were not active are: 3,4,7,8,9,15,21,22,23,24,25,26,31,
34,35,43,58,59,68,69,70,71,72,74,90
PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As
always, you never know - "Work First Worry Later" (WFWL).

OPDX InterNet Subscribers will receive an additional bulletin (due to its
size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3C5, EQUATORIAL GUINEA. Alan, 3C5A, who is active on 6 meters, expects
to leave here in April.

3D2CI, CONWAY REEF. This operation is now QRT. The team had a bumpy trip
back to Fiji due to Tropical Cyclone PAULA. However, the team made it back
safely in spite of the terrible sea-sickness they had. The team net 30,000
QSOs on the operation. Look for the logs to be available after March 9th
on the Web page: http://www.kragujevac.co.yu/3d2/
Last week OPDX had a error and reported that YU1FW was a member of Conway
team. This is incorrect and YU1DX/Srecko should have been listed instead.

3G, EASTER ISLANDS. Just a reminder (Please refer to OPDX.495) to look
for a team of Chilean and German operators to be active from here as 3G0Y
now through March 19th. Operators mentioned are: Alfredo/CE3WDD, Sergio/
CE3WDH, Fred/DK1BT, Falk/DK7YY, Tom/DL2OAP, Mar/DL3DXX, Jan/DL7UFN,
Norbert/DL9NEI and Danilo/XQ3ZW. The team plans to be active mainly on
CW and RTTY. Operations will be on all HF bands, but with an emphasis
on the lower bands and the WARC bands. QSL via DK7YY. For more information,
check their Web site at: http://www.qsl.net/3g0y

3Y, BOUVET. By the time you read this, Chuck, 3Y0C, should have departed
from Bouvet as of March 4th. He was picked up by the ship "RV Lance"and
headed to Cape Town, and is expected to arrive around March 10th.

59(9) EDITOR RETIRES. OPDX received the following message from Bob, WB2YQH,
Editor of "The 599 DX Report": "After several weeks of considering all the
circumstances here at '59(9)', we have decided to retire from the DX bulletin
business. This was not an easy decision. We started this publication from
the ground up 7 years ago. It has grown to be the largest of the U.S. paid
subscription newsletters. Each issue was created with care and dedication to
deliver a full and complete issue. We have sold the subscription list for
all versions to Bernie McClenny, W3UR, Publisher of The Daily DX. Bernie's
journalistic style closely matches ours and we are certain he will provide
you with the same high quality newsletter each week. He has a solid DX
background to satisfy all your DX needs. This publication will be called
The Weekly DX and will be available in paper and PDF versions. He will
provide you with all the details next week. All your subscriber information
has been forwarded to him. Any renewals received here will be forwarded to
him as well. We are retaining the company name and the Flying Horse Callbook
business as The 59(9) DX Report - Callbook Distributor. We will continue to
offer the WARC Award and the current QSL Pipeline Directory. We have
enjoyed all your positive comments along the way. Thank you all for your

support. A special Thank You to my wife, the creator of the layout and all the graphics, for being there every week to proofread the issue. Thanks for staying with us, it's been a great ride."

5U, NIGER. An Italian group consisting of Silvano/I2YSB, Paolo/I2UIY and Marcello/IK2DIA are now active until March 12th. The team was active during last weekend's ARRL Contest as 5U5A. However, look for them to be active this week as 5U2T on CW and 5U2K on SSB. There has been a lot of activity on 40-10 meters, especially the WARC bands. QSL via I2YSB direct or via the ARI Bureau. Also, check out the following Web page for details and an online log search: http://digilander.iol.it/i2ysb

9M0, SPRATLY ("The UnDXpedition", refer to OPDX.498). Members of the Central Arizona DX Association (Darryl/AF7O, Dennis/AF7Y, Sally/KM5EP, Mike/N7MB, Dan/NA7DB, Jerry/WB9Z and Luis/XE1L) are now active as 9M0M. Some members were active in the ARRL DX SSB Contest during the past weekend. Activity will be 80-10 meters CW/SSB. QSL via K7XN. For more information, check their Web site at: http://www.xcvr.com/9M0M

9M6, EAST MALAYSIA. Andy, G4ZVJ, plans to operate CW only from 9M6AAC, East Malaysia from March 8-12th. His activity will include an entry in the RSGB Commonwealth Contest (BERU).

AP, PAKISTAN. Hasnat, AP2HA, has been active on RTTY around 21081 kHz between 1330-1430z.

CQ1, PORTUGAL. An operation sponsored by the Costa Verde Radio Club will sign with a special callsign CQ1CV on the air from Portugal during the CQ WPX 2001 SSB weekend. The site of operation will be on the northern border close to Spain on Serra Amarela at roughly 1200m altitude. The entry will be Multi-Single with 6 operators joining the team: CT1ENQ/Miguel, CT1ERK/Antonio, CT1ETE/Paulo, CT1GFK/Antonio, CT1GPQ/Goncalo and CT2GTP/Paulo. All these operators have good contest experience. The team will be active on all 6 bands and is aiming at the World Top Ten spot and will do their best to get there.

CQ3/CQ4, PORTUGAL. Cupido, CT1BNW, informs OPDX that he will be active during the next two CQ WPX Contests with special callsigns to celebrate the event "Porto 2001", the Capital European of Culture (CEC). Look for him on SSB, March 24-25th, to sign CQ3CEC. Look for him on CW, May 26-27th, to sign CQ4CEC. QSL via CT1BNW.

D68C QRT. This operation is now QRT. Reports indicate that they excessed over 160,000 QSOs, with RTTY QSOs exceeding 4000, PSK exceeding 1,000 and FM 3,200. It will be a while before someone breaks this record.

DXCC NEWS.....
Bill Moore, NC1L, DXCC Manager, reports, "We just approved ST0P for DXCC credit. It was on the bad list for lack of documentation since the middle of last year. The documentation has been reviewed and it is OK. People can now receive DXCC credit. Anyone who has submitted it and had it rejected can contact us and we'll be able to update their record without having to submit the card again. If not, it can

be sent in the next submission."

EA8, CANARY ISLANDS. Well known DXer Martti Laine, OH2BH, had a temporary escape from the rather cold OH-land and was active this past week from his Canary Islands QTH as EA8BH for the ARRL DX SSB Contest. It was reported that Martti has offered a drink on his account at HamCom in Texas, June 9-10th, for those who were lucky to work him on all six bands. See the following Web page for details: http://www.hamcom.org

FK, NEW CALEDONIA (Great News! TX0). Jacky, F2CW, is currently active from here as TX5CW (but earlier in the week as FK/F2CW). He has been active mainly on CW on 30/20/17/15/10 meters at various times. However, here is the great news. "The Daily DX" is reporting that Jacky will be heading a group of four operators to activate Chesterfield Islands (DXCC's newest entity) between April 24th and May 8th. Reportedly, arrangements have been made for a chartered sailboat to take the team there. Dany, F5CW, and at least two other operators will join the group. They expect to have 3 stations active. There will be a special effort on the lower bands and 15 meters. More details are forthcoming.

HA, HUNGARY. Viktor, HA5LV, informs OPDX that operators in HA-land are still waiting to be permitted to use 6 meters. Any reports of activity are SLIMS.

HC8, GALAPAGOS ISLANDS. Pedro, HC1OT, is now active from San Cristobal Island, Galapagos, as HC8Z until March 8th. QSL via NE8Z: Rick Dorsch, Box 616, Hamburg, MI 48139 USA.

HI, DOMINICAN REPUBLIC. Babs/DL7AFS and Lot/DJ7ZG will be on tour again and will be active from here as DL7AFS/HI9 and DJ7ZG/HI9, respectively. They should be active now through March 23rd. Activity will be on 80-6 meters on SSB, RTTY and PSK. QSL via DL7AFS.

HK0, MALPELO ISLAND (Update). Pedro, HK3JJH, informs OPDX that he will leave for Malpelo April 4th and his operation will start April 7th (if all goes well).

IOTA NEWS.....
AS-NEW. Bill-Chen, BV9BC, from the "Eastern Branch of Chinese Taipei Amateur Radio League" reports to look for BV9O from Orchid Island (Lan-Yu) from March 15-19th. Operations from this new IOTA will take place from Lang-Tao Elementary school. QSL via BV8BC: Bill-Chen, Box 222, Taitung-city 950, Taiwan.

AS-056. Masa, JA6GXK, will be active from Danjo Archipelago (Meshima Island) now through March 8th during his spare time. Suggested schedule is as follows: March 5th 1000-1500z, March 6th 1000-1500z, March 7th (no times) and March 8th 1000-1100z. Activity will be on 40 meters, 14260 and 21260 kHz +/-10 kHz. Operations will be on SSB/CW/SSTV. This is not a DXpedition. QSL only via the Bureau.

OC-066. HA9RE is active as FO0ARE from Tuamotu Island. His length of stay is unknown. QSL Manager is HA8IB.

OC-144. Irfan, YC4FIJ, a resident on Belitung Island, can be found a few days during the week on or around 21260 kHz between 1200-1600z. QSL via YC9BU.

OC-201. Bob, G3PJT, will be active from Waiheke Island as ZL4CC from March 8-13th. His activity will be mainly on CW, however, he does plan to participate in the RSGB Commonwealth CW Contest. QSL via G3PJT (direct or bureau).

IQ, ITALY. The "Campania Contest Team" will participate in all major contests throughout the year of 2001 with special callsign IQ8S. The team operators are: IZ8AJQ, IZ8DBJ IZ8CEV, I8TLI, IZ8CSD and IK8YBE. QSL via IZ8DBJ direct (or via bureau) to: Mario Pesce, P.O. Box 15, ZIP 80070 Bacoli (NA), ITALY.

JD, OGASAWARA. A station signing JD1BIA was active over the weekend during the ARRL Contest running 10 watts on 21353 kHz. Length of stay is unknown.

KH0, MARIANA ISLANDS. Nob, JM1LRQ, will be active as KH0/JM1LRQ from Saipan Island (OC-086), March 22-26th. Activity will be on 160-6 meters CW/SSB. He plans to participate in the CQ WPX SSB Contest as Multi-Band entry. Nob states that he will concentrate on CW outside of the contest. QSL via the bureau or direct to: Nobuyuki Arai, 5-6-1-1002 Kitayamata, Tsuzuki, Yokohama, 224-0021, Japan.

LLDXT UPDATE (QTH Needed). Rob Snieder, PA5ET, reports that "The Low Land DXpedition Team (LLDXT) is currently planning the 'Caribbean Tour 2001' to Grenada (J3) and St.Vincent (J8) which will be held in August/ September 2001. We are looking for excellent operating spots on both islands preferable on the north side, or on a hill with free sight to the north. The locations should at least have 2 bedrooms, big living and plenty of space in the garden to setup yagi's, verticals and wire antennas. We found several nice villa's on the Internet but all of them are very expensive. Who can give us some valuable information/tips which can contribute to a big success of this years tour." If you can help, send an E-mail to Rob at: pa5et@muurkrant.com
Also, visit the LLDXT Web page at: http://www.qsl.net/lldxt/

PW0S PRESS RELEASE/SUMMARY. This operation is over, making around 7800 QSOs. OPDX InterNet Subscribers will receive the complete press release/summary as an additional bulletin.

QSL INFO AND NEWS.....
The ARRL Letter reports that the British Virgin Islands has a new QSL Bureau address effective immediately. It's BVI QSL Bureau, PO Box 4, West End, British Virgin Islands.

QSL cards have finally arrived from the printers for the July 2000 operations of FP/KT1J, FP/N1JEZ and KT1J/CY9 (all via K1WY DXA), and WV2B/CY9 and WA4RX/CY9 (both via N2AU). Direct and bureau cards will

be mailed very shortly.

Alfred, IK7JWX, inform OPDX tha EQSLs are available for: IK7JWX, IK7JWX/7, IK7JWX/P, IK7JWX/ILH, IK7JWX/ZA, IK7JWX/IJ7, IK7JWX/IL7, IJ7/IK7JWX, IL7/IK7JWX, ZA/IK7JWX and IQ7J. Check the Web site at: http://eqsl.cc/qslcard/
Regular QSLs are also available via the bureau.

IQ7J was activated during the ARRL SSB Contest by the "Salento Dx Team" from Lecce, Italy. QSL to IK7JWX via the bureau of Italy or direct to: Alfredo De Nisi, P.O. Box 218, 73100 LECCE, Italy.

NOT THE MANAGER. Karl, DL2FAG, informs OPDX that he is not the QSL Manager of Z21AV. He is receiving at the moment quit a lot of QSL request for Z21AV (direct and bureau). Please check your databases.

Several have asked what the QSL route is for TR8CX. QSL TR8CX to: Xavier Cholat, BP 4776, Libreville, GABON.

The recent operation of W4D from Dauphin Island (NA-143) now has the log search and pictures available on the MDXA Web Page: http://mdxa.org/dauphin-2001.html
The photo on the main page of the island at sunset is a possible photo for the QSL card.

Doug, N6RT, informs OPDX that the latest logs for XX9TDX and VQ9GB are now available at the Web site: http://dx.qsl.net/logs

Fabrizio, IN3ZNR, inform OPDX that his processing of QSL cards for his Laos 2000 DXpedition, where he signed XW3ZNR and Mauro/IN3QBR signed XW3QBR between December 27th (2000) through January 11th (2001), will begin after March 15th, once he has the picture QSL card back from the printer. He is also glad to inform everyone that both operations were approved by ARRL DXCC Desk.

RARE OBLAST. Leonid, UA6CW, informs OPDX that his good friend Kirill, UA6CT, a reporter for Russian television, is now active from Chechnya as UA6CT/6. He will be on all bands with 100 watts with dipole antennas during his spare time. It's a good chance to confirm this rare oblast. Leonid may also take part in the Russian DX contest. QSL via RK6AXS, either direct or bureau.

RRC ANNOUNCEMENT. The Russian Robinson Club is proud to announce the results of "World Robinson Cup Marathon 2000" and the rules for the upcoming "World Robinson Cup 2001" (WRC-2001). The WRC-2001 participation period is from April 1st through September 30th. The new rules for the WRC-2001 can be found on the Web site: http://rrc.sc.ru
Any comments or questions are welcome via E-mail at: wrc_rrc@mail.ru
PLEASE Note: The lists of islands for National Islands Programs are available on the RRC site and on the official site of the program.

SOUTHERN PACIFIC DXPEDITION (3D2, A35 and 5W). Hirotada, JA0SC, will be active this month from Fiji, Tonga and Western Samoa. Look for him to

sign A35SC for 5 days from Tonga starting March 10th. He will head to Apia, Samoa, on March 15th and be active there for 5 days as 5W1** (callsign will be assigned upon his arrival). He will arrive in Nadi, Fiji, on March 20th and operate for 2 days as 3D2HY. His suggested operating frequencies are: SSTV - 21343, 28683 and 14233 kHz; RTTY - 21080, 28080 and 14080 kHz. His equipment is a FT-100 with a HL-200 amp (200 watts) into a CY153 (15m), 10 meter 3 element monobander Yagi and a PW-1 Portable HF Vertical antenna for 7-30Mhz. He will use a Vaio Laptop PC with MMSSTV software for SSTV and MMTTY for RTTY. QSL via the Bureau or Direct to JA0SC: Hirotada Yoshiike, 722-1 Shiba matsushiro-cyo, Nagano-city 381-1214 JAPAN.

SPECIAL EVENT. Look for special event station IR0MA to be active next month (April) commemorating the 2754th birthday of Roma. This operation will be valid for 5 points on the "Natale di Roma Award". On April 21st, look for IR0MA to be active from the "Capitolium of Roma". QSL only direct to I0MWI CBA. ADDED NOTE: OPDX InterNet Subscribers will receive an additional bulletin containing the details of the "Natale di Roma Award".

VK9L, LORD HOWE ISLAND. Reorts indicate that Ed, K8VIR (aka-ZL4IR) is planning to operate as VK9EHH from here beginning this week, March 5th. Watch the IOTA frequncies. QSL via W8WC.

VP2MDY OPERATION SUMMARY (Sable Island, CY0, Next). Art, N2NB, aka-VP2MDY, has made it safely home and is happy to report that the logs have safely made it to his QSL Manager NW8F's QTH. Art would like to thank everyone for making his one man 6 day operation worth while and fun. His totals are:
160 Meters --- 176 QSOs 15 Meters --- 1286 QSOs
80 Meters --- 499 QSOs 12 Meters --- 499 QSOs
40 Meters --- 208 QSOs 10 Meters --- 1126 QSOs
30 Meters --- 635 QSOs SSB --- 3163 QSOs
20 Meters --- 1760 QSOs CW --- 3894 QSOs
17 Meters --- 868 QSOs TOTAL --- 7057 QSOs
Art mentions that he would like to hear some feedback (both positive and negative) from you. He also mentions that there are 17 of you who are on his elite list for working him at least 8 times. His E-mail address is: A1RTRAFFIC@aol.com Art is currently making plans to go to Sable Island (CY0) next.

ZD8, ASCENSION ISLAND. Jim, N6TJ, will once again be active as ZD8Z from May 7-17th. QSL via VE3HO (U.S. stamps are OK).

ZW0T, TRINDADE ISLAND. Ben, PY2KQ, informs OPDX that a DXpedition to Trindade Island is scheduled for October, 2001. The current list of operators are: PU2RYW/Fran, PY2NW/Claudio and PY2QI/Erwin. There will will be two stations active for two to three days, ZW0TB on SSB and ZW0TW on CW. This DXpedition has been planned since January and they currently have three sponsors at this moment:
ICOM Incorporated Japan - is providing them with 2 HF transceivers.
SOUNDY Equipamentos para Radioamador - will help them with partial QSL expenses and some equipments.
RADIOHAUS Radiocomunications - will help them with partial QSL expenses

and some accessories.
They also have the support of the Brazilian Navy, which has a base
there and also ANATEL, the Brazilian Telecomunication Agency which allowed
them the licences for ZW0TB and ZW0TW. Ben, PY2KQ, will be the QSL-Manager
and will support the group. You can check detailed information about this
DXpedition by visiting the official web site (still under construction)
at: http://www.radiohaus.com.br/trindade.htm

Quoting sorta broken again.

Why would 1296 EME WAS be that hard? First, MD counts for DC, and I'd think that a 1296 EME portable station (or even mobile) wouldn't be too difficult. I am pretty ignorant about EME, though, so maybe there are technical difficulties.

Hi folks,

With ARRL dues going up again and me realizing that the only reason I belong is for DXCC (which I qualify for but need to send in for) and Outgoing QSL services, has anyone on this NG found another outgoing service which is competitive with ARRL's ??
I think ARRL is now $7 / pound.
With all the fee increases and now another dues increase one would think the deposed democratic politicians have landed in Newington! :)

W5UN will probably tell you that it wasn't that hard to work DXCC on 2 meters. It only takes a single Yagi and 100 Watts to work. And patience. And someone willing to try over and over again until the QSO is complete.

I'd think you need 4 long (say 20 lambda) yagis for starters, at least 3-400 watts output, a very low noise level front end receiver, optimized TX-switching with low loss, optimized stacking distance, precise azimuth and elevation tracking, decent propagation prediction (distance varies), good weather (no rain or snow, low humidity), physical distance from noisy electrical appliances of all kinds. Times two, times fifty.

Not that easy.

try http://www.qsl.net/wf5e/

This is a pretty good service. will forward cards direct to a qsl
manager if there is one. COst is a tad high 4 cards for $1 (.25 each)
vs just over 4 1/2 cents for the ARRL. Lead times are about the same for
either way, although I think the return rate is better with Les and his
service

A "busted" spot is one in which the callsign sent to the cluster is wrong -
is not the callsign the DX station is actually using.

(personally, network traffic issues aside I think people are doing a
disservice by tagging these spots as "busted". If the people who chase them
don't bother to double-check & copy the callsign off their HF radio, they
deserve to lose credit for the QSO.. Tagging spots as "busted" is like
blinking your headlights to warn oncoming speeders of a police car.)

We sysops in Europe already thought that somebody is doing
intentionally sabotage to our dx-cluster network, since the spots
arrived TWICE:

first as e.g. w1abc, then as w1abc/busted.

This is very annoying! So, pse stop feeding these "busted"-spots into
the cluster network!
Any modification to dx-spots MUST be avoided.

Although we already could trace down some earlier modifications to a
certain sysop/cluster here, the other last observed mods
(adding a blank behind dx-stn-call, stripping parts off from comment
field) are coming probably through "user"-links and/or telnet-links
and/or by bugs in new cluster node software..

Most European sysops are aware of all the problems user-links are
causing, if the setup of own node is not done right.
The forward of such user-link-spots back into the network must be
prevented, if not permanently under control!

For that reason many sysops here do not accept such user-links and
disconnect them if realized.

If contest stations are setting up a provisional dx-cluster node,
they should have a close look, what their node is receiving and
transmitting. Check it out BEFORE the contest!

695. Blackout allows amazing DX!

Newsgroup: rec.radio.amateur.dx
Date: 2001-03-07 12:21:33 UTC
From: ti2dll@email.com
Message-ID: <985949$bumc$1@ID-7470.news.dfncis.de>
Source record: 17750

Hi all,

It's 03:15 GMT on march 7th and I'm jumping up and down all over the shack, I cannot believe what I just witnessed...

We've been getting some rain and wind these past few days for the first time in several months. And the problems with electrical networks were to be expected... about 2 hours ago the power went out: all over the country from what I heard on local emergency service frequencies.

Well, I wasn't about to let this opportunity pass me by. A clean environment to work in for the first time in years. I took the battery out of my car and plugged in my FT-840. What I heard amazed me.

I had a background noise level of S0 on 28 and 21 MHz. 18 MHz had a background noise of only about S2... and 14 MHz, of all bands, was clean... S1. I jumped down to 7 MHz, and had an S4 level, 3.5 MHz had S7. I had never thought things could be so quiet. I went to 14.195 and just happened to catch a 3B8 station with quite a pileup on it... for once in my life I heard him perfectly, along with all the LU and K stations calling... even though he was only S3. A shame though, the battery wouldn't give me the amps to run full power on the rig and work him :/

And when the power came back on 5 minutes later it was even more amazing. All of a sudden the background noise went from the S1 to S7... 3B8 disappeared completely in the noise, along with most of the stations calling! I ran downstairs and cut the power to the house (ignoring everyone who was yelling at me for doing it... <g>) and went back up. The noise was now at S5... and 3B8 was still gone.

Amazing. I never thought so much noise could be coming from the power wires, and so much from the wiring in my house. And even more amazing that electrical noise could be swallowing up so many signals!

Now the question: what can be done about it? Would elevating the antenna to a more decent height help? Install some kind of filtering device on the power coming into the house or at least into the shack? Changing antennas?

BTW, the rig used for the test was a Yaesu FT-840. It was plugged into a wire G5RV through an MFJ949E tuner, the antenna's just above the rooftop in inverted V configuration, the apex at about 5.5 meters. The battery was a regular old Exide 35A car battery.

Hallo Ronny,

I received a lot of Jave bugs. I am not an expert in Jave. I do it in plain HTML code.

By the way;
I have discovered that you radio amateurs are not responding quickly.
Are you better in the Air than typing an Email?

Some time ago I posted a question on the rec.radio.amateur.equipment forum asking for a reference where I can download Navtex software. As nobody has replied to the thread,
I'll rephrase my question :-)) Can anybody get me started!

I have bought for my sailing yacht(see my Site) a Lowe HF-150 mainly for receiving Navtex and
Weatherfax/charts

Who can provide me a 100% operationally Demo Software with a restriction of 30 days to receive Navtex and Weathercharts and, all information to decode synoptic weatherfax code.

If this is not the proper or only newsgroup please correct me.

Best regards,

Well, Walt, I also have only one PSK31 contact on 30m - with K0AQO on 10.140. But W1AW transmitted on both PSK31 (10.140) and MFSK16 (10.135) during the HF Digital Run on January 13, 2000, lending support to the conclusion that digital modes are legal on 30m, if not particularly popular. Copy of W1AW here on 30m was the best of all the bands they used -- no QRM!

According to RAC, in Canada the only restriction is on maximum bandwidth (1 kHz). According to the ARRL band chart, US hams can use CW, RTTY or data modes on 30m. According to both ARRL and RAC band plans, the place to look for digital modes is 10.130-10.140 MHz. So, I guess the best advice is "keep trying..."

I'd search the house for the source of the noise that went away when you killed the house power. Try one breaker at a time until the noise returns. Then search the loads on that circuit. Could be a VCR or TV, these don't turn completely off if they are remote control operated.

706. Re: Blackout allows amazing DX!

The only thing that you can do is move to an area where RF pollution is lower. The lower HF bands are not usable at all for DX in many places.

So what's wrong with that? Right after religion, the second largest scam in the history of mankind is this American paranoia about "speeding" (i.e. driving 5 mph above the speed limit). Typical politically correct brainwashing: we all drive within the posted speed and nobody dies. Right. Just like we're gonna win this war on drugs - any day now. Four legs good - two legs bad.

Better yet...a common server we log into and IT QSLs both stations that verify their QSO over the air. You can have your card on the server and it only gets sent when the smart server sees that both stations are logging same QSO data.

Given enuff BW, it could keep track of contests, DX, propagation trends, openings, etc. Sort of the Mother of all WWW clusters.

Now go take on the day.....

715. Questions for a Potential DX Operation

Newsgroup: rec.radio.amateur.dx
Date: 2001-03-11 14:01:48 UTC
From: NCS <palitz@attglobal.net>
Message-ID: <tan1atdvdtuu3c@corp.supernews.com>
Source record: 17670

I'm going to be living in Ghana (9G) for some time, and want to get on the air - not looking to be a major contester, just for fun. I will have a house on a corner lot with a good size lawn, and will also have a Ford Expedition for mobile operation. I don't think there are any VHF/UHF repeaters here. I'm a long time ham with a preference for CW (with QSK) and digital modes, but haven't been on lately and am not too familiar with current equipment.

1. I am looking at two small rigs, the Yaesu FT100D and the Icom IC706MkIIG. Price differences are not very important to me. What comparisons or experiences do you have to report between the two? What accessories or options might be useful? Is it practical to run either off a car battery on a charger? My perception is that Kenwood does not have a similarly capable micro rig; is that correct?

2. I'd rather not put up a tower and yagi. I do have sufficient land for a trap vertical with radials, or for dipoles/inverted vees perhaps up to 1/2 wave on 80 meter size. Any suggestions? Do any of the trap verticals break down into checked- or carry-on baggage size?

3. Any ideas for multiband mobile antennas that would be compatible with a Ford Expedition? What kind of mounting would work well?

4. I am guessing a stateside QSL manager would be a good idea. What's the best way to find one, and what is a typical arrangement with one?

5. What kind of logging programs are popular? I suppose it should be contest compatible, be able to print QSL labels, and certainly to be able to export log files for a QSL manager.

6. How rare is 9G these days, anyway? Are any of the places I could reasonable drive to and operate mobile, such as Togo, Benin, Burkina Faso, or Cote d'Ivoire needed during contests or at other times?

Thanks in advance for your advice!

73,

Bob Palitz AA6Y

Hi Rod, the above link is one and I seem to remember one of the CD QSL
services, Buckmaster, QRZ or another offering some form of this or it
being in the planning stage. BUT I also understand that the ARRL is
working on a unified online database for all its contests, awards and
etc. The implacation being that their, ARRL, will be the do all be all
of electronic QSL services and further implying that their system will
be the "ONE". I would have no problem with that except thatI would be
afraid that they would tie their system to membership and for various
reasons I have tended to shy away from joining for nearly 30 years.

I use the FT100D for mobile as well as fixed. If you use the 100D, plan
on an external speaker (even though the 100D has a larger speaker in the
case).

Take an external antenna tuner (MFJ 941E works well).

And, my fixed-location 100D runs off a deep-charge marine 12-volt
battery all the time (recharging when necessary).

HF antenna - Look at the B&W Folded Dipole - 95 feet long, better than
1.5:1 SWR across the HF bands. It comes in a cardboard tube about 5 ft
long.

Mobile antenna - Hustler with various resonator coils. 'Course, that
will reguire a hole in the vehicle.

Source record: 17677

I have a couple of questions I bet some of you could help me wiht. I got a lot of responses from my last posting regarding if anyone knew of any Newsletters or Nes groups that related to 30 meters. Seems like this is a popular band ! I know it is a good band. Ok, the questions are this:
(1) HOW do you start a News group, if we don't have one lets start one !
(2) Would you be interested in a NEWSLETTER regarding activity on this band ?
Please reply by direcct e-mail , sometimes i am not in here that often to check the News groups but I do check my e-mail all the time. 73 and thanks
_ Larry, WB5KYK/QRP

720. How does one increase QSL card return rate?

Newsgroup: rec.radio.amateur.dx
Date: 2001-03-11 16:53:38 UTC
From: "John (KB3CDF)" <murphman@erols.com>
Message-ID: <98gaiqpsg1@bob.news.rcn.net>
Source record: 17674

With 6m and HF (General privileges), my return rate has been 50% thus far. I used direct and burough "forward routing". The "reverse routing" has been established through the burough but best from USA Hams via direct. DX ...(snooze), I have been really patient but nothing in the mail yet.

Does anyone have any "Elmer Tips"?

Thanks in advance!!!

Both the Icom and Yaesu are good radios, but I would find a store that had them both so you could hear the output and check the feel of the rigs. Buy the one which works best for you. A Butternut antenna would work well for you if you have the room for radials. Don't forget to take along a lot of wire. A GAP needs few radials but is a bit top heavy so needs guying. If you need to use a vertical and it seems you do, you should have an amp of some sort. Look around for a used AL80A or B and give it a new tube before you leave and take the old one along as a spare.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4/Mar, through Sunday, 11/Mar there were 234 countries active. Countries available: 1S, 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4U1U, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BV9P, BY, C3, C5, C6, C9, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, SU, SV, SV5, SV9, T32, T7, T8, T9, TA, TF, TG, TI, TI9, TK, TR, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, VE, VK, VK9L, VK9N, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZK2, ZK3, ZL, ZL7, ZP, and ZS

PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3C5, EQUATORIAL GUINEA (Correction). Alan's, 3C5I (not 3C5A as reported in OPDX.501), 6 meter beacon is still up and active on 50096 kHz. Alan

was heard this past weekend on 50110 kHz around 2130z calling CQ. He will leave here in April.

3G, EASTER ISLAND. The 3G0Y group continues to be very active on all bands and modes. Look for them to go QTH on March 19th. QSL via DK7YY.

3W, VIETNAM. YL operator Aya, 3W2QAQ, was heard active on 21040 kHz at 0015z and on 7013 kHz at 1420z. Also heard was 3W2NY on 21245 between 0430 and 0530z. QSL via JH1MZG. Hans, 3W2LWS, continues to be very active on 15/20/40 meters CW between 1900 and 0130z. QSL via WA1LWS.

5U, NIGER. The activity by the Italian group signing 5U2K and 5U3T should be QRT (March 12th) by the time you read this.

9M0, SPRATLY. The 9M0M group may have gone QRT. There were no QSNs reported over the past weekend. Last spot was on March 9th. QSL via K7XN.

A4, OMAN. Chris, A45XR, has been playing on RTTY a lot on 40/20/15/10 meters during various times throughout the day. Check around 80 kHz from the band edge. QSL via P.O.B 2038, CPO 111 Oman.

BQ9, PRATAS ISLAND. The BQ9P group continues to be very active until March 15th. QSL via KU9C.

H40, TEMOTU PROVINCE (Just One More). Well known DXer Ron Wright, ZL1AMO, who usually travels/activates many locations in Pacific, informs OPDX that he will be activating the Temotu Province (OC-065). He expects to begin operations about March 21st for 3 weeks. His callsign most likely will be H40RW. H40 is ranked near 48 on the most wanted list. He will be on CW/SSB/RTTY with various antennas, but no amp. Ron states that his linear is too heavy to carry. His liasion during the operation is via Dick, N6FF, E-mail address: n6ff@tco.net
The QSL will be a special color card as this will probably be "his last DXpedition". Ron would like to encourage everyone to QSL direct to ZL1AMO CallBook address.

HK0, MALPELO ISLAND (Update). Pedro, HK3JJH, informed OPDX this week that some friends in Japan sent him a new transceiver, an Icom IC-706. He reported that he will make a two day trip to Bahia Malaga to ship the equipment to Malpelo on March 6th. He states now that his next start (heading for Malpelo) will be April 6th where he will be active for a month. Pedro will be active only on SSB on all the bands from 80-6 meters in the DX windows +/- or the IOTA frequencies. It was reported this past week that Carl, N4AA, editor of "QRZ DX", will be Pedro's QSL Manager. Also, Carl is collecting donations for Pedro's operation. Please make checks/money orders payable to "CARL SMITH", and put a notation on the check that it is for HK0M. Send it to: Carl Smith, POB 249, Leicester, NC 28748-0279 USA

IOTA NEWS.....
AS-NEW. Look for BV9O to be active from Lan-Yu Island from March 15-19th. An IOTA number has not been assigned yet and is usually assigned during the operation. QSL via BV8BC.

AS-056. (Change in plans) Masa, JA6GXK, will be active from Danjo Archipelago (Meshima Island), April 10-20th (March 21-30th was cancelled). This is not a DXpedition, and he will only be active in his spare time. Activity will be on 40 meters, and 14260 or 21260 +/- 10kHz. QSL only via the Bureau.

EU-064. Jean Marc, F5SGI, will be active from Yep Island (lles de la France Metropolitaine Award AT-021) as F5SGI/p from April 14-21st (instead of the 26th). Activity will be mainly on CW on all HF bands. QSL via F5SGI, direct or via REF French National Bureau.

EU-038. Once again the UBA section "NOK" will travel to Texel Island to take part in the 2001 IOTA Contest. During the last 2 years they were active using the callsign PA6TEX, but this year they are trying to apply for a shorter callsign and special prefix (PF,PC,PG), which they hope will satisfy prefix and IOTA hunters. As soon as they can, they will inform us of the callsign. Activity will be before and during the contest on all bands/modes. QSL via ON4ALW: Ronald "Ron" Van Aken, Kapelstraat 5, 2330 Merksplas, Belgium (or via UBA Bureau). Please do not send QSLs via the DUTCH QSL Bureau!!!

EU-091. The "Salento DX Team" from Lecce was expected to be active from the Island of Treviso (I.I.A. BR-006 - WW.LOC. JN80XP) over the past week. Stations expected to be active were: IK7JWX/7, IK7FPX/7, IK7LMX/7, IK7QMJ/7 and IZ7CTE/7. QSL via their home callsigns.

OC-NEW. Operators YC6LAY, YB6LYS, YC6JKV and YC6PLG will all sign homecall/P and activate Mursala Island (in the Sumatra's Coastal Island North Group) during March 15-17th. Activity will be on 21260 kHz and 14260 +/- 10 kHz and operations will be on SSB only. QSL via YC6LAY.

SA-077. A group of Brazilians will activate Franceses Island in the Santana Archipelago, which is located at the opposite side of the city of Macae in the east coast of the State of Rio de Janeiro from March 29th through April 1st, 2001. Operation will be around the clock on CW/SSB on 80-10 meters including the WARC bands, depending on propagation. Look for callsigns/ operators: PU1NEZ/p (Carl), PY1LVF/p (Zeca), PY1NEW/p (Pete) and PY1NEZ/p (Lima). Suggested frequencies (+/- 10 kHz):
CW - 3530, 7030, 10115, 14040, 18098, 21040, 24920 and 28040
SSB - 3755, 7055, 14260, 18128, 21260, 24950 and 28460 kHz
QSL via their homecall or through the Bureau. Please feel free to contact them either through their E-mails or mailing addresses:
PU1NEZ - Carlos Guilherme Correa, 9/306 Presidente Backer, 24220-045 Niteroi, RJ - Brazil
E-mail: pu1nez@bol.com.br
PY1LVF - Jose Luiz Vieira Fernandes, P. O. Box 18009, 20722-970 Rio de Janeiro, RJ - Brazil

E-mail: < py1lvf@cxpostal.com >
PY1NEW - Emanuel Tavares Filho, P. O. Box 100659,
24001-970 Niteroi, RJ - Brazil,
E-mail: < py1new@interclub.com.br >
PY1NEZ - Rogaciano Lima C. Filho, 91/1101 Belizario Augusto,
24230-200 Niteroi, RJ - Brazil
E-mail: < py1nez@interclub.com.br >

J3, GRENADA (Update). Paul, W5PF, wants to remind everyone that he and Dee, W2HEO, will be active here March 30th through April 11th. Operations will be on 40-10 meters, CW/SSB. Special attention will be given to the WARC bands and the General Class portions of the phone band. Suggested frequncies are:
CW - 7030, 14030, 18080, 21030, 24910 and 28030 kHz
SSB - 7085*, 14185/14240, 18140, 21320, 24940 and 28440 kHz
* Listening frequency to be announced!
Their J3 callsigns will be assigned upon arrival, but they are expected to be J3/W1HEO and J3/W5PF. QSL with SASE direct to their respective callbook addresses or via the bureau.

LX, LUXEMBOURG. Philippe, LX2AJ, will be signing with the special callsign LX7I during the CQ WPX SSB Contest as a Single/Op/Single Band 20 meters entry. QSL via LX2AJ: Philippe Lutty, 6A, Sentier de Bricherhof, L-1262 Luxembourg. The log will be on the InterNet after the contest on the Web page: http:dx.qsl.net/logs

QSL INFO AND NEWS.....
NOT THE MANAGER. John, K4BAI, continues to receive requests for 8P5A QSLs, however, he is NOT the QSL Manger for 8P5A. The correct route is Tom, W2SC. There are several on-line databases that STILL show K4BAI as the 8P5A QSL Manager, please correct your databases. However, John, K4BAI, is the QSL Manager for 8P9HR, 8P9HT and 8P9Z.

NOT THE MANAGER. Remember, the QSL Manager for D68C is G3SWH, not G3SXW.

PLEASE NOTE: Bob, N2OO, reports that "ALL QSLS FOR 9M6AAC MUST GO VIA N2OO." There have been reports that G4ZVJ was operating from 9M6AAC and to QSL to his home call. This is WRONG. Please make the note. All QSLs for 9M6AAC will be via N2OO only.

The QSL Manager for CQ1CV is CT1ETE via the bureau or direct to:
P.O.BOX 1026 - 4811-908 GUIMARAES - PORTUGAL

Leo, CX3AL, wants to remind the DX community that 1 USD does not cover the postal rate in Uruguay. The Uruguayan Post Office has raised their rates as of December 2000, and the minimun cost of mailing a letter is 2 USDs. On the other side IRCs are accepted by the Uruguayan mail. So, to cover the postage you have to include at least 2 USDs or 1 IRC.

Babs/DL7AFS and Lot/DJ7ZG now active from the Dominican Republic as HI9/DL7AFS and HI9/DJ7ZG through March 23rd, will have on-line logs available at: http:\\www.qsl.net/dl7afs

The logs from FO/DL5XU (Rangiroa OC-066) and FO/DL1AWI (Marquesas OC-027) operations are now available at the following two Web site: http://dx.qsl.net (N6RT) -or- http://www.radioklub.de/cgcg

Diego Salom, LU8ADX, was active in last week's ARRL Contest as AY8A. He states to QSL via LU8ADX via the Bureau or direct to: Box 373, (1412) Buenos Aires, Argentina. Do NOT use the callbook address.

SPECIAL EVENT (50 YEARS FOR VRZA). Wim Visch, PA3BIZ, Vice President of the VRZA, informs OPDX that "this year the V.R.Z.A. (Dutch Amateur Radio Society) celebrates its 50th aniversary. For this occasion a special award will be issued. To qualify for this award, one needs to contact at least four of the following special stations who will be on the air throughout the year 2001: PI50VRZ/A, PI50CQP/A, PI50V, PI50R, PI50Z and PI50A. Each week the callsigns PI50V, PI50R, PI50Z and PI50A will be assigned to 4 of the 18 clubstations participating in this event and shifting the next week to four other clubstations until the circle is closed going the whole year round. QSL needs to be sent via the regular clubstations callsign i.e. PI4(clubcall) so please ask, if you work a PI50(?), for the clubstations callsign. The stations will be on all bands all modes, also during contests etc.... A log file of the four stations you have heard/worked, signed by two other amateurs, and accompanied by 5 USD or equivalent will be sufficient to apply for the award. Send to the manager: Ben Horsthuis, PA0HOR, Fr. Halsstraat 95, 3781 EV VOORTHUIZEN, The Netherlands."

TX0, CHESTERFIELD ISLANDS (Update). Jacky F2CW/ZK3CW, Dany F5CW/FK8VHY and two others operators will leave Noumea on April 24th and hope to arrive at Chesterfield on April 27th. They leave Chesterfield on May 2nd to head back to Noumea on May 6th. They hope to have 3 stations active for operating on 160-6 meters. They have requsted the callsigns TX0C or TX5C.

TX5, NEW CALEDONIA. Look for FK8GM and FK8HC to sign with the callsign TX5G during the CQ WPX Contest.

VP5, TURKS & CAICOS ISLANDS. Dave/W5AO, along with husband/wife team Connie/K5CM and Pam/N5KW, will operate from the VP5B station on North Cacios Island from March 21st through April 5th. Each operator will sign out the contest VP5/homecall. They will operate 160-6 meters SSB/CW and will be active during the CQ WPX SSB Contest as VP5V. QSL cards for VP5/K5CM and VP5/N5KW go to their home address and for VP5/W5AO and VP5V, QSL to Box 88, Morris, OK 74445-088.

VP6, PITCAIRN (Possible New One?). The "Les Novelles DX" is reporting that Jacky, F2CW/ZL3CW, who was recently active as FK/F2CW and TX5CW from Noumea, will be traveling with Kan, JA1BK, and has left for Tahiti and Pitcairn. Over the past weekend, QSNs show that VP6BK and VP6CW were active on CW on 40 meters and the WARC bands. ADDED NOTE: Word has it that Kan and Jacky may be on another island close too but far enough away from Pitcairn Island to qualify for a new DXCC entity. Kan suggests/hints this on his Web page at: http://www.iijnet.or.jp/JA1BK (but in Japanese) Many are guessing that the two are on Ducie Island (OC-182) which is 540 KM east of Pitcairn (lat/lon 24.40s/124.40w). The two will be coming back to Noumea at the end of March.

XU, CAMBODIA. XU7ABN has been active on RTTY on 14085 kHz between 1900 and 0000z.

YV, VENEZUELA (IOTA Activity). Dr. Rick, NE8Z, will be in Venezuela from March 26th through April 4th signing YV5/NE8Z from the Caracas area. He will then leave roughly around March 30th through April 2nd, for "Islas Los Roques" (IOTA SA-035) signing YV5/NE8Z. He will only be on 28460 kHz on SSB with his TS-50 and dipole antenna. QSL via NE8Z, Rick Dorsch, Box 616, Hamburg, MI 48139 USA.

ZD7/ZD9, ST. HELENA AND ASCENSION ISLAND. Glyn, GW0ANA, QSL Manager and Team Member for the ZD7/ZD8 DXPedition advises OPDX that all their gear has arrived safely on Ascension Island and is waiting their arrival on the 19th of March. They have be allocated ZD8K for Ascension Island and ZD7K for St. Helena. The team hopes to be active from ZD8 in the CQ WPX Contest. Their Web site has been fully updated and looks very interesting. DXers may want to log on to the neat URL: http://www.dxpedition.co.uk

Im NOT the bringer of "gloom & doom" but i often get the feeling the bands [DX & paper chasing] are being less and less visited.

Im close to getting my DXCC with upgrades and i dont want what appears to be a crumbling hobby to collapse in a pile of rubble round my feet before i get my cards.This Eqsl'ing has to be the way of the future and its quick,no doubt. Work a bunch of 'em while its active,then print out your qsl's, lick n stick em on the wall:- Uh Oh im getting excited again !!

NOW, HF DX'ing will NEVER die out but probably become nye impossible to complete such activities as award chasing etc if activity continues to drop. Cheers guys,Rod VK4XI

SASE's, Green Stamps, IRCs are the obvious. Also you need a nice card. One that shows you put a little effort into QSLing. Photo cards are the best. How can anyone ignore your face smiling at them asking for a card in return? Add a personal note or copy of your town's history - something to create a little guilt.

Hi John,

A short personal message on the card is also nice. Even when it is a 59/59 report exchange, I always put "Thanks for the contact and report and a New One for IOTA, DXCC, DXCC Band country, etc"

Using mint airmail stamps on your return envelope can also give a big boost to your return rate as can using "nested" airmail envelopes. Two sources of stamps and envelopes are:

William J. Plum
12 Glenn Rd.
Flemington, NJ 08822-3322

Send Bill a note and he will mail you his "package" of stamp prices, how he accepts payments, etc. He does not have a presence on the Net. I REALLY recommend his European Air Mail "Cover (send out to the DX)" and "Return (the envelope with your address)" Envelopes. The return envelope fits in the "Cover" without folding and also puts another layer of paper over your greenstamps(s) to hide them.

JAMES E. MACKEY, K3FN
PO BOX 270569
WEST HARTFORD, CT 06127-0569

Jim has a presence on the Net at:
http://www.net1plus.com/users/ryoung/index.htm

Once you establish an account with him you can email your stamp orders (no minimum) and pay by check once you've gotten them. Very convenient. He also has the Euro Air Mail Envelopes but they are much more expensive than Bill's.

Good Luck,
Tony, WF1N

The main opponet of eqsl's are the dx stations that profit from qsl'ing. While some countries like Germany cannot mail a card for 1 US dollar, others can mail them for much less. Still others just pocket the dollar and send the return card via the bureau. When you work a dx station in a poor third world country and they are running a station worth several thousand dollars, 9 out of 10 times the dollars are paying for it. Sad but true.

736. DX MONITOR SERVER DOWN?

There is no DX Monitor's server in the real sense of the word, but there is a site from which the DX Monitor imports the data and it seems that the site has been down lately. The site's URL is http://oh2aq.kolumbus.com and if you look under Options/Settings/URLs in the DX Monitor, that's where you'll find it.

This argument sounds plausible......except why couldn't the rare DX
station simply refuse to participate in the eqsl approach and continue
to insist on the paper w/green stamp approach? It seems to me that
the main benefit of the eqsl would be to make it simpler for people to
exchange qsls with/between non-rare DX.

Walt,

Most of the PSK that I have worked on 30 meters was found at 10.139 MHz - a frequency that I troll regularly for 30m PSK QSOs. Last night was particularly busy - I saw 6 simultaneous QSOs running on 30... which is a true pile-up for that band! ;-)

Hope to see you there,

No i cannot confirm or keep any skeds at this time julian as im rebuilding my station and i only have the VX5R,a TS50S and a MFJ 989C.I am currently without an antenna too.
I will soon be back where i was with current equipment instead of 30yr old dinosaurs.
My old station is up on the net if you wish to see it but there is nothing there of my NEW GEAR [above] yet !!! :-

From: KB9YXM <kb9yxmNOSPAM@arrl.net>
Message-ID: <98ofv7$t0a$2@ousrvr3.oulu.fi>
Source record: 17607

Hello everyone.
Kb9YXM here.
I would like to start to build my own antennas for VHF/UHF. To start, I would like to build what might be a strange 6 meter antenna design.
I am trying to build a 6 meter 2 element phased array.
I was hoping someone could send me some idiot proof instructions or direct me to a website that they know fdirst hand might have information on this type of antenna.
The other quesiton is a simple one. When building an antenna, why must one use a gamma match, isnmt it possible just to use a ballun as with a di-pole?

Thanks and73's in advance.

>
> Many QSL managers *cannot* reply to cards via the bureau, because the
> bureaux refuse to handle outgoing cards unless the licensee of the DX
> station is a paid-up member of the national association in the *QSL
> manager's* country. If the DX operator says "QSL via WA3***, Direct
> Only", this is probably the reason why .... and he means it.
>

Speaking of postage and bureaus, my observations.

I have gone to the expense of using an SASE with postage of the country from which the reply will come from. While this has increased my response there are some countires Germany in particular where my postage has ripped off the envelope and returned with no stamps. From what I can translate it appears the US and Federal Republic of Germany offices have passed them through with postage due. The British commonwealth QSL managers and hams are very good at fast turn around with these cards.

However, most of other countries operators never replied or the cards have been lost. My return rate is still below 50%.

Bureaus on the other hand never seem to pass cards on. I have had several Hams tell me they sent cards via Buro. But after 3 years of sending ebvelopes to thew ARRL 8th district Buro nothing has came out nor will the group manage return Email inquiries. I read several months ago where a Germany Ham called the Buro "The Ham Way of QSLing", my opinion it is a waste of time and effort. Because of the way most other countries national radio clubs fail to pass on QSLs to non-members as stated.

Even the famous "Green Back" does not ensure a reply, after wasting several dollars upon this method.

What I say goes for US based DXepdiation QSL managers as well, I have received my own QSL returned with a handwritten note of verification with promises of future QSLs. This happened after sending an SASE and extra postage to a state side QSL manager.

Just needed to unload my QSL frustration also. All I know is after 33 years of Ham Radio, QSLing is nothing like it was about 20 or more years ago. In fact, the whole mess is almost a business deal with supply and demand directing the replies. Unfortunately I am in a country with very little demand! There are a few good DX station who will even reply without an SAE

or SASE but they are rare. I thank those who QSLed me, back while I was in college and broke.

>Subject: 8P5A QSL Route??

I worked him in the ARRL DX contest. The most recent OPDX bulletin gave the manager as W2SC. You might want to subscribe to the OPDX Bulletin - it's free via e-mail.

There was some erroneous info out that K4BAI was the manager.

I'm mailing off my card to W2SC tomorrow.

Lots of QSL tips and advice at URL:
http://www.ac6v.com/qslmisc.htm#PRIMER
A lot of the advice is from the QSL Managers or DX Stations themselves.
My return rate using green stamps or IRC's and the advice listed and the ARRL incoming and outgoing Bureaus is in the 80+ percentile. Every country I have worked is confirmed, only some band countries and some contester contacts have never been received. However don't use green stamps to the obvious countries - IRC's usually do the trick for these.

Sometimes for a country where postal thieves might be at work, I have re-submitted in a pen-pal looking envelope or one with a business looking envelope well after the initial rush of cards and received a reply. It took three years of 3 submissions to get a 3V card. Another trick is find a friend of a friend who can address your card in the native language - this worked for Iran.

Learn how to send a thin package (no folds) that looks like a plain letter with no return envelope (but a thin unfolded one inside) -- see QSL Primer for this.

Burros can take a year to 3 years or more. One Russian card (old box 88) took 5 years!!!
Good QSLing

Source record: 17628

Hi Robert -

Yes, you should send the card to I2PJA. A "Green Stamp" is a US $1 bill, you can send that or get a "postal reply coupon" or IRC at the post office. 1 IRC can be exchanged for an airmail stamp in most any country. You should also include a self-addressed envelope.

Source record: 17630

Robert---or depending on how "time sensitive" getting the QSL is to you another way to send the card is via the ARRL outgoing QSL Bureau. When you do that you need to make sure it is apparent that the card is addressed to the manager. My cards are blank on one side and I write in BIG letters "VIA I2PJA" on that side and put it that side up in the stack of outgoing cards. Obviously it'll take a while to get your card back and if you send out lots of cards that is the most cost effective way to exchange cards. If the card is REALLY important to you (like for an award as DXCC) you can send the SASE direct to the manager either with the appropriate number of IRCs (available at the post office for about $1.70 a piece) or with a "green stamp". Depending on the country you're sending the mail to this may or may not be a good idea as some countries have legal prohibitions about their citizens possessing foreign currency.

I have done this both ways with great success (and some miserable failures!)....all part of the drill.

Good luck!

One way I found that insures faster replies from Italian QSL Manager is an SASE with Italian postage upon it. I have had about a 95% return rate so far from Italy.

I have bought international "nested" envelopes sets and postage from William J. Plum in NJ (908) 788-1020. This has increased my response considerably. He is not the only person selling these items, just that I met him at the Dayton Hamvention a few years ago and he has been an excellent supplier of my postage, etc.

I doubt it, as the rubber stamp marking was entirely in German both times. The US Postal Service accepted and delivered the envelopes, most likely because the workers did not understanding what was indicated by the rubber stamp imprint.

My biggest problem with US mail handlers is the lazy factor. If a letter sorter has never heard of a country, then it does not exist, and needs to be returned rather than verified! For example, for St. Helena Island after 5 attempts and returns, I had to have the local Postmaster place my envelope into an Official US Government envelope, address it exactly the way I had my envelope before it would go through. Most postal workers here in the US collect Jack Daniels or other booze bottles rather stamps.....However statistical theory states at least one out layer in the probability set! Maybe there is a chance that happened but, the rubber stamp imprint would have been only partially upon the envelopes as it was upon the area were the stamps use to be.

God only knows who took the stamp, and it only happens from DL land is all I know.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 503
BID: $OPDX.503
March 19, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, NC1L, K2KW, W3UR & The Daily DX, N4AA & QRZ DX, N4ZC, N6HPX, AA7X, KD7H, W7TSQ, K8YSE, KQ0B, CE6TBN, CX2AQ, DL1EK & DX News Letter, DL2VFR, EA7FGS, EA7FTR, F5LIW, F5TJC, F6BFH, FK8HC, GW3CDP, GM4YXI, HA0HW, HB9BXE, HB9CRV, HK5MQZ, JJ1ANW, PA1AW, PY7ZZ, TA3YJ, VA3RJ and VE5MX for the following DX information.

OPDX INTERNET WEBSITE (by John, K8YSE).....
The OPDX InterNet Web site has moved to a new server. Those of you who read the bulletin at http://www.en.com/users/k8yse/opdx.html will be redirected to the new server at http://www.papays.com/opdx.html The redirect will continue for a few weeks but eventually you will have to use the new address in order to access the bulletin. The K8YSE Web site has been hosted at en.com for many years. The new site, however, will provide more flexibility and allow enhancements not possible on the exiting server. For now everything will appear the same. If you have any questions, please contact John at: k8yse@papays.com
ADDED NOTE: The NODXA Web site has also changed. Please see URL address below.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 11/Mar, through Sunday, 18/Mar there were 234 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3D2/r, 3V, 3W, 4J, 4L, 4S, 4U1U, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BV9P, BY, C2, C3, C5, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JT, JW, JX, JY, K, KG4, KH0, KH2, KH4, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, S7, SM, SP,

SU, SV, SV5, SV9, T30, T32, T7, T9, TA, TF, TG, TI, TJ, TK, TR, TT,
TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK,
VK9N, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE,
XU, XX9, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7,
ZF, ZK1/s, ZK2, ZK3, ZL, ZP and ZS.
PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As
always, you never know - "Work First Worry Later" (WFWL).

OPDX InterNet Subscribers will receive an additional bulletin (due to its
size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3B6, AGALEGA (Update/Progress). Hans-Peter, HB9BXE, sent out a press
release (3B6RF Bulletin Nr. 13) this past week. OPDX InterNet Subscribers
will receive the large release as an additional bulletin. In short, the
press release states that preparations for this DXpedition is running
according to plan. On April 21st, three members of the team will head for
Mauritius in order to make final preparations on the spot. The rest of the
crew departs on April 28th, from Zurich. The 3B6 team plans to arrive on
Agalega on May 3rd and plans to be active May 5th for 12 days. There is
the possibility of chartering an aircraft for their trip from Mauritius
to Agalega, and they are still working on it. Using an aircraft will allow
them 2-3 additional operating days. The crew now consists of 20 operators:
HB9BQI/Rene, HB9BQW/Christine, HB9BXE/Hans-Peter, HB9CRV/Hermann, HB9HFN/
Cedric, HB9JAI/Karl, HB9JBI/Friedhelm, HB9AAQ/Fred, CT1AGF/Luis, CT1EVP/
Antonio, DL3KUD/Matthias, DL6UAA/Mart, F6HMJ/Jack, G3KHZ/Derek, NK6F/Ken,
N3SL/Steve, SP9RTI/Stefan, 3B8CF/Jacky and 4X1DX/Seth. YAESU of Germany
has lent them the following equipment: 6 Transceivers FT1000MP, 6 Linear
Amplifiers VL1000, 6 Power supplies, 2 Transceivers FT 847 and 1 Transceiver
FT 920. They will have a huge arsenal of antennas to use. The group will
have 4 Diesel generators 5.5 kW each. The satellite activity from Agalega
will be the first ever from this remote place. They will concentrate on
using the satellite AO-10, but, however, they will also use RS-12/13
sporadically. There will also be 6 meter activity and also PSK31 since it
is becoming more popular. PKS31 will be used alternately with RTTY. The
PSK31 frequencies to be used are: 14068.15 kHz +/- 1.2 kHz, 21078.15 kHz
+/- 1.2 kHz and 28078.15 kHz +/- 1.2 kHz. SSTV will also be used but for
only 3 days. Split operation is a must for SSTV. Their complete frequency
band plan can be found on the Web site at: http://www.Agalega2000.ch
QSLs can be sent via the bureau or directly to: Ambrosi Fluetsch, HB9AGH,
Lerchenweg 29, CH 8046 Zurich, Switzerland. For USA only via N3SL:
Steve & Kimberly Larson, 22 N. Hidden Acres Drive, Sioux City, Iowa 51108.
There will be a log search available during and after the operation.
Please check their Web page for further developments.

3B9, RODRIGUES ISLAND. Robert, 3B9FR, has been active recently on 17/12
meters with NO takers. Check between 24480 and 24900 kHz around 1330z.
Check 17073 kHz around 0300z. He can also be found on 20/15/10 meters
CW/SSB between 1230 and 1530z. QSL via Robert Felicite, Box 31, Rodrigues
Island, Indian Ocean, via Mauritius.

3V8, TUNISIA (Attention YL Chasers!). YL operator Zaida has been active at the controls of 3V8BB. You can usually find her on or around 14260 kHz between 1030 and 1300z.

3W, VIETNAM. Tom, 3W7CW, was heard on 12 meters working simplex on 24896 kHz between 0730 and 0830z. QSL via SP5JTF. Jurgen, 3W9HRN continues to be very active on 10 meters CW (as well as 15 meters) as early as 0630z and as late as 1300z. QSL via DL1HRN.

4S, SRI LANKA. Nelson, 4S7NE, seems to like the 30 and 17 meters CW. Generally he can be found on/around 10103 kHz after 1200z and 18075 kHz after 1830z.

6Y8A - DXU RESULTS. Kenny, K2KW, reports that the results and photos of the 6Y8A DXpedition University (DXU) trip can be seen on the Web page:
http://www.k2kw.com
DXU was the first of its kind to offer a training ground for hams wanting to learn the art of DXpeditioning. In total, the group made over 21,000 QSOs, and nearly 11,000 in the ARRL SSB Contest. The trip was a great success, and they are thinking of holding another trip in October or November 2001 (also to Jamaica). If you are interested in attending, please send an E-mail message (to express your general interest) to:
k2kw@prodigy.net

9N, NEPAL. Lawerence, 9N7RB, in Katmandu is a good catch on 10 meters around 28447 or 28487 kHz. Check around/after 1330z and again 0130z.

A5, BHUTAN. Just a few more days to work Dimitri, RA9CO, as A52CO. His last day should be March 21st. He has been very active on 10 meters CW (very little SSB) at various time during the day. There has been some activity on 15, 20 and 40 meters. QSL via UA9DD.

ALL ASIAN DX CONTEST. Suzuki, JJ1ANW, informs OPDX that this summer "The Japanese Amateur Radio League" (JARL) will be sponsoring the "All Asian DX Contest." For more details and the rules, please refer to the JARL Web site at:
http://www.jarl.or.jp/English/4_Library/A-4-3_Contests/AA_Rule.htm

C6, BAHAMAS. Bill, AA7X, will be operating from Treasure Key from March 24-31st including the CQ WPX SSB Contest. His callsign will be C6AKK. QSL via AA7X.

DL, GERMANY. Nilay (XYL), TA3YJ, will be active as DL/TA3YJ from March 25th to March 30th. She will be active on all bands using SSB. QSL via TA3YJ.

D68C PRESS RELEASE. "The Five Star DXers Association" has released a four page bulletin (Number 6) with details and statistics of their record breaking DXpedition to Comoros. Because of its length/size, the D68C Bulletin No. 6 is available in RTF format at the K8YSE EIDX Web site at:
http://www.papays.com/d68c_b6.rtf

DXCC NEWS..... Bill Moore, NC1L, DXCC Manager, reports that XU7AAZ has been approved for DXCC credit. It was on the bad list for lack of documentation. The documentation has been reviewed and it is OK. People

can now receive DXCC credit. Anyone who has submitted it and had it rejected can contact DXCC, and their record will be updated without having to re-submit the card. Send an E-mail to: dxcc@arrl.org. If not, it can be included in the next submission.

DU, PHILIPPINES. Larry, N6HPX, is currently on vacation and is signing as DU1/N6HPX until about April 10th. He is on IOTA OC-042. Most of his activity has been on 14260 kHz between 1130 and 1300z. He was also reported on 6 meters on 50225 kHz at 0929z. QSL via N6HPX:
Larry Fields, 1207 E. Victoria Ct., San Pablo, CA 94806

FRENCH POLYNESIA OPERATION QRT (FO0/A & FO0/M Possibly Next!). Eli, HA9RE, recently active from French Polynesia as FO0ARE between February 27th and March 7th, was active from Tahiti Island (OC-046, Windward Islands Group) between February 27-28th, and again from March 6-7th. The other place he operated from was on Manihi (OC-131, King George Islands Group) between March 1-5th. The QSL Manager is Kari, HA8IB. His current address is:
Szabo Karoly, Aradistr. 42., H-5525 Fuzesgyarmat, HUNGARY. QSL via the bureau is also OK. Eli and his girlfriend Sara, HA9SD, have plans to go back to the Pacific Ocean during the autumn, possibly to the Austral Islands or to Marquesas.

GM7, SCOTLAND. Keith, GM4YXI, will be active during the CQ WPX SSB Contest using the "North of Scotland Contest Group's" callsign GM7V. His activity will be a Single Op/Single Band (10m)/High Power entry. QSL as usual via ZS5BBO.

H40, TEMOTU PROVINCE. Just a reminder that Ron, ZL1AMO, will be active from beginning around March 21st for three week. This operation is a special one because it will be his last DXpedition. We are sure many of you have worked Ron from many rare places and have many of his QSL cards. Ron is a very special, interesting DXer and person. Your editor is glad he had a chance to meet him many years ago at a NODXA meeting. Please show Ron thanks by working him from H40. He will probably sign H40RW or something with the "RW" suffix.

HB0, LIENCHTENSTEIN. A team of five French hams will be active from here from Friday, March 23rd to Monday, March 26th. Activity will be on the following bands: 80, 40, 20, 15 and 10 meters. The team will use the callsign HB0/F6KQL. They will also be active during the CQ WPX Contest. QSL direct or throught the bureau to F6KQL: Radio Club MJC,
7 Rue de Longvic, 21300 Chenove, France.

HK0, MALPELO ISLANDS. Jairo, HK5MQZ, informs OPDX that he and Hiro, HK5QGX, will leave for Malpelo Island on April 6th. They plan to operate from April 10-21st. They will sign as HK5MQZ/0 and HK5QGX/0. Activity will be on CW and SSB, 80/40/30/20/17/15/12/10 meters. However, 160 and 6 meters will be optional. Jairo, HK5MQZ/0, will work SSB. QSL via Jairo Vargas, P.O. Box 10862, Cali, Colombia. Hiro, HK5QGX/0, will work CW. QSL via JA0MGR.

IOTA NEWS.....
AS-079. Take, JI3DST/6, will be active from Miyako Island April 28th

through May 6th. Activity is planned for 15, 28 and 40 meters SSB/RTTY/SSTV. QSL via JI3DST.

AS-155. Bob, EA7FGS, on the IOTA Committee, informs OPDX that Lan-Yu Island was given AS-155, and it is one of the islands in "Taiwan's Coastal Islands". BV9O was active from here during the past weekend.

EU-065. Bernard/F9IE and Alain/F6BFH will be active as homecall/p from Molene Island May 2-8th. Activity will be on the IOTA frequencies SSB and CW. QSL to the bureau or via their home callsign.

IOTA OPERATION. Bill, VK4FW, has made plans to visit three Queensland State IOTA groups within the next 2 months. He is expected to activate the North Coast (Centre) Group OC-172, the Torres Strait Group OC-138 and North Coast (North) Group OC-187. Bill expects to activate them one behind the other. QSL will be direct only. He also expects many of you to work him from all three locations, and if you do so, please include a minimum of 2 USD or 2 IRCs for cards. His callsign will be VK4FW/p. Bill will release more details as soon as all is finalized.

OH, ALAND ISLAND (and IOTA Operation). Ric, DL2VFR, reports that in less than one month he and Frank, DL2SWW, will be active from Aland Island (OH0 EU-002) from April 14-20th and Vland Island (SM7 EU-037) from April 21-28th. Their activity will be on CW/SSB/RTTY. He requests to please use the questionare on the following Web page to give them feedback (Where do you need them?): http://www.iota-expedition.com

QSL INFO AND NEWS.....
3D2TC QSL ROUTE. Bob, W7TSQ, informs OPDX that people continue to send QSL requests for contacts with 3D2TC to him. He reports, "I do not know of any reason that I should appear as a manager for this station, I am not, never have been, have no logs and no cards!!!!!!!!!!!!!!!!!!!!" The only route is DIRECT to 3D2TC, Craig Thompson, Box 273 Suva, Fiji Islands S. Pacific. As there is no effective bureau there, DIRECT is the only way to go. Craig does QSL and has a nice QSL card. Bob, W7TSQ is, however, QSL Manager for YB0AZ, YB3OSE, YB3ASQ, A35RK, A35SQ, 3D2RK, 3D2SQ, AH6PN/HR6, N7QXQ/HR6 and any W7TSQ operations ONLY!!!!!!!!!!

Alex, PA1AW, is the QSL Manager for 5A24PA. However, he is NOT the QSL Manager for 5A1A or any other activities by Abubaker. He is only expecting logs for 5A24PA only. Cards will be printed directly after completion of this special activity and after receipt of the logs. QSLs for 5A24PA go direct only to: Alex van Hengel, PA1AW, Schoener 85, 2991JK Barendrecht, The Netherlands. He is currently not committed to any bureau QSLing.

QSLs for Richard, CX2AQ, can be sent to his QSL Manager EA5KB.

Fran, EA7FTR, informs OPDX that he is currently the QSL Manager for the following stations: CX8BU, OX3CO, TG9RZ, UN7GCE, VK7KHZ, YB4JIM, YC1VBH, ZP8AE and ZP8BHA.

NOT THE QSL MANAGER. Denny, GW3CDP, informs OPDX that he still continues to receive QSL cards for EK4JJ/Serge and EK4GK/Alex for which he is NOT the QSL Manager. The only route for EK4JJ and EK4GK is DIRECT. PLEASE CHANGE YOUR DATABASES. Denny is, however, the QSL Manager for EY8XX and EW6WR.

HK3JJH/HK0 QSLs. Apparently, Carl, N4AA, Editor of QRZ DX, has worked a deal out with Pedro, HK3JJH, on QSLing for his 1999 operation. Cards should be sent to N4AA with an SASE. Carl will send the QSO data to Pedro by E-mail. Pedro will fill out the cards and send them to Carl in batches, and Carl will put them in the SASE for return to the sender. This might be a little slow, but cards will be answered without fear of losing them in the Colombian mail system.

The log for the PW0S (St. Peter and St. Paul Rocks) is now available on the Web page at: http://www.soutomaior.eti.br/mario
If there are any questions about QSOs not in the log or any other kind of problem, please send a message to the QSL Manager KU9C at: ku9c@arrl.net

Mike, KQ0B, informs OPDX that anyone needing cards for Eli, PT7BZ, and as PT7BZ/PY0F can either send them direct to Eli, via bureau to PT7BZ or to Mike, KQ0B. Please note: Mike is awaiting Eli's latest log entries which should be sent to him shortly. He has already received the cards and will reply once he get Eli's log.

QSLs for XW3QBR, XW3ZNR, XU7AAY and XY7AAZ. Roger, N4ZC, informs OPDX that IN3ZNR continues to be the correct QSL Manager for XW3QBR, XW3ZNR, XU7AAY and XU7AAZ .....but, for those USA stations that have not sent for their cards by now, or those wanting a faster reply, N4ZC has the complete logs and blank cards for those N.A stations that want a cheaper or faster way to get their cards. Those stations using U.S. postage may send a normal SASE for their cards to N4ZC. If you have already sent your cards to Italy, don't worry, all U.S. cards when answered will be sent in a box from IN3ZNR to N4ZC and mailed from N4ZC's NC QTH. If you must have a faster return for some reason, N4ZC can return N.A. cards within a day to two. Those stations outside N.A. should continue to use only IN3ZNR. They are working on answering cards at this time.

SPECIAL EVENT. Look for station TM0AR to be active during the "International Festival of Art and Technologies" from May 15-27th. Activity will be on 40/20/15/10 meters including the WARC bands. Reference DDFM - 72. QSL via F5TJC: Jean-Louis Briere-Lecomte, 18 Le Petit Saint Louis, 72400 Cormes, France.

TX8, NEW CALEDONIA (Update/Correction). Franck, FK8HC, informs OPDX that FK8GM, FK8HW, LA5IIA and Franck will sign with the callsign TX8G (not TX5G as reported last week) during the CQ WPX Contest as a Multi/Multi entry.

VB6, CANADA (Attention Prefix Hunters!). Todd, VE5MX, informs OPDX that he will be using the special callsign VB6A from VE6JY in the upcoming CQ WPX SSB Contest. All QSLs go via VE5MX, bureau preferred.

VP6CW AND VP6BK QRT. Robert, KD7H, spoke with Tom, VP6TC, Tuesday night, and he told him that Jacky/F2CW (VP6CW) and Kan/JA1BK (VP6BK) were on Pitcairn for the entire length of their VP6 operation. They were not on Ducie Island or any other island. The two operators are attempting to get Pitcairn admitted into the IARU and "then" perhaps Ducie will be a separate counter (new entity). The two operators left the island and might be active from other Pacific islands on their way home.

ZK1, NORTH AND SOUTH COOK ISLANDS. Victor Rivera, ZK1CG, on South Cook is back on the air again after being off for 10 years. This is thanks to Roger/W7VV and Sue for the very kind donation of an IC-751A and a G5RV vertical. Victor will be operating on all bands from 160-10 meters. If conditions are good he will change bands with you so you can work South Cooks on all bands. He was spotted this past week on 20 meters (around 14200 kHz) between 0430-0700z. QSL only direct to: Victor Rivera, P.O. Box 618, Rarotonga Cook Islands (or use the info on QRZ.com Web site). Victor is clearing a back log of old QSLs from the past contacts he has made. If you worked ZK1CG from South or North Cook Islands in the past and did not receive a card, please send again. Also, look for Victor/ ZK1CG, Tuatai/ZK1CY (ZK1MA) and members from the WWDXC Club Roger/W7VV (ZK1VVV), Bob/W7TSQ (ZK1TSQ), and three others to be going to Manihiki, North Cook for the CQWW SSB Contest this year in October for one week. They will have 4, 5 and 7 element beams and will be active on 160-10 meters. On the return from North Cook, all operators will be active from South Cook. ADDED NOTE: Look for ZK1MA to be active from North Cook. Tuatai, ZK1CY, is leaving South Cook and is heading back to Manihiki on the next boat. Tuatai lives in Manihiki.

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not

have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

Hello everyone.
OH/KB9YXM here.
I wanted to let everyone know about the Finnish Club station OH8TA's Expedition to IOTA island Hailuto in the Gulf of Bothnia off of the Finnish coast near Oulu. We will be operating for three days from the university of Oulu's marine research station on the island.
We will be operating on HF VHF and UHF. The frequency for 6 meters will be 50.110USB. For other bands and frequencies please send an email message to oh8ta@oulu.fi
Operating conditions for 6 meters will be a Cushcraft 3 element Yagi, Yaesu ATAS-100 with GP and counterpoise, Yaesu FT-100@100-500Watts. The Yagi and ATAS-100 will be mounted atop the lighthouse station at 30-35 meters above sea-leval.
The dates will be April 6-8.

KB9YXM is a US operator currently living in Finland and very active on 50Mhz and above.
QSL to KB9YXM will be 100% via OH8TA

782. QSL direct or rip-off?

Source record: 17637

Dear Fellow DX'ers

Being fairly new to the hobby, I still need everything confirmed.
I worked some stations telling me to qsl direct (for various reasons). This will cost me some money, which is no sweat if I get all my cards...
My question is: are these stations reliable QSL'ers, or just Dollar collectors? Abstraction of loss or theft of course, but that goes without saying...

5A1A asks for direct and registered
SY2A via SV2ASP
EA6SX
EA9IB
9H3JR via DJ0QJ
8R1AK
3V8BB worked Feb 15, 2001
T77C via WA4JTK

I have the addresses of all these stations / managers, I only wonder if they do answer (with S.A.E. nd IRC or $).

Please: protagonists of eQSL - spare me your remarks, thank you! I like hard-copy cards.

Greetings, ON4CLN - Franki

Just my 2 cents worth:

5A1A : Sent direct registered - still waiting (28 Jan 2001)
Has not been very long so this is still up in the air
SY2A: No Contact
EA6SX: No Contact
EA9IB: Sent direct - Received no problem
9H3JR: No Contact
8R1AK: No Contact
3V8BB: Contact was on 26 Mar 2000 and was via YT1AD - Received no problem
T77C: Sent direct - Received no problem

I only have experience with a few of these stations. 5A1A does respond,
but it's difficult to get a card. Registered mail (from the US, at least)
seems to be a must, as otherwise the cards don't seem to get there. I
enclosed two US dollars. Supposedly, IRCs are not acceptable in Libya,
although the Universal Postal Union website says otherwise.
I've had success with several 3V8BB operations. Check various on-line
resources to find out who the manager is for a given operation. It's usually
someone in Europe, like YT1AD.
As for SY2A, I sent a card to him several months ago, but I haven't
received a reply yet. He certainly replies to cards, judging from the notes
of QSL card receipt in various DX bulletins, but I've read that mail
pilfering seems also to be a problem for Monk Apollo.

Hello John,

I've about 20,000 QSL cards sorted and stored by country. This
represents years of QSL'ing and lots of contacts. Here are some things
that work for me:

1) Be acccurate Very very accurate.
2) have all the information on one side of the card
3) If you need the card for an award, say so on the card.
4) For direct cards, always include a SAE and some payment of the
return postage. You can buy used IRC's, enclose green stamps, (Not all
countires postage are covered by $1.00 US, Germany for example is
barely covered by $2.00). Get mint foreign stamps from folks like Bill
Plum and send the SASE with the correct postage, even then if its a
DX-pedition or using a QSL manager send a bit extra.
5) Use a QSL service for the common countries
6) Use the ARRL bureau where you can for outgoing cards, Be prepared
to wait up to several years for a reply.
7) For mailing into 3rd world countries NEVER have the word "Radio" or
callsigns anywhere on the envelope.
8) Always ask on countries you need if the station has a manager
9) Learn to use the internet for up-to-date addresses and managers
10) Make friends on the air and let them know the card is coming, then
on the card say someting about the station, the country that will
remind them of the QSO.
11) Use Euriopean size envelopes for both the sending envelope and the

SASE enclosed. Don't use fancy stamps, I've use a postage meter for
CIS and African countries with a Return address of just my last name
and address.
12) Some even go so far as to use a pseudo address, like
"Mynake Enterprises, 123 main steet, anytiown, MN USA"
on the return, Use your address butt make a business sounding name.
13) And if your one of the deserving, you'll get your card.

Good Luck es 73

If you e-mail or post what has been written/stamped by the postal clerks
on the envelopes, I would try to translate it for you.
There is a high probability that the stamps were ripped off by some
kind of postal machinery (sorting machine or the like). This case
presents some features of interest for a philatelist ;-)

I sent my first QSL to HK0TCN in 1997 and received no QSL in return. I
tried once more in 1999 and again received no QSL in return.

793. FS Northern NJ antenna system with shack/house attached

Newsgroup: rec.radio.amateur.dx
Date: 2001-03-19 20:19:48 UTC
From: "R. Makul K1XV" <k1xv@arrl.net>
Message-ID: <mdqcbt4dmdq3j3qa7bvifos9hom95ahbsq@4ax.com>
Source record: 17646

I thought I would give this a shot before taking the antennas down and listing my house with a realtor.

Getting an honest to goodness tower up in northern New Jersey is a royal pain. Well, I have a 100% LEGAL fully approved antenna system in Northern NJ, and neighbors who do not complain. The time is coming to relocate, so maybe somebody would like to buy my house with all the antennas in place, saving them a lot of hassle and searching for a "tower friendly" town in New Jersey.

The antenna system consists of a Tri-Ex LM 470 motorized telescoping tower, professionally installed, upon which are two Force 12 antennas, an EF-420/240 (4 elements on 20, 2 on 40) at 70 feet and a Force 12 4BA for 17-15-12-10 at 84 feet. All turned by an Emoto 1300SAX. At the top is a Comet CX333 for talking to the locals on 144-220-440.

Also suspended from the tower are IAC Antenna double bazookas in inverted vee configuration for 160 and 80.

I have 230v. brought into the ham shack as well.

The house is 20 years old, six rooms, around 1450 square feet, 2 car garage, on approx. 1.9 acre near Lake Hopatcong/Picatinny Arsenal. Oil heat. Land in rear borders watershed land, and you cannot see another house or building looking out the rear window. Lots of wildlife in area. (Four legged kind) Convenient to Interstate 80 exit 34 (Route 15 exit) and Morris and Essex train line.

Antenna system went in place in July 1998, and since then have worked 300+ countries in about 20 months of operating (work takes me away from home)

It would seem a shame to take down this antenna system while there are other hams in NJ or looking to locate to NJ who would love to be able to put up an antenna system like this, but cannot. If you buy my house, you can just hook up the coax and to your rig and be Dxing in a minute.

Asking price is $250K for house and antenna system, which is what the realtor says the property would sell for, plus something extra for the antenna installation. If a ham does not buy, I will take the tower and antennas down and put them up again at the new QTH.

Hi Folks,

I got my CW ticket and await an HF xcvr (ICOM IC-730) but I'm wrestling
with a good single-point source for a telegraphy key.
I won't go into all the particulars, but if anyone can give a green, yet
aspiring CW op advice or points to consider for my First key I'd really
appreciate it. I a little torn on the whole thing; paddles or straight key,
switches, material, why a key costs $400, etc.

Drink, WP3JQ

Welcome to the CW community!

All things CW can be found here:

http://www.morsecode.dutch.nl/index2.html

including discussions on a wide variety of keyers. BTW, the overwhelming
majority of German high speeders use the Schurr Profi paddle and the
ETM9/Logikey. It's expensive, but since CW is the thing I am primarily
concerned with in ham radio, to me it was important to have a keyer that
I feel really comfortable with. In my 20+ years of CW I have tried many
keyers, but the Schurr finally is the one I have been looking for all my
life.

Drink: I would purchase an inexpensive generic straight key. They are not
well made and won't hold up well. But
they are adequate to learn on. And in doing so you will slowly learn what
you do not like about the cheaper key
and this will educate you in what you want in a good key, (and it will only
cost you about 15 $).
More expensive keys have precisely machined parts, adjustments once made
will stay locked, Bearings on pivots
allow no side play, contacts are silver or gold plated and do not tarnish
easily. they are designed with more ergonomic
arms for ease of use for long periods of operating, have weighted bases so
they don't jump around; And I do not think one can really appreciate a
quality key until you actually feel how well it works. You do not have to
pay 400 bucks plus for a quality key, a lot of this has to do with the
finishing of the key such as chrome silver or gold plating and collector
value.There
are many manufacturers that offer excellent keys for 150.00 or less.
I would recommend trying before buying if at all possible, because the feel
of a key is really a personal thing that is
developed by experience.

Hi Drink,
If you want to enjoy CW, don't get a straight key. Get iambic paddles
and a keyer. I recommend the Bencher paddles as the best for the buck.
For the actual keyer, I've built about a dozen over the years, and
prefer the CMOS Super Keyer III, available from Idom Press. If you
prefer something pre-built, the same keyer is available as the
Logikey.
73,
Barry W2UP
P.S. You may want to get a new callsign if you do much CW :.)

I agree with Barry. When you start CW, you don't want to be
worrying about how well you are running a straight key, in addition to
sending and copying code. Unless you are truly rhythm gifted or are a
professional or skilled amateur musician, I would definitely recommend
going with a paddle first. The Bencher is a fine choice, and will hold
up for a long time, as well as giving good service.
After you are more accustomed to CW, then try the straight key. I
use one from time to time for fun, and do fairly well with it. The
reason for that is because I learned first using the paddle. It's much
easier sending on a straight key after your ears and brain are accustomed
to the sound of good code.

Welcome to CW. Not the fastest, not the most glamorous, but
certainly the politest and most elegant.

73,

Adam, KM5N

Dear Drink

I started out on HF only 5 months ago, but it wasn't until last month that I threw myself on CW. In Belgium, as in most countries I guess, you have to do the CW test with a straight keyer. But I bought an iambic keyer, the Bencher like displayed on my website. I must say I bought it second hand for about 80US$, which is a good price because it had 0 qso's on the counter!
Just to say: an iambic keyer combined with an electronic keyer device (most modern rigs do have one on board) is what you need to get started. For me, the hardest part is still copying, not sending!
And it keeps you from sending what I call "ugly code"; for an inexperienced CW operator like I am, sometimes a bad " f " sounds like " i n " - well, not that a paddle prevents you from this, but it's harder to do so I think.

Greetings, ON4CLN - Franki

Whatever you get, practice off the air. Tape it, listen to it, and learn
from it.

I personally think a straight key is quite appropriate for the beginner
and user up to about 20 wpm.

I agree. I always felt that starting with a straight key is a good thing, much like learning to drive with a standard transmission before learning an automatic. The advantage being that you can revert later, if necessary. If you learn using a keyer, it's unlikely that you will pick up the straight key skill later.

Derek, could you please explain? I think you mean that every CW qso contains the same items, and that every qso seems to be made by a "template". Is that what you mean?

All I meant was that people run the 'm' and 'e' together when
they mean to send "name", so that it comes out as "nag".

Then there are the people in California who can't send a 6
without adding on a few spare dits, but we know what they mean.

822. Re: CW sending

Newsgroup: rec.radio.amateur.dx
Date: 2001-03-22 22:51:09 UTC
From: ham_guy@webtv.net
Message-ID: <2224-3ABA81DD-4@storefull-134.iap.bryant.webtv.net>
Source record: 17576

You will probably never have to worry about listening to my bad CW... doubtful I'd ever use it again after the exam anyway.

I've tried countless times since 1959 to learn CW so I could become a ham and have built up a dozen or so stations in expectation of mastering it. Everybody talks about how easy 5 wpm is to learn.... I can do 3 after 41 years of trying. I took the exam last month and could copy at 5 for a bit, then mind would go blank and I'd have " QTH HERE IS MA- - - - - - - - - - - KS - - - - - -W - - - RIG IS A KENWOOD TS440"
Once I started missing letters, I would hear the sound and it was like a total "no response." Several of us old guys flunked again that day. I believe we could learn boolean algebra a lot easier than Morse code. The next exam is first Saturday in April so I have about 15 days to go. Rather than practicing 30 minutes twice a day like I've been doing... I decided to go at it 5 - 6 hours at a time ... drill drill drill dit dah dit dah drill drill ... the way the army does those guys.

My wife is threatening to leave me. "There's more to life than ham radio" she says and is about ready to go looking for a divorce laywer. "I'm getting real tired of this code and radio stuff" she says. "Hey, you should be the one doing it.... you aren't any more fed up with it than I am." says I.

The fact is, CW isn't just a hazing of the pupil, but of his entire family. She is wanting to buy a camper and said if I don't pass the code this April, I need to sell all that radio ****?!# and take the money and buy something we can both do. I have wanted to be a ham ever since I was a kid. I like the radios. I like the guys in the club and the places we go... even if it is out for a coffee.

O God, I hope the radio community drops this mandatory CW so others don't have to spend a lifetime in mental anguish and fatique, the way I have done. It kind of reminds me of hearing my PC link up to the net and say... "I think I'll translate this by ear... without the computer." and it makes about as much sense, except for the requirement that remains in place. Why in the world would anyone want to emulate an MFJ code reader in his head, since the thing can expertly send & recive exact and perfect characters? This is the hardest (and the dumbest) task I've ever tried to do in my entire life.

I wish I had a dollar for every dude that went to divorce court over Morse code. I have 2 more weeks of this and I'll either be in court, out of radio, or maybe I'll pass this time once and for all time. I'll for sure never, ever, ever try to send CW with a manual device like a code key. Maybe PSK-31 or something and let the logic circuits take care of the copy. Nothing has ever been able to make me feel this

inept, futile and frustrated. 73, OM, TNX FER QSO.

826. Web DXCC

Newsgroup: rec.radio.amateur.dx
Date: 2001-03-23 16:16:38 UTC
From: Bill@ng3k.com
Message-ID: <906D7CC02wfeidthiscom@216.200.68.12>
Source record: 17581

Just for fun, I decided to see how well I was doing with
"Web DXCC". That is, how many distinct "top-level domains"
(TLD) have visited the NG3K Web pages.

In a Web server logfile address like this:

nhm068.dokidoki.ne.jp

the "top-level domain" is ".jp" which corresponds to "Japan".
There's a one-to-one correspondance between many TLDs and a
DXCC entity.

Of course, some TLDs (.com, .edu, .gov, .mil, .org, etc) do
not correspond to a DXCC entity, but on the other hand some
TLDs (.uk and .ru, for example) correspond to more than a
single DXCC entity. Also, addresses can be spoofed, so just
because there's an Oman entry in the logfile doesn't tell
you with 100% certainty that someone from Oman actually
visited your site. To complicate things even more, 20% or
so of all requests received each month do not resolve to
a named address and their geographical source cannot be easily
determined. This means that one may have received visits from
more TLDs than are relected in the statistics. So the correlation
between TLDs and DXCC entities is pretty loose.

Keeping those limitations in mind, I wrote a Perl program to go\through my
monthly statistical reports and pull out/calculate the information I needed
to see how I was doing.

If you're interested, have a look at:

http://www.ng3k.com/stat/index.html

and you'll see how my inquiry came out. You'll find an index
of all TLD that have visited (with links to monthly statistics
for each), the total number of TLDs that have visited to date,
and a list of the 15 domains most recently "visiting for the
first time". Next to each entry is the (year/month) of the
first visit of that entity. The data start with February 2000,
so most TLDs will show up as having made their first visit
that month.

The page gets updated once a day to include data from the
previous day.

As a matter of possible interest, Analog (the statistics software
I use to generate my monthly statistical reports from the source

logfiles) currently recognizes 255 TLDs. So I've got a way to go, hi.

Hey Fellas,
Thanks for all the good inputs. I got a lot of good ideas and some pointedly differing opinions. I think I came to the right decision.
I ordered a new set of bencher paddles with a fair keyer. Then, I added on a $6 straight key. I figured that tradition and old fashioned keywork was something that shouldn't be ignored (remembering a story told me by a friend who was a communicator in the Army about a guy who, during a qualification exam had to resort to shorting wires to make contact) but recognized that the days of a straight key compete with a new way of doing things. Besides, this way I can learn the basics and be constricted to sending code at a rate I can copy;{)
For my German friend curious about my english skills,
Ich bin ein Amerikanische (HaHa). By the way, I only speak enough German to coax a german tirade.
Thanks to all helping me on this one. It's been a good experience so far.

Message-ID: <99j7pe$6m0$1@news.storm.ca>
Source record: 17596

The ADIF specification is at http://www.hosenose.com/adif/. Two typical
records might be:

<call:6>WN4AZY<band:3>20M<mode:4>RTTY
<qso_date:8:d>19960513<time_on:4>1305<eor>

<call:5>N6MRQ<band:2>2M<mode:2>FM
<qso_date:8:d>19961231<time_on:6>235959<eor>

(examples taken from the ADIF specification). This certainly can be produced
using a text editor (is McSink a text editor?), but that could be more work
than you had bargained for. If you have access to a machine that will run
Windows, then you can try BV (http://www.qsl.net/df3cb/bv.html) or LogConv
(http://www.qsl.net/ka5wss/logconv/) (DOS and Linux versions of LogConv are
also available) to convert from another format into ADIF. Of course, if you
don't have software on the PSION or Mac that will produce one of the
supported input formats, then...

To the original poster, if you have the logs in any kind of database it would be very easy to convert them, either on a PC or Mac. Proper software on a Mac is going to be easier to use perhaps, but you can use Excel in either case or MS Works, fill down the columns, convert dates and such in McSink, and paste them back in the correct columns and then finally delete the tabs in the text file.

Question--is there a line feed or carriage return following RTTY and also <eor> in each record (using the example) or just at the end of the record <eor>, and if so, which? It makes a difference!

Gilbert,

Your QSO with UK0ABA counts for DXCC as Asiatic Russia, ADIF #15.

73 Alex, VE3NEA

Thanks for giving me what it represents. I sill have no idea of how to determine if it is new or not. The listings I have been pointed too tell me how to determine the Geographic location of a contact. They do not tell me what entity it is. In other words, EXACTLY how does an ARRL card checker determine an entity name. Is there no complete listing or definition? Have the entity names ever changed since 1970? If the name has changed but the geographic location is the same is it only one entity credit? I am sorry but this is beyond my comprehension.. I would certainly appreciate a clear and unambiguous definition, assuming that is possible which I doubt.

I do see that in some cases the Prefix alone is not enough, that part of the suffix is used also. How does one know?

For instance I was credited with White Russia S.S. R. and is Asiatic Russia a different entity?
White Russia is not even on the new list.

I was credited with UL7KAR Kazakh. I have the question is Kazakhstan a different entity?

I really do not care what the exact location is, I want to know only one thing, given a callsign, how do I determine UNAMBIGUOUSLY the ARRL COUNTRY to which it belongs?

Some more questions, I have AP5HQ which was credited as West Pakistan. In 1970 there was also an East Pakistan. Today there is only Pakistan. Is that a different entity if worked today or is the credit from East Pakistan now considered Pakistan so I cannot claim a new credit for a Pakistan contact made today?

Why did ARRL change the name if this is not a new country for me?

How am I to know ?

Even more questions

Are Korea, North Korea, and South Korea separate entities. I got Korea
before it was split. Is that a separate country? If not then whish is it
North or South!!!!????

It never ends, does it. I have credit for Western Caroline Islands. I don't see any Caroline of any kind in the current list, Not east , Not West Nothing?

What happened here?

Gilbert, Ellis and Ocean Isalnds are not on any list. I have it as a credit
for VR1L. What happened to these?

Are Rhodesia and Zimbabwe the same entity. Both seem to cross ref to Z2.

It depends somewhat on when the contact took place, since there have
been a few changes.

The printed ARRL DXCC list ($3.00) has prefix cross references with (in
many cases) dates.

The ARRL didn't change the name, the country did. What was once East
Pakistan is now Bangladesh, so West Pakistan is now known as just plain
Pakistan.

>
>How am I to know ?

Where changes occur, the footnotes in the DXCC list generally provide
the answers, but not always.

It can be confusing. For instance, before Sept. 17, 1973, there was
just one Germany. After that, the previous Germany became a deleted
country and there were West Germany and East Germany. After October 3,
1990, there is just one Germany again, but it counts the same as West
Germany, not the previous Germany.

>
>Are Rhodesia and Zimbabwe the same entity. Both seem to cross ref to Z2.

Yes.

If you have a difficult question, you can email dxcc@arrl.org and get
answers from the authoritative source.

This stuff can be quite confusing, which is why cards older than 10
years must go to the ARRL instead of the field checkers.

Try them both if you can and see which one feeld best for you. I've used
a 706MarkII on my Scotland ops and found it quite a good little radio.

Accessories: an auto tuner is nice; I was able to find the matching
autotuner for the 706 at a good used price. [If the R-5 is set up
correctly, you won't need a tuner but you do need it on 40 on the R-7 or
on most any wire antenna
>
> 2. I'd rather not put up a tower and yagi. I do have sufficient land for a
> trap vertical with radials, or for dipoles/inverted vees perhaps up to 1/2
> wave on 80 meter size. Any suggestions? Do any of the trap verticals break
> down into checked- or carry-on baggage size?

Vertical: Try to find a Cushcraft R-5 [or an R-7]. [the 5 covers 10 thru
20; the 7 covers 10 through 40]. They both break down into manageable
sections. [And if you do finds a used R-5 without instructions, the
Cushcraft web site has a section of pdf files for their antennas]. There
is a hard plastic ski carry case put out by Sportube that I used to take
my R-5 to Scotland. It can expand to different lengths. I just bubble
wrapped the R-5 sections and had no problem. The airline had no trouble
taking it a checked baggage; indeed, it was a 3rd piece but they didn't
charge extra; seems they allow a free third piece of "sport equipment."
But check your airline[s].
Note: the R-5 needs to be at least 10 feet off the ground. Perhaps a
section of mast of some sort attached to your house. Doesn't need to be
heavy masting.

Check out Sportube at:
http://www.sportube.com/ There are photographs and a list of dealers by

state. [Note: I'm not connected with them, just a satisfied used].

I also was able to fit a DK9SQ collapsible fibreglass mast in the
Sportube. This mast extends to ~33 feet but the upper most sections are
a bit too thin to hold more that a plain wire. But, I've attached a
40-meter dipole to the 3rd section [still a fair amount of sway, HI] in
an inverted-V configuration.

>
> 5. What kind of logging programs are popular? I suppose it should be contest
> compatible, be able to print QSL labels, and certainly to be able to export
> log files for a QSL manager.

There are a great number out there. I've used Logger in Scotland along
with CT for contesting. Logger is a great general purpose logging
program and is a free downloadable program developed by Bob 9K2ZZ. There
is also a Logger Reflector. Check out:
http://www.itis.net/golist/ and...
http://www.qsl.net/kc4elo/

For contesting, the best still seems to be CT [check out the adds in
QST]. There is a small utility program on the CT site that converts the
CT file to ADIF [amateur Data Interchange Format] that can then be
loaded into Logger.

But, check out the various options, particualrly with any hams in your
area where you can actually see and "test drive" them.

> 6. How rare is 9G these days, anyway? Are any of the places I could
> reasonable drive to and operate mobile, such as Togo, Benin, Burkina Faso,
> or Cote d'Ivoire needed during contests or at other times?

They are all rare enuf that you would have no problem developing a
pileup any time you get on from any of them, HI.

> Thanks in advance for your advice!
>
> 73,

From: Richard Ferch <ve3iay@storm.ca>
Message-ID: <99kn2bieh1@news.storm.ca>
Source record: 17522

Gary,

The lightbulb just went on after your second message. What I hadn't recognized from your earlier message is that once the log data are in a spreadsheet, you can use the spreadsheet program to put in the field identifiers, including a formula or macro to calculate the length parameter required in ADIF. Likewise, the spreadsheet could be used to translate dates, band information, etc. to the format required by the ADIF spec. Then you just export the spreadsheet to a tab-delimited file. I don't use spreadsheets very often, so the possibility hadn't even occurred to me; my mistake!

As far as newlines go, it doesn't matter. To quote the ADIF spec: "Any number of characters of any value except < may be added after a field's data or <eor> and before the start of the next field. This is typically carriage returns and/or line-feeds to make the file easier to read in a text viewer."

In other words, the entire file could be all on one line, or every field could be on its own line. There could be comments or other extraneous characters between fields or between records. As long as the extraneous characters don't include the character '<', it doesn't matter.

The examples I took from the spec were originally put there to demonstrate that newlines can be put between fields in the middle of a record for readability. Many programs exporting ADIF files also put spaces (tabs would work equally well) between all fields. Since there could easily be a couple of dozen fields in each record (there are 42 different fields defined in the original spec, although many of them are rarely used), these programs often also put newlines after every few fields and after every record, all to make viewing of the file easier. But the spec does not require this.

To Mike, the original poster -- does this help?

I don't know about anyone else, but I have always had a lot of trouble finding 5 x 7 1/2 envelopes (the preferred size) for the QSL Bureaus. So I special ordered a bunch. Now I have a lot. If there are other hams interested in some of these envelopes, I will send (10) envelopes to you if you send me $3.00 and a 6x9 (or whatever size you have as long as it is bigger than 5 x 7 1/2) S.A.S.E envelope with enough postage to get them back to you. Ten of these envelopes weigh about 2.4 ounces. So add the weight of your envelope to the 2.4 when figuring the return postage. Send everything to me at my Callbook or QRZ.com address.

Regards,

Duffy - WB8NUT

I went thru this exercise and found the recommended size and the 6th district burro sent them back. This was the Sun Valley address, now moved to San Diego. Sed they used another size and they prefer a check and labels. Best check with your district bureau and determine what they want - not particularly what the ARRL site recommends.
For example on the ARRL web site it sez for the W2 District -- "This Bureau accepts money credits only. NO SASEs".

For the address of the districts bureaus -- see URL:
http://www.arrl.org/qsl/qslin.html

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K2FRD, N2OO, W3UR & The Daily DX, N4AA & QRZ DX, K4VUD, N4GN, K7ZZ, K8YSE, KB9YXM, A35RK, CX6VM, DL1EK & DX News Letter, EU1EU, F6AJA & Les Nouvelles DX, G3PJT, HK5MQZ, I2MOV, IW5BZQ, LU4FM, ON4AAC, PA3AXU, PS7JN, VK4AAR, YS1RR and YV5EED for the following DX information.

DXCC COUNTRY/ENTITY REPORT:According to the AR-Cluster Network for the week of Sunday, 18/Mar, through Sunday, 25/Mar there were 235 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, SU, SV, SV5, T30, T7, T8, T9, TA, TF, TG, TI, TK, TR, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS
There were 39 CQ Zones available during the past week. CQ Zone that were not active are: 2
There were 50 ITU Zones available during the past week. ITU Zones that were not active are: 3,4,9,15,21,22,23,24,25,26,31, 34,35,43,58,59,69, 70,71,72,74,90

PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its

size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3A, MONACO. A group of Italian operators will be active for 3 days from here (grid JN33RR) during June 1-3rd. They will mainly concentrate their activity on 6 meters, but they will also be active on HF and 2 meters. Look for the following callsigns (operators) to be active: 3A/IK5GQK (Fabrizio), 3A/IK5YOJ (Giuseppe), 3A/IW5BZQ (Stefano) and 3A/IW5EDQ (Virginio). Their activity on 6 meters is as follows: 50.210 SSB, 50.600 RTTY and 50.620 MHz PSK31 (using an Icom IC-706MKIIG with 6 element yagi and HQ50 Halo Loop). Their 2 meters activity will be on 144.290 MHz SSB (using an Icom IC-706 with 9 element yagi). Their HF activity will be on SSB, RTTY, PSK31 and SSTV (using two Yaesu FT-100 and vertical antennas). You can send E-mail for skeds to: 3a@mannelli.com
They mentioned that while they are on air they will check their E-mail every hour at the top of the hour. For the latest news, check their Web page at: http://www.mannelli.com/3a
Direct QSL (SASE) for VHF QSOs (6/2 meters) via: Stefano Mannelli (IW5BZQ), P.O. Box 569, 50123 Firenze Centro, ITALY. QSL HF QSOs to: Fabrizio Vannini (IK5GQK), via Forlanini 68, 50127 Firenze, ITALY.

3G, JUAN FERNANDEZ ISLAND. Look for Key/JE6JYT, Chip/N6CA, Jack/N6XQ and Roman/XE2EED to be active from the Isla Robinson Crusoe (IOTA SA-005) between March 27th and April 3rd signing 3G0Z. They will have two stations active to cover many directions: one in San Juan Bautista village, the other on a nearby hilltop operating part-time. Activity will be mainly on 6 meters, transmitting on 50102 kHz and receiving on 50140 kHz. Their pilot stations, N6RV and KB6NAN, will be on 28885 kHz. QSL via N6XQ. For more details, check/watch the Web page: http://www.ham-radio.com/ce0z/ce0z.html

5R, MADAGASCAR. Stations 5R8FL, 5R8FU and 5R8GO have been active over the past week. Claude, 5R8GO, has been active on 20 and 10 meters. He was also active SSTV on 28680 kHz around 1245z. Ake, 5R8FU, has been active mainly on 15/12 meters CW. Check 12 meters around 0915z and 15 meters around 1815z. QSL via SM5DJZ. Andre, 5R8FL, has been active on 20 meters (14206 kHz) around 0430z and 10 meters (28496 kHz) around 1445z. QSL via F5TBA.

7X, ALGERIA. The "LNDX" reports tha Yannick, F6FYD, will be here for the next 2 months starting very soon (mi-March). There was no callsign or bands of operation mentioned. However, Mohammad, 7X4AN, has been very active lately on 10 and 15 meters, mostly SSB. Activity has been between 1700 and 2200z.

7Z, SAUDI ARABIA. Joe, W5FJG, is expected to be active about April 15th from Jeddah as 7Z1AC. He will be working as a technician for the U.S. Consulate and is expected to be here for two years. According to his Web page, Joe works both CW/SSB, but will spend 60% of his operating on SSB. He likes and probably will spend most of his time on 20 meters. He will have equipment and antennas for 20/17/15/12/10 meters and expects 30/40/80 meters may come later. His operating time will be Saturday through Wednesday after 1530z and on Thrusday and Friday (his weekend) anytime. He does have equipment for the digital modes, so expect to possibly see

him on Packet/RTTY/SSTV. QSL via WA4JT. More details can be found on his homepage: http://sites.netscape.net/joeyjeep99usa/homepage
Joe mentions on his Web page that the American Embassy in Riyadh has received permission to restart amateur radio operations using the callsign 7Z1AB. Look for them soon to be on the air.

9G, GHANA. Derek, 9G5MD, has been very active on 15/10 meters, generally between 1200-1800z. Check around 28500 and 21250 (and above). QSL via F5VCR.

AP, PAKISTAN. Bob, AP2JZB, continues to be active on 12 meters, as well as 10 meters. Check these bands between 1430 and 1530z around 28492 or 24946 kHz.

ASIAN TRIP PLANNED. Charly, K4VUD, reports that he has purchased his airline tickets to Asia for the period of early May through mid-August, 2001. He plans to operate as HS0ZCW again and will apply for India (VU) and Laos (XW) licenses. He states that it will be not likely for him to be active as/from 9N7UD nor A52UD this trip.

EP, IRAN. Abdullah, EP2FM, is a nice find on RTTY on 20 meters after 0330z. You can catch him on SSB on 20 meters generally after 1430z and again around 2000z.

EV21, BELARUS (Arctic Expedition, "POLAR RING"). There is currently an expedition going on in the Arctic and is being helped by the members of the "Activity Group of Belarus" (AGB). The expedition/operation started February 1st in Minsks and will travel the southern part of the Arctic and the Polar Area. The expedition will pass through Yama (R9K/), Taimyr (R0B), Yakutia (R0Q) and Chukot (R0K). Currently, R0B/EV21ABG is now on from Taimyr. Igor, EU1EU (AGB#001 - President of AGB), informs OPDX that there is usually traffic being passed every Monday, Wednesday and Friday on 14120 kHz at 0500z. However, most of the information is in Russian. The operators are Yuri (AGB#124) and Vladimir (AGB#123, Leader of expedition). There is an award available for working this station. Some information can be found on the club's Web page at: http://www.qsl.net/eu1eu
A special link for the English language can be found at:
http://www.qsl.net/eu1eu/EV21AGB_eng1.txt
In a week the group plans to be active from Yakutia and sign R0Q/EV21AGB.
Any questions/messages can be sent to either/or:
Igor, EU1EU, at: eu1eu@qsl.net
Vladimir, EU1CQ, at: eu1cq@usa.net

FM, MARTINIQUE. Gerard, FM/F2JD, has closed down his station from here and he will be back in France sometime this week. He made 11,200 QSOs (6600 CW, 1000 RTTY, 3600 SSB).

H40, TEMOTU PROVINCE. Ron, ZL1AMO, now active as H40RW, has been very active on 15 and 10 meters CW.

HK0, MALPELO ISLAND (Update). It has been reported that Jairo/HK5MQZ and Hiro/HK5QGX will be embarking off to Buenaventura on April 6th arriving on Malpelo Island April 8th in the late evening. They will disembark April

9th and expect to start operation April 10th until April 21st. They will operate on all bands 80/40/30/20/17/15/12/10 and 6 meters. They will carry a Hygain TH3-MK3 Tri-Bander and home brew 3 element monobands for 17 and 12 meters. For 80/40/30 meters they will use wire dipoles. The group will also use a Yaesu FL-2100B linear amplifier and two HF transceivers: One Icom model IC-706-MK2 and another Kenwood TS-430S. Jairo will be active as HK5MQZ/0 only on SSB. QSL direct ONLY, via HK5MQZ (Jairo Vargas, P.O. Box 10862, Cali, Colombia). Hiro will be active as HK5QGX/0 and will operate on CW only. QSL his contacts via his QSL Manager JA0MGR (direct ONLY).

IOTA NEWS.....
EU-065. Didier, F5BWJ, will be active as TM2A from Noirmoutier Island from March 31st to April 7th. QSL via F5BWJ.

EU-126. Lawrence, KB9YXM, reports that the Finnish Club station, OH8TA, is planning an IOTA DXpedition to the Island of Hailuto in the Gulf of Bothnia off of the Finnish coast near Oulu. They will be operating for three days from the University of Oulu's marine research station on the island. They will be operating on HF, VHF and UHF. The frequency for 6 meters will be 50110 kHz. For other bands and frequencies please send an E-mail message to: oh8ta@oulu.fi
Operating conditions for 6 meters will be a Cushcraft 3 element Yagi, Yaesu ATAS-100 with GP and counterpoise, Yaesu FT-100 at 100-500Watts. The Yagi and ATAS-100 will be mounted atop the lighthouse station at 30-35 meters above sea-leval. The dates will be April 6-8th. KB9YXM is a U.S. operator currently living in Finland and very active on 50 Mhz and above. QSL to KB9YXM will be 100% via OH8TA.

EU-174. Eddy/ON6HE, Dirk/ON5CT and Frank/ON4AAX will be active from Thasos Island between May 27th and June 3rd. Their activity will be on all HF bands, CW and SSB. They will try to have a special callsign. QSL via the bureau or direct to ON4AAC: Frank Pletinck, Potaardestraat 72, B-9190 Stekene, Belgium.

OC-087. Tom, K7ZZ, informs OPDX that plans for the expedition to Enewetak (part of the Marshall Island group) on April 19-26th are going smoothly. An antenna mast will be loaned from Force 12. Support has been obtained from the makers of Mountain House freeze dried foods. And a donation to cover part of their QSL expenses is expected from the Island Radio Expedition Foundation. The only real snag has been the failure of a second amplifier to material-ize. The two Stateside team members will depart the West Coast on about April 10th to join the rest of the team on Kwajalein. From there they will fly on to Enewetak. Although only one station will have an amplifier, two additional tranceivers will be included. Antennas are a small tri-bander, a log for 10-6 meters, and a R-7000 vertical plus a wire dipole for the low bands. Propogation predictions show a slim chance of a 10 meter opening to Europe, but lots of chances on 15 meters. All other

areas should have lots of openings. The callsign V73E has been issued/assigned. QSL cards go to WF5T.

SA-035. Dr. Rick, NE8Z/HC1MD, will be active as YV5/NE8Z from Los Roques roughly between March 31st-April 2nd. He will be using a TS50 + dipole mainly on 28.460 SSB. If propagation is poor on 10 meters, he will operate on 21260 or 14260 kHz SSB. No CW this trip. QSL via NE8Z: Rick Dorsch, Box 616, Hamburg, MI 48139 USA

JW, SVALBARD. Per, LA3FL, is currently active in his spare time from Hopen Island (EU-063) as JW3FL. He is the only radio operator on this little island with many polar bears. He will be here until June 2001. He was recently heard on CW on 21025 kHz at 0915z and 1833 kHz between 0045 and 0330z. QSL via LA3FL.

PACIFIC TRIP 2001. Gerard, PA3AXU, has announced another DX trip into the South Pacific. This time during September 2001, he will be heading to T30, C21 and 3D (Fiji). He reports that like his last trips, this will not be a holiday but work on the radio. He also hopes to give everyone a new one on SSB/CW/RTTY/SSTV and/or PSK31. Gerard will start his activity on Tarawa, West Kiribati, as T30XU, beginning September 4th. He will then travel to Nauru and sign C21XU beginning September 11th. Gerard will end his activity in Fiji signing as 3D2XU, from September 20-28th. For more details and up-to-date information, check the Web site at:
http://www.qsl.net/pa3axu/2001
Gerard requests to please submit any comments/remarks/suggestions on his 2001 Pacific trip in the guestbook on his Web site.

QSL INFO AND NEWS.....
3D2CI Update. Hrane, YT1AD, in Belgrade, reports that the logs are going to be on the Web site soon (they may be there!). They are currently having problem recovering some QSOs from a damaged hard disk, but they hope in a few days all will be consolidated into one log on the Web site. There are some photos of the Conway Reef operation on the Web site. Check them out at: http://www.kragujevac.co.yu/3d2/photos/photos.htm
Hrane is going to be at the Dayton HamVention with a 1 hour video of Conway Reef.

LAST MINUTE CHANGE: The Hillview Gardens ARC (9M6AAC) was assigned the special callsign 9M6A for this past weekend's CQWW WPX SSB Contest with Peter G4MJS as the operator. Please QSL 9M6A via N2OO:
Bob Schenck, PO BOX 345, TUCKERTON, NJ 08087 USA.

Paul, A35RK, would like to remind everyone that the Kingdom of Tonga (licensing authority - Tonga Communication Commission) has no national amateur radio society, no radio club of any sort, and NO QSL BUREAU. At present, it is a waste of time and money to send "bureau" cards to Tonga. Currently licensed A3 operators are certainly not receiving any "bureau" cards, and therefore they are unable to reply. In his own case, "QSL A35RK via W7TSQ" is the only possible route. The postal address for A35RK, in any database that he has seen is incorrect: "via direct", using that incorrect information, will most certainly

result in a "dead letter" and no response.

Gerard, F2VX, can confirm the contact made with A51AA ONLY for the contacts made in September 2000, NOT for the new operator that was newly autorized.

Charly, K4VUD (aka A52UD), reports that all direct mail requests for A52UD QSLs have been answered to date. The bureau QSL will be done next fall.

QSL CW6V, which was active in last weekend's contest, to W3HNK.

Yannick, F6FYD, informs us that all direct and bureau requests for his operation as 5T5YD and 5T5YD/P are on the way.

HI9/DL7AFS and HI9/DJ7ZG QSL and Log. Babs, DL7AFS, informs OPDX that as of the early morning of March 23rd, the duo have arrived back in Germany. They thank the many for the interest in their Dxpedition. They made 16340 QSOs and plan to begin printing the QSLs next week. The log search is now available at: http://www.qsl.net/DL7AFS

L40F was active in the CQ WW WPX SSB Contest as a Multi/Multi category. The LU4FM team was: LU1FAK, LU1FAM, LU1FGE, LU1FGZ, LU1FZR, LU2FT, LU2FP, LU2JCW, LU3FCK, LU4FPZ, LU5FA, LU6FEC, LU8FCM, LU8FPT and LU8FQQ. QSL Manager is LU4FM: Radio Club Rosario, Zeballos 811/817, (2000) Rosario, Republica Argentina.

The Finnish Army Signals School is celebrating its 60th anniversary this year with their station OI3AY that was activated during the CQ WPX Contest. Also, Martti Laine, OH2BH, was one of the operators from the OI3AY station during the contest. A special QSL card will be issued for this special event. The QSL Manager is Teuvo Kaistila, OH1BV, Ahventie 5B1, 25410 Suomusjarvi, FINLAND.

Alan, VK4AAR, announced that all QSL requests for VK0MM cards received through March 20th have now been processed. There were some "not-in-log" replies sent out, but please be assured, that they were not sent out without a thorough check. Alan states, "My wife opened and checked the incoming card against the computer log. If she found any sort of problem she gave it to me to look for obvious typos etc etc.. If I could still not resolve the situation I would E-mail Alan, VK0MM, who would then search his own master log and get back to me. Therefore, it is useless to contact me for further checks.... I have already done all that is possible. Donations for Camp Quality (a charity supporting children who are dying of cancer etc..) are coming in regularly though some still expect a card when they don't even send reply postage and SAE. But a donation will NOT "buy" a card for a QSO that is not in the log. To those who have not yet sent their card to me..... be warned .... DO NOT PUT AUSTRALIAN STAMPS ON YOUR REPLY ENVELOPE. It is most likely that you do not have the correct series of international stamps. Most are putting the wrong amount on their SASEs, too. Let me do the stamps. Just send SAE and USD or IRCs (dollars are preferred as the surplus can go to the charity...IRCs only buy stamps). Those that have the wrong stamps on

will be mailed back to you but I don't guarantee if you will receive them. Finally, and for the umpteenth time, **DO NOT** SEND REQUESTS FOR VK0LD OR AX0LD CARDS TO ME. I HAVE NO AUTHORITY ON THOSE AT ALL !!!"

The Grupo DX Caracas which participated in the CQ WW WPX SSB Contest this past weekend as YW4M gets QSLed via W4SO.

ZL4CC QSLs for the March 2001 operation. Bob, G3PJT, informs OPDX that the correct direct QSL route for this operation is to Bob Whelan, G3PJT, 36 Green End, Comberton, Cambridge CB3 7DY UK. Bob states, "Do not send cards to any other address which may appear in old callbooks as the call was reissued to me for this operation. Bureau cards are OK via G3PJT and the RSGB QSL bureau. An E-mail log request is OK for a bureau card." Bob's E-mail address is: Bob_g3pjt@compuserve.com

TX, NEW CALEDONIA. Jacky, F2CW, is now active as TX5CW. Look for him mainly on CW. His activity this past week was on 30/20/17/15 meters. QSL via F2CW.

VO2, LABRADOR, CANADA DXPEDITION. Fred, K2FRD, reports that he is planning a DXpedition to Labrador; not a DXCC Entity, but an uncommon contact nevertheless. He will be operating from about June 6th through August 31st, as VO2/K2FRD from a tent. His QTH is about 90km WSW of Churchill Falls, Labrador, Province of Newfoundland, Canada. His activity will be mainly 10, 15 and 20 meters in that order. Suggested frequencies are: 28415, 28515, 21315, 21415, 14215 and 14295 kHz. He does plan to be active on some nets. For more details on bands, frequencies, schedules, QSL info, etc...., check the Web page at: http://sites.netscape.net/thefred3/labr1

ZD8, ASCENSION ISLAND. The UK team is now active from here as ZD8K until March 28th. They will move onto St. Helena and sign ZD7K and be active until April 12th. QSL via GW0ANA.

ZY0, ST. PETER ANS ST. PAUL ROCKS. Joaquim, PS7JN, reports that he will be active from "Sao Pedro and Sao Paulo Archipelago" beginning April 1st through April 15th, as ZY0SAT during his free times (afternoons and evenings). His primary objective there is Geochemical of Sao Pedro and Sao Paulo Archipelago. He will be active on HF and the satellites. His suggested operating frequencies are:
HF - 3780, 7085, 14180, 21280, and 28450
SAT - AO-10 (145.9), UO-14 (435.07), FO_20 (435.850) and FO-29 (435.850)
His equipment will be a FT-480R, 20dB amp., XY 7+7 element, 4800 Standard, 20W PA, XY 15+15 element and a HF Atlas 210 with inverted V all band.
QSL Manager is PS7JN: Joaquim "Kim" das Virgens, Rua Carlos Serrano, 1969, CEP: 59076-740, Natal-RN, Brasil (Send 2 IRC and a SASE. Any contribution will be welcomed).

877. Re: Envelopes for the QSL Bureau

Newsgroup: rec.radio.amateur.dx
Date: 2001-03-25 19:13:02 UTC
From: "J. Duffy Beischel" <duffyb01@fuse.net>
Message-ID: <tbsgorlc4dkge5@corp.supernews.com>
Source record: 17533

That's interesting. Well I know the 8th area bureau uses them. Been sending them for years. Probably because they are perfect for oversize QSLs. Anyway, if anyone needs them, I've got 'em.

"AC6V" <ac6v@ix.netcom.com> wrote in message news:3ABE1D76.689A908B@ix.netcom.com...

879. QSLs for PJ4G ?

Newsgroup: rec.radio.amateur.dx
Date: 2001-03-25 20:16:29 UTC
From: Bill Ogden <wogden@attglobal.net>
Message-ID: <3abe44d7_1@news1.prserv.net>
Source record: 17532

I have been unable to find a QSL manager (or address) for PJ4G. Any suggestions?

Bill Ogden

880. Re: ADIF logging program for PSION 5 or MAC ?

Newsgroup: rec.radio.amateur.dx
Date: 2001-03-25 20:30:38 UTC
From: Richard Ferch <ve3iay@storm.ca>
Message-ID: <99lkfn$od9$1@news.storm.ca>
Source record: 17535

Further to my previous message, I've worked out how to use a spreadsheet program to convert a log stored in a spreadsheet into ADIF. I've only tried it on a couple of dummy records and only with the spreadsheet programs I happen to have available (Microsoft Works 97 and Lotus 123 version 5), so it isn't a foolproof procedure. It's more like a collection of ideas for implementing Gary's suggestion. Anyway, it's at http://www.storm.ca/~ve3iay/spreadsh.html .

To test this, I used a text editor to convert a space-delimited log file into a tab-delimited one that I could copy and paste into a spreadsheet. After that, the entire conversion to ADIF was done inside the spreadsheet program. Thanks to Gary Danaher for the idea.

I am looking at getting a SuperStar 4900 for use in Amateur 10 meters. The one I have had a chance to look at only seems to cover the CB channels. I have been told that they are able to go from 25 to 30 mhz. Can anybody advise as any modifications available to provide the frequency range necessary. Please respond via email. Thanks Don KB6GQA.

OK, good deal. BTW, if you are going to use MS Works, it is more fool proof than Excel for this sort of stuff. Excel can easily foul a sort whereas Works database can't. Using Works, create a database with a bunch of fields. type the first field, such as <!@#$%^> followed in the next field by the actual data. Fill down the first field. Remember that some callsigns are 4 places, some 5, some 6, and with the millenium, well there were some long callsigns. You might need to sort them out by length. If you have several thousand of these, there is a relatively quick and dirty way to do that as well.

Now I'm a step ahead of you, Gary. I figured out how to use the built-in string manipulation functions in the spreadsheet program to automate the whole thing, including calculating the length of the call sign, putting the date in the right format (today is 20010326) and so on. Once you stuff the formulas (some of which are fairly long and tedious) into the appropriate columns, the rest is done automatically. No sorting, no editing. If you wanted to, you could even automate the calculation of band from frequency (e.g. 14027 in the log puts <freq:6>14.027 <band:3>20m in the ADIF file, all calculated without operator intervention). Spreadsheet programs are amazingly versatile.

Have you been able to get any QSLs out of the 8th district buro?

I have been sending a new envelope every time postage goes up. Nothing comes out even though email correspondance with DX stations says they sent them that way.

Up until about 1993 use to get a least 1 card a year but, recently nothing seems to come out even though I have worked more DX in past 4 years than I did in the first 20!

This is a neat looking little radio, but it is basically a CB. At the price I've seen these going for ($300) you could spend a few dollars more and get an older model ICOM 706 or Yaseu FT100. A few of the extra features from a real amatuer rig like the ICOM or Yaseau are more power, a better reciever, full HF coverage, 6 meters, 2 meters, and 70cm(depending on the model), and CTCSS tones for repeaters. As I recall, the 4900 doesn't include any tones for 10 Meter repeaters.

That being said, there is a lot of Superstar 4900 info at www.cbtricks.com. It looks like the radio can be set to default to a CB, 10 meter, or wideband personality depending on how jumpers are set inside the radio. If you do buy one, please come back and give a review of this rig from an amatuer perspective.

Small point Bob, it is an International Reply Coupon and their a bit
on the pricey side. A single IRC is exchangable at any foriegn postal
administration for "ONE UNIT" of return postage. For Airmail service
you would have to include multiple IRC's depending on the country sent
to,

Source record: 17545

The 8th Area QSL Bureau has a different volunteer handling
the 26 suffix groups. You can find out who handles your callsign
at: http://mrrace.com/ARRL/QSLBureau/index.htm

For example, My call is 'K8ND', and so I look for the 'N' letter
manager, who is ND8L. His email address is provided so I
can contact him about my cards, if desired.

Most of the managers have updated a "You've Got Cards"
page at http://mrrace.com/ARRL/QSLBureau/CardsPage.htm.
This page show callsigns for people with cards but no
envelopes at the Bureau.

If that doesn't help, the 8th Area Bureau Manager is Ed Gassman,
N8HTT, and his email address is N8HTT@GreenApple.Com.

The letter managers *are* volunteers, and sometimes life
intervenes.

Nominally, yes, but I have not yet received cards for QSOs 1-2 yrs ago.
Bernie W3UR told me that there have been some problems getting the logs,
but after this weekend's M/M operation from A61AJ there will be great
pressure on the ops to get some logs to him, I assume. We can hope that
this will include operations before then.

To my knowledge that is *not* the case in the USA. The incoming QSL bureau
here accepts non-member cards (though the outgoing bureau does not) and to
my knowledge only receives postage for internal correspondance.

Likewise, and agreed. #89 confirmed on 80m.

Also received a direct QSL from a SM3 station including an IRC purchased in
Ellsworth, Maine for 22 cents. As you might imagine, it wasn't purchased
any time in the recent past<grin>.

Any suggestions on where to QSL direct or via MGR to C91PH?

BTW, Peter Hubber KB7YHD as per Buckmaster & QRZ are -not- good addresses for this station or his manager.

Thanks and 73

To correct, a current IRC covers one unit of air service anywhere amongst the UPU members. That change occurred a number of years ago.

I'd recommend Mario DJ2MX, a VERY good manager, he's a manager for a
few T9 stations. Visit his web site at www.qsl.net/dj2mx or email him at
dj2mx@t-online.de His services are totally free, direct and bureau
QSL-ing and he prints full colour photo QSL cards on his own cost.

Correct ! But the problem arises where the station refuses to use hard copy cards because he's got ability to confirm via email (eqsl) And I'm sure there will be many, many stations doing exactly that.

The other problem is that we're looking from the Western World point of view (US, EU, VK, JA etc) but what about a pure bloke in Bosnia, Kazakhstan, India, Western Sybiria and who knows where else, who couldn't even dream about a computer, let alone having internet ? How they're gonna confirm a QSO ?

DX clusters, no CW requirements, now e-qsl ... I wonder if we're going too close to self destruction ?

You're both wrong. It's subject to interpretation, with most places
giving airmail overseas postage for an IRC, but if there are two or
more classes of foreign postal service i.e. airmail and seamail, then
an IRC can be considered as redeemable for only the lowest class.

Look around on www.ac6v.com for the IRC/greenstamp chart.
That's a minimum, by the way. I tend to send some extra to QSL
managers, and dxpeditions, but that's up to you.

Derek
The good news is that I finally received the November logs I was missing and logs for this years CQ WPX SSB. I hope to have them imported into the main log by the weekend. I finally got tired of waiting for Ali to order the QSL cards so I ordered new ones from W4MPY and received them late last week. I started on the US cards Monday. In fact yours was done today. I am working on all QSL cards received here in Glenwood prior to March 23, 2001. It's going to take a while but I will be finishing up the W's by this weekend. DX will go out following that. 2001 QSOS will follow that. Hopefully Ali will send me more QSL cards.

914. AD0S/KH5 and XZ9A Dxpeditions Authorized?

Newsgroup: rec.radio.amateur.dx
Date: 2001-03-27 23:03:49 UTC
From: Trav & JoAnn <tdwalter@netins.net>
Message-ID: <99r64b$5t$1@ins21.netins.net>
Source record: 17419

After some lapse (20 years) I submitted a bunch of cards to DXCC. The following were not allowed as unauthorized operations.

AD0S/KH5 Palmyra - 4/29/1981, I have a real problem thinking this was unauthorized.
XZ9A Burma, 9/23/1981, Possibly was an unauthorized operation.
HH0N/KP1 Navassa 7/22/1981

I would appreciate if someone could verify whether any of these were authorized operations. Of course Palmyra is my big worry as I returned to the air too late to work the last Dxpedition. Learned a big lesson about keeping things current.

Why don't you just sit down with a current IRC in front of you and read it, huh?

"This coupon is exchangeable in any country of the universal Postal Union for one or more postage stamps representing the minimum postage for a priority item or an unregistered letter sent by air to a foreign country."

Now, what part of this don't you understand? Doesn't say anything about being sent by seamail.

To answer some to the comments.

First, I have not received any cards in quite some time.

However, the web link to the bureau was very helpful. Did not know it existed...Thank You!!!!

When I send them envelopes, I also enclose a small donation to help with any expenses since they are doing a totally volunteer service and it is appreciated.

Thanks Folks in the Bureaus!!!

I'd suspect Palmyra will be on the air off and on. As I understand
it, the new owners are understanding about amateur operations, and
there will some tourism there soon.

Notwithstanding, people in Belgium have stated that one IRC will only
get surface postage to the US, two are necessary for airmail. And in
Switzerland, one IRC is for lower priority mail, not in an airmail
envelope, two are required for priority airmail.

I suggest you take this up with the International Postal Union.

Surely these $ 3.000-radio-guys do not have to worry about buying a
computer but I know MANY hams in Bosnia who don't even have a radio on
their own, they use club stations or at best have some very old TS830's
and FT 101's. If they're lucky to have job they earn approx. US $ 100 -
150 a month (if they're lucky again to get paid at all)
I do consider that to be poor (sri typo / tnx corr.) and not being able
to buy a PC. And a 486 or low pentium based pc still cost much more than
$ 50- out there.

Source record: 17428

To put it exactly:

first class (A priority) airmail to the US (overseas in general) = 32 BEF = 0.79 Euro = 0.703 US$
(this covers "normal weight": 1 SAE + 1 IRC + my qsl-card + 1 small letter to beg for a card in return)

for 1IRC, Belgian postal services give in return 27 BEF = 0.67 Euro = 0.593 US$

1 IRC costs in Belgium 45 BEF = 1.12 Euro = 0.988 US$

Voil�, I know because I just sent out a bunch of direct cards last week,
costed me a small fortune, but I don't care...
Aaahhh... The anxiety of waiting for the mailman...
No eQSL for me! Hardcopy QSL forever!

Thanks for exact information.

That's all a bit cheaper the the US, currently.

Hmm, so that means I should buy my IRCs in Belgium!! I wonder what's the lowest price worldwide for new IRCs? I currently have a stash of $1.05 US ones, but....

What do IRC's sell for, from the PO, in the UK?

W3UR just sold a bunch at $1.00 each, so there's one price point for private exchange.

Or ignorance: Maybe he doesn't realize that all "airmail" IRC's are now
redeemable for $0.80 in postage.

And he may not realize that that $0.80 will carry twice as much
weight.

Never ascribe to bad intentions what can as easily be ascribed to
ignorance. There's a lot more of the latter about.

If that is so, Mike, then you've got a deal of the century right there. I'm sure Australia, just like the US, is full of unwanted 486's and early Pentiums that nobody wants anymore and that go for literally $5 apiece, if that much. So get a bunch of them, ship them cargo, sell them at a 100% margin, make a shitload of cash and in the process make a shitload of people computer literate overnight. Only, both you and I know that it ain't so, that used PC's, even though more expensive than in the West, nevertheless are within reach of the average ex-Yugo. All those countries are overloaded with satellite antennas, VCRs, cellphones and such stuff. However, the average ex-Yugo doesn't need a computer, he's either busy plundering or being plundered. And now for the good news: in 50 years everything will be back to normal (whatever normal means for the Balkans).

X-FLARE: A powerful X-class solar flare
erupted near sunspot group 9393 on March
29th at 1015 UT. The blast sent a coronal
mass ejection (pictured right side in a SOHO
coronagraph animation on SOHO web) toward Earth -- the
second in as many days. The first of the
two incoming CMEs will likely hit Earth's
magnetosphere on Friday; today's
expanding cloud will arrive approximately a
day later, on Saturday.

Forecasters say there is a good chance (15-25%) of severe
geomagnetic storming when the CMEs strike.

please Help!!!

I have a Yeasu FT-920 and am using a PC software logging package (happens to be Shacklog) which can communicate with the radio via the CAT interface from the COM port of the PC. The Yeasu manual specifies that an RS-232 cable is required and that only pins 2,3 and 5 should be required..

I have tried and tried to get this working to no avail. Does anyone have pin connections please for the PC and radio ends of the cable??

Thanks

Hi John
I use a siskin multicat with a FT757gx mark 1
it has a "molex" cat socket on and the handbook was incorrect for me.
according to the multicat manual
the pins for the
yaesu pin3 to pin 1 on the muticat
yaesu pin 1 to pin 2 on the multicat
yaesu pin 2 to pin 5 on the multicat
however I tried this and found (by accident) the pin on mine to the agc
was not needed.(pin2 yaesu to pin 5 cat)
Iam using scancat gold which works a treat
hope this helps

W9INN (Bill) has granted me permission to create and publish a web page devoted to his outstanding antennas. It includes a diagram of one of his more popular 5-band resonant HF fan-dipoles - the MPD-5C which comes in either a 78ft or 87 ft model. I have included contact info for Bill and included the measured 2:1 VSWR bandwidths I obtained.

Just click on this link http://www.ab7sl.com and then the W9INN Antennas button .

I have worked 289 DXCC countries (ssb-only) on Bill's antenna (in less than 5 years) and felt he deserved a little internet presence as he has yet to create his own site. All the info you need to reach Bill is on this page. 73 / DX

Hi John,
One of the common problems is confusing a
'null modem' cable with a straight through or
'direct' cable.
The 'null modem' cable cross connects the
RX and TX signal pins (pins 2 and 3).
I believe you need a straight through cable.
Steve

Know what, Zoran; I give up.

There are people who are thoughtless drones, no matter how hard you hit them with a hammer. Charles is one of them. He doesn't care about usenet and he doesn't care about other people's interest in this fabulous medium. He sees it as the perfect place to run his adv^H^H^HSPAM and think that it's just great.

He behaves like the simplex idiot who is too stupid to grasp the concept of split operating. In that vein he is unable to grasp the concept of a text based, ad-free and multicultural environment that has been designed to discuss ideas, not to promote ridiculously bad designed and contentless webpages. He laughs at people who think that his fullquotes, referenceless drivels are a waste of conceptual bandwidth.

Let him have it his way. Let him be happy in his dysfunctional way of not understanding what 2-way communication at its best can be. Let's leave him alone and pray for www.usenet2.org where mindless people like him will never have a place.

Hi John,
I don't think I've come accross a radio that can talk to an RS-232 port
directly. I seem to remember an interface being required, probably based on
a MAX 232 level converter (makes TTL stuff talk to RS-232). If I find it
again, I'll email you a copy.

Some do. If I remember correctly, the FT-920 is one of them.

The FT-847 requires a null modem cable, but no level conversion.

OK, I'll leave it with you. Thanks for putting me straight, but I do have details of the CAT/keyer interface (Log-EQF compatible) for Yaesus if anyone wants it. Surprising, but it's dead simple (three trannies and four resistors).

MattD..

Some of the Kenwood radios talk RS-232 as well.

Great DX Conditions or "don't look now but you S-units are showing"

Did anyone else catch the fantastic band opening last night? I could not sleep so I was up late and was tuning around 20 meters when I heard the clock strike midnight. Suddenly the band really came to life with some great DX stuff. First I heard Romeo Germany 8 Uniform really banging in from somewhere in the south Atlantic with a big pile-up on the frequency. I picked a spot and dropped in my call. "Mike India Lima go ahead". "Germany 8 Uniform, you are 70 over 9, QSL info please." "Not to

worry India Lima, my card 63% to you via burro." "Aw-Right, got him!" Then Charlie 0 Dog Echo gave me a call on CW running a modified HW-8 at a KW output with a re-worked cash register as a keyboard keyer. Maybe try a little more CW action. Called CQ on CW and answered by BIG

CARRIER, weak audio from Victor 0 India Charlie Echo. "Your audio is weak,
OM, try turning up the gain", I answered. Found out the audio section of his
transmitter was not working and he was modulating by screaming at the final tubes.
Swung the beam further south and there was Charlie 0 Alpha X-ray in the
Feedline Islands. Gave him a call. "Kilo 5 Mike India Lima you broke my S meter, do not transmit again I am afraid you may blow my rig." "Roger roger Alpha X-Ray, what is QSL info please?" He didn't reply. OK, lets see what's going on in the Pacific. Swing the beam on around. Wow! there is Fox Ocean 0 Lima running 80 over 9! "Fox Ocean 0 Lima this is Kilo 5 Mike India Lima you are 80 over 9, what are you running?" "Ok Mike India Lima, rig here is a converted cordless phone running 1.63 watts using lamp cord feedline to a chicken wire fence." Now this is great! Lets see what is going down on the European front. Swing the ole beam on around past north. Man listen to those signals! Better catch this one. Dropped in my call. "Mike India Lima go ahead." "Roger roger...Germany 0 Tango Charlie Hotel Alpha, you are 62.3 db over

S9, Q5 copy. What is my report?" "Mike India Lima, you are minus S8, can only copy on negative voice peaks, try again." "MINUS S8!!, WHADDYAMEAN MINUS S8? Im running 14 bazillion watts to a 42 1/2 element Thunder Stick at 163.42 feet!! Minus S8 my Aunt Fanny!" Wait a minute, what's that call again? G0TCHA? What's today? Let's see that calendar. Aw rats!

Gee, and I didn't hear a bloody thing.
In fact, I've turned my rig into a random number generator.
So much noise, gotta put it to use for something. Now I've got
37 gazillion random numbers stored on my hard drive for later use
when the get sparse.

Thank goodnes for those solar flares.

Thanks all for your replies.
The FT-920 manual states that the "null modem" type of cable should not be used, and that the radio has a built in level converter, therefore can be interfaced direct to the PC.

The RS232 specification tells me that the connections should be pin to pin i.e. 2 to 2, 3 to 3 and 5 to 5.. However this does not work. I then tried crossing them...still no luck.

Any one with any more ideas??

Thanks,

John

Wrong baud rate perhaps?

The FT-847 has a menu item to select 4800, 9600, or 57600. Unfortunately
not all of the software has this configurable; some require 4800, and
some require 57600, and some let you choose.

Monster Sunspot Hurls Solar Flares Toward Earth

News/Current Events News
Source: Reuters via DailyNews.Yahoo.com
Published: 04/01/2001 Author: Reuters, Deborah Zabarenko
Posted on 04/01/2001 07:58:02 PDT by GeekDejure

WASHINGTON (Reuters) - Four solar flares and a pair of powerful magnetic gas clouds spawned in a monster sunspot were headed for Earth and could affect power systems, satellites and some radio transmissions, a top space weather forecaster said.

They might also provide a dazzling display of the northern lights if they arrived at night, said Gary Heckman, senior forecaster for the U.S. Space Environment Center in Boulder, Colorado.

``They're headed our way,'' Heckman said in a telephone interview. ``But these still aren't the barnburner events. ... It will tickle some power systems. Satellite operators will notice.''

The solar flares -- explosions in the sun's atmosphere -- and the fast-moving magnetic gas clouds, known as coronal mass ejections, were hurled at Earth from the biggest sunspot scientists have seen in the past decade. The sunspot was about 86,800 miles in diameter and had about 13 times the surface area of the Earth, according to the National Science Foundation (NSF) and the U.S. Geological Survey (USGS). The spot is so big it can be seen unaided as long as filters are used to protect the eyes from damage, the NSF said in a statement.

Sunspots are dark patches on the sun's surface caused by a concentration of distorted magnetic fields. Violent solar activity is believed to be caused by the release of magnetic energy. The first bit of stormy solar weather left the sun on Wednesday, and the first effects of it

were expected to reach Earth late on Friday and continue through the weekend, Heckman said.

The USGS, which monitors solar weather at a network of magnetic observatories around the world, said Earth's geomagnetic field ``is expected to become quite disturbed'' by this solar activity. ``While geomagnetic storms give rise to the beautiful northern lights, they can also pose a serious threat for commercial and military satellite operators, power companies, astronauts, and they can even shorten the life of oil pipelines in Alaska by increasing pipeline corrosion,'' a USGS statement said.

Heckman said it takes about two days from the time the sun fires off flares or throws out a coronal mass ejection until its effects can be felt on Earth, when a hot ionized gas of charged solar particles hits the Earth's magnetic field, causing fluctuations in it. The big sunspot has another week to go before it rotates away from Earth, but that could be plenty of time to cause mischief, Heckman said.

``The monster sunspot's still there,'' he said on Friday afternoon. ``That region (of the sun) has been storing energy for more than 24 hours. It's just building it up, so when it's released, there is the potential for a really large event there. ... It's rather ominous just sitting there for the last 24 hours.''

An image of Thursday's coronal mass ejections can be seen online at http://www.spaceweather.com

Seems the HF bands were pretty dead this weekend (Mar 31/ Apr 1).
Did anyone work any good DX? With 100W and a dipole?

962. Re: Anyone work any DX this weekend, what with that solar flare?

Newsgroup: rec.radio.amateur.dx
Date: 2001-04-02 06:49:54 UTC
From: Richard Friedman <rchrd@rchrd.com>
Message-ID: <3AC82F1F.4E18A210@rchrd.com>
Source record: 17367

Things were much improved today (Sunday) here on the west coast.
But I did have to go mobil and move down to the Oakland/Emeryville
Marina on San Francisco Bay to get good reception. 10m from home
was completely blanked out. Something about being near a body of
water did greatly improve matters.

But today I heard calls from Tahiti, Australia, New Zealand, and
the midwest (Chicago to Houston, with Kentucky and Tenn.)
No East Coast or Washington/Alaska. Also heard Puerto Rico
and Brazil. Unfortunatly I didn't have enough time to call CQ,
and none of my attempts (100w IC-706IIg mobile antenna) to answer
CQ's got anywhere. 10m seemed to close up around 6pm here.

Friday late afternoon was also good on 10m for a short time. Again, I
parked my camper near the bay and this time had QSO's with
the east coast. There were some pileups making contact with stations
in south america and russia, but I could hear very little DX, and very few J's.
Japanese stations usually come in by the zillions between 4-7pm
local time here. There's been very little from Japan this weekend.

The solar flares have really made a mess of the ham bands.

You might want to check out:
http://www.spaceweather.com/
and
http://dx.qsl.net/propagation/index.html

Good luck.

Just for the record, but the dx-cluster PI4CC is temporary qrt due a removal. Today it will be up again with a new IP number. The IP number will be 212.127.163.66 You can try it after 19.00 UTC.

In the near future there will be a IP number change again due a switch to an other ISP.

966. PR: Log Windows 3.07.33 released

Newsgroup: rec.radio.amateur.dx
Date: 2001-04-02 16:49:59 UTC
From: Rick Ruhl <ricker@cssincorp.com>
Message-ID: <_32y6.931$Rv.45163@news1.atl>
Source record: 17371

Log Windows 3.07.33 released!

Update adds TS-2000 and FT-817 radio support and support for Nova Satellite program

Muscle Shoals, Alabama. April 2, 2001: Creative Services Software announced that version 3.07.33 of the popular logging program Log Windows has been released. The release includes fixes for the FT-990 with DX Spotting, as well as support for Kenwood's new TS-2000 and the new Yaesu FT-817 QRP radio.

One of the major advantages of using it with the TS-2000 is that it supports the Packet Cluster Tuning Data feature, which allows you to be connected to one cluster with your TNC or internet connection and use the TNC in the TS-2000 with Packet Cluster Tune turned on to get DX spots from both clusters at the same time. Many Dxers will be able to use this feature to help add to their DXCC, WAS and other award totals, as well as during contests.

It also has the new features of the 3.07.XX releases:

- Support for Top Ten devices band decoder
- Support for Alinco DX-77
- Direct support for the Icom IC-706 MKII
- Stop rotor function for HYGAIN and Sartek rotors
- Browse function for PSK mode (in search options)
- Added option for W4CSS parallel interface (5th message with MFJ Voice Keyer)
- Direct Support for the Rotor-EZ
- Added Grayline windows display.
- Added DXCC2000 reporting support.
- Telnet DX Cluster Access
- IOTA Support
- WinQSL QSL Manager Support
- QSLMaker 2.3 QSL Printing Program Support
- Full ADIF support
- Support for the W9XT CW keyer
- Support for the K8CC parallel port interface

The product retails for $69.95 and upgrades from release 3.06.15 or earlier is $40.00. Those who have purchased version 3.06.50 or greater will get this upgrade free. It also appears on the Digital Trio CD. It is available from dealers around the world, as well as direct from CSS.

To each his own, Peter. Spam will be with us no matter what, and probably the best way to deal with it is a filter. I tend to not use filters in newsgroups because, to quote a friend of mine who does the same: "I like to have the latest figure of the index of stupidity".

I know this is 'off subject' but hope you can help, I went to my first computer 'fest,swap, show', this last weekend, and was really amazed at the amount of 'equipment'. Had I 'known' , would have 'made the trip way before this'! But, back to my question, I was telling my daughter about the computer show, and she ask me if I could find the locations of such ''shows'' in the Seattle area, she (a ham) is new to that area (just married) ... I live in south Tex. , so a 'little out of touch with that area'. Appreciate any and all input. thanks inadvance. Chuck Lorentson "73"

Older Yaesu radios AFAIK only have 4800 baud 8 bits, 2 stop bits. This may
also cause problems.

Hello all!
I love to DX and do limited contesting. I have been searching for awhile (and doing some posting out here) in search for the right antenna. Because of my living situation (an apartment) the antenna has to be a vertical, not over 20 feet tall, and no radials or counterpoises sticking out all over the place, wires laid out on the roof for radials are OK tho. I would like to work the bands 10 -20m including the WARC bands. Any suggestions for an antenna that would fit this need??
Please email me direct at: NZ8C@aol.com

Oh, Jeeze, I guess I better respond, what with me living in Seattle and all. A sad fact is, I really don't know of any of these, but then again, I really never had a need for them. I guess it depends on what your daughter is looking for. Perhaps a much better deal, if she's looking for the state-of-the-art stuff, would be to attend the numerous dot-com bankruptcy auctions - there have been at least 5 or 6 in the last month or so in the area (check the Seattle Times classifieds). Or, if she's looking for some dirt cheap stuff, there are computer recycling shops like Re-PC, Boeing surplus and so on. But, simply for information, tell her to find free computer magazines in local coffee shops, libraries and bookstores. If they don't know of any swapfests, then there aren't any around!

It seems strange for someone who knows CW to bootleg someone's call, except in the case of a former amateur whose license was revoked....

Bootlegging usually is with the voice modes.

I had one of those, the guy was misbehaving on 75m with my call maybe
ten years ago. The only equipment I'd had on the air for years was my
2m FM xcvr in the car. Some w4 called me on the phone outta nowhere
one nite and started reaming me. I told him it couldn't be me, "go DF
the guy or get the monitoring station to DF him or something, not my
problem." Never heard any more about it.

Back in the mid 60's I ran into a ham on 20 cw using my call (different
one at that time). I didn't have a beam antenna, so couldn't really get
a bearing on the location, but propagation was primarily to the midwest
at the time. I called him, and signed with the same call. He quietly
disappeared. :_)

"Usually"? What's the basis of such a conclusion? I'd be interested
in the research you've conducted in this area. How did you compile
the data to make such a statement, especially when most cases probably
go undetected and/or unreported?

I didn't say that it has to be the former amateur who had the SAME call; just a former amateur who can't get relicensed and happened to pick your call.

> >Bootlegging usually is with the voice modes.

On the basis that most of the bootlegging that goes on around here happens to be on 2m repeaters, and the mode certainly isn't CW. Anyone can bootleg using voice; no practice required. Not anyone can bootleg using manually generated morse code - such takes practice.

Anyone who has gone to the trouble of learning CW, etc., has no reason not to take the amateur radio examinations. That is my experience from being a volunteer examiner for 7 years and therefore meeting alot of people who have proven such.

[PS: As far as licensing is concerned, I am not in the "pro-code" group and do feel that the FCC's elimination of the higher speeds as a requirement was a correct action.]

Being unable to get a license is only one of a number of reasons for someone
to bootleg a call. It is quite possible the bootlegger in person actually
has a call but for some reason would rather use Jeffrey's. (to suggest one
possible reason: because he wants to know what it's like to be DX without
actually travelling to a DX location)

It stands to reason that a person who can bootleg CW can probably
obtain a general class license. It is not so apparent for voice
mode bootleggers.

He has absolutely atrocious fist, and has to pause periodically to look
up rarely-used letters from the Morse Code list on the front of his
walkie-talkie.

I dunno about the bootlegger, though.

1000. 3A2DX - Pirate?

I saw some spots this morning showing that 3A2DX was active on 10m working stateside. In the past, I've frequently seen that he's listed as a "pirate". Does anyone know what the real story is on this guy (he gives his name as Robert)? Is he actually operating from Monaco, but doesn't have the proper license for HF? Has he upset the locals in some way? Of is he just a "run-of-the-mill" pirate, operating from somewhere else in Europe?

It was so common they even had a name for bootleggers, like 'Elmer',
only for the bootleggers it was 'Slim'.

Happens all the time.

> The phony KH6O is on 10m CW, handing out "his" 10-10 number!

Reality check, Jeffie! Why would anyone do that?

Far more likely than your "bootlegging" scenario, the fellow is either:

1) Sending his call inexpertly, so it sounds like "KH6O", or
2) Being copied inexpertly, or
3) All the above.

If you know his 10-10 number, send it in to Ten-ten International and ask who
has that number. My guess is that it belongs to someone with a call like
K5BO, KH6MT, KH6TM, KS6O, or similar.

1017. Re: Bootlegger using my call

Newsgroup: rec.radio.amateur.dx
Date: 2001-04-05 23:10:44 UTC
From: JAMES HAMPTON <j.r.hampton@worldnet.att.net>
Message-ID: <UX6z6.12270$RF1.819444@bgtnsc06-news.ops.worldnet.att.net>
Source record: 17472
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.dx

For what it is worth, how difficult is it to hook up a computer and let the machine send and receive the code? I doubt most bootleggers would do this since it might entail just a bit of work; regardless, the question remains - how would anyone know that the other individual can or cannot send or receive CW? Computers make this relatively painless.
A simple solution might be to change the testing. Everyone gets a piece of paper and a pencil. They sign their name and put the date on the paper. After the papers are collected, the VEs simply check drivers licenses and see if the names were spelled properly. 50 points for the proper spelling of your own name and 50 points for getting the date right. 50% would be a passing score. That would be the general. For the extra, you have to spell the name of the city, town, or village you reside in. Correctly guessing the answer counts. Passing would require two out of three correct answers (name, date, location). Extra classes could apply for and obtain 2X3 calls, others would be issued either 3X3 or 3X4 calls.

1018. Signal Reports on a New Ten Meter Beacon

Newsgroup: rec.radio.amateur.dx
Date: 2001-04-06 01:55:05 UTC
From: Donn Sinclair <WY5I@worldnet.att.net>
Message-ID: <ZI9z6.10425$rk4.815059@bgtnsc04-news.ops.worldnet.att.net>
Source record: 17473

This is a follow-up to a previous request. I only got a few
responses. A new more from various areas would help.

Again, I would very much appreciate receiving signal reports
on a new Ten Meter beacon I have just put on the air.
It runs 5 watts with a 7db gain colinear vertical antenna.
It is on 28.2578 Mhz. TNX. 73. Donn WY5I

1019. Ohio/Penn DX Bulletin #505 (*Corrected)

Newsgroup: rec.radio.amateur.dx
Date: 2001-04-06 02:50:00 UTC
From: kb8nw@barf80.nshore.org
Message-ID: <$opdx.505.2001@ampr.org>
Source record: 17474
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.info

MESSAGE FROM KB8NW: After about 7 days of no connection to the outside, BARF-80 BBS is now back on-line connected to the InterNet (Details in next week's bulletin). To OPDX InterNet Subscribers and readers on the various UseNet groups, "We are sorry for the delay".

SB DX @ WW < KB8NW $OPDX.505
Ohio/Penn DX Bulletin No. 505 (*Corrected)

The Ohio/Penn DX PacketCluster
DX Bulletin No. 505 (*Corrected)
BID: $OPDX.505
April 2, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, KA1GJ, NC1L, K2FRD, W3HC, W3UR & The Daily DX, WN3VAW, N4AA & QRZ DX, N6RT, W7TSQ, K8YSE, WA0RJY, 9Y4VU, EA5BY, GM4SUC, HL1IWD, I1JQJ/IK1ADH & 425 DX News, IK7JWX, JA3MZB, JI3DST, ON5NT, OZ5MJ, VA3RJ, Zik and ZK1CG for the following DX information.

SPECIAL NOTE FROM EDITOR: As of 2230z Thursday, March 29th, BARF-80 BBS lost its ISP mailer until possibly April 2nd or 3rd. This is due to a changeover of DSL ownership and equipment/hardware/cable (which will not be available until then). This means your editor will probably lose all of his mail sent between March 29th and April 2nd or 3rd. If you have sent something for the OPDX, PLEASE send it again after April 3rd. Also, OPDX's InterNet Subscriber will be receiving their bulletin one to two days later than normal due to this changeover. I am very sorry for this inconvenience. However, OPDX.505 will be available as usual at the K8YSE OPDX Home Page. Provisions are being taken to have OPDX.505 uploaded to the various DX Reflectors and UseNet groups..... Thanks de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th March, through Sunday, 1st April there were 237 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9U, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6,

KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON,
OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0S, PZ, R1FJ, S2, S5, S7,
S9, SM, SP, SU, SV, SV5, SV9, T2, T32, T7, T8, T9, TA, TF, TG, TI, TI9,
TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE,

XT, XU, XW, XX9, YB, YI, YJ, YK, YL, YO, YS, YU, YV, Z2, Z3, ZA, ZB,
ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS
There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2
There were 49 ITU Zones available during the past week.
ITU Zones that were not active are: 3,4,15,21,22,23,24,25,26,31,34,
35,43,58,59,68,69,70,71,72,73,74,90

PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As
always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its
size) with a complete breakdown and "DXCC/Entities Chart of Activity".

4W, EAST TIMOR. Neville, VK2QF, is once again active from here as 4W/VK2QF.
Reports indicate that he will be active on all bands 80-6 meters CW/SSB
until April 5th. Over the past weekend, he was spotted on 15 and 10 meters
CW. Check 10 meters after 0100z and 15 meters after 0830z. QSL via his
CBA.

5R, MADAGASCAR. Sigi, 5R8GT, was quite active this past week on 12 meters
and some other WARC bands. Check around 24942 kHz between 1630 and 1730z.
Also, check 10104 kHz after 0300z, 18142 kHz around 1630z and 21242 kHz
after 1730z. QSL via DK8ZD.

5X, UGANDA. Graham, 5X1GS, was active over the past week on 10 meters.
Look for him on SSB on/around 28460 or 28475 kHz after 1030z and again
after 2000z. QSL via WB2YQH.

C9, MOZAMBIQUE. Joe, G3MRC, was active this past week as G3MRC/C9. He
was heard on 28029 kHz between 1330 and 1600z. QSL via home callsign.

D70, SOUTH KOREA (Special Event/Attention Prefix Hunters). A group of
HL operators will be active now through May 25th with the special callsign
D70IAF (Delta Seven Zero India Alfa Foxtrot) to celebrate the opening
of the "Incheon International Airport". They were spotted last week on
CW/SSB/RTTY/PSK31. Check the following frequencies: 7006, 7070, 14014,
14070, 14086, 21070 and 21290 kHz. QSL Manager is Lee, HL1IWD, and he
prefers QSLs be sent via the bureau.

DXCC NEWS. Bill Moore, NC1L, DXCC Manager, reports that "Documentation
has been received for ET3VSC and cards will now be accepted for DXCC
credit."

E4, PALESTINE. The "425 DX News" reports that Gunter, OE1GZA, will be
active from Ramallah until the end of next year as E4/OE1GZA. Activity
will only be on 30-10 meters at this time. It is recommend that direct
QSLs should be sent (as bureau cards will not be answered for a long time)
to: Gunter Zwicki, c/o SICT, P.O. Box 91196, Ramallah, Palestine.

H40, TEMOTU PROVINCE. Ron, ZL1AMO, continues to be active as H40RW and has been heard on 7007, 14025, 14226.5, 14236, 21028 and 28024 kHz. QSL via home callsign.

INTERNATIONAL LIGHTHOUSE/LIGHTSHIP WEEKEND 2001 (Update). Mike, GM4SUC, reports that planning for this year's International Lighthouse/Lightship Weekend, Saturday 18th and Sunday 19th August, is progressing very well. A list of stations that have already confirmed their participation can be found at the following Web site: http://www.vk2ce.com/illw/2001.htm Rules and information on the weekend can also be found at: http://www.vk2ce.com/illw/index/html If you require any more information just contact Mike at: GM4SUC@compuserve.com

IOTA NEWS.....
AS-NEW. The Korea DX Club (KDXC) has an IOTA DXpedition scheduled for May 5-6th (only two days) to one of the Kangwondo Province Islands. The island name will be announced later because of military security. This will be a new IOTA and will also be the last IOTA in South Korea. They plan on using a beam and amp during this operation. QSL via HL1XP. All contacts will be confirmed via the bureau automatically.

AS-024. Nasu, JM1TUK, will be active from Ishigaki Island from April 4-16th. He will use the callsign JM1TUK/6 and will be operating on 40-15 meters using a TS-50 and groundplane. QSL via JM1TUK.

AS-056. Masa, JA6GXK, will be active from Danjo Archipelago (Meshima Island) during the following dates: April 10-20th, May 1-10th and June 1-12th. This will not be a DXpedition, and Masa will be active only during his spare time. He will be active from a lighthouse on Meshima. Suggested frequencies are: 7 MHz, 14260 +/-10kHz or 21260 +/-10kHz. QSL only via the Bureau.

AS-056. Joe, JA4PXE/6, will be active from Danjo Island starting around 2200z on May 4th, ending May 6th at 2200z. He will be operating on 14260 and 21260 kHz +/- QRM, and 50.145 MHz. QSL via JA4PXE.

AS-079. Look for JH0BLI to be active from Miyako Island, May 3-5th. He will use JH0BLI/6 and will be active on 40-10 meters CW/SSB. QSL via JH0BLI.

EU-174. There is a correction to last week's bulletin. Look for operators Eddy/ON6HE, Dirk/ON5CT and Frank/ON4AAC (not ON4AAX as mentioned in OPDX.504) to be active from Thasos Island between May 27th and June 3rd.

LYNX DX CONVENTION. The LYNX DX Group is proud to be hosting its annual Convention in Alicante, Spain, on April 28-29th, 2001, at the Hotel Melia Alicante. DX forum guests will be: N4XP (K5K), F2VX (A52FH), EA4DX (T24DX + 8Q7XX) and CT1EEB (4W6EB). For more info about the Convention, check the Web page: http://www.lynxdxg.com/conv2001/index.htm

NORTHWEST DX CONVENTION 2001. The Western Washington DX Club (WWDXC) is proud to be hosting the Northwest DX Convention in Seattle on July 20-22th, 2001. The special event will be held at the Everett Holiday Inn (Web page http://www.rogueweb.com/holidayeverett/). DX Forum guests will be Bill Fisher/W4AN, Carl Luetzelschwab/K9LA, Bill Moore/NC1L, Al Rovner/K7AR, Garry Shapiro/NI6T, Dennis R. Motschenbacher/K7BV and others. For additional information and details, check the Web page at:
http://www.wwdxc.org/convention
Or send questions to WWDXC, P.O. Box 395, Mercer Island, WA 98040 or E-mail to: convention@wwdxc.org
OPDX InterNet Subscribers will receive the complete WWDXC press release as an addtional bulletin.

QSL INFO AND NEWS.....
Frank, 9Y4VU, informs OPDX that all QSL requests, including the cards by QSL Managers W3EVW and NY3Y up to September 2000, and all direct requests received up to March 23rd (2001) have been answered and mailed by March 23rd. He apologies for the delays.

Doug, N6RT, reports that the A52CO log is now available online at:
http://dx.qsl.net/logs

Take, JI3DST, was expected to be active from "O Island" (Ooshima-mura Munakata-gun Fukuoka-ken) during the past weekend as JI3DST/6. QSL via the bureau.

*TX5CW QSL UPDATE. It is recommend that QSLs for TX5CW be sent to Jacky's ZL3CW address instead of his F2CW address as reported last week. QSL to: Jacques Calvo, P.O. Box 593, Pukekohe, Auckland 1800, New Zealand.

Dr. Jeffrey Parker, KA1GJ, informs OPDX that all QSLs received to date have been answered for his V73GJ operation during January 2001. Confirmation of contacts with V73GJ are via KA1GJ.

Zik a member of "Radio Sekcija Kozara" (YU1AAV), informs OPDX that QSLs for YZ1V should go via YU1AAV. QSL via the bureau or direct to: Radio Sekcija Kozara, Jurija Gagarina 210, YU-11070 Novi Beograd, Serbia, Yugoslavia.

ZX0F, active from Fernando De Noronha Island as a Multi-Single entry during the CQ WPX Contest, gets QSLed via W3HC.

ZX5J, active from Boa Vista as a Multi-Multi entry during the CQ WPX Contest, gets QSLed via VE3HO.

SPECIAL EVENT (IOTA Operation). Look for special event station OZ5HCA to be active from April 2-8th. The special callsign OZ5HCA will be used to commemorate the birthday of the fairy tale writer "Hans Christian Andersen" (suffix HCA). The QTH of OZ5HCA will be located in Odense on the "Island of Fyn" (IOTA EU-172 and for the Danish Island Award FY-001).

THE SURPRISE OF WEEK. Mike, GM0HCQ, showed up as VP8SGK on South Georgia. He was active on Friday and Saturday, but it is reported that he will only be there for a few more days. However, he is there to work, and his

operating is unpredictable or may have ended. Keep watching 14052 kHz.
According to his Web page at http://www.qsl.net/gm0hcq/
Mike is a crew member of the "Ernest Shackleton", a British Antarctic relief ship. There is a possibility he may also go to South Orkney Island. QSL via: Mike Gloisten, Rose Cottage Kinlochleven, Argyll, PA707RE, Scotland, U.K.

VK9, COCOS KEELING/CHRISTMAS ISLAND. Jurek, SP9EVP, currently active as VK9KCP from Cocos Keeling as this bulletin is being written, is expected to be on Christmas Island soon (if not already there). He seems to like 12 meters a lot but has been on 40/30/20/17/15/10 meters. Activity should end April 6th. QSL via home callsign.

VO2, LABRADOR, CANADA (DXPEDITION Update). Fred, K2FRD, reports to OPDX: "Many thanks for adding my Labrador DXpedition to the OPDX List. I feel a little insignificant being listed next to the likes of 3G, 5R, and 9G, but from the hits I've received on my Web site and the E-mail messages I've received, I'm going to be very busy up there!" (ed. Hey Fred, "DX IS") Fred also mentioned that, based upon all this feedback, he has updated the Web site with additional bands, frequencies, and schedules. All info may be found in: http://sites.netscape.net/thefred3/labr1

WAIS WEB SITE. Alfred, IK7JWX, informs OPDX that you can find the rules on the "Worked All Italian Squares Award" (W.A.I.S.) on the Web site: http://www.qsl.net/ik2uvr/

SOUTH COOK ISLANDS. Victor, ZK1CG, has been active on 20 meters SSB recently. Check above 14200 kHz after 0630z and again around 1500z. Also active is Jim, ZK1JD, on 20/10 meters SSB. Check 20 meters after 0400z and 10 meters (above 28470 kHz) after 2330z. It was mentioned this week by Victor that Jim, ZK1JD, would like QSLs sent direct to: Jim Ditchburn, PO Box 491, Rarotonga Cook Islands, via New Zealand. The Cook Islands do not have a QSL bureau, so all cards for ZK1 must go direct or to any managers indicated by operator. Any cards sent via the QSL bureau get dumped in the trash can. Victor states, "If you are QSLing direct, please include a self addressed envelope and 2 IRCs or a green stamps to help cover the cost of the postage and QSL cards." Jim/ZK1JD, Victor/ZK1CG, and Tuatai/ZK1CY (Also ZK1MA when he is in North Cook) are the only local hams on Rarotonga, South Cook Island that are operating. QSL ZK1CG to: Victor Rivera, P.O. Box 618, Rarotonga Cook Islands, via New Zealand.

ZY0, ST. PETER AND ST. PAUL ROCKS. Joaquim, PS7JN, showed up as ZY0SAT on March 1st, on 14267 kHz and was active between 2300 and 0200z. He will be here through April 15th. Remember his is activity will be limited to his free time (his afternoons and evenings). QSL via PS7JN.

2001 Northwest DX Convention - DXing in the 21st Century!

The Western Washington DX Club is proud to be hosting the Northwest DX
Convention in Seattle in 2001.

Dates: July 20-22, 2001

Location: Everett Holiday Inn (www.rogueweb.com/holidayeverett/).

Activities:

Friday and Saturday - Hospitality Suite hosted by the Western Washington DX
Club

Saturday -

Programs from 9AM through 4PM -

Internet Portals for Ham Radio - Bill Fisher, W4AN (eham.net, contesting.com)
DXing on the Back Porch of Cycle 23 - Carl Luetzelschwab, K9LA
DXCC Manager - Bill Moore, NC1L

YK9A DXpedition - Al Rovner, K7AR and others
Other programs to be announced!
DX videos hourly all day!

Saturday Dinner - Garry Shapiro, NI6T, "Confessions of a Mad Reefer" (a summary of his adventures to several rare reefs and islands)

Sunday -

DX Breakfast - Guest Speaker, Dennis R. Motschenbacher, K7BV - "Tales of East Timor, 4W6/K7BV"

Fantastic raffle prizes!

Prices:

Complete Package (Programs, Saturday Dinner, Sunday Breakfast): $62 (2 Free Raffle Tickets if you register early! $5 late fee if you register after July 10, 2001!)

Programs: $20
Saturday Dinner (London Broil, Salmon, or Vegetarian): $30
Sunday Breakfast: $12

Additional Information will be announced at www.wwdxc.org/convention as our plans continue to progress. Send questions to convention@wwdxc.org or to WWDXC, P.O. Box 395, Mercer Island, WA 98040.

To: "OPDXB" <kb8nw@barf80.nshore.org>
From: I2UIY <i2uiy@cqww.com>
Subject: EU Sprint 2001
Mime-Version: 1.0

EU SPRINT 2001
In 1994 the EU Sprint Gang (I2UIY, OK2FD, DL6RAI, and G4BUO) organized the first European Sprint contests. For 2001 there have been some rule changes, introducing an awards programme and bringing the Spring Sprints forward in the calendar. You can find past scores and other information about the sprints by visiting the official EU Sprint web site at this address: <http://loja.kkn.net/~i2uiy/>.
The BIG news is that now we will award a certificate to the winners in each country but this is not all. Three nice plaques will be awarded for the top three scores from all four contests combined. Therefore, please red circle the four EU Sprint saturdays on your calendar, we will be looking for you starting April 14!

EU SPRINT 2001
The EU Sprint Gang hereby invites you to participate in the four European Sprint Contests held in 2001.

ENTRANTS: any licensed station may enter the Sprint. European stations can work everybody; stations outside of Europe can work only European stations.
CATEGORIES: Single Operator ONLY. Only ONE signal may be aired at one time.
DATES:
EU SPRINT Spring:
* SSB: second Saturday in April - 14 April 2001 - managed by G4BUO
* CW: third Saturday in April - 21 April 2001 - managed by B.C.C.
EU SPRINT Autumn:
* SSB: first Saturday in October - 6 October 2001 - managed by I2UIY
* CW: second Saturday in October - 13 October 2001 - managed by OK2FD
TIME: from 15:00 UTC until 18:59 UTC.
BANDS: 20, 40 and 80 metres only.
Pilot frequencies are: SSB: 14.250, 7.050, 3.730. CW: 14.040, 7.025, 3.550
EXCHANGE: all of the following data MUST BE PART OF THE EXCHANGE:
a) your callsign,
b) the other station's callsign,
c) your serial number starting from 001 (RST not required),
d) your name or nickname.
Please note that BOTH stations MUST repeat BOTH callsigns DURING the exchange.
A valid exchange is: "OK2FD de I2UIY 118 Paolo" while "OK2FD 118 Paolo" is NOT a valid exchange.
SPECIAL QSY RULE: if any station initiates a call (by sending CQ, QRZ?, etc.), he is permitted to work ONLY one station on the same frequency. He must thereafter move AT LEAST 2 (two) kHz before he may call another station or before he may solicit again (CQ, QRZ?, etc.) other calls.
VALID CONTACTS: valid contacts are QSOs correctly logged and confirmed. Each operator may use ONE and ONLY one name during the Sprint. If the exchange is copied incorrectly, that operator will receive zero (0) points. In case of miscopied callsigns, both stations will receive zero (0) points for that QSO.
SCORING: each valid QSO counts one 1 (one) point. The final score is the total number of QSOs.
AWARDS: Colorful certificates will be issued to the winners of each Sprint, and to the leaders in each country. A special plaque will also be awarded for the top three scores from all four contests combined. To be eligible for this award an operator must enter at least three of the Sprints in the year. Results will be forwarded as soon as possible to Leagues, magazines and bulletins.
LOGS: a single chronological log is required. Please send us your log via email or on a floppy disk, if you use computer for logging. Use any of the available software or send a plain ASCII file. A separate summary sheet is also required. Please send us the right files: for DL2NBU software, send yourcall.ASC; for N6TR software, send yourcall.DAT; for IK4EWK software, send yourcall.DBF.
If you want the latest release of the DL2NBU software, you can download it from the EU Sprint web site:
<http://loja.kkn.net/~i2uiy/free_sw/eu_sprint.zip>.
Log files must be sent NO LATER than 15 days after the contest to:
<eusprint@dl6rai.muc.de>. The receipt of your electronic log will be confirmed.

If you do not receive a confirmation within two days, try again or use the postal
system.
Disk logs, or paper entries must be posted NO LATER than 15 days after the contest to the appropriate address:
* Spring SSB Sprint: Dave Lawley, G4BUO, Carramore, Coldharbour Road, Penshurst, Kent, TN11 8EX, England, UK.
* Spring CW Sprint: Bernhard Buettner, DL6RAI, Schmidweg 17, 85609 Dornach, Germany.
* Autumn SSB Sprint: Paolo Cortese, I2UIY, P. O. Box 14, 27043 Broni (PV), Italy.
* Autumn CW Sprint: Karel Karmasin, OK2FD, Gen. Svobody 636, 674 01 Trebic, Czech Republic.

Thanks in advance for your participation de: G4BUO, I2UIY, OK2FD, and the B.C.C. Sprint Committee.

>receive CW?

On the receive side, it would become obvious pretty quickly. Machines have
a hard time copying CW, and find it nearly impossible in QRM. It might not
be obvious that the guy's a bootlegger, but it would be obvious that he
wasn't copying code by ear.

(awhile back, a Chilean military officer/ham was stationed on a Chilean
island that counts as a rare country separate from Chile. The operator knew
little or no Morse - he did all of his operating on RTTY. Apparently after
being asked for CW QSOs enough times, he decided to fire up his multimode
TNC on CW. The effort was very much appreciated, but it was very obvious
something different was going on...)

I listened a couple of times the past days; no copy at all!
Conditions to my QTH have been bad to non-existent this week...

I have a TS-850SAT and an inverted V dipole...
Hope to copy it one of these day's, will let you know!
73 es gud DX (or at least better than mine)

Following some previous threads, I thought that this information was of value.
Pete

The ARRL Membership Services Committee (N2FF is Chairman) is developing a plan to implement electronic QSL verification for all ARRL Awards including DXCC. Dave Patton, NT1N, QST cover-boy for April 2001 and Assistant to Dave Sumner, is the staff person detailed to implementing the project and is currently working with consultants to specify the software that will need to be written to implement the program. While exact details are still to be worked out there are NO plans to accept laser or ink jet printed QSL cards for ARRL awards. It's too easy to forge them. When implemented ARRL expects to be able to accept logs from expeditions and DX stations and its own members the way it currently accepts contest logs via email. Those wishing credit for awards such as DXCC will eventually be able to check the status of their QSOs and apply for awards on line. The project has been dubbed "Log Book of the World." No firm date has been yet set for implementation as the software still has to be written and tested but it could happen within a year.

Hello One and all,

GB7SDX located in Glasow, Scotland now has an internet connection. If you wish to use the system then please connect to the following Telnet address:

sdx.dyn.dhs.org port7300

The system also rf links for local users. In the future its hoped to put on a converse system as well.

regards John GM0OPS SYSOP GB7SDX

Ohio/Penn DX Bulletin No. 506

The Ohio/Penn DX PacketCluster
DX Bulletin No. 506
BID: $OPDX.506
April 9, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, NC1L, N2IM, N3CR, W3EH, W3UR & The Daily DX, KJ4UY, N4AA & QRZ DX, AI5P, N5FG, KH6BZF, K8YSE, 4Z1GY, CO2TK, CE6TBN, DJ7ZG, DL1EK & DX News Letter, DL2SBY, F5PBL, F6AJA & Les Nouvelles DX, F8BBL, FM5BH, G3SWH, HA0HW, HK3JJH, HK5MQZ, IK7JWX, JA3MZB, JA0DMV, JI3ACL, PA1AW, RW3GU, SM0AGD, UR5EAW, UT7ND, VA3RJ, VK4AAR, Z32AM, ZK1CG and ZL3CW for the following DX information.

SPECIAL NOTE FROM EDITOR: Last week was a rough week for your editor. After about 7 days of no connection to the outside world, BARF-80 BBS was finally back on-line connected to the InterNet on Thursday, April 12th. How bad was the connection missed? After several hours of down-loading, BARF-80's backlog of messages was just over 1400 messages (and this does not include all the amateur radio UseNet New Groups). We were very lucky (and thankful) that "APK.NET" held all messages (few were lost) until the new DSL service was reconnect with BARF-80's ISP "NSHORE.ORG". The DSL service that pulled the plug because of bankruptcy effected over 1000 ISP and 81,000 users in northern Ohio. We are glad it is back!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1/April, through Sunday, 8/April, there were 233 countries active. Countries available: 1A, 3A, 3B8, 3D2, 3D2/r, 3V, 3W, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E3, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/a, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH3, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0S, PZ, R1MV, S2, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T30,

T31, T7, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK,

YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS
There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2
There were 54 ITU Zones available during the past week.
ITU Zones that were not active are:
3,4,15,21,22,23,24,25,26,31,34,35,43,58,59,69,70,71,72,74,75,90

PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As
always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its
size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3A, MONACO (SLIM ALERT). A station signing as 3A2DX was heard active on
April 4th, on 28495 kHz at 1400z and then QSYed to 15 meters CW. This
station is a "Pirate/Slim". DO NOT QSL. Save your money. Buckmaster also
has this station listed as a Pirate.

3W2KF IS NOW QRT. Claude, F5PBL, is now back in France as of April 2nd.
He sent OPDX the following and requested that we publish it:
"Tnx to everybody for the calls. Despite a high level QRN on my side, I
hope I have answered to most of your calls (except USA ... sorry guys,
the QRN was S9 towards the States ! Did my best but ...). That was my
very first DX trip so sorry for my lack of experience in pile-ups
managering! QSLing is OK via bureau or direct (Claude TERRIER,
18 allee du Mail, F-92360 Meudon-la-Foret, France). Note that the address
in Villeparisis (Zip 77270) is OK also but not the quickest one and
please avoid Aulnay (Zip 93600) because the Postal services will soon
stop the forwarding to me. QSL cards should be printed and delivered
within 6 weeks now. I will then start the answering process, starting with
direct requests, of course. I will NOT answer to eQSLs, sorry." For more
updated information and the log (which will be available soon), check
out the Web site at: http://www.qsl.net/f5pbl

4X, ISRAEL. Look for Yoram, 4Z1GY, to sign with the special callsign
4X2K during the Holyland Contest, April 21-22nd. Activity will be on SSB
and CW on 80/40/20/15/10 meters.

8Q, MALDIVES. Phil, G3SWH, and his XYL Jan, will be in the Maldives between
June 4-11th. Phil has been allocated the callsign 8Q7WH. This will be the
usual holiday type of operation, and he will have his IC-706 and R-7000
with him. Phil will be active on all bands 40-10 meters, CW only, as time
allows. QSL to his CBA with SAE and return postage or via the RSGB bureau.

8Q, MALDIVES. Peter, HA2SX, will be on tour again to the Indian Ocean. He
has received his old callsign which he used last year. Look for him to
sign 8Q7KK again from April 14th through May 4th. He will be using his
FT-1000MP Mark V w/200 watts. His antennas are a DX-88 + 160 m kit and
a windom antenna (by DK9FN) for 80-10 meters. His main operation modes
will be CW/RTTY/PSK31 and some times (only during his local daily time)

he will be on SSB and for special requests, on SSTV. Request for SSTV skeds should be sent by E-mail until April 12th. Peter's E-mail address is: kalocsa@infornax.hu QSL requests should be sent only to the following address: Peter Kalocsa, MARKO, Bakonyi ut 20, H-8441, HUNGARY. Peter will try to be active in the following contests: JA-DX, TARA PSK31, ES-OPEN-HF, YU-DX, and SP-DX RTTY.

9Y, TRINIDAD & TOBAGO. Charlie, N2IM, will be operating from Trinidad, as 9Y4/N2IM, April 26th through May 4th. He is expected to be on 20, 15, 10, and 6 meters, and possibly other bands. He will be using dipoles and 100 watts. Look for him on the air in the early morning and late evening. QSL direct to N2IM.

CO/CM, CUBA. Eric, F5SSM, will be in Cuba from April 23-30th. He will try to operate if he can get a licence.

DXCC NEWS. Bill Moore, NC1L, DXCC Manager, informs OPDX that documentation has been received for the operations listed below; cards will now be accepted for DXCC credit: 3XY2D Guinea and 3W2LWS Vietnam

EK, ARMENIA. Daniel, F5LGQ, will be here from April 9-21st, signing EK8ZZ. Look for him to be active during his evening around 1600-1700z.

FJ, SAINT MARTIN. Philippe, F6BXE (ex-TR8DX and FG5HE), has been active as FJ5DX since March. At the moment, he has been heard on 12 and 20 meters. He was heard this past week on 14176 kHz around 0300z.

FO & FO0/A, FRENCH POLYNESIA AND AUSTRAL ISLANDS. Marcel, ON4QM/FO0DEH, will once again be active from this area, possibly the same dates as last year (Sept. 25th through Nov. 25th). He will be active from Pukapuka (OC-062) in the Tuamotu Island group, then from Rapa (OC-051) in the Australes and may be again from Reao (OC-238) in the Tuamotu.

FO0/A, AUSTRAL ISLANDS. Alain, F2HE/FO0CLA, is now active from Tubuai Island (OC-152) in the Australes. He will be there until April 27th. He will then move to Rurutu (OC-050) "maybe" without a radio. QSL via F6CTL.

FS & PJ, ST. MARTIN AND ST. MAARTEN. George, W3EH (ex K2KTT), will be at his St. Maarten home from April 11-17th. He will be on the air as PJ/W3EH and FS/W3EH, mostly on 10 meters phone (28.450 to 28.500) with appearances on other bands and CW depending on propagation.

HK0, MALPELO ISLAND (Update). By the time you read this Pedro, HK3JJH, should be on his way or may even be active from Malpelo. He is expect to be active from HK0 at the beginning of the week and stay active until around May 7th. QSL via N4AA. He was heard this past week and weekend active from a Lighthouse on Isla La Palma (IOTA SA-017) as HK3JJH/5.

HK0, MALPELO ISLAND (2nd Operation Update). Jairo/HK5MQZ and Hiro/HK5QGX have announced that the DXpedition originally planned between April 8-21st has been cancelled. The reason for this cancellation: The second voyage of the only ship that sails to Malpelo was cancelled; the scuba group that had originally contracted the ship cancelled out. Jairo informs OPDX that

the first sailing from April 6th and 13th has no problems and would have taken place. They had planned to sail on April 6th on the first trip and return to Buenaventura on the second sailing. But their second trip was cancelled and they did not have any possibilities for the return trip. Therefore they cordially present their apologies to all colleagues who were interested in this operation.

HONOR GIVEN. The Magnolia DX Association (http://www.mdxa.org) has sent an appreciation plaque to Chuck Brady, N4BQW, for his one man operation as 3Y0C. They wanted Chuck to know how much the DX community appreciated his one man operation from Bouvet Island. Chuck endured many hardships and much improvising to allow many thousands of DXers world-wide to make a contact with the VERY rare DXCC entity.

IOTA NEWS.....
EU-051. Look for IE9/IZ8AJQ and IE9/IZ8DBJ to be active April 26-29th from Ustica Island. Activity will be on 10/12/15/17/20/30/40/80 meters, using CW, SSB, RTTY. If if is possible, they will also try to work PSK31. QSL via homecalls direct or bureau:
IZ8AJQ - Erminio Cioffi (di Michele), Piazza Umberto 1 n.16, 84036 Sala Consilina (SA), ITALY
IZ8DBJ - Mario Pesce, Via Privata Falcin.2, 80070 BACOLI (NA), ITALY.

EU-096. Pekka, OH1lU, will be active from Kustavi Island April 13-15th. Their is no QSL information at this time.

EU-098. Wolfgang, DH3ZK, will be active from Poel Island April 13-16th. This island will stop counting for IOTA on February 01, 2005. He will be on 15, 20, and 40 meters using SSB and RTTY. QSL via home callsign.

EU-146. Eric, F5SSM, will be signing PA/F5SSM, April 14-16th, from Shouwen Duviland.

OC-154. Dan, VK8AN, has decided to take his equipment back to Troughton Island for his next few tours. His activity is expected to take place April 10-24th, May 8-22nd and June 5-19th. If there are any alterations to those dates we will be advised. Dan has some changes planned for this time. Besides his 3 element tribander and IC-738, he will have a linear amp (FL2100) to help a bit. Later he might try a vertical on either 12m or 17m and a long wire for 40/80/160 meters. QSL to VK4AAR (as before) DIRECT ONLY to: POB 421, Gatton 4343, Australia. A Reminder: Do NOT send SASE with Aussie stamps unless you have access to the right series (this is IMPORTANT). It is better to send USD (or IRC if you must).

SA-069. Pat, CA1URH, will be active from Santa Maria Island near to Antofagasta in the north of Chile. His callsign will be 3G1M from April 13-15th. Activity will be 40/20/15/10 meters. QSL via CE1VLY: Pat Valero Dazarola, P.O. Box 103, Santiago - 21

Chile.

J2, DJIBOUTI (IOTA Op). Jean Louis, J28NH, and others will be active as J28CDX from Dijboutian Island of 7 Freres (Sept Freres Brother) IOTA AF-059. They will be there from April 12-16th.

KH2, GUAM. Shige, JI3CEY, will be active as KH2/JI3CEY on HF and 6 meters from Guam between April 21-23rd. This is a short DX holiday from KH2JU's rental shack. QSL via homecall bureau or direct: Shigeru Yokoi, 2-138-1-704 Hamaderasuwanomorichonishi, Sakai-City Osaka 592-8347 Japan.

KH0, SAIPAN. Look for Akira, JA3AOP, to be active April 13-17th. Activity will be on all bands and 6 meters. There was no callsign mentioned. QSL via JA3AOP.

QSL INFO AND NEWS.....
TX5CW QSL CORRECTION. It is recommend that QSLs for TX5CW be sent to Jacky's ZL3CW address instead of his F2CW address as reported last week. QSL to: Jacques Calvo, P.O. Box 593, Pukekohe, Auckland 1800, New Zealand (NOT to Chatham Island, New Zealand).

Erik, SM0AGD, informs OPDX that all direct QSL requests received up to April 1st, for his January/February 3C1AG operation, have now been answered and were expected to be in mailed sometime last week.

The 5A24PA special event station by Abubaker is history now. Currently, Abubaker is working to get the logs sorted and sent to Alex, PA1AW. Alex reports that after he receives the logs, it will be about 2-3 weeks to get the cards, and another 2-3 weeks to get the cards out in the mail. PLEASE NOTE: Alex is NOT the QSL Manager for 5A1A. QSLs for 5A24PA go to: Alex van Hengel, Schoener 85, 2991JK Barendrecht, The Netherlands.

9M2TO QSLS (New address). Tex, JA0DMV/9M2TO, informs OPDX that all QSLs received before March 31st (2001) have been sent out to the JARL Bureau. PLEASE NOTE: The JA0DMV address has been changed. The new address is as follows: Tex Izumo, 827 Nakanojyou Ueda, Nagano 386-0034, Japan.

A61AJ QSL Situation. Bernie, W3UR, Editor of "The Daily DX", reports that all direct U.S. requests received prior to March 23, 2001, for QSOs prior to January 1, 2001, have been answered and are now in the mail. He is now (1/5 through) working on all direct DX QSOs received prior to March 23, 2001, for QSOs prior to January 1, 2001. Bernie hopes to have this completed by the end of this month. Next will be all direct requests received after March 24, 2001. He also states that 95% of all QSOs are now on-line at: http://www.dailydx.com/a61aj_search.html
If your QSO is not in the on-line log, more than likely it is in one of the hand logs. Please do not panic.

Kasimir, DL2SBY, reports that he has been active as LX/DL2SBY, IS0/DL2SBY, TK/DL2SBY and HB0/DL2SBY. However, many stations continue to QSL via the wrong address. His correct address is: Kasimir Bastian, Gruenaeckerstr.39, 71069 Sindelfingen, Germany.

Gene, UT7ND/ER0ND, QSL Manager for ER4DX, ER0N, ER/UT7ND and ER0ND, informs OPDX that many envelopes have been ripped open by what he calls " mail rats " and return postage in the SAE has been taken. He states that he can not send these QSL cards back direct, so cards will be sent back via the bureau. Gene recommends that when sending QSLs to him, use envelopes that are dense and sealed with tape. Also, it is better/safer to use IRCs.

NEW address for Fred, IK7JWX, (also IQ7J and IQ7J/7): Alfredo De Nisi, Vico della Cavallerizza, 4/d, 73100 - Lecce - Italy

Recently, AH7X was on Guam for the CQ WPX Contest. His QSL routes as AH7X go via JP1NWZ. Also, AH7X/PORTABLE is via JP1NWZ.

TO5T logs for the last CQ WPX Contest are now online at the following Web page: http://www.madinina.fr.fm
QSL TO5T direct via FM5BH not W3HNK.

VK0MM QSLS. Alan, VK4AAR, reports that he is pleased to announce that the backlog of QSLs for VK0MM have been cleared. He adds that each day's mail is now being processed the same day and mailed back the next day (24 hour turn around now!) Alan, states, "Just want to say 'thanks a million' to those amateurs that heeded our request for generosity with funds which we donate to Camp Quality (a children's cancer support charity). So far we have donated close to $20,000.00 and more will be welcome. US$$ are easily donated but IRCs will help a bit if you can't get greenstamps. Don't get the wrong impression... donations don't "buy" a card... you MUST be in the log also, of course. Please visit the Macquarie Island web site (it is regularly up dated)....."
http://www.geocities.com/vk0ld/1.html
QSL DIRECT ONLY to VK4AAR. Important reminder.... Do NOT (repeat "NOT") waste your time (and Alan's) asking for a QSL card for VK0LD. Cards are NOT available. Details on the above web site.

QSL Z39A to: Radio Amateur Society Of Macedonia, P.O. Box 14, Skopje 1000, Republic of Macedonia.

SPECIAL EVENT. Look for special event station 8J3EAG to be activated on 80/40/20/15/10 meters and VHF bands by several operators. Activity will take place from April 28th through May 27th during the East Asian Games from Osaka city (East Asian Games's Web site: http://www.eagocweb.com/) This station will also help in trying to promote publicity of Osaka to be a candidate for the next Olympic Games in 2008. Information about this station and an online log search can be found on the following Web site:
http://www.qsobank.net/cgi-bin/logserch.pl
QSL via JARL Bureau or direct to the JA3DBD: Souichi Miyamoto, 6-9-2 Habikigaoka, Habikino Osaka, 583-0864 Japan.

SPECIAL EVENT. Pepin, CO2TK, informs OPDX readers to look for station T40VPG to be active durings the 40th aniversary commemoration of the "Victoria Playa Giron", from April 14-15th. Activity will be on 160/80/40/20/17/15/12/10/6 meters on SSB and 2m FM, reference number EL-92. QSL via CO/CM Bureau.

SPECIAL EVENT. The special callsign TM6JUN will be on the air from "Utah Beach" from June 1-10th. Suggested frequencies are:
CW - 3526, 7026, 14026, 21026, 28026 and 50206
SSB - 3644, 7074, 14174, 21174, 28574 and 50200 kHz.
QSL via F8LDX (preferably via the bureau).

SU, EGYPT. Members of the Russian Robinson, and Russian Contest Clubs (RW3GW and RN3OA) will operate as SU1HR as Multi-Single in the CQ WPX Contest and a few days before and after the contest. A special award is available for two QSOs on different bands. The QSL and Award Manager is: Valery Sushkov, RW3GW, P.O.Box 3, 398000, Lipetsk, Russia. The log will be available at the RRC Web site at: http://rrc.sc.ru/

SV9, CRETE. Laurent, F8BBL, will be on the Island of Crete (EU-015), near Heraklion, as SV9/F8BBL, from June 25th through July 2nd. Activity will be on 160-6 meters CW/SSB using an IC-706MKII w/100w and long wire (L:80m) into an ICOM AH4. QSL card via home callsign (CBA 2001).

TM, FRANCE. Patrick, F6OIE, will use the TM0A callsign from May 13-25th. He will be active on all bands SSB/CW and is expected to participate in the CQ WPX CW Contest.

TX0C, CHESTERFIELD ISLAND (Update). Jacky, F2CW/ZL3CW, reports to OPDX that they found a 48 foot yacht last month capable of carrying up to 6 passengers. Originally, they wanted to travel with 4 operators and 2 divers in order to help share the cost. Unfortunatly, they could not find 2 divers. So, instead of leaving with 2 empty spaces (which still has to be paid as the charter and is a fixed price regardless the number of passengers) they decided to invite 2 more operators. The operators now are: F2CW, F5CW (FK8VHY), FK8FS, FK8FU, ZL1GO (JA4EKO) and FO3BM. They will be leaving Noumea, April 24th for a 3 day journey. In route they will be using the callsign TX4A/MM (for prefix hunters!). Their estimated time of arrival (ETA) is Friday, April 27th. They plan to depart the island on Thursday, May 3rd. They will again use the callsign TX4A/MM on their way back to Noumea (3 to 4 day journey). QSL for TX0C and TX4A/MM are via ZL3CW.

UZ5, UKRAINE (6 meters). Look for grid square LN08 and LN09 to be active from June 2-11th, by UX2MM, UX2MF, UX5MZ, UR5LCV, UX7MX, UX7MA, UR3MP, UR5MID and UR5EAW. The group of Ukrainians will be active as UZ5M in the IARU1 50 MHz June Contest and the UKSMC. QSL via UX2MM (Box 59, Lisichansk, 93100).

V4, ST. KITTS AND NEVIS. Larry, KJ4UY, will be operating again as V47UY in May from the 10th through the 16th. He will be staying at Karl's, V44NK, shack on Nevis. Larry is sending a KT34A and 2 element Hygain 40m beam as soon as he can find out how to do it. QSL to homecall, KJ4UY.

V5, NAMIBIA. Nick, ZS4NS, is expected to be active as V51/ZS4NS from April 10-20th. His activity will be mainly on 6 meters (listening on 50.110 MHz). He will, however, be active 20/15/10 meters also. QSL via N7RO.

VP9, BERMUDA. Rich, AI5P, will be operating as VP9/AI5P from April 29th through May 9th, from Hamilton Parish, Bermuda. This is primarily a holiday

trip with operating as a possibility. The emphasis will be on CW and on the WARC bands. QSL via AI5P.

ZB2, GILBRALTAR. Babs/DL7AFS and Lot/DJ7ZG will be active again, this time as ZB2/DL7AFS and ZB2/DJ7ZG from April 23-30th. Activity will be on 80-10 meters RTTY/PSK/SSB. Look for more info (and their logs) on the Web page: http://www.qsl.net/DL7AFS
Lot reports that they are still looking for a light weight power-amp (p.e.500-700 Watts) for their DXpeditions (Weight of 8-12 kg, incl.PS 120/220V is welcome). If you can help or have some helpful ideas, contact Lot at: DJ7ZG@t-online.de

ZD7, ST. HELENA. The ZD7K team is now active. Activity is expected to last until April 12th. QSL via GW0ANA.

ZK1, SOUTH COOK ISLANDS (Update/Help Need). OPDX received another message from Victor, ZK1CG, and he states the following (edited): "Jim/ZK1JD and myself are both running barefoot rigs. Jim has a dipole up about 30 to 40 feet for 20 meters, I know this because I threw the rock over the tree Hi Hi. He also has a vertical and a 5 element monobander on 10 meters up 20 to 30 feet pointed at a very high tree. I Have a G5RV up 35 feet and a Vertical and a Icom 751A (Thanks to W7VV Roger and Sue). I do have a KT34A that's on the ground that I'm trying to get parts for. It is over ten years old and has not seen much action on the Ham bands. I would love to get it up and running before we go to North Cook in October for CQWW SSB Contest with the group from Seattle and Canada for one week. If anyone has a old KT34A with usable parts on it that they would like to see and hear operating from both North and South Cook please contact me. I know not many old and used KT34As are around but you never know your luck...
I am running on a single battery at the moment so if anyone hears me FMing, let me know so I can save the rig. Yes, I know you may need the contact, but I like to skip around to the new bands when possible to give the hams a new one on 17 and 12 meters....... Regards, Victor, ZK1CG". QSL ZK1CG to: Victor Rivera, PO Box 618, Rarotonga Cook Islands.

Norbert Graf, DD3KF

Hello,

the 8th April 2001 update of the ON6DP QSL-Manager Database is ready for download:

http://www.dd3kf.de

You can also subscribe for a newsletter with Update information.

Because of serious technical problems by the webhoster the server was down from 27th March to 30th March 2001. According to the webhoster and my own observations the server is now stable again.

Please let me know further problems. If needed I try to offer you an alternativ download address!

vy 73 and best DX!

Any close hit will come back thru the ground wire. It is not a one way
wire.

Hi...

First release of KLog is now on the web, ready for download..
Software is in early beta stage, so don't be surprised with some bugs
It's 32 bit Windows application, and it's free for amateur radio usage.
If you are interested, go to: http://www.kreso.com/klog
and download it..

Any suggestions, comments, ideas are appreciated..

Thanks.

73,
Chris - 9A5K,K5CRO

1045. Signal Reports on a New Ten Meter Beacon

Newsgroup: rec.radio.amateur.dx
Date: 2001-04-11 20:55:00 UTC
From: Donn Sinclair <WY5I@worldnet.att.net>
Message-ID: <Ew3B6.18160$RF1.1397995@bgtnsc06-news.ops.worldnet.att.net>

I got a couple of reports on my new Ten Meter Beacon when it was put on
the air about a week ago. TNX for that. I would very much appreciate
additional
reports to get an idea of it's coverage given some fairly good conditions
recently. It runs 5 watts with a 7 db gain colinear vertical. It is on
28.2578 Mz.

Perhaps they should all be made to cross their hearts and promise to be good and then get released. Face it, they are there for a reason, and it is not because they are particularly fine citizens I would guess. If you watch the video, you will see that the rooms are cleared frequently (like every hour or so) and thoroughly cleaned. Not having a chair or bed is not inhumane in my opinion. Neither I or anyone I have ever known has been put in one of those cells. Surely it is not just pure chance or bad luck that those who have, have been. I bet there is a good reason. The court system is there to figure out when, or if, someone has gotten themselves there in error. It works pretty well.

Hi Frank -- CBA is Callbook Address
Some others found on the DX packet Cluster
CBA ï¿½ Call Book Address
QSX xxxx - The split frequency where the DX is listening
EU Only ï¿½ DX is listening for Europe only
NA (SA) Only - DX is listening for North America (South America) Only
NIL ï¿½ No Signal Heard
UP ï¿½ Split Operation - DX is listening UP (usually 5 to 10 kHz SSB, 2 to
5 kHz CW)
MNG (MGR) ï¿½ QSL Manager of the DX Station
VIA - QSL Manager of the DX Station
DIRECT ï¿½ DX is listening and transmitting on the same frequency
SIMPLEX - DX is listening and transmitting on the same frequency
CLG (CQ) ï¿½ DX is calling CQ HR = here
WKD (WRKD) ï¿½ Worked (A Brag Spot)
(NA) (SA) (AS) (OC) (EU) (AF) (AN) continents - North America, South
America, Asia, Oceania, Europe, Africa, Antarctica
AF-032 - IOTA Number for continents e.g., AF-032 is the Islands On The
Air Number for Zanzibar Island off the African Coast
A "busted" spot is one in which the callsign sent to the cluster is
wrong - not the callsign the DX station is actually using. Was a typo
or the spotter miscopied it.
WARC ï¿½ The WARC Bands are 30 meters, 17 meters, and 12 meters

That's right. If you really want to work a lot of Au propagation, CW is the way to go. On SSB Au sounds like darth vader talking in slow motion. There is no tone on cw but it's easy to copy. Normal signal reports on cw are something like 551, 591, etc.
I've never worked Au on 50Mhz. I'm always too busy working it on 144Mhz.

> meters and above bands. I have some questions to ask regarding the 2 meters and
> above band. By using handhelds or mobile, can I communicate with HAMS all over
> the world by using satellites or is it meant only for communicating with local
> HAMS by using repeaters ?

All over the world.

If I can communicate with HAMS all over the world do I
> need any special equipment other than my handheld or mobile ?

You may, at a later date, want to invest in some good beam antennae for
use with satellites. Also, if you have a computer near your station,
some software that tracks them so you'll know when they are "in range"

Or do I have to
> pay any special fees for using the satellites ?

no, but there is an association that promotes sat use AMSAT (Amateur
Satellites) http://www.amsat.org, and you might want to consider joining
if you so desire, but it is not mandatory.

Are there any good articles on
> these. The reason I ask all these is because I would like to communicate with
> HAMS all over the world using the VHF-UHF spectrum. Thank You all for
the info.

Check the AMSAT website and they'll have a lot of answers

1072. Radio Reporting System

Newsgroup: rec.radio.amateur.dx
Date: 2001-04-13 23:25:31 UTC
From: AC6V <ac6v@ix.netcom.com>
Message-ID: <3AD78AEA.B721248C@ix.netcom.com>
Source record: 17326

Whodu26733@aol.com wrote:

Hi my name is Al, I am trying to find out what 5x5 means, I cant seem
to find
it can you help please. thank you
==========
Hi Al -- sounds like a signal reporting system. There are five commonly
used ones.
The Q Signals, SI System, the RST System, the SINPO System, and 10
codes.
==========
Q-signals were used by the military, is used by Hams, and some others.
In Q signal form:
QSA -- What is the strength of my signals (or those of ...)?
The strength of your signals (or those of ...) is ... (1 to 5).

QRK -- What is the readability of my signals (or those of ...)?
The readability of your signals (or those of ...) is ... (1 to 5).

==========
For the SI system -- previously military, police, fire, Shortwave
Listeners, etc.

[S]ignal/[O]verall 5-Excellent 4-Good 3-Fair 2-Poor 1-Nil

[I]nterference 5-None 4-Slight 3-Moderate 2-Severe
1-Extreme
Thus I read you 5 by 5 is an excellent transmission with no interference
- sometimes as loud and
clear.
Latest Marine Corp training is Lima Charlie (loud and clear), Whiskey
Romeo (weak but
readable)
==========
The RST system is used by Amateur Radio Operators:
The RST System of Signal Reporting has been used for years (circa 1934)
as a shorthand
method of reporting
Readability, Signal Strength and for CW, Tone (i.e., quality of the CW
tone). For voice contacts
only the R and S are
used. The S component is usually not the same as your S-Meter reading as
most S-Meters aren't
calibrated to track the RST System. The RST is also reported on QSL
Cards and must be filled
in correctly -- e.g., a 569 report for a Voice Contact is invalid. Note

that many DX operations
and contest stations merely report 59(9) as a convenience to avoid
having to log each of the real
reports. A questionable practice but a fact of DXing/Contesting.

READABILITY
1 -- Unreadable
2 -- Barely readable, occasional words distinguishable
3 -- Readable with considerable difficulty
4 -- Readable with practically no difficulty
5 -- Perfectly readable

SIGNAL STRENGTH
1 -- Faint signals, barely perceptible
2 -- Very weak signals
3 -- Weak signals
4 -- Fair signals
5 -- Fairly good signals
6 -- Good signals
7 -- Moderately strong signals
8 -- Strong signals
9 -- Extremely strong signals

TONE (For Morse Code)
1 -- Sixty cycle a.c. or less, very rough and broad
2 -- Very rough a.c. , very harsh and broad
3 -- Rough a.c. tone, rectified but not filtered
4 -- Rough note, some trace of filtering
5 -- Filtered rectified a.c.but strongly ripple-modulated
6 -- Filtered tone, definite trace of ripple modulation
7 -- Near pure tone, trace of ripple modulation
8 -- Near perfect tone, slight trace of modulation
9 -- Perfect tone, no trace of ripple or modulation of any kind
Thus 5 by 5 in Ham reporting 5 by 5 is Perfectly Readable and Fairly
good signals
==========
The SINPO Reception Reporting Code

The SINPO code is a quick and simple way to provide the radio station
with
an indication of how well the radio signal was received. This
information is
valuable to the broadcaster and it is important to provide it if you
want to
receive a QSL card from the station. The broadcaster uses this
information
to determine whether changes should be made in the times or frequencies
used
to broadcast to a particular area.

In the SINPO code, "S" stands for signal strength; "I" for interference;
"N"

for noise; "P" for propagation; (in the form of fading -did the signal
increase and decrease in strength and, if so, how severely); "O" stands
for
the overall rating. Another version of the code uses an "F" for fading
instead of a P.

The code is based on the numbers 1 to 5. Five is excellent (or
represents no
interference, noise or fading); 4 is "good" or "slight", 3 is fair or
"moderate" while 2 is poor or "severe" and one is unusable or "extreme."

Thus, a SINPO report of 55555 is perfect, 33333 is average. Not all of
the
numbers will be the same, however. For example, a common SINPO report
might
be 44343 indicating a good signal with only slight interference but
moderate
amounts of noise (static), little fading and an overall rating of
average.

Interference as used with the code refers to man-made interference such
as
that from other radio stations or local electrical appliances. Noise
refers
to natural noises such as static.
==========
10 Codes -- CB, Fire, Police, etc
10-1 Receiving Poorly
10-2 Receiving Well
10-4 Ok, Message Received
10-62 Unable to copy, use phone
10-62sl unable to copy on AM, use Sideband - Lower (not an
official code)
10-62su unable to copy on AM, use Sideband - Upper (not an
official code)

In theory, one IRC should get one unit of airmail postage. In practice, many countries don't work that way, as there are multiple levels of airmail. For example, Switzerland requires 2 IRCs. There are several resources for checking the required number of IRCs to a particular country. One good one is:

http://www.qsl.net/n6dhz/irc-chart.html

There are also several other links on the very helpful www.ac6v.com web page.

Contrary to a lot of misinformation that I've read recently, older foreign denominated IRCs can still be exchanged for $0.80 (the current 1 oz rate) in airmail postage in the USA. I confirmed this with Dennis, NB1B, who is a postmaster. Check the International Mail Manual on www.usps.com for the official language on IRC redemption in the United States. Many local post office employees are totally clueless when it comes to IRC handling.

A very careful reading at a College Station, TX, post office, just
before the things went from $1.05 to out of sight was done here for me.
I was told firmly that there is no language in the manual to indicate
that the date and cost of an IRC has anything to do with the function.

Any IRC I were to turn in here would get me the required unit of postage
for the airmail letter response. Indeed, the new 80 cent rate here in
the USA for most destinations, is a one ounce rate, not the old half
ounce rate. It makes no difference whether I send older IRC's at the
$1.05 rate, or the newer ones at the higher rate. A coupon is a coupon
for the purposes of the coupon, period.

According to the international manual, same thing would hold true
outside the USA. A coupon is a coupon; period.

The local hams discovered the factoid a day or so before rate hike and
bought out the store here. Initial response from a number of countries
over the deal indicates that the USPO opinion rendered here was/is correct.

Of course the USA does not run the world .. grin ...

--> Sleep well; OS2's still awake! ;)

Source record: 17335

Basically, an IRC is what it says in the coupon...if you translate the French....good for one unit of international postage, in essence, for airmail (the new , airmail ones at least). However, some countries have multiple airmail rates, not like the USA, which has one (well, two if you include VE and XE 60 cent rate).

MOST countries work with one....but there are exceptions. A few of the posts here had some good resources for that advice.

I have a bunch for sale, and have been selling them for $1.00 each.....from the QSLs I handle.....if anyone is interested.

Now, here is a twist. Has ANYONE had any experience getting rid of the 'old USA' ircs. For example, I have some of the old 42 cent, 65 cent, 80 cent, etc.

Also, anyone have a post office friendly enough to exchange the 'bad' ones....where the issuing post office stamped on the wrong side?

please contact me....I have a ton of both...HI

Message-ID: <kT7C6.5567$JV1.495324@news1.rdc1.va.home.com>
Source record: 17336

Steve,
I've never tried to exchange a US-purchased IRC in the USA. The USPS International Mail Manual has the following somewhat confusing statement:

372.3 Selling Price and Rate of Exchange

a. The selling price of a reply coupon in the United States is $1.75. One coupon is exchangeable in any other member country for a stamp or stamps representing the minimum postage on an unregistered air letter. Unused U.S. coupons (that is, those with the U.S. selling price stamped on them) may be exchanged only for United States postage stamps by the original purchaser at a discount of 1 cent below the purchase price.
b. International reply coupons purchased in foreign countries are exchangeable at U.S. post offices toward the purchase of postage stamps, postage meter stamps, postage validation imprinter (PVI) labels, and embossed stamped envelopes (including aerogrammes) at the rate of $0.80 per coupon, irrespective of the country where they were purchased.

So, if I read this correctly, US-purchased IRCs may be redeemed for postage only for the purchase amount less 1 cent. So, I guess that a 42 cent IRC is worth only 41 cents in postage, if redeemed at a US post office. This seems a bit odd. On the other hand, sending an old "42 cent" IRC overseas should still yield one unit of foreign airmail postage in the recipient country.

Regards,

Rich Eckman KO4MR

>worth only 41 cents in postage, if redeemed at a US post office. This seems
>a bit odd. On the other hand, sending an old "42 cent" IRC overseas should
>still yield one unit of foreign airmail postage in the recipient country.
>
>Regards,
>
>Rich Eckman KO4MR

The Colllege Station, Texas Post Office at which I work all this told me
very plainly. If I want to trade a USA purchased or any other IRC I
have for an airmail stamp out of the USA - give 'em the IRC. One stamp
will be issued. Thus, if I'm of a mind to trade a $1.05, or any other
value IRC for that stamp, it's my decision.

For USA purchased and validated IRC's, if I want to exchange them at
any post office here in the USA, they will redeem them at the posted
rate on that IRC, minus one cent.

The discussion arose over trading the older ones in minus one cent for
money credit toward the newer higher rate. A close examination of the
postal regulations revealed, per the crew there, the analysis that
trading them in less a penny for credit toward the higher priced ones
was silly. No matter *WHAT* the rate was when it was sold, it's going
to be worth one airmail unit of whatever when presented no matter where.

I was told to just send the old ones, and any others that I could find
and buy before the price went up. It made no difference at all in the
end result! So the word got passed around town and the hams cleaned
them out of the old rate coupons!

As of this point, I have some of the results. There seems to be no
problem at all in sending the older rate ones, nor, if you want to
redeem then for money, for rate miuns one cent of whatever!

Of course the College Station, Texas, Postal Orfice doesn't make the
rules, but that's what the experience has been from here so far!

--> Sleep well; OS2's still awake! ;)

I've already had this discussion with another group a few weeks ago, but the problem with eqsl.cc is that there is absolutely no security of any kind. The question came up as to how one might forge an eqsl card. Easy. Given the challenge, I created a forged eqsl, noted it properly as a forgery across the face of the jpg and sent it back to the guy who doubted me. I spent a total of ten minutes on this project. There is simply too much qsl information out there available to research, and the eqsl folks let anyone look up anyone elses qsl information.Until it becomes at leaast as difficult to forge an eqsl as it is to forge a glossy four-part fold out card, then they won't be worth having. Yes, yes, the argument is that you are only hurting yourself. Untrue. I don't think I would want to see another guy's callsign on the honor roll and think that he got there illegally.

Ohio/Penn DX Bulletin No. 507

The Ohio/Penn DX PacketCluster
DX Bulletin No. 507
BID: $OPDX.507
April 16, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1NU, K1VV, N3SL, W3UR & The Daily DX, N4AA & QRZ DX, K8AV, K8YSE, KC8FS, 4X4NJ, DL1EK & DX News Letter, F5NQL, F9IE, IZ8AJQ, I2YSB, JR3TVH, LA5HE, MM0BQI, SM7AED, UZ8RR, VA3RJ and ZK1CG for the following DX information.

OPDX CELEBRATES ITS 10TH ANNIVERSARY! I can't believe that almost every Sunday morning for the last 10 years I have sat in front of my computer writing the OPDX bulletin. Even my wife Linda (OPDX's chief proof reader) can't believe she has been reading "all this stuff" (as she puts it) for 10 years. When I first started the bulletin, it used to take a few hours to write, but it has grown, and now it takes several hours.
Actually, I am a week late in celebrating. With all the confusion last week in losing my link to the InterNet for BARF-80 BBS, I forgot that April 7th, 1991, was the first issue of the OPDX. Many ask, why do you write the OPDX for free?" (including my wife, she says, "If you get one USD from everyone you could buy a new radio"). The reason that I write the OPDX and my involvement in the DX community is to help others achieve the pleasure and challenge of working DX as I have. I really enjoy the hobby. However, I also must not forget the many friends I have gained over the years writing the bulletin. Without their help and contributions of information, there would not be a bulletin. Lastly, I would like to thank my wife. Without her there would not be an OPDX. She is a non-ham (which one day I hope to change), but a LD teacher and proof reads the bulletin every week (usually telling me she is not sure what she is reading), plus she puts up with the many hours I spend at the keyboard and with club activities.
Thanks for reading the OPDX and I hope to continue to provided information each week that will let you work a "NEW ONE".... Remember, DX IS ..
73 de Tedd KB8NW (Editor of OPDX)

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8/April, through Sunday, 15/April there were 230 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1U, 4X, 5A, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/a, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HK0/m, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0S, PZ, S0, S2, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T30, T7, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, VE, VK, VK9N, VP2E, VP2V, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XX9, XZ, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS
There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2
There were 51 ITU Zones available during the past week.
ITU Zones that were not active are: 3,4,15,21,22,23,24,25,26, 31,34,35,43,58,59,68,69,70,71,72,74,75,90
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3A, MONACO. Fabrizio/IK5GQK, Giuseppe/IK5YOJ, Stefano/IW5BZQ and Virginio/ IW5EDQ will be active for 3 days from 3A-land (JN33RR) between June 1-3th. They will CONCENTRATE their activity on 6 meters, but they will also be active on 2 meters and HF. Their callsigns will be 3A/IK5GQK, 3A/IK5YOJ, 3A/IW5BZQ and 3A/IW5EDQ. Their activity is as follows:
6 meters - (50.210 SSB, 50.600 RTTY, 50.620 PSK31) using an Icom IC-706MKIIG with 6 element yagi and HQ50 Halo Loop.
2 meters - (144.290 SSB) Icom IC-706 with 9 element yagi.
HF bands - (SSB, RTTY, PSK31, SSTV) two Yaesu FT-100 and vertical antennas.
You can make skeds before and during their operation by sending E-mail to: 3a@mannelli.com
They will check their E-mail at the top of every hour during their operation. For the latest news and log, please check their Web page at http://www.mannelli.com/3a
QSL VHF QSOs (6/2 meters) direct to: Stefano Mannelli, P.O.BOX 569, 50123, Firenze Centro, ITALY. QSL HF QSOs direct to: Fabrizio Vannini, via Forlanini 68, 50127 Firenze, ITALY.

3B6, AGALEGA (Update). Steve, N3SL, informs OPDX of the following and states that there will probably be one last press release bulletin from the "official sources" before the team hits the air. The advance team leaves in little over one week with the rest of the team on April 28th from Zurich to Mauritius. It is NOT absolutely certain, but it is looking like the team is flying to and from 3B6, which would give them an extra 3 days on the air (that should probably come from the official news

release). Steve, N3SL, states that his daughter, Kim, is now going to handle the QSLs for North America (not just the USA). So, Canada and Mexico are to be sent via Kim Larson, 22 N. Hidden Acres Dr., Sioux City, IA 51108 (which is N3SL's CBA). Reportedly, Kim is handicapped and is getting a real thrill in doing this job. It occupies her time, and she loves seeing all the cards. She did probably 75% of the AH1A QSL cards, so she is not a novice. The 3B6RF team is planning a photo card, so that will undoubtedly take a bit of time after the DXpedition to get printed. Steve states that he will see to it that all the U.S. DX newsletters are kept informed on their status. Steve will be doing mostly CW, but he has been asked to do RTTY (or possibly SSB) whenever they're trying to work the U.S.
Riki, 4X4NJ, reports that he will be joining the 3B6RF team as part of a 21 amateur group. He states, "We'll have 8 stations on the air during the first 3 weeks of May. All of the equipment and antennas are "World Class" - examples: 4square arrays on 80m & 40M, Titanex vertical and Beverages for 160M, beams for HF, Yaesu FT1000MP transceivers with 1KW amplifiers, etc..... Naturally, I will devote myself to 160M as much as possible!" For more details, check online at: http://www.agalega2000.ch

3C, EQUATORIAL GUINEA. Martin, 3C5J, was active last week on 20/17/10 meters. The sad part is that his operation will not count for DXCC because he is operating from an oil platform. He is expected to be there for 6 months. The good news is that "The Daily DX" is reporting Martin may have a chance to go to Malabo to operate which will count for DXCC.

3XY, GUINEA. A couple of new stations have been on the air signing the prefix 3XY. Station 3XY6A was active during last week, mainly on 12 meters (24955 kHz between 1730-1930z) with little activity on 20 meters (14203 kHz after 2230z). QSL via VE2XO. Station 3XY2S showed up over the weekend on 10 meters (28447 kHz around 0915z). QSL via P.O. Box 1484, Konakry.

4U, UNITED NATIONS HQ. This one has to be the most interesting report of the week. Reports on the Cluster Network indicate that 4U1UN was active on PSK31 on 20 meters and SSTV on 15 meters.

A2, BOTSWANA. Charles, A25/KY4P, was heard active over the past weekend on 10 meters CW/SSB. Check around 28002 kHz or 28452 kHz between 1200 and 1500z. QSL via SV0LM.

C6, BAHAMAS. By the time you read this, Tom, WB8N, should be in Nassau (IOTA NA-001) beginning Easter Sunday, for 6 days. He intend to operate a portable HF station from the resort he is staying at, beginning Monday April 16th. He will receive his callsign upon arrival. His operating times will be approximatly from 2000-2200z (possibly longer). His suggested frequencies are:
10 meters - 28495 kHz +/- 10 kHz (main)
28450 kHz +/- 5 kHz (secondary)
28520 kHz +/- 5 KHz
If conditions are poor on 10 meters, look for him on 20 meters (14195 kHz +/- 10 kHz). He will also give 12 meters a try, on: 24950 kHz (SSB) and 24890 kHz (CW) both +/- 5 kHz.

E4, PALESTINE. Gunter, OE1GZA, is now active from here as E4/OE1GZA. He was heard this past weekend on 15/10 meters between 1100 and 1600z. Check around 28460 and 21270 kHz.

HK0, MALPELO ISLAND. Pedro, HK3JJH, is now active as HK3JJH/HK0M. Reports show he has been on 40/20/15/10 meters SSB.

INTERNATIONAL MARCONI DAY (Special Event). Over 30 Special Event Stations representing Historic Marconi station locations worldwide will participate on April 21st, from 0000-2359z, on CW/SSB/Digital. The list of participating stations is on the Web page:
http://www.users.globalnet.co.uk/~straff/particip.htm
Award Certificate rules are available at:
http://www.users.globalnet.co.uk/~straff/
The Marconi Radio Club W1AA/IMD wll represent the 1903 Marconi Transatlantic Station on Cape Cod, Massachusetts. W/K QSL to CBA with an S.A.S.E., DX via the W1 Bureau. Their Web page is: http://personal.tmlp.com/k1vv/w1aa/

IOTA NEWS.....
EU-048. Francois, F2GL, will be active from Houat Island (French Brittany - DIFM AT-016), April 30th through May 6th. Check the HF bands from 80 to 10 meters, including the WARC bands, both on CW and SSB. QSL direct via F2GL's CBA or via the French REF Bureau.

EU-051. Look for Erminio/IZ8AJQ and Mario/IZ8DBJ to be active from Ustica on April 26-29th, sign IE9/homecall. Activity will be on 80-10 meters including the WARC bands on CW/SSB/RTTY and possibly PSK31. QSL IE9/IZ8AJQ to: Erminio Cioffi di Michele, Piazza Umberto I 16, 84036 Sala Consilina - SA, Italy. QSL IE9/IZ8DBJ to: Mario Pesce, Via Privata Falci 2, 80070 Bacoli - NA, Italy. QSL either direct or through the bureau.

EU-065. Look for stations F6BFH/p, F6EGG/p and F9IE/p to be active from Molene Island (DIFM AT-002), May 2-8th. Activity will be on the HF IOTA frequencies on CW and SSB. QSL via home callsigns.

EU-092. Jim, MM0BQI, will be active from the Island of Tanera Mor in the Summer Isles from April 20-23rd. The various references numbers are; Islands of Scotland Award SC10, WAB NB90 and QRA IO78. Activity will be on all bands 80-10 meters SSB/CW/RTTY and PSK31. He states, "Hopefully this year conditions will be better, and I am looking forward to working lots of DX stations who require the Summer Isles for IOTA or IOSA. I will be using my own call MM0BQI/P for some contest activity and also special callsign GB5SI (Summer Isles)." QSL is 100% via RSGB or direct to MM0BQI: Jim Martin, 3 Lismore Avenue, Edinburgh, EH8 7DW, SCOTLAND - UK.

EU-094. Look for TM5N to be active from Saint Nicolas Island (Glenan Archipelago), from April 27th to May 1st. Other reference numbers are: DIFM AT-010 and Loc Grid IN77XR. Check the usual IOTA frequencies on 160-23cm on CW and SSB. There will be

14 operators and 2 YLs at the logs. QSL via F6KOP.

EU-094. Look for F6KOP/p to be active on Cigogne Island, April 28-29th (depending on WX conditions). Other reference numbers are: DIFM AT-061, Loc Grid IN87AR and DFCF29004. Activity will be mainly around 7055 kHz SSB. QSL via F6KOP.

EU-171. On April 17th, Jakob, OZ7AEI, plans to activate the Danish Islands, Venoe (NO IOTA, DIA NJ-005) around 1200z for about an hour before going to Jegingoe (IOTA EU-171 and DIA NJ-006). Activity will be on 14260 +/- QRM. QSL via bureau or direct: Jakob Pedersen, Hvamvej 47, DK-7500 Holstebro, Denmark.

NA-137. Scott/K1OA and Len/K1NU will be activating Peaks Island, ME, on Saturday, April 28th using the special event call W1N. This island represents a new counter for the U.S. Island awards and will be issued a number after this activation. Look for them on 14260 and 21260 kHz +/-. QSL via K1OA, bureau or CBA.

JW, SVALBARD. Rag, LA5HE, will once again be active as JW5HE from April 26th through May 1st. He states low band contacts are very unlikely as there is the "midnightsun" now.

KH4, MIDWAY. Hiro, JF1OCQ, is now active as W1VX/KH4 now through April 22nd. Look for his activity on 80-6 meters, mostly on CW with some RTTY. As this bulletin was being prepared he was active on 7007 kHz around 1345z. QSL via JF1OCQ either JARL QSL bureau or direct to: Hiroyuki Miyake, 1-3-6 Asakura, Maebashi, 371-0811 Japan.

KH0, MARIANA ISLAND. Members of the ODXLG will be active from Saipan Island, Northern Mariana Island (IOTA OC-086) April 28th through May 1st. Look for Taka to sign KH0/JR3TVH and Natsu to sign KH0/JJ3NAW. Activity will be mainly on 40-6 meters CW/SSB/SSTV/RTTY/PSK31 (will take any request). Antennas used are: C4 (Force12 JA dealer,EDC) and a 6 element yagi (Radix). Also, they will use a Zepp like wire (Saga) and a HB9CV (Minimulti) housed in the shack. QSL via the Bureau or direct w/SASE to JR3TVH home QTH listed on QRZ.com.

KP4, PUERTO RICO (QRP Op). Hal, KC8FS, reports that his 18-year old daughter Holly, N8VUQ, is now there with several of her high school classmates and a local college biology class. She will be in San Juan and the north coast of KP4 until April 21st for an ecological research trip that will net her some pre-college biology credit. She took along a borrowed AEA 10 meter DX Handy and will try to work her father if conditions are right. This would be a great demo of amateur radio for the other students if it works. She will be calling him near 28375 kHz (+/- 5 kHz) at the top of the hour beginning at 1700z and depending upon her scheduled activities. Her operating time will be limited because her itinerary is pretty full with snorkeling, exploring mangrove swamps and hiking in a tropical rain forest. Hal asks that if any DXers hear her, please spot her on the DX PacketCluster. Also, he can be reached via E-mail (kc8fs@aol.com) or via the phone (304) 744-5949 (H) and

(304) 767-6202 (W).

LIGHTHOUSE OPERATION. Leon, ON4ZD, will be signing F/ON4ZD/P between May 5-7th from Fort Boyard. There are three lighthouses on that Fort, FRA 287, FRA 288 and FRA290. Leon will attempt to find a place that will have all lights in the line of sight on at the same moment. QSL via home call, bureau (UBA) or direct with sase.

LLDXT 2001 CARIBBEAN TOUR. The Low Land DX-pedition Team (LLDXT) is pleased to announce the 6th Caribbean Tour. This year's tour will bring them to the "Island of Carriacou" (Grenada - IOTA NA-147) from August 2-15th and the Island of Bequia (St. Vincent - IOTA NA-025) from August 16-27th. The team members will be Bouke/PA0ZH, Ronald/PA3EWP, Rob/PA5ET and Dennis/PA7FM. The callsigns will be J3/homecall and J8/homecall. They will use two FT1000MPs with amplifiers and will be active around the clock on 160-10 meters on the modes CW, SSB, RTTY and PSK31. Titanex has sponsored a V160E vertical to give them a good low-band signal. As is in past years, they will have a Tour Web site which will be updated daily with the latest information, on-line logs, tour diary, digital photo's and digital pile-up recordings. The Guestbook can already be signed. The LLDXT home page can be found at: http://www.qsl.net/lldxt/
All QSLs will be managed again by PA5ET, Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands. He is a QSL Manager for many other stations; look under "QSL INFO AND NEWS".

QRP-PEDITION FROM A UR-QRP CLUB. The Ukrainian QRP Club will hold its first (what they call a) "QRP-pedition" to the Ai-Petri mountain in Crimea, from May 4-11th. The main aim of this expedition are:
1) To publicize low power activity on the air.
2) To attract the attention of hams to the QRP movement and to show the boundless possibilities for low power operations.
3) To test home-made QRP transceivers, as well as, to meet friends and associate with them.
A special callsign will be used during the QRP-pedition: EM5QRP. The members of the QRP-pedition are: RK3ZK, UR6IRL, UR7IRL, US1RCH, US1REO, UU4JCQ, UY1AW and UZ8RR. The QRP-pedition members output power of their transmitters will be: 5 watts (CW) and 10 watts (SSB). Look for them to be active mainly on the international QRP frequencies. Operations on RTTY and SSTV are being planned too. Prizes (A book, published by Igor Grigorov, RK3ZK) will be given out to three stations who have the largest number of the QSOs with the QRP-pedition members on various bands. All other contacts will get a special QSL card confirming their QSOs. Those who wish to get the QRP-pedition pennant must send their QSL and 4 IRC to the expedition QSL Manager UR7IRL: Vladimir Tretyakov, Post Box 41, Konstantinovka-10, Donetsk Region, 85110, Ukraine.

QSL INFO AND NEWS.....
The final and complete logs for 5U2K, 5U3T, and 5U5A are now available on Sil's, I2YSB, Web site at: http://digilander.iol.it/i2ysb

Rob, PA5ET, is the QSL Manager for the following stations:
1994 - HB0/PA3ERC/p

1995 - VP5C (August 95), VP5/PA3BBP, VP5/PA3ERC, VP5/PA3EWP, VP5/PA3FQA
1996 - FG/PA3BBP, FG/PA3ERC, FG/PA3EWP, FG/PA3FQA, TO5C (Guadeloupe
August96), J79BP, J79RC, J79WP, J79QA, J77C (August 96),
FM/PA3BBP, FM/PA3ERC, FM/PA3EWP, FM/PA3FQA
1997 - J6/PA3BBP, J6/PA3ERC, J6/PA3EWP, 9Y4/PA3BBP, 9Y4/PA3ERC,
9Y4/PA3EWP
1998 - 6Y5/PA3ERC, 6Y5/PA3EWP, ZF2RC/ZF9, ZF2WP/ZF9
1999 - PJ7/PA3EWP, PJ7/PA3GCV, PJ7/PA4EA, PJ7/PA4WM, PJ7/PA5ET,
PJ7/PA7FM, FS/PA3EWP, FS/PA3GCV, FS/PA4EA, FS/PA4WM, FS/PA5ET,
FS/PA7FM, V47WP, V47CV, V47EA, V47WM, V47ET, V47FM, VP2EWP,
VP2ECV, VP2EEA, VP2EWM, VP2EET, VP2EFM
2000 - 8Q7ET (January 00), 8Q7WP (January 00), V26EA, V26ET, V26WP,
V26FM, VP2MPA , 8P9JR, 8P9JS, 8P9JT, 8P9JU

S0, WESTERN SAHARA. By the time you read this, the short operation by
S07BT will probably be over. QSL via EA1BT.

V7, MARSHALL ISLANDS. Just a quick reminder that Tom/K7ZZ, Dave/WW2AVG,
George/AH8H and Jim/W7UG will be active from Enewetak Atoll (IOTA OC-087)
in the Marshall islands from April 19-26th. They plan to use the callsign
V73E, some operators have their own individual callsigns. Activity will
be 80-6 meters with operation on CW/SSB/RTTY. Check the usual IOTA
frequencies. QSL via WF5T.

VK9M, MELLISH REEF (Refer to OPDX.500). Look for David/VK4ZEK, Alan/VK4BKM,
Peter/VK4APG and Harris/VK4CWT to be active later in the week from here.
They will be on the reef signing VK9ML between April 21-24th. This activity
is in preparation for a much larger operation planned in late 2001 or early
2002. Their activity will be on the following suggested frequencies:
CW - 3504, 7025, 14025, 21025, 28025 and 50105 kHz
SSB - 3799, 7085, 14195, 21295, 28480 and 50145 kHz.
Check the web site for more details at: http://www.qsl.net/vk9ml
QSL via VK4APG.

ZK1, SOUTH COOK ISLANDS (Update/Help Answered). OPDX received another
message from a very excited Victor, ZK1CG, and he stated that thanks to
the call for help for his KT43A antenna situation in last week's bulletin,
someone has offerred to send him a complete/operational KT43A. Details
have to be worked out on sending it, but Victor will keep us informed.
He will use the antenna at his Rarotonga location, and on his vacation
in October to Manihiki, North Cook Islands for the CQWW SSB Contest
with five operators from the Western Washington DX Club. They will be
in Manihiki for one week, and possibly Victor will be there for 2 weeks.
If you are planning a trip to the Cooks and would like to help in getting
some antennas down to Rarotonga (so they can be shipped to Manihiki before
October), contact Victor. He states, "..... coming to the Cooks for a
vacation or DXing..... I'm sure we will make your stay in the Cook
Islands a most pleasant and enjoyable one, plus you will be helping many
make a new contact from North and South Cooks." Keep looking for Victor
on 10 meters between 28480 and 28490 kHz after 0000z. ADDED NOTE: Victor
is looking for the extension kit to make the KT43A into a six element beam.

Hi Gary,

Forgeries are eveywhere today, I bet there are people with awards now that have not earnt them.
If someone is sad enough to go to such extents they will do it regardless of paper or electronic means.

The annoying thing for me is that is takes YEARS for the QSl to come via the buro, often they never arrive
even though I have confirmation from the people who sent them!

The internet is a great medium for QSling, seems a shame to waste it !

Thanks for the input anyways!

Cheers!

MikeT ...

Space Weather news for April 15, 2001

http://www.spaceweather.com

One of the most powerful solar flares ever recorded (an X14-class explosion) erupted near sunspot group 9415 today, climaxing a two-week spate of X-class flares from that active region. The source of the explosion is near the Sun's western limb, so the blast was directed mostly away from Earth. That's a good thing because today's flare was nearly as powerful as one in 1989 that triggered the collapse of a power grid in Canada -- no such calamities are expected this time. A moderate radiation storm is in progress. For details and updates, please visit SpaceWeather.com.

1097. FS 4 el 20 meter beam in DENVER

Newsgroup: rec.radio.amateur.dx
Date: 2001-04-16 04:15:58 UTC
From: Bill <m6rf@yahoo.com>
Message-ID: <3ADA71FE.A913287F@yahoo.com>
Source record: 17152

I have a TELEX/HyGAIN 4 element 20 meter beam for sale.

Gain is 8.2dB, front-to-back is15dB minimum to 28 dB
maximem, 50 ohm impedance, VSWR 1.2:1, will handle full
legal power, boom length is 26 feet, Maximum wind survival
is 100mph.

The beam is in excellent condition and is ON THE GROUND
ready to be picked up.

The price is $150. I live in the Denver area.

Thanks,
Bill

If beacon operators want feedback on dx reception, it would help greatly if more of them would include an e-mail address, because I don't think I am alone in figuring it isn't worth it to me to have to purchase an international stamp to send them a snail-mail reception report. VE7AFN.

From: kpb@fc.hp.com
Message-ID: <9bf2it$bk3$1@fcnews.fc.hp.com>
Source record: 17157

I tried using IRCs and got sporadic results compared to using SASEs. There is a fellow ham out there who has a website where you can order foreign stamps and airmail envelopes. He mails your order in a flash and you have the stamps you need in just a couple days.

This is the ultimate in convenience for me and the foreign operator. I don't have to go stand in line at the Post Office to buy IRCs and the foreign op does not have to stand in line to exchange them. All the op has to do is fill out your QSL card, put it in the SASE, and drop it in the mail.

I also use his envelopes. The sase envelope fits perfectly inside the mailing envelope, so no folding is required. The envelop is thin and does not draw undue attention from postal thieves. In addition, all the theif will get is some stamps, no money is sent.

I tried this for the first time after the ARRL DX contest. So far, I have received back 50% of the QSLs I sent. In 6 weeks, I got back 20 some cards 5 of them new DX entities for me. Cost for foreign stamps is about the same or less than IRCs.

Sorry, I don't have the website url with me here, but I am sure someone will follow up this message with the site. Ditch IRCs, use SASEs with real foreign stamps. You will be much happier with the results.

Kevin Burkhart (kpb@hpeskpb.fcnospam.hp.com)

> LOL!!!!! Hey, I know what you mean. How's 6 been lately?

A couple of weeks back when the Aurora was visible in Northern Mexico the
band was open from around 7:30 PM on Friday to about 5:30 PM on Saturday.
Most of the US was heard.

Last week there was an opening (they tell me) to Argentina from Northen Ind and Ill.
As there was a great opening, but not nearly as long lived. Unfortunately we were in a Tornado watch area and the weak ones just above the noise were getting clobbered by static crashes at least 60 db stronger.

Lots of Auroral activity from the last two major sunspot groups, but other than the really big flare yesterday (pointed away from us) it appears activity is declining.

Maybe we'll get some more big groups developing.
It'll be interesting to see what group 9393 looks like when it comes back into view.
It's expected to be far less active than it was the last time it was visible.

73,

Source record: 17161

This web page:
http://www.angelfire.com/md/k3ky/page35.html

has a list of the two that I know of.....William Plum and James Mackey. The web page
http://www.net1plus.com/users/ryoung/index.htm

is Mackey's...I'm not sure if Plum has a web page.

Just a comment......having postage pre-affixed is a great help, IF it is correct postage. I think these two guys do a great job in makign sure they send you the correct amount, but realize if you buy it today, it may not be the right amount a year from now....

Also, remember that folks like me pay for the QSL cards, etc from the greenstamps, sale of ircs, etc that come with the envelopes. While I don't mind a simple sase at all, remember that there are costs to put the stuff you put into the envelope, and if it is a card you really need, you might consider a donation with your SASE.....it's never required, but it does help.

This depends on which country you are mailing to. I have received several
SASE with old Norwegian stamps and not enough postage. Green stamp work
fine here, so does IRC.
The main pain is all those US hams who are using odd size enevelopes, which
is common in USA bit nowhere else. For a change , they are not big enough
for standard size cards.

Two sources of envelopes and stamps are:

William J. Plum
12 Glenn Rd.
Flemington, NJ 08822-3322

Send Bill a note and he will mail you his "package" of stamp prices, how he accepts payments, etc. He does not have a presence on the Net. I REALLY recommend his European Air Mail "Cover (send out to the DX)" and "Return (the envelope with your address)" Envelopes. The return envelope fits in the "Cover" without folding and also puts another layer of paper over your greenstamps(s) to hide them.

JAMES E. MACKEY, K3FN
PO BOX 270569
WEST HARTFORD, CT 06127-0569

Jim has a presence on the Net at:
http://www.net1plus.com/users/ryoung/index.htm

Once you establish an account with him you can email your stamp orders (no minimum) and pay by check once you've gotten them. Very convenient. He also has the Euro Air Mail Envelopes but they are much more expensive than Bill's.

Message-ID: <XA3E6.10161$gl.1297686@typhoon.nyroc.rr.com>
Source record: 17177

Hey all!

I'm a college student in upstate NY. Want to do a signal processing project using the BCD data stream from WWVB (broadcast on 60KHz) out of Ft. Collins Col., problem is that my rig blew up during a lightning strike, and now I have no way to receive the signal. I was wondering if I could talk any of you guys in or near Colorado into recording a few minutes (3 to 5) of clean WWVB signal and emailing it to me at tannerpa@clarkson.edu or p_a_tanner@hotmail.com . WWVB has no vocal announcement, it's only AM DSB-SC modulation carrying a PWM BCD data stream. You'll know you got it if you hear a pulse every second. I've tried contacting WWV by telephone, as it broadcasts both vocal announcement and BCD data, however the telephone signal is the vocal announcement only. Best results probably at night. I'll send $20 to the first person who sends me a useable wav file, for their time and effort, and to express my apreciation!

Source record: 17179

I have had an IC706 MKII for a couple of years.

I just recently bought a power gage to my antenna.

I discovered that my microphone, that comes standard with the IC706
MKII just exites the trx to 2 watts of output power! It should be 100w
(or something like 100/sqrt(2) !

No wonder people have difficulties hearing me.

I have heard that this microphone can be modified to produce a better
result.

Does anyone know how to do that?

Please e-mail me in that case:

Your microphone doesn't determine the output power of your radio.... I do not have a 706, but from what I understand, you can adjust the power output with controls on the radio itself... perhaps you should check the manual?

I have a 706 MKIIG. You need to check what the power out is in CW mode. If that is ok, then check the SSB side. If you only have a couple of watts out in CW, then the problem is probably is in the rf area. Unless your microphone is bad I would not do anything to it.

Here are the major questions that are covered in my latest revised copy of the Deep Cycle Battery FAQ 3.02:

1. WHAT IS THE BOTTOM LINE?
2. WHY BOTHER?
3. HOW DO I TEST A DEEP CYCLE BATTERY?
4. WHAT DO I LOOK FOR IN BUYING A BATTERY?
5. HOW DO I INSTALL A BATTERY?
6. HOW DO I CHARGE (OR EQUALIZE) A BATTERY?
7. HOW DO I INCREASE THE LIFE OF A BATTERY?
8. WHAT ARE THE MOST COMMON CAUSES OF BATTERY FAILURES?
9. HOW CAN I STORE BATTERIES?
10. WHAT ARE THE COMMON MYTHS ABOUT BATTERIES?
11. HOW LONG WILL A DEEP CYCLE BATTERY LAST ON A SINGLE CHARGE?
12. WHERE CAN I FIND MORE INFO ON BATTERIES?

If you (or anyone else) would like a free copy of the latest version, you can find the Car Battery FAQ at http://nyquist.ee.ualberta.ca/~schmaus/batfaq.html or Deep Cycle Battery FAQ at http://nyquist.ee.ualberta.ca/~schmaus/dcbat.html. You can also email me at bjb_darden@yahoo.com and I will email you a copy.

There can be a lot of variation in the output levels of identical model microphones. I have a pair of Yaesu MH-1 mikes that came packaged with new rigs. No quantitative numbers to quote but there is a huge difference in their output levels when used on the same radio. You should be able to adjust your menu settings to compensate unless the mike is truly defective.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15/April, through Sunday, 22/April there were 226 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/A, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HK0/m, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH4, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TL, TN, TR, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9M, VK9N, VP2E, VP2V, VP6, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XT, XX9, XZ, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS
There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2
There were 53 ITU Zones available during the past week. ITU Zones

that were not active are: 3,4,15,21,22,23,24,25,26,31,34,35,43,
58,59,68,69,70,71,72,74,75,90

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

2000 DXCC YEARBOOK IS OUT. Many have began receiving the "2000 DXCC Yearbook" and the ARRL has put out another excellent publication for members involved on the DXCC program. The yearbook not only has the top "100 Most Need DXCC Entities" and the DXCC Annual List, but great articles by Wayne/N7NG, Martti/OH2BH and Carl/N4AA. There is also, an article and interview with Bob Eshleman, W4DR, the 2000 DeSoto Cup's winner. The Top 10 Most Wanted Entities are:
1 - P5 North Korea 6 - H40 Temotu Province
2 - BS7H Scarborough Reef 7 - BV9P Pratas Island
3 - E4 Palestine 8 - VU4 Andaman & Nicobar Islands
4 - FO/A Austral Islands 9 - 7O Yemen
5 - FO/M Marquesas Islands 10 - A5 Bhutan

3W, VIETNAM (Possible New IOTA). Look for Alan/BA1DU, Jin/BA4TA, Liao/BA7QT to team up with Bac Ai/3W6AR and Hau/3W6LI to activate Tam Island (new IOTA) from Vietnam. Tam Island is located in the South China Sea, about 12''10'N and 109''15'E. The team will use the callsign 3W7D and plans to operate from April 26th April to May 1st. They will set up two stations and work on CW and SSB on the normal IOTA frequencies from 40-10 meters. Their equipment will include FT-990 and TS-50 transceivers, GO-2KW linear amplifier, Cushcraft R5 vertical and multiband dipole antennas. The 3W7D team is supported by The Beijing DX Club, Chinese Radio Sports Association, The Vietnam Amateur Radio Club and sponsored by Island Radio Expedition Foundation Inc. QSL via BA1DU (E-mail: ba1du@arrl.net). Send directly to: P.O.Box 8091, Beijing 100088, CHINA, or Chinese QSL bureau.

4U, UNTIED NATIONS HQ (Update). Henry, KT1J, informed OPDX that:
"Yes, we had 4U1UN on the air in PSK and SSTV for a short time again last Friday (April 13th). (We initially ran some tests back in February). It is anticipated that 4U1UN will be on in the digital modes fairly regularly in the near future, once a few computer issues have been resolved, and antenna improvements have been made."

6Y1, JAMAICA (Attention Prefix Hunters!). The rare prefix of 6Y1A will be activated by Tom/N6BT, Fred/KE7X, Walter/N6XG and Ken/K2KW in the CQ WPX CW Contest, May 26-27th, 2001. Outside the contest, look for operations using their homecall/6Y5 from May 20-29th. They will use KW amplifiers on 40-6 meters, and vertical arrays will be provided by Force 12. Special emphasis will be given on the WARC bands and 6m outside the contest. QSL 6Y1A and K2KW/6Y5 via WA4WTG, others via their home callsigns. Questions go to Kenny, K2KW at: k2kw@prodigy.net
For information, visit the Web page: http://www.k2kw.com

AP, PAKISTAN. Robert, S53R, informs OPDX that he wil be starting a new assignment with the U.N. beginning in May and will start in Pakistan. He will try to sign AP2ARS as much as possible again. Operation will be on 40-10 meters, including the WARC bands, almost exclusively on CW. Robert told us that other operations from the region are also possible, and he will keep us posted.

BEACON CALLSIGN CHANGE. Yacov, 4Z5AY, informs use that the 4Z5AY 6 meter beacon located in Tel-Aviv has a new callsign. Look for 4X4SIX to be active on 50.080.20 MHz. More details are available at the Web site: http://www.iarc.org/~4z5ay/htmls/bea_tec.htm

DAYTON DX DINNER BANQUET (Update). Steve Bolia, N8BJQ, informs OPDX that at the moment, all tickets for the DX dinner have been sold. All orders on hand have been filled and due to space constraints, no more can be sold. It is possible that some may become available just prior to the dinner. Also, Chuck Brady, N4BQW (3Y0C), will be the featured speaker and will talk about his 3Y expedition. For those that want to know more about Chuck's real job they can find it at: http://www.jsc.nasa.gov/Bios/htmlbios/brady.html

FH, MAYOTTE. According to Ted, JJ1LIB, who operated as S07U, 5T5U and 8Q7JY, he will be active as FH/JJ1LIB from April 29th through May 4th. Ted will use a TS-570 plus an IC2KL(500W), a 2 element HB9CV yagi for 20-10 meters, and a 6 element yagi for 6 meters. For the lower bands, he will use wire antennas. Operations will be on CW, SSB, and RTTY. The QSL for FH/JJ1LIB should be sent to JN1HOW.

H40RW WRAP-UP. Ron, ZL1AMO, informs OPDX that he is back home slowy recovering, and he has completed his H40RW DXpedition to Temotu on April 6th. He made about 11500 QSOs which includes about 300 on 6 meters (this was a suprise for Ron). Ron states that the weather there was really really hot and also extremely wet with constant electrical storms with deafening thunder. He also mentioned things have really changed in Honiara since his last visit in 1990. He also thanked OPDX for the write up on his DXpedition and congratulated OPDX on its ten years of dedication.

HK0, MALPELO ISLAND. Pedro, HK3JJH/HK0M, continues to be very active on 75-10 meters, usually not working split. He will be there until May 7th. QSL via N4AA.

HR, HONDURAS. Wolf, HR1BY, is active from Valle de Angeles on 6 meters. He is working QRP, only 8 watts. Check around 1830z and 2330z. QSL via EA7FTR.

HS, THAILAND. Charly, K4VUD, will be active from Bangkok as HS0ZCW from April 26-28th. He states to look for him on the higher bands.

IOTA NEWS.....
AS-079. Take, JI3DST, will be active from Miyako Island (Miyakojima Hirara-City Okinawa-ken) as JI3DST/6 from April 27th through May 6th. Activity will be on 80/40/17/15/12/10/6/2 meters on SSB (he is planning SSTV/RTTY). QSL via the Bureau.

EU-030. Klaus, DL7UXG, will be active from Bornholm Island as OZ/DL7UXG/p from August 5-18th. Activity will be on 80/40/30/20/17/15/12/10 meters, using CW and SSB. QSL via DL7UXG.

EU-047. Karl, DJ9IN, reports that DA0IMD was active from Borkum Riff Lightvessel during the "International Marcoi Day" this past weekend. Look for more activity from here using the callsigns DL0KBM and DL0BRF.

EU-094. (Update) Team TM5N will be operators F2FZ, F4AJQ, F4BUX, F4BTP, F4TTR, F5FG, F5AGB, F5IKO, F6DOP, F6EGG, F8BUI, F8CTY, F8UHU and F9IE. Activity will be from St. Nicolas Island (Glenan Islands/DIFM AT-10) from April 26th through May 1st. They then will be active as F6KOP/P from Cigogne Island (DIFM AT-61) on April 28th or 29th. Operations will be on 160m-23cm. QSL via F6KOP.

EU-127. Felix, DL5XL, will be active and signing DL5XL/p from Helgoland Island, July 28-29th. Activity will be on 80/40/20/15/10 meters, using CW only. He plans to participate in the RSGB IOTA Contest as a Single OP/24hr/CW/Island Class entry. QSL cards are "OK" via the bureau. Further information is available at:
http://www.dl5xl.de/
QSL via DL5XL, P.O. Box 1253, D-30984 Gehrden, Germany.

EU-148. The "Castres DX Gang", consisting of operators F5AUB, F5OSN, F5XX, F5RVI, F5DBX, F5UOE, F5BJW, F5BKB, F4CLO, F5JBR and F5VV, will be active from Fort Brescou Island, May 24-28th. Activity will be on CW/SSB, all bands 80-10 meters including the WARC bands. The will use the callsign F5XX/P, however, there will be a special entry in CQ WPX CW Contest CW using the callsign TM5B. QSL via F5XX direct CBA or via French REF Bureau.
Other reference numbers for this operation are:
French Metropolitan Islands Award - DIFM ME001
World Light Houses Award - 0500
International Light Houses Society - FRA 015
French Forts and Castles award - DFCF 34001

EU-174. Will, N2DH, will operate as SV8/N2DH from Thassos, from April 27th through May 4th. Operation will be on 20-10 meters SSB with some possible 75 meters operation. QSL direct to home callsign N2DH.

OC-171/OC-172/OC-187.
Bill, VK4FW, reported this past week that he had to change his planned Queensland operation from OC-138, OC-171 and OC-172 slightly. Due to problems associated with OC-138, he has made the following arrangements. By the time you read this, he should be active from North Coast Centre Group (OC-172) on Monday, April 22nd, for 3 days. From there, he will then go to North Coast (North) Group (OC-187) for 3 days. From there he will head south to activate the North Coast (South) Group (OC-171) for 3 days. As this trip is not funded, Bill would appreciate if you

could help a little when QSLing. He will spend most of his time
on CW on all bands 80-6 meters.

JW, SVALBARD (Rare IOTA). Terje, JW3OHA, reports that he and others are
planning/arranging a DXpedition to a rare Arctic island and are looking
for operators. The operation is planned to take place this year from
May 31st to June 9th from Prins Karls Forland (IOTA EU-063). If interested,
check out the Web page: http://www.dxpedition.org

PY0F, FERNANDO DE NORONHA. Dennis, K7BV, < k7bv@aol.com > will operate
from Fernando de Noronha, May 24th through June 1st. He will sign with a
special callsign throughout the DXpedition. Dennis will be active in the
CQ WPX CW Contest, most likely entering as a SOABHP category. After the
contest he will be very active on all bands 160-6 meters, generally on
CW. Rod, WC7N, < wc7n@gb.wave.net > will serve as Pilot Station, assisting
Dennis, helping 9BDXCC chasers fill empty bands. Logs will be posted on
web site: http://www.qth.com/k7bv/PY0F
This web site is expected to be launched sometime this week with details
of the DXpedition. Steve, KU9C, will handle QSL chores.

QSL INFO AND NEWS.................
Carl, N4AA, editor of "QRZ DX" reports that there has been some confusion
on the callsign for the QSL Manager for 3V8SM and 3V8SQ. John, K1XN,
of the GoList, tells Carl that the information he received was 3V8SM
via DL1DBF: Manfred Wiedemann, Am Feldberg 43, D-57334 Bad Laasphe,
GERMANY.

The correct address for 3W2KF (operated by F5PBL) is: Claude Terrier,
18 allee du Mail, 92360 Meudon la Foret, France.

Robert, S53R, informs OPDX that all direct requests for E4/S53R have
been answered. All contacts made will also be confirmed via bureau
when he is back home for a holiday in July 2001. Many requests for
his recent operations as AP2ARS, EY8/S53R and UK8AXA were received.
QSLs are being printed and will also be answered during the next
holiday. Do not send duplicate requests.

Fran, EA7FTR, reports that he is the QSL Manager for the following
stations: CE3HKF, HR1BY, HR1RGA, HR1RQF and ZP6EM.

It is reported that Ken, N8KR, is having printer problems on his
QSL cards for his October 2000 operation from FP land. He states
to please stand by and QSLs will be out as soon as he receives them.
Also, his XYL wants the dining room table back!

RAC CORRECT ADDRESS. Fred, PY7ZZ/PY0FZ, informs OPDX that there is
a bad listing of his RAC address. The correct address is:
Fred Souto Major, Rua Almedia Belo 241/302 - Bairro Novo, Olinda,
PE 53030-030, Brazil.

Leif, SM5BFJ, informs OPDX that he is QSL Manager for 5X1D, 9Q5TE,
9U5D and 9X/SM5DIC. The QSL information has been "via SM0BFJ", but
from now on the QSL information is "via SM5BFJ". His address is:

Leif Hammarstrom, PL 1053, SE-730 91 Riddarhyttan, SWEDEN.

SPECIAL EVENT. Look for the Mongolian special event station JU1O to be active from Ulaanbaatar between May 5-13th. We contacted Khos, JT1CD, explained what the special event is for and he stated that JU1O will be active during the "National Technical Olympiad". The children of the High Schools of the Mongolia will compete in these championships (which are Amateur radio direction finding, aeromodelling, Ship modelling and Car modelling... etc). QSL via JR0CGJ: Takashi Shimizu, P. O. Box5, Tateshina Kitasaku, Nagano 384-2305 JAPAN.

TT8, CHAD. Look for Eric, F5JKK, to be active starting the 2nd or 3rd week of May. He has asked for the callsign TT8JE again. Eric prefers 6 meters using and FT 847 w/100 watts (maybe more!) into a 5 element Yagi antenna. He states to listen for his CQ on 50.110 kHz and will begin listening on 50.200 kHz (5 to 10 up). His operations will be mainly CW, but there will be some SSB if conditions are good. Eric will be running a beacon using 25 watts on 50.096 kHz. The beacon will send: VVVVV DE TT8JE JK72MC -- (5'') and break (5''). IMPORTANT! Eric reports that he worked many stations in 1998, however, in 2001, he states, "NO dupe or I'll cancel old QSO. Listening carefully on my frequency, don't loose time for you and all others (Sample: When I say Alpha Bravo NO others like Alpha Kilo...). Education and courtesy, no need to say more." Eric will be on HF using the same radio but with a R7000, dipoles and loop antennas. His modes of operation will be RTTY/PSK31 and will try SSTV and CW. He suggests to look for him on the WARC bands and especially on 10 meters. QSL via F6FNU.

TX0, CHESTERFIELD ISLAND (Update). Andy, YS1AG, informs/reports to OPDX that he has received the following information from Kan, JA1BK, about the upcoming TX0 operation. Kan states that rumors of the upcoming TX0C DXpedition being cancelled is FALSE. Only Jacky/F2CW, and Akinori/JA4EKO have dropped out of the DXpedition. There will be only four operators now, Georges/FK8FS, Daniel/FK8FU, Dany/FK8VHY and Philippe/FO3BM. Activity is scheduled to take place April 27th through May 2nd, on HF and the 6 meters band. Pilippe will be the only operator that will listen to 6 meters using a 7 element beam and a FT-100D plus a small amp. All QSLs via JA1BK.

VK9C, COCOS-KEELING ISLAND. Dennis/G3MXJ, Roger/G3SXW and Nigel/G3TXF plan to be active from here as VK9CXJ, VK9CXW and VK9CXF, respectively, from April 28th through May 5th. Activity will be on all nine bands, CW only. As many other DXpeditions will be active during that week, there are two suggested frequencies for each HF band. They will try to always be on one or the other of them: 10108/118, 14008/018, 18078/088, 21008/018, 24898/908 and 28008/018. On the lower frequencies, try 7008, 3508 and 1825 kHz. For their propagation and other details, check the web site: http://www.G3TXF.com/dxtrip/vk9cxf/vk9c.html QSL via home callsign.

VK9M, MELLISH REEF. After three days of sailing, the VK9ML team landed on the Mellish Reef Thursday, April 19th at 2321z. According to a press

release by Adam, VK4CP: "There was some concern that Mellish Reef may not exist as such anymore as it has been a few years since the last DXpedition and there have been several cyclones in that area in recent years. Mellish Reef is only 1 metre above high tide, as was the case when the team arrived." The team is expected to be active until April 24th. Look for them on various bands. For more details on the Mellish Reef Site Survey DXpedition have a look at the web site: http://www.qsl.net/vk9ml

VP8, FALKLAND ISLANDS. By the time you read this, the Scottish team of Gav/GM0GAV, Rob/GM3YTS, Tom/GM4FDM and Jack/GM4COX should be active as VP8SDX until May 8th. Activity will be on all bands 160-10 meters. Their suggested frequencies are:
CW - 1823.5*, 3503, 7003, 10103, 14023, 18073, 21023, 24893, 28023
SSB - 1843*, 3793, 7053, 14193, 18123, 21263, 24923, 28493
RTTY - 14083, 21083, 28083
PSK31 - 14069
* Other frequencies will also be used to accommodate specific country sub-bands (e.g for Japan).
Their goal is to make 30,000 QSOs with two stations on the air. There will be lots of low band activity besides the HF. They plan to keep the WARC bands busy. There will be (as they state) "gallons of CW, a few pints of SSB, a glass or two of RTTY, and maybe a 'wee dram' of PSK31. Their pilot station will be Chris, GM3WOJ. You will be able to send your feedbacks, comments and suggestions to them via E-mail at: vp8sdx@talk21.com
QSLs can be sent via the bureau, E-mail or direct to GM4FDM: Thomas Wylie, 3 Kings Crescent, Elderslie, Renfrewshire, PA5 9AD, Scotland. Check out their interesting Web page at: http://www.hfdx.co.uk/vp8sdx

VQ9, CHAGOS ISLANDS. VQ9IO has been active on 24904 kHz at 1445z and 21017 kHz between 1430-1530z.

Z3, MACEDONIA. Venco informs OPDX that since April 1st, he has changed his callsign from Z31JA to Z36W. He can usually be found on 40/20/17 meters CW after 2230z or on 10 meters after 1400z. QSL via NN6C, or the QRZ.com and CBA (using his old callsign). Venco states any contacts with him for skeds, info... etc, can be made via his E-mail address at: z31ja@mt.net.mk

ZK1, NORTH COOK ISLAND. Victor, ZK1CG, reports to OPDX that Tuatai, ZK1MA, is back in Manihiki, North Cook Island after his long stay in Rarotonga, South Cook as ZK1CY. Tuatai is mainly a CW operator using FT-747GX and dipoles for antennas. His home and radio gear/antennas were completely wipe off the Atoll a few years ago during a hurricane that destroyed 85% of the Atoll. He is slowly recovering from this, Victor/ZK1CG sent Tuatai the FT 747GX to use with battery power. Victor is now operational from South Cook thanks to W7VV (Roger and Sue) who so kindly sent him a rig that he had as a spare. Victor states that they will be donating some antennas to Tuatai after their October CQWW SSB Contest operation. What Tuatai needs now is new a mike for his rig. If you have an old (not too

used) mike for his FT-747GX laying around, please let Victor know and he
will make arrangements to send it to Tuatai. Victor's E-mail address is:
sales@computers.co.ck

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

1133. Beam Headings from UK

Newsgroup: rec.radio.amateur.dx
Date: 2001-04-23 10:41:37 UTC
From: "John M. Sonley" <john@jmsknars.demon.co.uk>
Message-ID: <PSZeeBAhbA56Ew4c@jmsknars.demon.co.uk>
Source record: 17188

Does anyone have a simple ready reference list of beam headings from UK cross referenced with callsign prefixes. Please e-mail direct, as well as to Newsgroup if you have, as I'm away from my computer for a week

Regards

John

Hi all !

Wonder if any one can help with this question.
I am trying to find out from which DXCC country VK9RS operated from on the dates June 11th 1998 and September 23rd 1999.

An old DXCC list indicates that VK9R is NorfolK Island, but that may not be correct for this operation.

It counted for Australia. Don't remember the island name but it was an IOTA counter off the Western Australia coast.

1140. 10 & 11 meter licensing question

Newsgroup: rec.radio.amateur.dx
Date: 2001-04-24 04:20:40 UTC
From: Michael Weaver <dutchman15@earthlink.net>
Message-ID: <sa7F6.4147$Ee1.339942@newsread2.prod.itd.earthlink.net>
Source record: 17195

PLEASE HELP! I am interested in obtaining my license to operate on the 10 & 11 meter bands, but found absolutely no info through the FCC. It has been a while since I have seen the rules regarding licensing. Can anybody point me in the right direction?

Thanks

If you want to operate 11 meter there is no license required and you must
follow FCC rules and local and state laws. To operate 10 meters you need a
Ham General class license that requires passing a test and 5 words per
minute.

No license needed for 11 meters. A license will be needed for 10meters.
Try http://www.arrl.org for more info on an amateur (ham) radio license

Good luck

Received this announcement this morning
--
73 From Rod AC6V In San Diego
700 Ham Topics & 6,000 Links
http://ac6v.com/
I Doubt, Therefore I Might Be!!!
==========
This is Chetan L. Pujara, VU3DMP from Mangalore (West coast of Southern India)
would like to announce that we will be activating the IOTA AS-096, St. Mary's Island
from 5th to 7th May, 2001.

The permission from the Government, WPC (Wireless Planning & Coordination) has
already been granted for this operation. There will 12 operators with the following
callsign active.

VU2MHC(Manipal Club Callsign), VU2SBJ, VU3DMP, VU2MTT, VU2RDQ, VU2PAI, VU2NJN VU2RDJ (YL), VU2HEG, VU2RCT, VU2JIX, VU2GPH & VU2JRO.

we will active on bands from 80 - 10 metres with Yagis, Verticals etc. with CW &
SSB with three station active continously from St. Mary's Island (AS-096). There
is a webpage hosted for more information about the operations on www.vuiota.com .
Qsling will be handled individually for each callsigns, Direct (S.A.S.E)

(Qrz.com,
vuiota.com) or via Buro is OK. Buro request can be sent to qsl@vuiota.com.

73 Chetan L. Pujara, VU3DMP

>I've already had this discussion with another group a few weeks ago, but
>the problem with eqsl.cc is that there is absolutely no security of any
>kind. The question came up as to how one might forge an eqsl card. Easy.

This is FLAT NOT TRUE! They have a good trust model. Not a great
one mind you, but a good one. It is much better the paper QSL cards.
Also we aren't really talking about security models we are talking
about trust models. They are different but related. In the case
of eqsl.cc security is about the same as any other web site on the
net.

Eqsl.cc uses an active trusted arbitrator. Which means that either
the arbitrator has to validate the information or it has to
provide the information. Therefore any QSLs which didn't come
directly from eqsl.cc must be validated by eqsl.cc in order to
be considered trusted and validate. IT IS A VALID TRUST MODEL.

But eqsl.cc has a dark side!!!! eqsl.cc wants to be the only
eqsl services and they have the stated goal of shutdown anyone
who tries to compete with them.

See: http://www.eqsl.cc/qslcard/reasonswhy.cfm

I don't think this is in the sprirt of amateur radio. It isn't
something I want to support.

Wow, what scum! Yet another reason not to support this joke of an electronic QSL system. I wonder what "technology" they intend to patent - probably something as fundamentally unique as "One Click" on Amazon?

From: Bill Tippett <btippett@alum.MIT.edu>
Message-ID: <3AE8CB61.91D19104@alum.MIT.edu>
Source record: 17266

Info from Carl N4AA:

I have just discovered that the FCC made an error in my zip code when they
processed a change of address several months ago, and I never noticed their
mistake.. The post office brought this to my attention when all the mail
started coming in for HK3JJH/HK0.

Please help me spread the word that the correct address for N4AA is:
Carl Smith
PO Box 249
Leicester, NC 28748-0249

The error is in the last four digits of the zip code being shown as 0279.
Those last four digits aren't even required but it is causing me great
difficulty with my local post office. It could result in mail being
delayed or even rejected because of this error.

Thanks for any help you can give in getting this information to all
possible QSL databases.

73,

Carl, N4AA

1163. Outgoing QSL Bureau

Newsgroup: rec.radio.amateur.dx
Date: 2001-04-27 15:16:27 UTC
From: Allen <wookie8u@hotmail.com>
Message-ID: <f3gG6.33432$U4.7141358@news1.rdc1.tn.home.com>
Source record: 17268

Is using the outgoing ARRL QSL bureau a good idea? I looked at their web page and had one further question about using it. Do you put QSL cards in separate envelopes (as if mailing them) within the large group envelope or do you just sort the cards and stick them in the envelope with your 4 bucks? This is my first time to try to QSL DX (I just got my general ticket a month or so ago) so pardon my ignorance.

Thanks,
Allen

Allen -- just sort them, put a rubber band around them and place them in an envelope. I use a padded envelope, so the PO doesn't rip up the envelope (inadvertently of course) -- has happened.

You didn't put a callsign down, but you should contact your local
Incoming buro as well. Depending on your call, that will dictate who
will handle your cards as they come in from foreign buros.

Check the ARRL website. They have the addresses and specifics for each
of the 10 US incoming buros

1166. West coast DXers -- Do you need Mapelo?

Newsgroup: rec.radio.amateur.dx
Date: 2001-04-27 16:04:22 UTC
From: AC6V <ac6v@ix.netcom.com>
Message-ID: <3AE99885.2B0C51B8@ix.netcom.com>
Source record: 17271

After listening on all bands (many hours) since Pedro has been on Mapelo, for me the optimum band is 20M (usually 14.260 MHz) at 0230 to 0330Z. Couldn't hear him on any other band ever and very very weak on 20M -- only a few nights out of the several weeks he has been there. Last night was the best but still exceptionally weak, but workable. Not many calling at 0330Z or he has worked em all!! If the QRM is low -- open up your bandwidth, only way I could hear him.

Good Luck -- your ESP may vary

Definitely. Especially if you have a significant number of cards to send, it's a WHOLE LOT cheaper than going direct yourself. Not to mention a lot easier than looking up all those addresses.

The downside is that it's relatively slow. Expect between 3 and 12 months for your card to reach the DX station, and another 3-12 months for his card to get back to you.

>I looked at their web page and had one further question about using it. Do

Just sort the cards & stick them in the envelope. At ARRL HQ, they take all your cards going to, say, Germany, and stick them in a box with all the cards other ARRL members are sending to Germany. When the box is full, they ship it all to the German equivalent of ARRL, which handles distributing the cards to their members.

You need to also check out the *incoming* QSL bureau, as that's where the DX stations' cards will end up when they reply to yours. You need to send either envelopes or money for postage credits to the appropriate bureau for your callsign.

Excellent advice. Will add you need to be an ARRL member for the outgoing bureau, but non-ARRL members can use the incoming bureau. If you work any DX - any at all, be sure to send your incoming district - money for envelopes and postage. I hear the incoming bureaus are loaded with QSL cards that folks have not supplied the info for mailing.

Hi OMs,

The team member BA7QT reported, they setup two stations here. The local
power
supply in Tam island is unstable, sometimes they have to QRT, and power will
stop on 0400z-0430z, 0900z-0930z, 1500z-1530z, 1900z-1930z, 2300z-0000z
every
day. BA1DU also reported electromagnetism environment there not so good,
that's make trouble for copy weak single, they started on air on 1400z
26-Apr-2001 around 21.255MHz and 14.255MHz SSB, if you worked 3W7D on
21.040MHz CW on 0700z-1530z, it is a pirate.

Very true.

I forgot to mention the part about needing to be an ARRL member. If you
work large amounts of DX, the outgoing bureau makes membership well worth it
all by itself. The magazine and the representation in Washington are just
free bonuses.

I exchanged some email with Pedro a couple of years ago - unfortunately for us in NA, the only reasonable landing site on Malpelo is on the south side of the island, isolated from us by the mountainous peak of the island itself. Apparently there is no safe place to land on the north side, and no way to climb to the top. Most extremely rare countries are extremely rare for a good reason...

HK3JJH is on Mapelo Island now and is shielded from the Western USA by the rock he is on. For my station and several others here, his signal is non-exsistent in So Calif on all bands except 20M and only at 0300Z +/- an hour or so and then just above the noise and at best only a few nights in 3 weeks.

Qustion is would a receiving loop for that band or bands up to 10M be effective, any one built one and how well does it work????

Although noise levels here are low, I have an R-7000 vertical and can not use any other antenna (HOA).

Am aware of the effectiveness on 160M and 80M

Hi OMs,

3W7D team member BA7QT 1410z 29-Apr reported, power supply in Tam island
still unstable, and sometimes break suddenly, they plan to QRT on 2300z
1-May.

Terry Liang (BD7NQ)

The Ohio/Penn DX PacketCluster
DX Bulletin No. 509
BID: $OPDX.509
April 30, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, N2OO, N3SL, W3HC, W3UR & The Daily DX, K4JZ, N4AA & QRZ DX, N4GN, W4WX, AC6WO, K6KM, K7BV, K7ZZ, K8YSE, N9RD, 9A7K, CT1END, CX6VM, DL1EK & DX News Letter, DF6QN, DK8LV, DL7IO, DL7VOA, F5NOD, F5NQL, F5UJK & WLH Board, HB9DLE, HL1IWD, I1JQJ/IK1ADH & 425 DX News, IK4NQL, IK2XDE, IV3SKB, JI3DST, RN3RQ, S52DG, SM7AED, SQ4NR, VE3BX, VU3DMP, VU2SBJ and YS1RR for the following DX information.

"SO MUCH ACTIVITY NO - ROOM TO REPORT ALL OF IT!..... de Tedd KB8NW"

TIP OF THE WEEK: When sending regular messages, turn OFF your "HTML" format in your mail programs and use plain text. This will save a lot of bandwidth. Using "HTML" usually makes the message twice as big and copies itself twice in one message!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22/April, through Sunday, 29/April there were 231 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1U, 4X, 5A, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/a, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HK0/m, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JT, JW, JX, JY, K, KH0, KH2, KH4, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TX0, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9M, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XX9, XZ, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/s, ZL, ZP, ZS
There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2

There were 55 ITU Zones available during the past week.
ITU Zones that were not active are: 3,4,9,15,21,22,23,24,25,
26,31,34,35,43,58,59,69,70,71,72,74

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3B6RF THE AGALEGA DXPEDITION (Update). As this was being written, the 3B6RF team is heading to Agalega and plans to arrive around May 2nd or 3rd. The team will start operating 10 or 12 hours after landing and stay active until the 16th or 17th of May. From a press release by Steve, N3SL, the advance team for 3B6RF had been on 3B8 for a week where they obtained the license and landing permit, and purchased the perishable supplies and arranged final transportation. The remaining crew should have been in 3B8-land by Saturday, April 28th. Their flight arrangements now calls for travel to 3B6 via S7, and they expect to be on the air by May 3rd, and to begin the tear down process on May 16th. They will not begin operations until all 6 stations are assembled, which includes the massive array of antennas. Once they start, they will be on all bands, 160-6 plus satellite, and all modes (CW, SSB, RTTY/PSK, FM, and SSTV). Their team of 21 members, many of whom gave you 3B7, is giving concentrated effort to North America, with extra attention to the low bands. Unfortunately, they do not share common darkness past the Midwest, so pray hard to the 160 gods! There may be times they have 2 or even 3 stations on 160 simultaneously if conditions warrant. They fully expect to finish with 100,000+ QSOs, approximately 65,000 on CW and at least 2,500 on RTTY/PSK. The digital modes will commence on day 1, but with times limited to 1 hour/continent until the CW pile-ups are worked down a bit. Then more effort will be placed on digital. PSK31 will be a bit unique, as they are using software capable of decoding multiple signals simultaneously. They will listen both up and down 1+ kHz, allowing them to work someone "up 1" while already decoding the next station "down 1" and vice versa, keeping the rates as high as possible. Standard DX frequencies will be used, and they will always work split. The entire band plan is spelled out on their web page. A color QSL is planned, so QSLing will not begin for some time after the expedition is over. North American (Canada, U.S., and Mexico) QSLs go via Kimberly Larson, the daughter of N3SL, at N3SL's CBA: 22 N Hidden Acres Drive, Sioux City, IA, 51108. All other QSLs via HB9AGH. As usual, the bureau will be used for cards received via the bureau or without sufficient return postage. Their web page gratefully acknowledges all of their sponsors and contributors to date. Each team member has put forth a minimum of 6000 USD toward this effort, but with the change in travel plans via S7, significant, unexpected expenses have been incurred, and further assistance/donations will be greatly appreciated. Information and feedback during the expedition should be sent via their American pilot station: Bill Avery, K6GNX, at " bavery@telemetry.com ". They especially want feedback from the western half of the U.S., where 3B6 is needed most. Online logs will be updated daily during the expedition. For more info and daily news, check out the 3B6RF Web page at: http://www.agalega2000.ch

3D2/R, ROTUMA. Katsumi, JA1NVF, is now active as 3D2NV/R. His length of stay is unknown at this time. He has been very active on 20/17/15/12/10 meters SSB and FM 10 meters. QSL via home callsign.

4N8, KOSOVO, YUGOSLAVIA. Boyan, LZ1BJ, was signing 4N8/LZ1BJ from Pristina this past week. Activity seems to be on 40-10 meters CW/SSB. QSL via his home callsign.

8Q, MALDIVES. Only a few more days to work Peter, HA2SX, as 8Q7KK. He will go QRT on May 4th. His activity has been mainly on CW. Check 3504, 7005, 10107, 14003, 18080 and 21005 kHz. QSL via HA2SX.

9A, CROATIA (Lighthouse Operation). Franjo, 9A2MF, has started operation from the Croatian lighthouse Savudrija. Franjo is a lighthouse keeper who has been in service for the past 20 years, and stationed on many Croatian lighthouses. Currently, he is stationed on the SAVUDRIJA, where he will be for the next several years. He has already erected an antenna on the lighthouse building. The "Lighthouse Savudrija" is valid for Croatian Light House Award. Savudrija is a CLH-73. Hams interested in the Croatian Light House Award can get all the details on the following Web page at: http://www.qsl.net/9a7k

C6A, BAHAMAS. Bill, W4WX, will be operating from the Treasure Cay, Bahamas, May 7-14th, as W4WX/C6A. He will be active on RTTY and some SSB on the WARC bands. QSL via home call.

CS, PORTUGAL. Operators CT1EPS, CT1ETX, CT1END, CT1AHU, EA7KW and EA7AH will be active from "Point of Sagres" (locator IM56MX) as CS0RCL/p, June 2-3rd. This operation is valid for the "Castles and Forts Portuguese Award", reference numbers: DCFP (F-054), DMP (815) and DFP (FAL-02). Their activity will be on HF, 6 meters, 2 meters and 23cm. Skeds can be made for 6/2 meters and 23cm via E-mail through CT1EPS at: ct1eps@netc.pt QSL via bureau or direct to CT1EPS.

CW, URUGUAY. Jorge, CX6VM, reports that he will be active in the next CQ WPX CW Contest as CW6V. He will be operating as a Single Operator/ All Bands/ Tribander / Single elements category (SOAB TS). Jorge will be mostly on 10/15/20/40 meters due to the difficultly of getting 6 point QSOs on the others low bands. QSL to his QSL Manager W3HNK: Joseph Arcure Jr., P.O.Box 73, Edgemont PA 19028, USA

EAST TIMOR VIDEO. Dennis/K7BV and Dick/N6FF have announced that a 32 minute video titled, 4W/K7BV 4W/N6FF Timor Lorosae DXpedition - "Memories Beyond the Pileups", is now available in VHS 1/2" tape format (standard USA) or on a CD for 15USD + 5USD handling (USA via Priority Mail). They will also make the video available in PAL format if there is sufficient interest. If interested, contact K7BV, and he will forward all inquires on to the proper people. Please send inquiries via E-mail to: k7bv@aol.com
Or by (snail) mail to: Dennis Motschenbacher, K7BV, 4357 Appollonio Way, Washoe Valley, NV 89704.

FP, ST. PIERRE & MIQUELON ISLANDS. Wendell, K4JZ, has announced what he calls "The Poor Boy DX-Pedition". From June 14-18th, Wendell will be operating from FP-land using the callsign FP/K4JZ. His operations will

be on 40-10 meters SSB. QSL To K4JZ with SASE. This is a one man operation, and any donations will be appreciated.

HC8, GALAPAGOS ISLAND. Operators Robert/N5KO, Charles/W6OAT, Ken/K6TA, Kay/K6KO, Jon/N0JK and George/K5PI will activate HC8N in the CQ WPX CW Contest as a Multi-Multi catagory. QSL via AA5BT.

HK0, MALPELO. Pedro, HK3JJH/HK0, continues to be active. This will be the last week to work him. Activity will end May 7th. QSL Manager Carl, N4AA, reports he will NOT have cards/logs until mid-May after Pedro returns home. He estimates that it will be at least June before everything is in place to start answering the hundreds of requests pouring in. PLEASE READ SPECIAL NOTE under "QSL INFO AND NEWS...."

HV, VATICAN. Look for HV5PUK to be active from the Vatican City on May 3rd, as usual during the "V Lateran Journey". Operations will be on HF, 6 and 2 meters starting around 0800z. QSL to Luca, IW0DJB, the QSL Manager of HV5PUL.

IOTA NEWS.....
AS-NEW. Lee, HL1IWD, informs OPDX that the Korea DX Club regrets to say that their scheduled (May 5-6th) operation for the Kangwondo Province has been cancelled. They could not get the landing permission from government's Ministry of Defence. He states that a few years ago, a North Korean submarine was wrecked and captured near where they were going to operate. After that, the military's HQ has been sensitive to island landing, especially overnight stays. Also, they do not understand about ham radio and IOTAs! They will try to find another way.

AS-056. Joe, JA4PXE/6, will be active from Danjo Island starting around 2200z on May 4th, ending May 6th at 2200z. He will be operating on 14260 and 21260 kHz +/- QRM, and 50.145 MHz. QSL via JA4PXE.

AS-096. Chetan, VU3DMP, from Mangalore (West coast of Southern India) and Srikanth, VU2SBJ from Manipal, informs OPDX that a team of Indian operators will be activating St. Mary's Island from May 5-7th. The un-inhabited, bare and very small St. Mary's Island is located in the Udupi district in the state of Karnataka. The permission from the government, WPC (Wireless Planning & Coordination) has already been granted for this operation. WX permitting, they intend to run 3 stations active on most bands most of the time with about 12 operators. The stations will be active on CW and Phone. The 12 operators that were mentioned are: VU2MHC (Manipal Club Callsign), VU2SBJ, VU3DMP, VU2MTT, VU2RDQ, VU2PAI, VU2NJN VU2RDJ (YL), VU2HEG, VU2RCT, VU2JIX, VU2GPH and VU2JRO. Their activity will be on 80-10 meters with Yagis, Verticals etc..., on CW and SSB with three station active continuously. There is a web page with more information about the operations on: http://www.vuiota.com QSLing will be handled individually for each callsigns, direct (S.A.S.E) (Qrz.com, vuiota.com) or via Bureau is OK. Bureau

requests can be sent to: qsl@vuiota.com

EU-048. Francois, F2GL, will be active from Houat Island now through May 6th. Operations will be on CW/SSB, 80-10 meters (including the WARC bands). QSL to F2GL, direct or via bureau.

EU-130. Andy/IV3SKB and Mauro/IV3HAX will be active from Martignano Island (IIA-UD-005), May 1-7th. Activity will be 40-10 meters, including the WARC bands, on CW/SSB. QSL via IV3HAX.

EU-136. Dusan, S52DG, will be active as 9A/S52DG/P from Krk Island (CI-046 - Croatian Island Award), now through May 1st. His activity will be 80-10 meters. QSL via CBA or bureau.

J5, GUINEA-BISSAU. Baldur, DJ6SI, and others have activated the callsign J5X now through May 11th. Their activity will be on 160-6 meters on SSB, CW, RTTY, FSK, SSTV. QSL CW/SSB to DJ6SI. QSL RTTY, FSK, SSTV to DL1QW.

JW, SVALBARD (Update/Rare IOTA). "DXpedition Artic 2001" will take place during June 1-9th, from Prins Karls Forland Island (Polpynten Area) which has the rare IOTA EU-063 (Spitsbergen's Coastal Islands). The callsign will be JW0PK. The team operators are as follows: DL5NAM/Christoph, ES1CH/ Aleksei, F5PBL/Claude, I2ADN/Angelo, IK2XDE/Andrea, IK2XDF/Giampaoalo, IK4MED/Dario, LA3OHA/JW3OHA/Terje, LA8AV/JW8AV/Egil, ON4AMX/Marc, S57FYL/ Aleksandra, S53AC/Atila, SP5DRH/Jacek, SP5LCC/Witold, US0VA/Igor (Doctor of the team), XE1BEF/Hector and others (members of logistic & security). They plan to operate on all bands and modes on the following suggested frequencies:
SSB - 1840, 3790, 7060, 14195, 18145, 21295, 24950, 28460, 50145, 144250
CW - 1822, 3505, 7005, 10105, 14020, 18080, 21020, 24895, 28020, 50095, 144025
RTTY - 14080, 21080, 28080 | JW7SIX Beacon Frq. 50.047 Mhz.
PSK31- 14071, 21071, 28071 | WW Locator JQ68TB
FM - 29200 |
There will be activity on the satellites/RTTY/PSK31. They will try 6 meters 24 hours a day. They will try the lower bands, but they will have daylight during the operation, so low bands QSO will be difficult. They are looking for sponsors or support, so if you want send them a contribu-tions, you can use this address: DXPEDITION ORG., P.O. Box 584, 9171 Longyearbyen, Svalbard Islands, (Norway). QSL Manager is SP5DRH, QSL via the bureau is ok. If you prefer a direct QSL from SP5DRH, send it to: Mr. Jacek Kubiak, P.O.Box 4, 00-957 Warszawa - Poland. For more info, please send E-mail to them at: dxpedition2000@dxpedition.org
Their Web Page is at: http://www.dxpedition.org

KH1, BAKER AND HOWLAND ISLANDS. Raymundo, YS1RR, announced this past weekend that the same team which was active from Conway Reef 2001, is planning a DXpedition to Baker and Howland Islands at the end of the year. The expect it to take place during the months of September/October 2001, with alternative schedule for the months of February/March 2002. The leader of DXpedition will be Hrane, YT1AD. More datails and plans are forthcoming soon.

LU, SOUTH ORKNEY ISLAND. A station signing LU1ZA from here was active for about an hour on April 21st on 28325 kHz on SSB. His activity started about 1830z, and the operator could not speak English. It is unknown how long he will be there. If anyone knows more information about this operator/station, please pass it on to OPDX. There are many who need this station as a new one.

NEW DXER IN THE FAMILY? The DX team of Holger/DL7IO and Birgit/DL7IQ added an addition to the family on Sunday, April 22nd. NODXA's friend Holger informs OPDX that the mother Birgit and new daughter Xenia are fine. Xenia weighted in at 3590g and her length was 51 cm. She has long black hair (like her sister Saskia had). Congratulations to both Birgit and Holger! By the way, the first pictures of the new arrival are available at the following Web link: http://www.ea8.de/xenia.html

QSL INFO AND NEWS.....
IMPORTANT NOTICE. Carl, N4AA, editor of QRZ DX and QSL Manager for Pedro, HK3JJH/HK0, reports that he has just learned that the FCC made an error in his zip code when they processed a change of address several months ago and he never noticed their mistake. The post office brought this to his attention when all the mail started coming in for HK3JJH/HK0. Please help and spread the word that the correct address for N4AA is: Carl Smith, PO Box 249, Leicester, NC 28748-0249

Mac, W3HC, has informed OPDX that he is now the QSL Manager for EP3SP.

Gil, F5NOD, reports that Eric, F5SIH (ex-FO0BOG), states that the QSL cards are printed, and the first package of QSL should be in the mail as of this past weekend.

FR/T QSL STATUS. Gil, F5NOD, reports that 1000 QSLs are still in the hands of Larry F5PYI, (QSL receieved in August/September). Larry is back at home and they will mail them very soon. They have sent about 8000 QSLs out, but they are still working on the QSLing and there is about 1000 QSL cards yet to go. Gil states the following:
- "PLEASE, Do not resend QSL request !! (save your green stamps)
- I WILL INFORM YOU WHEN ALL QSL WILL BE SENT !! AFTER THAT YOU CAN RESEND REQUESTS .. FOR LOST MAIL etc... ...
- We will start Bureau QSLing after all direct QSLs are sent
- DO NOT SEND ME (or to Erwann F6JJX) E-mail "Did you received my QSL ?" >> We really don't know!
- DON'T FORGET to put with your request , postage contribution and SAE (SELF ADRESSED Envelop) many of you forgot the SAE!!! ... Also don't forget to write your country on the SAE!! Many of you forgot it too ... That's the major reason for lost mail."

QSL K5K STATUS. The 425 DX News reports that Tom, N4XP, is processing and mailing QSLs daily. He started six weeks ago, but the queue was over 30,000, so it will take a while.

R2/DK8LV STATUS. Stephan, DK8LV, reports that all cards received have not been answered yet. The reason for this is that after his stay in

Kaliningrad last year, friends in UA2-land ordered the QSL cards by UA3AA in Moscow. He received the package with the cards last December, but they were all printed with the wrong callsign (R2/DL8LV!). So, Stephan had to order new cards again, but they have not arrived yet - shipment date was February 22nd (!!). He states that he will wait until the end of April, and if the cards are not received by then, he will look for a new printer. Stephan will answer all cards as soon as they are ready from the printer.

QSLs for TA0/IT9YRE/p and TA0/IT9WDY/p go to IT9YRE either direct (Ferdinando Rubino, P.O. Box 30, 96012 Avola - SR, Italy) or through the ARI bureau.

The team of operators that were active from Enewetak as V73E are back on Kwajalein as this bulletin was being prepared. They made about 18,000 QSOs. QSL via WF5T. A Web site has been set up for this operation at: http://www.sixmeters.com/v73e

Bill, K6KM, reports that all direct QSLs for VK9NOO and VK9NNN have been answered. No bureau cards have been received yet. He mentions that about 5% of the cards had the wrong date. NONE had time off by more than five minutes. Bill states, "Apparently many ops don't know that U. S. postage to almost anywhere is now 80 cents. Many cards had 60 cent stamps. Correct U. S. postage is best, 1 USD is almost as good, IRCs are a pain but they work (only 1 required). Envelopes with peel-off stickies are GREAT! Thanks to those who sent them!"

Bob Schenck, N2OO/9M6OO/V85OO, announced the formation of "The QSL Manager's Society". This will be a web based "organization" that will act as a "point of contact" for quality QSL managers, and for DXpeditions or DX stations looking for one. It will also provide a central source of information useful to any QSL manager. Please visit the web page at: http://www.qsl.net/qslmanagers

SAD NOTE. Bob Schenck, N2OO/9M6OO/V85OO, sadly reported this week the passing of H.G. Hassan, V85HG (aka V8HG). Hassan was always a strong and steady voice for Ham Radio in Brunei. He will be sorely missed. Bob mentions that a nice photo of Hassan can be found on the Buckmaster callsign server at the web site: http://buck.com/cgi-bin/do_hamcallexe (enter V85HG). OPDX and the DX community send out our deepest sympathy to the family and friends.

SPECIAL EVENT. During the celebration of the 56th Anniversary of the end World War II, the members of the "Michurinsk Contest Groupe" will activate the special event stations RP3RST, RP3RTG, RP3RTK and RP3RZK between May 5-9th and May 12-13th (including the "ARI DX" and "CQ-M" contests). If you make contacts with these stations (CIS stations - 15 QSOs, EU stations - 10 QSOs, DX stations - 5 QSOs; dupes are valid on different bands or modes) you will receive a "MCG-medal" trophy free of charge (please, send only 2 IRCs for postal expenses). QSLs for all these stations are via RN3RQ (direct, bureau or E-mail requests for bureau cards is OK): Jack Yatskiv, P.O.Box 30, Michurinsk 393760, Russia. His E-mail address

is: mcg@pub.tmb.ru
All QSL requests for the 2000 year activity were sent via the bureau.

"THE MOBILE DXER" (New Book). Dave, AC6WO, has informed OPDX that he has written a new book for "The Mobile DXer". This book is the "First and Only" book devoted entirely to Mobile Dxing. "The Mobile DXer" will be introduced to the Amateur Radio community by CQ Publications next month at Dayton. If you are interested in Mobile DXing and are going to Dayton, stop by the CQ Booth and take a peek at "The Mobile DXer".

TK, CORSICA (IOTA Activity). Pierre/F5MOG and Jean-Pierre/F1AHO, will be active from North Corsica (EU-014, DIFM TK001) near cap Corse now through May 6th, as TK/F5MOG and TK/F1AHO. Activity will be on the HF bands, both CW and SSB, every day after 4:00 PM (their local time). On April 29th or May 1st (according to boat possibilities), check for them to be active from Giraglia Island (EU 164, DIFM TK 007, WLH 0511). On May 5 and 6th, Jean Pierre, F1AHO, will be active on hyper (5.7, 10 and 24 Ghz). QSL via F5MOG, direct CBA or via French REF Bureau.

TX0, CHESTERFIELD ISLAND. The TX0C team is now active until about May 2nd or 3rd. Activity will be on 160-6 meters CW/SSB. QSL via JA1BK.

VK9C, COCOS-KEELING ISLAND. The English team of three operators is very active on 30-10 meters CW/SSB (frequencies listed in OPDX.508). Activity by VK9CXF, VK9CXJ and VK9CXW will last until May 5th.

VP8, FALKLAND ISLANDS. The Scottish team of 4 four operators is making it easy for anyone who needs this on CW. VP8SDX is on ALL bands 160-10 meters (frequencies listed in OPDX.508). Activity will last until May 8th.

XX9, MACAO. Arto, OH2KW, will be on the air again from here. He will be active between May 18-20th and during the CQ WPX CW Contest (May 26-27th). His callsign will again be XX9TKW. QSL via his home callsign, via the bureau or CBA.

ZK1, NORTH & SOUTH COOK ISLANDS. Remember to look for Uwe/DL9NDS and Klaus/DL7NFK to be active as ZK1NDS and ZK1NFK (refer to OPDX.500). By the time you read this, they should be active. Activity will last until May 18th. They will activate a few IOTAs during their stay: Rarotonga (OC-013), Mangaja Island (OC-159), Aitutaki Island (OC-083) and Manihiki (OC-014). Their emphasis will be on the modes RTTY/PSK31/MFSK16. QSL via their home callsigns. They will have an online log available at:
http://www.dl9nds.de/Cook/cook.html

ZL7, CHATHAM ISLANDS. Ed, K8VIR/ZL4IR, is expected to be here on business during the next few weeks. He will operate as ZL7IR during his spare time. Suggested frequencies are: 14260, 18130 and 21260 kHz. QSL direct via W8WC.

1191. Re: Using satellites

Newsgroup: rec.radio.amateur.dx
Date: 2001-05-01 03:28:56 UTC
From: Bernard Poskus and Cheryl Blehm-Poskus <hamdan@ix.netcom.com>
Message-ID: <3AEE2D78.30F24962@ix.netcom.com>
Source record: 17296

Dear Ken:

You could work RS-12 given your current setup. It is considered the entry level satellite. You would key your 2m FM rig to send a CW type signal on the uplink. You would listen on 10 meters on the downlink (a dipole is good enough for an antenna). I have worked setups like that. I suggest that you check out the AMSAT website for more information. You can find it at www.amsat.org. It will have all kinds of information on RS-12 and all the other amateur satellites.
I would suggest that you get good tracking information first. You need to know when they are coming over, so you can listen for them. There is a website which I believe is called "Heavens Above" or something like that. If you get to it, you only need to plug in your lattitude and longitude, and it will tell you the passes for a whole host of satellites. Once you get that down for RS-12 (or RS-13, I forget which one is turned on right now), you should listen on the downlink so you can get a feel for operation. The RS 12 downlink passband is from 29.410 to 29.450mhz, and you should first listen for its beacon at 29.408mhz (remember, due to doppler effect, the beacon and all frequencies will actually appear higher than listed and will slowly change throughout the course of the pass to the point that the signals will actually appear lower than listed near the end of the pass - you'll hear the effect of doppler on actual signals from other hams because their signals will appear to drift). For RS-13, the downlink passband is from 29.460 to 29.5 mhz, with the beacon at 29.458mhz. The beacon will just be an automated cw signal.
One thing about satellites, they are not dependent on sunspots or propagation conditions. I love to chase dx, but the satellites are a hoot as well.

Let me know if I can help further

Source record: 17298

I've pretty much given up on eQSL.cc for a different reason - with the current website coding, it is simply nearly impossible for a very active operator to use.

I was unaware of the site until I started playing with PSK31 a few weeks ago. I am however quite active on CW. (nearly 61,000 QSOs in my log) When a couple of PSK31 operators asked me to QSL via this site, I obliged - and discovered I had several hundred eQSLs waiting.

It is not possible to confirm multiple eQSLs at once. Every time you confirm one, it sends back your entire list - in my case, about 350KB of data. (which takes about 2 minutes to send) Multiply that by several hundred eQSLs and you have a prohibitive task.

And then, you have to double it because after confirming an eQSL, you have to either archive or download it.

It should be possible to mark multiple eQSLs to be confirmed or archived with a single action. This would speed the operation immensely - and make it practical for me to use the service.

Unless/until that happens, W9WI will not be responding to eQSLs. If you want my card, you'll have to send yours the old-fashioned way. (and I *do* QSL 100% for physical cards.)

Thanks for all the info, thats exactly what I was looking for. I can see that there will be a bit of ramp up time to get going with QSOs.
I could only find RS-13 on heavens-above.com, but another source seemed to indicate that RS-12 and RS-13 have the same orbit. In any case I'll give it a listen when it comes into view.

Thanks es 73

Yep. It was reasonably well-designed for the occasional operator who generates a handful of cards, but it's a big problem for those who are more active.

The ADIF Upload option would be an interesting choice - except that an ASCII CSV backup of my 60,000+-QSO log is approximately 11 megabytes in size. I'm not intimately familiar with the ADIF format but from what little I've seen it would be even larger.

I wrote directly to the sysop this morning & was told mine wasn't the first such comment; they're investigating ways to address the situation. Being an absolute Novice at dynamic Web programming I'll presume this is not a trivial task<g>. At least they acknowledge there's a problem; that's the first step.

1198. PR: TR and CSS begin talks on contesting program

Newsgroup: rec.radio.amateur.dx
Date: 2001-05-02 16:11:28 UTC
From: Rick Ruhl <ricker@cssincorp.com>
Message-ID: <1jWH6.5166$j76.152198@news1.atl>
Source record: 17052

CSS and N6TR begin discussions on Windows(tm) based contesting
software.

Program would use TR and Log Windows technology for ease of use and
powerful features.

Muscle Shoals, Alabama. 1 May 2001: Creative Services Software
announced today they have entered into discussions with Larry (Tree)
Tyree, N6TR to research the feasibility of incorporating both
TR Log and Log Windows technology into a next generation contesting
program.

"Looking into the future, we're seeing more and more hams getting
into contesting.", said Rick Ruhl, W4PC, President of Creative
Services Software, Inc. "Using the 'best of' technology from
TR Log and Log Windows, it's a good base for a next generation
contesting program with hooks inot our logging program for
keeping track of awards and contacts."

"Partnering with Log Windows will allow the TR Log concept to become
available in the windows environment." said Larry "Tree" Tyree, N6TR,
owner of TR Log.

The DOS version of TR Log will still be sold by N6TR and the current
distributors. The windows version will be developed, sold, and supported
by CSS and its dealer network.

Hams use TR Log and Log Windows worldwide.

Log Windows is owned by SCO, Inc and is maintained by Creative
Services Software.

Creative Services Software is at http://www.cssincorp.com
TR Log is at http://www.qth.com/tr
The Log Windows home page is at http://www.logwindows.com

Windows is a Registered Trademark of Microsoft Corperation

Questions and Answers about the CSS and N6TR press release:

Q: Does this mean that the DOS version of TR Log is dead?

A: No. The DOS version of TR Log will continue to be updated and
enhanced just as it would have without this agreement. TR Log
for DOS would only die if everyone decided the windows version
was preferred.

Q: Will Creative Services Software take over the DOS version of TR Log as well?

A: No. The DOS version of TR Log continues to be owned by N6TR.

Q: How can I upgrade to new windows version?

A: Details still need to be worked out (after all, we don't have any software yet). The Windows based contesting module will be a separate program from Log Windows (you don't need Log Windows to run the program). The contesting module will interface with Log Windows to allow full data exportation.

Q: Will future TR Log DOS features be exported to the windows version? How about the other way around?

A: Some features (such as support for new contests) can move very easily from one program to the other. Other features will be more difficult. Essentially, they will be separate programs after the initial development.

Q: Who do I call for support of the windows version?

A: CSS will be supporting the program. There will likely be a separate mail list generated for the windows version, which can be used to ask questions.

Q: Does this announcement explain why TR Log wasn't at Dayton this year?

A: No. K5TR and N6TR previously announced their intention to take a year off from Dayton last August.

Q: Will there be any changes in the distribution of TR Log?

A: None are planned at this time. The TR Log distributors will continue to sell and support the DOS version. CSS will market and support the windows version.

I've looked and unfortunately, so far no. For SSB contesting, TRLog will
run well under DOSEmu. For CW, other processes will steal too many clock
cycles & it'll sound like a cat chasing catnip across your code key.

Within the past couple of years there was an article in QST about a DXpedition to an island in the Baltic that is shared, I think, between Sweden and Finland (not sure if I remember the countries correctly). I've tried searching the QST index at the ARRL web site but can't find it there. Does anyone remember the article and what the name of the island was? Thanks.

Download this free program and learn to use it:
http://www.qsl.net/w6elprop/

It is one of the best propagation programs around and will answer most
of the questions you posed.

1208. VP8SDX Dxpedition Observation

Newsgroup: rec.radio.amateur.dx
Date: 2001-05-03 20:27:04 UTC
From: thompson@mindspring.com
Message-ID: <9csevq$1tg$1@slb7.atl.mindspring.net>
Source record: 17062

The VP8SDX operation has been 95% CW and when they do come up on SSB they seem to work Europe or Japan.
They were on 24935 today QSX up 5 to 10. I called for a while using 100W then 300W and finally put on my 1.5KW amp
to work them. A LU called me afterward to say I was much louder then the EU stations the whole time. Now they seemed to be beaming EU as they were reported to be S9 there but only S7 in SE USA. The LU says he hears hundreds of USA calling but only a few QSOs. He also said that they will not answer the LU calls (I hear him on the band a lot and he has a strong signal here).

I only ask that they tell USA and South America that they prefer other QSOs or tell us not to call until they are ready for us. Its unfair that they work one area but that's their option...just tell us!

Pedro have done one great job working stations. If you follow his instructions (and he knows that with his low power that he is marginal at times) he is easy to work. I filled in 24Mhz and 40 meters plus worked him on three other bands. He is a one man show so cut the signal to noise level and gripes. Wish some of the other recent Dxpeditions would do as well.

One quick and easy way is to listen to WWV on all it's frequencies. Always use the same antenna (non-rotatable), but do it at several different times of day, and make a simple chart of signal strength vs time of day. Within a few weeks you'll develop a feel for when the bands are in good condition.

Your statement is unoriginal and weak.

So, you base your respect for people on whether or not they follow the laws that your local, state and federal government imposes on them?

Let me ask you this then, if you were around during prohibition (were you?), would you have disrespected bootleggers and consumers of alcoholic beverages up until the very point where the 18th amendment was repealed?

Good thing all those amendments came along abolishing slavery and granting women the right to vote or you still wouldn't have respect for women or Negroes.

Well, just take a look at Bill Clinton ....

>Let me ask you this then, if you were around during prohibition (were you?),
>would you have disrespected bootleggers and consumers of alcoholic beverages
>up until the very point where the 18th amendment was repealed?

Probably not. However I do respect the values of H.D.T. At least he
broke the law for much better reasons than to get drunk or to make an
easy buck.

>Good thing all those amendments came along abolishing slavery and granting
>women the right to vote or you still wouldn't have respect for women or
>Negroes.

You are way off base, here. Many people gave their lives in order to
abolish slavery, and many of those that died weren't slaves. The right
for women to vote wasn't granted because the government gave up
chasing women out of the toll booths. These examples don't even
compare to the actions of most radio pirates. There are right ways and
wrong ways to change the law, but radio pirates don't even try.

In fact, freebanders do NOTHING to try and change the law except to
whine about the FCC. I haven't seen anyone in rec.radio.cb, or
anywhere else for that matter, make even a half-assed effort to try
and change the laws regarding CB radio. That's because the collective
mentality for freebanders is to "do what you want and fuck the law, at
least until you get caught." They, like most criminals, want something
for nothing at the expense of others. I'm sorry, Bob, but that just
isn't an attitude that deserves ANY respect.

It's a simple law that you choose to disobey, you obviously think yourself grandiose enough to decide which law should be followed and which shouldn't. If you choose to disobey those laws what about others?

>
> Let me ask you this then, if you were around during prohibition (were
you?),
> would you have disrespected bootleggers and consumers of alcoholic

You are getting the idea ... why respect criminals ??? I'm pretty sure you don't go to local penn's to drop off stuff for the criminals inside (as you would call them ... "good buddy")

> Good thing all those amendments came along abolishing slavery and granting
> women the right to vote or you still wouldn't have respect for women or
> Negroes.

If a law is wrong lobby to change it ... don't sit back in your homes breaking it every chance you get ... and please don't ever compare yourself to women and african americans of back then ... you are not oppressed.

The test is a joke ... I did mine when I was 11 with a grand total of about 2 weeks of studying for it (on my own I might add) ... its 100 questions multiple choice (up here anyways) and is general knowledge any operator should know.

The only thing stopping you from operating legally on the ham bands is your ignorance and your spite for rules and regs.

I have never received a speeding or any other traffic infraction. I have never received a warning. I never speed. I always use my turn signals/mirrors/shoulder check when turning and changing lanes. There is no need to. I always give myself ample time to get anywhere. I have never received a parking ticket either. Speeding is stupid AND illegal.

>size. I'm not intimately familiar with the ADIF format but from what
>little I've seen it would be even larger.

For what period of time are these 60K QSO for?

ADIF would be even large because it uses name value pairs. Without
compression CSV (really TSV because no quotes) is going to be the
most compact file format.

The problem here isn't the eQSL.cc server, but logbooks software
isn't design to handle an eqsl service. The logbook software needs
to be able to download a list of stations that eqsls was received
from and compare it against it's own data, then mark that an eqsl
has been received for that QSO. Since no major award sponsors accepts
eqsl I would expect software vendors to wait until that happens
before changing their software. DXCC rule 2 disallows eqsls at
the current time. eQSL.cc claims they should because they can
validate them via their server. This may be true, but I could
also validate them by contacting the other station. Neither
of which I believe will happen.

> Being an absolute Novice at dynamic Web programming I'll presume this
>is not a trivial task<g>. At least they acknowledge there's a problem;
>that's the first step.

It isn't that hard, but it may take more than just server side
changes to fix it and since eQSL.cc is trying to kept tight control
on most aspects, I don't think many client side apps will commit
much effort.

Well it certainly is hard to find people with the courage of their own convictions today. The way I figure it, those laws are there for a reason. Who am I to contest them or break them. The way I look at it is a criminal is a criminal regardless of his crime. I can't stand criminals of any sort, so, why would I lump myself in the same group as them? As for speeding is concerned, I don't see a point to it. The farthest I go on a daily basis is 110kms. Speed limit's 80kmh ... if I tossed on say 15kmh to that (2 points off my licence if I get caught too) it will take me 1hr 9mins, if I do the speed limit it will take 1hr 23mins. 14 extra minutes is no big deal with me. And is certainly not worth the trouble if I get caught.

As for the signals and such, using them is very important, kind of a good idea to keep the other drivers on the road informed of my intentions.

Shortwave pirate radio meeting in holland

Hello dear sw radio freaks. Finally it will happen again, the meeting for the free radio freaks (listeners and operators/dj's) in Baarle-Nassua.near the Belgium border witch is organized by the operators of the free radio stations Borderhunter and Delmare.
The event will take place on 7 July and will start around 13.00 utc (15.00 local time) and the party go's on whole night. At around 15.00 utc there is a barbeque.

To take part in this meeting there is a fee of 5 guilders (around 2 or 3 us dollars) to cover the cost of the organization.

For those who come from far there is also a hotel in the area but there is also the possibility to stay over night (free radio camping) so than bring your sleeping bag.
The guys will take care for the roof over your head.
This will cost than only 10 guilders (around 4/5 us dollars) and you get a coffee or thee in the morning.

There also will be hanging antenna's for listeners and operators for px ing and listening

There is food and beer enough , so the only thing you will have to do is bring a good mood

you can get more info at borderhunter@hotmail.com

Come and meet all the other sw freaks

Hier een berichtje van de Borderhunter uit zuid-Nederland,of is het noord-Belgie?(hi)
Op 7 July 2001 organiseer ik wederom een meeting voor Free Radio liefhebbers.Zowel luisteraars als
stations zijn van harte welkom.De meeting vindt plaats op de Belgische/Nederlandse grens in de omgeving van Baarle-Nassau.
Dit gebeuren is op zaterdag 7 July en start om 15.00 uur tot diep in de nacht.Er is omstreeks
19.00 uur een barbeque voorzien.
Toegangsprijs F.5,-
Personen die van ver komen kunnen eventueel en hotel met ontbijt reserveren voor 65 gulden per persoon.Maar er is ook de mogelijkheid om te overnachten op de Free Radio Camping.
Alleen een slaapzak meenemen,voor een bed en een dak boven je hoofd wordt gezorgd.
S' morgens koffie of thee naar behoefte.Prijs F.10,- p.p.
Er hangen wat antenne's voor de luisteraar maar ook voor de zendamateur.
De bedoeling is om een gezellige ontmoetingsplaats te hebben waar luisteraars en amateurs zonder
risico elkaar kunnen ontmoeten,dit op een mooie piratenlokatie waar muziek en drank niet ver weg zijn.De juiste lokatie wordt geheim gehouden.Dit is echter wel te vinden door de borden te volgen die
volop aangeven welke richting je moet volgen. Inlichtingen bij borderhunter@hotmail.com
Tot zover de informatie tot nu toe.Nadere berichtgeving volgt nog

Radio Delmare en Borderhunter

_____
Also come and join the Sw pirates.
here you can listen/store audio/text/files. Receive the latest info
and lots more. Simply subscribe by sending a blanc email to:
SWpirates-subscribe@egroups.com
or get more info at: http://www.egroups.com/group/SWpirates

27 years. Actually, I've made significantly more QSOs (probably approaching 100K) but until the mid-1990s I didn't keep computer logs - I have only entered QSOs for which I have a QSL for dates before I dropped the paper logs.

>also validate them by contacting the other station. Neither
>of which I believe will happen.

Well, the problem is in the amount of data transferred every time you try to take an action with the list of QSOs on their server. Yes, I guess the ability to download the entire inbox & then process it against one's logbook and then re-upload would be of value. Given enough bad weather (to remove the temptation to go outside) I could probably write some Perl code to handle that. Except that when I was done, I'd still have 400 QSOs in my inbox and no way to archive them.

If they weren't using Java so extensively, one could write a script & use "wget" to grab/archive the QSOs. I'll bet it's not possible to handle what eqsl.cc does without Java though.

>It isn't that hard, but it may take more than just server side
>changes to fix it and since eQSL.cc is trying to kept tight control
>on most aspects, I don't think many client side apps will commit
>much effort.

It'll take both. IMHO if I could archive multiple records with a single action, the site would become usable. Other changes would make things easier but aren't that critical.

I don't know about that. I have been driving on the Los Angeles area freeways and city streets for 32 years and I have never received a traffic ticket either. I don't think this is as rare as you think - I know of several other people who have also never been cited for a moving violation.

I have, however, received a parking ticket from a city that did not allow overnight street parking in residential neighborhoods, and "forgot" to post any warning signs. A new twist on the old "speed traps" ? :>)

Anyway, I challenged the citation on the basis of 1) the violation was not done intentionally, and 2) the violation was a direct result of the city's failure to post adequate signage informing the public of the ordinance. The judge concurred and dismissed the citation.

Some day maybe it will be XML and the display and data will be
located in different locations.

>It'll take both. IMHO if I could archive multiple records with a single
>action, the site would become usable. Other changes would make things

That should be easy, but depends on how well the planned ahead.
At least the ARRL can learn from eQSL.cc mistakes and could have
a eqsl server done right.

Hey I got an idea Doug, you know mysql, I know digital signatures
and web design we could do our own eqsl server. HI HI!

The vast majority of speeders don't purchase and install special
equipment (linear amps) and modify their rigs (frequency mods) with
the sole intention of breaking the law.

No their equipment (cars) are capable of breaking laws without any
modification at all.

My point exactly. 'Freebanding' is a deliberate act, carefully planned and executed. But just for the sake of argument, suppose you live on a street where the speed limit is posted at 4mph. How long until you get fed up with people cruising past your house at 1000mph? More realistically, your street is probably 25mph, and that would clock those speeders at 6250MPH!!!! Not just that, but these speeders hold drag races, don't use any mufflers, and drive off-road right through private property. When these speeders are caught, the fines are typically more than ten times that of speeders on the highway. So how do you compare radio pirates to speeding?

>Rob St.Denis

BTW, any relation to Bill St.Denis in Spokane?

so is speeding, I'm not talking touching the accelerator a little too much off a light or anything I'm talking hitting the highway at 120kmh ... people do it and say well its not that much ... when that can land a hefty fine and 2 points on your licence ...

> and executed. But just for the sake of argument, suppose you live on a

They both willfully break the law. They both know that they did it (although ignorance is no excuse), heck "freebanders" have a term for their crime, "freebanding". They use a portion of the spectra reserved for other services, which in turn can lead to prolonging those services and in the case of millitary and SAR that could mean someones life the same as doing +20% on the high way makes you more of a danger to other drivers.

> BTW, any relation to Bill St.Denis in Spokane?

Nope ... I'm a canuck.

The difference is that when you run a kilowatt amp, you do it with the
sole intent of breaking the law -- you purchased the amp in order to
break the law and nothing else. Not true with a car, unless your car
can only operate above the speed limit.

No. They purchase speed radar detectors so they can slow down when they
approach a cop out trying to bust them....

They're just learning from the commercial world.......

I believe strongly in QSLing 100%, and am willing to go to some length to ensure that everyone who's asked for my electronic QSL receives it. Whether that electronic QSL is actually of any value or not. I'm not bothering to actually retrieve, store, or print the "cards". (I *did* check the few I confirmed against my log for accuracy, and did reject a couple that didn't match up)

(10 hours of staring at an hourglass, however, is further than I'm willing to go!)

>>It'll take both. IMHO if I could archive multiple records with a single
>>action, the site would become usable. Other changes would make things
>>easier but aren't that critical.
>
>That should be easy, but depends on how well the planned ahead.
>At least the ARRL can learn from eQSL.cc mistakes and could have
>a eqsl server done right.

Yep. From a design standpoint, replacing the "confirm", "archive", and "reject" links with check boxes, providing a "Submit" button, and then having the Submit button confirm every QSO you marked "confirm" for, etc. would be the way to do it. As you say, what the underlying code would be would depend on how it was coded in the first place. That part may not be nearly as trivial.

The other thing that I think would need to be different for a "production" system would be to have a simpler format available for retrieved QSLs. Some kind of text-only list. Downloading 400 graphics, even if they are well-compressed JPEGs, is a lot slower than downloading 400 QSOs worth of text. I strongly suspect there are other stations who have far more than 400 waiting.

I do think the ADIF upload is a nice touch. What it would cost to maintain enough disk space (and search power) to scale that up to a significant fraction of the HF community is another question.

>Hey I got an idea Doug, you know mysql, I know digital signatures
>and web design we could do our own eqsl server. HI HI!

Actually that *would* solve my problem with eQSLing - by ensuring I no
longer had time to get on the air!

They have learned well!

>(10 hours of staring at an hourglass, however, is further than I'm
>willing to go!)

As bad as I hate to defend eqsl.cc, if you upload your QSOs via
ADIF then there isn't that much work in QSLing. The software
takes care of the work.

>The other thing that I think would need to be different for a
>"production" system would be to have a simpler format available for
>retrieved QSLs. Some kind of text-only list. Downloading 400 graphics,
>even if they are well-compressed JPEGs, is a lot slower than downloading
>400 QSOs worth of text. I strongly suspect there are other stations who
>have far more than 400 waiting.

There not much point in downloading at all, be it text or graphics.
They don't prove anything and eqsl.cc rejects dups so once you get
into the cycle you can overlap just to be sure you get them all.

>I do think the ADIF upload is a nice touch. What it would cost to
>maintain enough disk space (and search power) to scale that up to a
>significant fraction of the HF community is another question.

I am sure there will be profit in it otherwise there wouldn't be
a point in getting expense patents.

>>Hey I got an idea Doug, you know mysql, I know digital signatures
>>and web design we could do our own eqsl server. HI HI!

>Actually that *would* solve my problem with eQSLing - by ensuring I no
>longer had time to get on the air!

See it would solve two problems at once. HI HI!

I've got a few lots up on Ebay of foreign stamps showing
ham radios. Check k7prz1 ID, or look in "General" section
of ham radio area.

73,
Dave

There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2
There were 55 ITU Zones available during the past week.
ITU Zones that were not active are: 3,4,15,21,22,23,24,25,26,

31,34,35,43,58,59,69,70,71,72,74,90

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

ARE WE HAVING A GREAT YEAR FOR DXING? Joe, W1JR, thinks so. Joe wrote to OPDX and states, "Just a note to tell you DX this year is doing well and possibly ahead of all years. Each year I try to see how many DXCC entities I can work. In a good year I can make about 280-290. Hence, on January 1, 2001 I started anew AGAIN. I guess I never learn! Yesterday (May 3rd) I worked XU7 for DXCC #270, all in just over 4 months. This is the earliest in the year that I have ever worked 270 entities. I figure I have missed about 10 others. I do keep a normal sleep pattern and don't catch them all! The DX is there. You just have to listen and work them!"

3B6RF THE AGALEGA DXPEDITION (Update/Change). It has been reported that the 3B6RF team is now on the island as this bulletin was being prepared, but not after a change in traveling plans. The team flew to Seychelles as planned but ended up taking a boat to Agalega instead of flying. It was reported that it took the team 34 hours by boat, with rough seas and waves 3 meters high, to reach the island. They are expected to be on the air by 1500z, May 6th. The official news and updates will be posted on the team's Web page at: http://www.agalega2000.ch/

9H, MALTA. To mark the event of the Pope's visit to Malta, the Malta Amateur Radio League is issuing a special Award and QSL Card. For further details, check out the Web page: http://www.9h1mrl.cjb.net

A2, BOTSWANA. Charles, A25/KY4P, has been pleasing the crowd on CW on 17/15/10 meters. Watch 10 and 15 meters after 1530z around 1 to 2 kHz up from band edge. Check around 18089 kHz later in the day (as late as 2100z). QSL via SV0LM.

AP, PAKISTAN. A good friend told me he needed AP on CW. Well, look for AP2ARS on 30 meters (one QSN said "NO TAKERS"). Look around 10103 and 10104 kHz as early as 1600, but generally as late as 1900-2100z. Also, check 17 meters around 18074 kHz between 1200-1500z. QSL via S53R.

DX ACTIVITY (Dayton HamVention).
The Northern Ohio DX Association (along with WVNO Radio) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Friday and Saturday evenings. All DXers/Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.

Visit the NJDXA Hospitality suite on the 12th floor of the Crowne Plaza. The suite should be open around 9 PM on Friday and will start hoping after the DX Dinner.

ET, ETHIOPIA. Claudio, ET3VSC, continues to please many on CW on the 17 and 12 meter bands. Look for him on either band after 2200z, sometimes as early as 1030z. QSL via K3IRV.

IOTA NEWS.....
AS-089. By the time you read this, UA1PBP should have started a two week operation as UA1PBP/9 from the Kara Sea Coast West Group. QSL to RK1PWA.

EU-038. Joel, F5PAC, will be active from Texel Island, as PA/F5PAC for the IOTA Contest at the end of July.

EU-113. (Possibly EU-158) Steve, G4EDG, informs OPDX that he intend to operate from Kythira Island as SV8/G4EDG and possibly EU-158 as SV3/G4EDG starting appox. May 7th, for 2 weeks. This is a backpacking trip and operation will be 20 meters CW only with 5 watts to a dipole. QSL via home call.

EU-148. Operators F5AUB, F5OSN, F5RVI, F5DBX, F5UOE, F5BJW, F5BKB, F4CLO, F5JBR, F5VV and F5XX will be active as F5XX/P from Fort Brescou, May 24-28th. However, during the CQWPX CW Contest, F5XX, F5VV and F5JBR will be active as TM5B.

NA-041. NODXA member Byron, KF8UN, will sign KF8UN/KL7, and will be active (time permitting) from Sitka City Island, Alaska. The dates are July 7 through 10th, and he will start at 0700z. Operations will be on 40 and 20 meters. QSL via CBA.

J5, GUINEA-BISSAU. Baldur, DJ6SI, and the J5X team continue to be active until May 11th. There has been plenty of active on RTTY and the WARC bands. This should be an easy catch if some one needs it.

JD/M, MINAMI TORISHIMA. Katsumi, JD1BCK, seems to really like 15 meters. Look for him between 21270 and 21290 kHz after 2300z. QSL via JM1TUK.

JD/O, OGASAWARA. You, JD1BIA, was heard this week and weekend on 15 meters around 21280 and 21290 kHz after 0000z and as late as 0830z. QSL via JD1BIA.

JW PHOTOS. Rag, JW5HE, reports photos from Svalbard can be viewed at: http://no.photos.yahoo.com/la5he

KH2, GUAM. Members of Mitsubishi Electric, JA1RTG, JF1CPE, JI1EOP, JK1EBA, JR3OET, JA5AGW and JI0PFJ will be active as KH2/JM1YGG between 0800z on May 10th through 0100z on May 13th. Activity will be on 40, 20, 17, 15, 10 and 6 meters CW/SSB. QSL via JM1YGG for the bureau or direct to JA1RTG.

KH2, GUAM. A group from the JA2 area will be active from here between June 9-12th. Activity will be on 160-6 meters. The callsigns and the QSL information are as follows:
K1HP/KH2 (Yoshi) via JE2EHP KH2/JH2QFY (Aki) via JH2QFY
N3WW/KH2 (Ban) via JF2WXS KH2/JJ2CYO (Yasu) via JJ2CYO
KH2/JH2CYU (Michy) via JH2CYU KH2/JS2ITP (Yasu) via JS2ITP

LIGHTHOUSE ACTIVITY.....
Operators G0KJW and G0OWE will be active as homecall/P on May 13th from Longstone Lighthouse (LH 0234 - WLH Award). QSL via their home callsigns.

Look for SK0QO to be active between August 18th to 20th from Soderarm Lighthouse (LH 0175 - WLH Award). QSL via SK0QO.

LU1ZA, SOUTH ORKNEY ISLAND (Update). The station LU1ZA has not been heard since April 21st. However, OPDX has received some info about this station. The operator's name is Claudio, and he is in the Argentina Army. He is a Ham but not a DXer. He does not speak English, but thanks to Raymundo, YS1RR, on April 21st a few people were able to work this station. His QSL route is as follows: Serv. Auxil. de Radioafic., de la Armada, Av. Del Libertador 8209, Capital Federal, CC 1429, Argentina.

OJ0, MARKET REEF. Operators Arne/LA3IKA, Bjorn/LA5UKA, Paul/LA6YEA and Trond/LA9VDA will be active from Market Reef's Lighthouse (LH 0542 - WLH Award) between August 5-8th. They will sign OJ0/LA3IKA, OJ0/LA5UKA, OJ0/LA6YEA and OJ0/LA9VDA. Lars, OH0RJ, has also been invited to join them. They plan to be active on 160-2 meters, SSB/CW/RTTY. LA5UKA (ex-LC3NAT) will be active in the 2m NAC contest. QSL to homecalls except for LA6YEA (QSL via LA9VDA). Look for more info later by checking the following Web page: http://www.qsl.net/la9vda

OY, FAROE ISLAND. Max/ON5UR and Wim/ON4CJI of the United Radio team will operate from Faroe Island (Stremoy Island - EU-018) with the callsign OY9UR, from May 28th through June 7th. They will be operating on 160, 80, 40, 20, 15, 10 and 6 meters. Wim is expected to be on PSK31. Also, look for them on May 26-27th and June 8-9th as a /MM. They will be active during the 6 meter contest on June 2-3rd. There will be a special full color QSL cards for both callsigns. QSL direct via OY9UR: United Radio, P.O.Box 33, Zichem 3271, Belgium. Remember: The QSO is short, the QSL is forever.

QSL INFO AND NEWS.......
Fran, EA7FTR, reports that he has the logs for BA1RB, and any station who needs a QSL can send via EA7FTR: Francisco Lianez Suero, Asturias 23, 21110 Aljaraque, Huelva, Spain. He is also the QSL Manager for Jack, HC3RJ.

QSL MANAGER CHANGE. Steve, DJ7AO, informs OPDX that he is no longer the QSL Manager for Ray, DL2GG/YV5. The new QSL Manager is Sigi, DL3AMA. Send direct via the CBA or via bureau.

Allan, VK2CA, reports that Norried, H44NC, will be leaving New Georgia Island (OC-149) shortly to return to the USA for approx. 12 months. He will be carrying the H44NC logs from July 2000 onwards with him. The new address for H44NC, as of the 1st of May 2001, DIRECT ONLY will be as follows: Norried F. Chaisson, P.O. Box 2262, Springfield, MO 65801, USA. QSLs before July 2000 will still be answered, but only after returning to H4.

QSL INFORMATION FROM THE DESK OF OH2BN: "Effective May 15th, late QSLing of E44DX, H40AA, 4W/N5KO and 4W/W3UR will be done by Steve, KU9C. The procedure we use is to keep answering all direct requests for 18 to 24 months from the time of the actual DXpedition. At the end of that period, all remaining QSOs will be QSLed through the bureau network. Because we do not print extra QSLs for another round, a "combo late request QSL-card" has been designed to confirm these late requests at KU9C.
In the case of TX0DX, we will keep answering all direct requests up to September 2001, when the bureau release will take place. All TX0DX direct requests have been answered as of today and we hold no backlog." de Jarmo Jaakola, OH2BN

Update on PW0S QSL Status by Steve, KU9C: "It appears that I will have the QSL cards for PW0S, barring unforeseen shipping problems, the weekend BEFORE Dayton. I expect them to arrive at my QTH on May 11th. If this happens on schedule, I plan to issue ALL direct QSL cards that are clean in the log by Tuesday, May 15th (it will be a busy weekend, but most of the preparation is done). Thus, many of you should have a shot at having your card in advance of the Dayton Hamvention. If the schedule slips, my plans are to do what I can do before leaving for Dayton, and finishing the process upon my return. Some of the PW0S members will be at Dayton, and will be hand carrying the paper logs, which will allow me to research any of the 'not in log' QSOs. Thus, if your card does not appear in your box immediately, please give me a few weeks to research the logs, as you may well be not in the log. I'll post a note when the QSL process is 'up to date'. Thanks to all of you that included donations with your QSL requests. The donations will be forwarded to the PW0S team to help pay down the expenses of this operation. If you would like further details, PY7ZZ's web site has a very detailed accounting of the DXpedition expenses, which you may find of interest. Go to the log search page at:
http://www.soutomaior.eti.br/mario
Click on the 'Costs' shortcut. Donations are still being accepted by myself and W9VA, Bill, as we are still trying to close the gap on expenses..... 73 es DX IS! Steve KU9C"

OPDX has been asked "What is the QSL status of the VK9XY cards?" Last we heard was cards were coming out (for the U.S.) the first past of the year. Does anyone have a more current update to report?

Doug, ZP6CW, informs OPDX that he has had a houseguest for the last thirty-some days, Ian, G4DIE. He obtained permission to operate and was active on CW and PSK. He has made over 400 PSK contacts to date. Ian was scheduled to leave May 1st. His QSL MANAGER is Doug's wife, Dani, ZP6CU. Doug states that, ZP6CU continues to be his manager, and manager for another North American there ZP6GG. She still has logs for S07UN and CN2UN, and they still have the cards on hand for those operations which are now QRT.

Raul, LU6EF, GACW Coordinator and QSL Manager, announced this week that "The GACW Group will accept eQSL cards to achieve the awards that they are currently using. Also, they will accept eQSL cards for any

special certificate of merit issued to relevant individuals and/or organizations. In other words, the GACW coordinators will spread the benefits of this system to more than 500 members in Argentina and some other countries to encourage and enforce the use of this very safe, quick and cheap method of confirming amateur radio contacts.

R1, FRANZ JOSEF LAND. R1FJL has been active on 12 meters lately. Check 24910 kHz around 1200z and after 0800z. QSL via UA3AGS.

SPECIAL EVENT. Peter McDonald, VK3DI, Secretary, EMDRC Inc., informs OPDX that the special event callsign AX3ITU will be operated by members of the Eastern and Mountain Districts Radio Club (EMDRC) to celebrate the International Telecommunications Day for 24 hours commencing 0000z on May 17th, on behalf of the Wireless Institute of Australia (Vic Div). This is a relatively rare prefix for those prefix hunters. All HF bands will be activated at some time during the period of operation. QSL via VK3ER: P.O. Box 87, Mitcham, Victoria, Australia 3132. All logged callsigns will receive a QSL via the Bureau unless a direct request with sufficient return postage is received within 90 days of event.

SPECIAL EVENT. Look for special event station EO56JM to be on by the Crimea Contest Club now through May 13th. QSL via KG6AR (Direct or Bureau).

SPECIAL EVENT. The club station PI4TIL will use the special callsign PA6T during the period May 27th through June 3rd. During the field day weekend they will enter the CW contest and the 6 meter contest. During the weekend of June 2nd and 3rd, they will be active on 80-6 meters, 2 meters, 70 cm, 23 cm and 13 cm. Operations will be on CW, Phone, SSTV, RTTY, PSK31, ATV and satellites. On Wednesday, May 30th, they will be active on SSTV from 1800-2200z around the usual SSTV frequencies on 10, 15 and 20 meters.

SPECIAL EVENT. The Old Barney A.R.C. announces a Special Event operation for the "International Lighthouse Activity Weekend". Station W2T will be operating from the "Tucker's Island Lighthouse" in the "Tuckerton Seaport", Tuckerton, New Jersey, at 1300z, August 18th, through 2300z, August 19th. Suggested frequencies are: 7280, 14280, 21380 and 28480 kHz (146.835/rpt). QSL via N2OO, PO Box 345, Tuckerton, NJ 08087 USA. Send a 9"x12" SASE with 55 cents postage for QSL and Certificate... or SASE/SAE+IRC for just a QSL.

TI, COSTA RICA. Philip, N0KE, will operate in the CQ WPX CW Contest as TI5X from TI5KD's station as QRP/All Band entry. N0KE will handle all contest QSLs for TI5X and TI5/N0KE outside the contest. ADDED NOTE: Over the previous two years contest operations were TI5N, and TI5KD handled the QSLs for this and other contest operations of TI5N.

USI ACTIVITY.....
The Roane County Amateur Radio Club (KW4JS) will be active beginning 1300z on May 19th, from Thief Neck Island, Tennessee. Thief Neck Island is in the Tennessee River in Roane County. Operation will be on all bands 20 through 10 meters. QSL via KW4JS. The USI reference number was not provided.

VO2, LABRADOR, CANADA (Update). Fred, K2FRD, want to make one last plug for his Labrador DXpdition before he leaves for the north country on June 1st. He expects to commence operations about June 6th and will operate daily until he QRTs on August 31st. This will give the worldwide hams an opportunity to contact CQ Zone 2 and ITU Zone 9 (which are usually not active/listed every week). In brief, Fred will be operating mostly SSB (with occasional CW) on 10, 12, 15, 17, 20, and 40 meters and CW on 30 meters per the schedule on his Web site. Normally, look for him near the MUF, which given the state of 10 meters recently, could be 17 or 20 meters. For more on his frequencies, bands, and schedule details, check his Web page at: http://sites.netscape.net/thefred3/labr1
Fred, K2FRD, states in his last press release: "I'd like to thank you (KB8NW) and the Ohio/Penn DX Bulletin, and the many hams worldwide who have provided encouragement and moral support for this trip. I will do my best to live up to everyone's (and my own) expectations. See you on the air......73, Fred K2FRD"

VP8, FALKLAND ISLANDS. Only a few more days to work VP8SDX. They will go QRT on May 9th. QSL via GM4FDM.

XU, CAMBODIA. The station signing XU7ABC has been active over the past week on 20/17/15/12/10 meters CW. Check around 18072 kHz, 24903 kHz and 11 kHz from band edge. QSL via G3XAQ. Meanwhile, XU7ABN, has been playing on RTTY on 20 and 15 meters between 1330 and 1400z, also after 1800z.

YO, ROMANIA. Jean Michel, F6AJA, will again be active as YO/F6AJA for the 8th year from Suceava (450km north of Bucarest). He will operate from the YO8FZ's QTH during his free time. Jean will be there from May 14-20th.

ZD8, ASCENSION ISLAND. Jim, N6TJ, will once again be active from here during May 7-17th. QSL via VE3HO.

I have a Kenwood TS-570 and an Ameritron AL-811H. I am looking for a connection cable (shielded audio type cable with standard male phono plugs for the 811H) to interconnect with the 570 (7 pin male DIN connector). Hopefully this is a manufactured item as my old eyes are to weak to work with a DIN connector, and the hands are unsteady to attempt the fine solder. Thanks for your time and input. W2JRM Jim 73's

Additionally, speed limits in many places are arbitrarily set
low. The USA population routinely exceeds highway speed
limits and the police don't care one bit.

And for most people, they are speeding just staying with
the flow of traffic on American highways. Interstae 80 in NJ
is 55 for 30 miles before NYC. The AVERAGE flow of traffic
is usually 65/70 or higher. Anyone doing 55 is (or should
be) in the extreme right lane.

See thats what people don't understand a speed limit is a maximum not a minimum.

It should go like this

55 <55 <<55

not

>>55 >55 55

People hitting 70+ should be the ones getting off teh road and having their heads checked.

No it's for revenue enhansment. The cities need the money and most
cities use "traffic" for generating money as a lot of it isn't paid
for by residents. GOD help you if you violate in Royal Oak,Mi as they
have a brand new court bldg that is NOT paid for! Royal Oak police
allowed a video to be made once and it was broadcast, the sargent is
giving the beat cops hell so they will PRODUCE more. $$$

WHY? Do you believe for one second that the speed
limits on American highways are realistic? Do they have
any resemblemce to reality. Is 70 mph across Kansas
logical when there is visibility to the horizon, light traffic
and not a bend in the load for miles ahead?

Cheers,
Bill K2UNK

The intrastate highways were engineered for 70 mph even in the city,
and I do miss the days of "no speed limit zone". Problem is with fuel
economy, doing away with frames, lawyers and millions of idiots who
can't control there machine at speed.

I hope the load doesn't bend... That would make it useless to the
receiver, and the shipper might get a little peeved.

PLEASE CHANGE THE HEADER WHEN CHANGING TOPICS
I opened up several posts today and the topic dicussed had nothing to do
with the header.
AND neither the header or the topic had anything to do with DXl.

Come on folks - lets respect the Use Group Guide Lines at URL:
http://faqs.jmas.co.jp/FAQs/radio/personal-intro

AND FOR CRIPES SAKES __ CHANGE THE HEADER WHEN YOU CHANGE TOPICS.
I just read one with a header of "freebander" nonsense and it was
discussing FM Quieting!!!

>
>73 de G3NYY
>

If they can overtake you on the wrong side, then you have NO business sitting in the middle lane. There are no 'slow' and 'fast' lanes on British motorways. The Rule of the Road applies - you 'drive on the left and overtake on the right'. If lane #1 is clear, you should use it, no matter how fast you are going (provided that you are not constantly having to move into lane #2 or #3 to overtake). It is not your job to try and be a policeman, and create an obstruction by driving at the legal limit in the middle of the road.

Anyway, Walt, you used to ride a motorcycle. We car drivers KNOW that motoring laws don't apply to motorcyclists. When did YOU ever stick to the speed limits???
Ian. ;*)

PS
I think that the UK motorway limit should generally be 80mph (but rigourously enforced) but, in built-up areas, as low as 10mph where conditions call for it. Unfortunately, in the UK it is very difficult to put in place a limit of less than 30mph (I think it takes an Act of Parliament, or even an Act of God).

Well think of the logistics. The average officer gives out what 10 tickets a day around 75$ a pop. 750$. Now his salary is 240$ a day. He will probably pay 50$ in gas for the touring he does. Administration as well is probably another 100$. So figure after all that he clears 350$. That is being very generous. In bumwad idaho (not an insult just my way of saying nowhere) they proably have 2 cops out per day and chances are they will split those 10 tickets between the two since population is small. Now the police pay 800$ a day for that 750$ income from tickets ... tell me where that makes sense that they do it for the profit ?

Tell me how its a bad law ? People speed, simple physics will tell you that that increases kinetic energy and momentum thus increasing stopping distances. People already don't leave enough room at the slower speeds and keep the same distances at the faster ones. So not only were they doomed from the start before they started speeding since every accident that could happen with buddy in front would result in them being involved, but, now their stopping distances are even greater and they will impact with a higher velocity.

First off its law. You hams don't like those cb'ers breaking the law because of some little arbitrary thing like needing a licence to operate (having the sheet of paper does not make you a better op) but yet you find the "arbitrary" speed laws rediculous? They are there to lower the risk of accidents. Car's do not handle as well at the higher velocities, reaction times are required to be far faster etc etc etc ... They do have engineers and such who do determine hte maximum velocity that is safe on a particular road given its conditions or give it the max of 55 (its 65 now isnt it ?) since that is about what the average driver can safely handle.

It is bad law because people do not want the government
telling them how to live their lives and to what degree of
risk they can/should afford themselves. No one is mandated
to drive 70 MPH. If you don't want to drive a that speed,
then don't.

>People already don't leave enough room at the slower speeds and

>The intrastate highways were engineered for 70 mph even in the city,
>and I do miss the days of "no speed limit zone".

They were engineered for 70 when cars of far less technological
ability as to road handling were the norm. I-70 across Kansas
could easily sustain speeds well over 70 today even though the
road itself was engineered years ago.

>Problem is with fuel
>economy,

Fuel economy is an issue that impacts only ME. It is
none of the gov'ts business if I drive in a manner that
costs me fuel economy.

>doing away with frames,

Actually, todays "frameless" cars are better than those with frames in
the same accident.

>lawyers and millions of idiots who
>can't control there machine at speed.

Few speeding accidents ever involve other cars. Most
accidents are caused by non-speeding factors (alcohol,
reckless driving, etc.).

Cheers,
Bill K2UNK

If YOU can't handle it, then don't. No one is forcing anyone to
drive 70.

>They do have engineers
>and such who do determine hte maximum velocity that is safe on a particular
>road given its conditions or give it the max of 55

Nope, the national 55 in effect for some 15 years had NOTHING to do
with safety when imposed. Since it has been lifted, highway detaths
per year are STILL dropping.

>(its 65 now isnt it ?)
>since that is about what the average driver can safely handle.

Many states it is now 70 or even 75. In NJ people routinely
drive 70-75 everywhere on the highway...totally ignoring
the posted 55 or 65 limits.

I was reading through an old (1979) Popular Mechanics magazine tonight and
saw an article on slow scan tv. I'm familiar with ATV and have messed around
some with it, but being able to DX on Slow Scan looks like fun.
Does anyone still do this? What type of equipment (the cheaper the better)
would I need to go slowscan with my hf rig?
Thanks in advance
73's
Tom

Still doesn't stop that idiot who is going to end up losing control of his car because he feels he should drive whatever speed he wants (since there wouldn't be any limit for him to abide by) and then crashing into my car. See believe it or not, MOST laws are there for the protection of OTHER people, not the offender.

Ya can't drive drunk under law because you are a danger to others, not yourself.

My ability to handle the road is irreevant. Fact is there will be 10 idiots out there that will take full advantage of a no speed limit idea that can't handle the road well at 65 let alone 70+ and end up killing off a great deal of the population ...

> Nope, the national 55 in effect for some 15 years had NOTHING to do

Face it, George looks like a monkey and is dumb as snot. As bad as Clinton was, and as slug-like as Gore was, the republicans are so bad they can't honestly win against them. Think about that!!!!

A top republican in Atlanta that was heading the impeach Clinton movement resigned recently because he was caught (a second time) exposing himself in a public park...and soliciting sex from an undercover policeMAN (not police WOman).

Republicans are more likely to have sex with Yasser Araofat and his male camel than women. Like they did with congressional pages.

How about some technical data proving your claim about republicans not liking to have sex with women? Statements like this cast a 'lot of doubt' about your abilities in other areas, such as electronics etc. I mean this is such obvious bullshit, it makes me wonder if your learned comments on other things might also be bullshit!

And yea, I'm a new republican, got so disgusted with Clinton and company, I changed parties, and I still like women!

I presume you still support Clinton and hold him in high regard. He was such a outstanding example of a President of the United States, wasn't he, ugh! puke! I don't know about you, but I was totally embarassed and ashamed to have him represent us/me to the entire world...!

Your computer sound card, a few wires and resistors for the interface, or $75 for a pre built interface, and software. Lots of SSTV programs, and all have a "free" evaluation mode.

I use SSTV32

i'm writing my own logging software, and would like to have it query an online callsign database of some sort. are there any networked callsign databases that are designed to be queried by machine? something like www.buck.com does not count, as i don't want to pull apart html.

if all else fails, i will put down $50 for a hamcall cd. is the format of the data on that cd documented, and if so, where is the documentation? if the format of the data is undocumented or if the data are in some stupid format, then the cd is not of any use to me either. (i use linux, so i have no use for any windows query program that comes with the cd; all i want is the data.)

Technical Data:

"JerryL" <jlockett@onemain.com> Group:
rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.digital.misc,rec
.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.policy,rec.radio.cb
Subject: Re: Respect For Freebanders Date: Tue, May 8,
2001, 7:32am (EDT-3) X-Trace: fu-berlin.de 989332288 17845332
209.165.2.21 (16 [55752])

And since we are on the subject of headers:

It is time for my monthly disclaimer, in case any newbies have arrived
since Leland's last folly with my nic and email.

.
KC8LDO Leland C. Scott forged the original post, it wasn't me. His
number of aliases and forged posts and emails are staggering, but he
especially likes forging me. Please check the headers. Leland C. Scott,
KC8LDO, and Doug Adair, N8wwm, and their many, MANY aliases are
responsible for ninety five point nine percent of the strife on the
rec.radio.cb ng, and probably on many of your amateur forums as well,
especially lately. A good number of posts appearing with no call signs
have been easily identified as the same forgers in the cb ng.

Thank you all for the replies via email, as most were polite and well
written, as were the many offers to assist me in attaining a ham
license, however, I believe in returning things to their rightful
owners, so any additional correspondence should be directed at the
author of the forged post and troll.

After exposing Leland for forging me over a month ago with the
assistance of another licensed amateur, he has waged a personal vendetta
against me.

He searched the web and found an article I wrote on freebanding for a
hobby magazine over a year ago and has posted it numerous times in an
effort to justify his own behavior towards myself and other cbers. He
draws his own inferences and hurls unfounded accusations and insults.
Leland's main line of defense has always been attack his accuser, no
matter who it may be. If anyone would dare suggest Leland may be wrong,
he has no defense other than to attack about "What you did" and it is
usually a lie (from questioning one's sexual preference to threatening
them).

He has repeatedly accused me and others of pirating on amateur
frequencies, and nothing could be further from the truth. I understand
how an amateur could feel so strongly as to defend his allocated

frequencies, but attacking countless individuals behind phony names, forging people, forging email headers in his posts, throwing accusations left and right and refusal to remove anything personal and not on subject off the ng exemplifies what this particular individual and his two cronies are about. He also reported me to my ISP for "forging" (the gall) and was so certain it was me that he made many posts threatening that I was about to lose my internet service. When he received word it wasn't me from my ISP, this sent him into a rage, as it did when I first exposed him. He has accused me of forging for so long (pot, kettle, black) he now accuses my ISP of "lying" to him. I guess the more Leland decides to forge me in your amateur forums, the more frequent I must point out the error of his ways.

I asked Leland and "Sparky" to take whatever personal problem they may have with me to email and I will be glad to debate whatever merit they see fit, but as all will see, these two are more interested in calling names, perpetuating problems between operators and will not cease their childish games....hence the crossposts They don't WANT the strife to go away. I apologize that they feel the need to make you all a part of it, and I was going to ignore most of the emails and what was forged of me, but then the email I received from amateurs was so far from what I expected. Leland forged me and posted that article in a manner to which I would be flamed, and instead, I received email from a great number of amateurs who didn't flame at all.

Quite the opposite, many offered to assist in getting my ticket, and for that I thank you. Turning the tables, if it had been me that were a licensed operator and someone posted an article about freebanding in an amateur format I frequented, I may have been one of the flamers, but as I said, the reaction from amateurs across the land was quite different than what the original author intended. If a post appears to be from me in anything other than the cb ng, please check the headers....if it has any other path than this one, it is a forge. All emails answered. Have a good day.

Rather than shell out the $50 or so for a cd, try downloading the U.S.
callsign database from the FCC. This is updated every couple of days, but
for your purposes, an update every month or so should be sufficient. The one
problem with this file is that it runs about 40 meg in size. The url is:
http://www.fcc.gov/fcc-bin/wtbdatadump.pl#amat
The format will be in the public domain. I am told it is a straight ascii
file, but I haven't checked.

Hope this helps.

Yes thanks. But it'll do you no good. RR is much better
protected than that.

You need the key for the actual floppy you put it on, and
you can only get that by registering it.

Tough!

Hi Jerry,

You have poor reading skills OM.

On Tue, 8 May 2001 07:32:26 -0700, "JerryL" <jlockett@onemain.com>
wrote:

>How about some technical data proving your claim about republicans not
>liking to have sex with women?

Never said that. One example is Newt. He had an affair with a female
member of his staff before he resigned..

Here is what I said:

>Republicans are more likely to have sex with Yasser Araofat and his
>male camel than women. Like they did with congressional pages.

>Statements like this cast a 'lot of doubt'
>about your abilities in other areas, such as electronics etc. I mean this
>is such obvious bullshit, it makes me wonder if your learned comments on
>other things might also be bullshit!

What is BS about it?

1.) Bush looks like a monkey

2.) We had a problem in the House and Senate with congressmen and
senators having sex with pages

3.) The Republican heading the "let's get Clinton" group was arrested
TWICE for exposing himself in a park and for soliciting sex with a
male undercover decoy in an Atlanta park

>And yea, I'm a new republican, got so disgusted with Clinton and company, I
>changed parties, and I still like women!

Good for you. We really ought to throw all the bums out.

Before someone whines about Clinton, we should insist he not have an
extramarital affair himself. Before someone heads a crusade to
prosecute someone else for banging a 21 year-old-female and lying
about it, we should make sure he isn't "hanging out" in public parks
trolling for young males.

>I presume you still support Clinton and hold him in high regard. He was such
>a outstanding example of a President of the United States, wasn't he, ugh!

>puke! I don't know about you, but I was totally embarassed and ashamed to
>have him represent us/me to the entire world...!

Frankly, both parties embarass me. I'm ashamed of many of them, and
embarassed that people think either party does not have more than its
fair share of dishonest members and even the occasional pervert.

Why on earth would anyone think that a certain party affiliation means
the people are honest or moral?

We let them all get away with far too much.

Now think about this...it is important. As bad as Gore was...and as
disliked as Clinton was....the best the Republicans could do was Bush.
They fielded a candidate that actually LOST the popular vote to
someone like Gore!!!! Phew!

Embarassing, isn't it?

Well I may have 'poor reading skills' but I take issue with you painting all people of a certain grouping with the same paint brush about their sexual perferences...There are wierdo's in any group, but not the whole group, and there is a hellva difference between Joe Blow congressman or anyone else and the President of the United States..No matter what, the President should keep him or herself above reproach in all matters, or at least be decrete about it for crying out loud and then lying about it on the national media, sheesh! To much!!!

As for ....the best the Republicans could do was Bush. They fielded a candidate that actually LOST the popular vote to someone like Gore!!!! Phew!...the last I heard on the evening news was that 'all the big time newspapers' that paid to finish the recount down in Florida, much to their chagrin, finally admitted that Bush won anyhow no matter how Gore and company tried to slant it!! As a note of interest, I didn't vote for either Bush or Gore, my candidate lost out early on....!

Take a hard look at what Dubya is doing/not doing with the oil companies right now, think back to what he had to say about the oil business during his campaign, and then take a look at the the modern Bush oil pricing structure. Now, aren't you proud to have voted for such a guy? I didn't think he could sell out in such a short order, but I underestimated the fool.

Thats funny as a lifetime inhabitant I have never heard anyone who lived
here call it that. The only "people" I have heard say it are outsiders such
as yourself who have no clue
and mimic what others say.

As a shareware developer (NuMorse Professional) it makes me sad to see
people asking for free reg codes. They are quite happy to rip off the author
but would get mad if somebody ripped off their credit card, or broke into
their house and stole some cash. They just don't get it.

I know that some people pass around keycodes for NuMorse but enough people
are honest enough to pay the small reg fee and that encourages me to
continue to develop more software. Thank you all for your support.

Hello folks,

Don't get much chance to get on these newsgroups, too busy writing
software:-)

Just to say that you can download a trial of NuMorse Professional from my
website. This program is a completely rewritten 32 bit Windows Morse code
trainer program based on user feedback and suggestions from the tried and
tested 16 bit NuMorse Program.

There are plenty of bells&whistles and loads of new features. Currently
two complete code training courses are included with the program with the
possibility of more to come.

Hope you like it.

Not to mention that most states didn't count their absentee ballots
because they wouldn't change the outcome. Most of those were from our armed
forces that voted almost 3 to 1 in favor of Bush, that could have made up
most of the "popular vote".

Respect for freebanders? What an oxymoron. How about respect for all lawbreakers? It's one thing to screw up the 11-meter band -- it was a wasteland 30 years ago. It's another thing to move into the "open spectrum" between 11 meters and 10 meters, then creep up into 10.

How about I move a couple of my "antique" cars into the free space you call your front yard?

Of course, a fool will always justify his actions to himself.

Subject: Re: Respect For Freebanders Date: Tue, May 8, 2001, 7:32am (EDT-3) X-Trace: fu-berlin.de 989332288 17845332 209.165.2.21 (16 [55752])

And since we are on the subject of headers:

It is time for my monthly disclaimer, in case any newbies have arrived since Leland's last folly with my nic and email.

.
KC8LDO Leland C. Scott forged the original post, it wasn't me. His number of aliases and forged posts and emails are staggering, but he especially likes forging me. Please check the headers. Leland C. Scott, KC8LDO, and Doug Adair, N8wwm, and their many, MANY aliases are responsible for ninety five point nine percent of the strife on the rec.radio.cb ng, and probably on many of your amateur forums as well, especially lately. A good number of posts appearing with no call signs have been easily identified as the same forgers in the cb ng.

Thank you all for the replies via email, as most were polite and well written, as were the many offers to assist me in attaining a ham license, however, I believe in returning things to their rightful owners, so any additional correspondence should be directed at the author of the forged post and troll.

After exposing Leland for forging me over a month ago with the assistance of another licensed amateur, he has waged a personal vendetta against me.

He searched the web and found an article I wrote on freebanding for a hobby magazine over a year ago and has posted it numerous times in an effort to justify his own behavior towards myself and other cbers. He draws his own inferences and hurls unfounded accusations and insults. Leland's main line of defense has always been attack his accuser, no matter who it may be. If anyone would dare suggest Leland may be wrong, he has no defense other than to attack about "What you did" and it is usually a lie (from questioning one's sexual preference to threatening them).

He has repeatedly accused me and others of pirating on amateur frequencies, and nothing could be further from the truth. I understand how an amateur could feel so strongly as to defend his allocated frequencies, but attacking countless individuals behind phony names, forging people, forging email headers in his posts, throwing accusations left and right and refusal to remove anything personal and not on subject off the ng exemplifies what this particular individual and his two cronies are about. He also reported me to my ISP for "forging" (the gall) and was so certain it was me that he made many posts threatening that I was about to lose my internet service. When he received word it wasn't me from my ISP, this sent him into a rage, as it did when I first exposed him. He has accused me of forging for so long (pot, kettle, black) he now accuses my ISP of "lying" to him. I guess the more Leland decides to forge me in your amateur forums, the more frequent I must point out the error of his ways.

I asked Leland and "Sparky" to take whatever personal problem they may have with me to email and I will be glad to debate whatever merit they see fit, but as all will see, these two are more interested in calling names, perpetuating problems between operators and will not cease their childish games....hence the crossposts They don't WANT the strife to go away. I apologize that they feel the need to make you all a part of it, and I was going to ignore most of the emails and what was forged of me, but then the email I received from amateurs was so far from what I expected. Leland forged me and posted that article in a manner to which I would be flamed, and instead, I received email from a great number of amateurs who didn't flame at all.

Quite the opposite, many offered to assist in getting my ticket, and for that I thank you. Turning the tables, if it had been me that were a licensed operator and someone posted an article about freebanding in an amateur format I frequented, I may have been one of the flamers, but as I said, the reaction from amateurs across the land was quite different

than what the original author intended. If a post appears to be from me in anything other than the cb ng, please check the headers....if it has any other path than this one, it is a forge. All emails answered. Have a good day.

I'm embarassed at the quality of candidates we get with this system. I
can't understand why some people feel good about barely squeeking past
Gore, like that is a major accomplishment!

We are lucky Jesse Jackson didn't run, he would have probably won.

I don't want to see this point go unchallenged. The vote
in each state is completely tabulated. To say otherwise is
supreme ignorance. Every vote was counted, and was
submitted. It is a fact that Gore won the popular vote, but
it is also true that this is immaterial to winning the Presidency.

Americans do not vote directly for President. They vote for
Electors. The candidate with the most Electors wins. The
popular vote is an interesting count, but has no bearing on
the Presidential election. It is equal in importance, to the
count of voters complaining of constipation, in relation to
those who have syphilis.

Finally, Bush won the Republican party because he had the
most money. There were other good candidates, but Americans
froze them out of the process by not contributing to their
campaign. Both parties received a fraction of the total votes
possible. More than 50% of voting age Americans never went
to the polls. These same 50% always whine about the result.

Yawn....this whole line is a bore... you win Tom, have a nice life with old blow-job BillC!!! I'm gone...!!!

de Jerry -n6jp-

>Your sense of humor sucks as bad as you sense of perspective.
You need to get a life away from thinking Republicans are better
than anyone else..or more moral.

Although it was intended as sarcastic humor, you must be aware
the Republican in Atlanta heading the "crusade" to get Clinton
disbarred for having sex (or whatever) has resigned because he
was caught a second time exposing himself in a public park and
soliciting a young male undercover cop for sex.

Where is Newt? Gone, because he was poking a woman on his
staff.

Frankly, Republicans and Democrats are both very poor examples
of what out public servants should be like. Now go away and stop
bothering me with this silly "Republicans are moral" crap. You can
pretend whatever you like, but don't fault me if you don't like the
>facts.

Oh, it wasn't up to him. It's just that his "friends" in the oil business know that he'll never use price caps nor controls. They couldn't care less that the extortionary oil price increases will be cause of Bush being evicted in four years. No matter- their additional billions will already be banked and Bush will be fully expendible and ousted at the polls, the economy trashed by universal inflation caused by the fuel price increases which impact *everything*.
So in the midst of record high profits by oil companies, and no sign of anything approaching a REAL shortage of petroleum products, just that allegation by those making the profits, prices rise to record levels (by collusion, no doubt). Nary an 'Out of gas" nor "limited to 10 gallon" sign to be seen (as in '73 when there was a REAL shortage).
Just today, radio news sources "within the oil industry" say that now the pipelines are again full, the 'shortage' is abating, so prices should start to come down, "Except on the West Coast and Midwest where there are special circumstances".(?) Of course, "down" will be somewhere around $1.50-1.75, which was exactly the objective of the entire exercise- get the prices up without just raising them "arbitrarily". (gotta have a 'valid' reason.) Fools that the pubic are, they'll never know what happened.

Sure wish we had a real political party in this good ol' USA. The Demoncrats turned out to be fools and the other side, crooks. Oh, the Clintoon admin. was able to work it both ways.

Or maybe the reverse. News reports (not generally reported by the liberal part of the media who almost universally supported Gore) say that millions of absentee ballots were NOT counted, ever, some 3 million in California alone, simply because they could not affect the outcome in the state in which they were cast. Absentees historically favor conservative candidates. So it could easily be that the popular vote is never going to be known accurately.

And you may ignore another fact, if you wish, but I live in a state where the Democratic machine routinely steals elections in metropolitian areas, and gets away with it. So it happened this time, too, with plenty pf press coverage that wss unavoidable under the circumstances, and do you *really* believe that the Democratic administration installed by that fact will proceed to do a proper job of investigating?

Hello,
I have been hearing about a newer mod for the IC-706 opening up the TX
to 200 MHz. Does anyone have any info on this? I'm not really interested
in using the radio for broadcast but I would love to take a look at the mod
and consider it. Anyone using his radio/mod? Thanks in advance.

Victor

Well, there are not many countries which have published their callsign
databases in a machine-readable form; if you don't find them on
http://www.qsl.net/kt4or/links/qslinfo.html ,
http://www.navkee.tmfweb.nl/Callbooks.htm or
http://www.dl6zfg.de/rr-call.htm, they probably don't exist.
Maybe you'll find something at http://www.dk0tui.de/ham/hamqsl.html -
but they had to move to a new server not long ago, and not all links
may work again.
There are data for OK at http://www.cpcug.org/user/wfeidt/Misc/okcb.html
and for OE at http://home.att.net/~dxer/oelist.pdf ... but that's about
all I can tell you. Germany will issue a CD-ROM with the callsign list
next year, but I'm afraid they will use some odd format, too.

And there is always good old Murphy at work ...

I have no problem with DWI laws. I do have problems where
speed limits are set lower than anyone rationally drives. I have
never suggested allowing unlimited speeds...although there
are certainly highways in the west that can and have had
only "reasonable and proper" as the limit.

The problem is that the safety nazis want everyone to abide by
their version of what is or should be safe. None of that
crowd trusts anyone as an individual.

I recently QSOed the QSL manager for K5K, who was in Portugal for a DX convention of some kind. He says that they are working on it steadily, but are far from the bottom of the pile.

Yes, very possible, particularly with a split operation where he could not hear the pile up. While I now have an antenna array that works well, not that long ago I was using a low "cloudwarmer" multiband dipole, and I could not hear weak DX that others were working. The original poster did not say whether the QRM was intentional, or whether the operator simply was unaware of any other activity on the frequency. It is possible that this was not intentional. As a matter of good operating practice, wouldn't it be nice if casual QSOs were conducted at least 5 khz outside DX windows? I am not a 30M operator, so I don't even know if that band has a DX window.

Oops, the original poster did say it is intentional! As Emily Latela used to say, "never mind". Yes, if it was truly intentional, then it may have not been the actual call. To me, the lowest of the low are the DX police on the DX frequency, and the most pathetic are those who then feed their ego by coming on the DX frequency to complain to them about their DX police activity, thereby causing more QRM than ever.

Also bad are those who feel compelled to come on the DX frequency to ask "who is the DX", and even worse are those who give them the answer!

It's not only on 30m...

Today on 17m and 20m, there was someone making QRM exactly on the CW - QRG of 3B6RF.
When the op qsy'ed half a kc up or down, the QRM'er followed, so he knew exactly what he was doing.

I asked on the cluster if someone else heard it, to determine wether it was deliberate QRM or accidental local noise, and a German op answered:
"no sri is real qrm abt 115 deg fr jo40kl 5/5"

Right now, 16.24utc, the same is happening on 17m. I don't know how the situation is in SSB, but I didn't had the chance of working 3B6 as a new one for me (I want 'm in CW).

The day before yesterday, the same thing on 30m with ZC4DW, not a DX for me, but still a new entity. He came in very strong, so I would have worked him I guess, if it weren't for some QRM'er who jammed ZC4DW full key down up to S9+10dB. Everytime ZC4 moved up or down SEVERAL kc, the QRM'er followed. This lasted for over an hour!

Who de h*ll finds such great amusement and satisfaction in spoiling the fun of others?
Similar facts (tuning of PA's, shouting callsigns when not addressed to...) drove me to abandon SSB and start using CW, but if whe have similar problems in te CW windows, what mode should I turn to then? CB? Collecting stamps?

Maybe I should let it go, but I just discoverd the greatest hobby in the world, and I don't want to go back to my stamp collection!

Just to release my anger and frustration...

That is because the rules are made for the masses not the individual. I doubtr any law says Mike Smith of Nowheresville can drive this speed And Betty Sue Timmins of Godknowswhere can drive this speed.

What do you expect?

The majority of CW-operators on this 3B6 thing has shown a level of
inceompetence that is hard to top. No wonder it brings out the worst in
a couple of frustrated hams who haven't managed a QSO so far.

Compare this to the most recent VK9C expedition or J5X. I can't remember
any QRM on *their* frequency.

Before you start throwing stones at me: By no means am I defending
jammers or advocating any behaviour like that of any QRM-producer.
However, I find it too shortsighted to just look into this backyard: The
DXpedition, at least in this case, is to blame to quite a high extent.

You have to remember that most "safety" related laws and rules are written for the lowest common denominator in society. Just because YOU can safely drive a car on a particular road at 70 MPH, does not mean that everyone else can. And since personal responsibility and prudent judgement seems to be at an all time low in this country, we have been more or less forced to have the rules dictated to us. It's a shame for those of us that feel that we're "better" than that, but the law is the law, and you do not have the right to arbitrarily disregard them. Organize a lobby, study and document your evidence as to why a particular law should be changed, and present it to the proper governing body, and let the process do its thing.

I am very much in favor of personal responsibility, and despise the government meddling in my life. But you have to realize that there are a great many peope in this country that are NOT responsible, and do NOT exercise good judgement. It is THESE people that the laws were written for. As long as people demonstrate that they could not behave themselves if left to their own desires, then the government will have to regulate them. This news group is a perfect example of why we need rules and regs. Too many people operate potentially dangerous equipment with little or no regard for other people's rights, yet they are the first to piss and moan when the law bites them. It's hard to make a case in favor of that type of mentality.

Peter, I agree with you. But, I think their poor operating extends to SSB as well. It's inexcusable for an expedition to tie up a significant portion of every band by saying they're listening "up", and then answering calls anywhere from 5 to 50 KHz up the band. Many times, I heard them calling CQ repeatedly, while dozens of stations could be heard calling them all over the band. Where exactly were they listening? Who knows! Seems to me that they could easily say "QSX up 1 to 5".

However, there can be no excuse for the kind of intentional and childish behavior exhibited by the Virginia station I mentioned in the original post. He knew exactly what he was doing and continued after he was politely informed of the problem. This is the same type of behavior we see in cases of interference to nets and repeaters here in the States. The same people cause the interference for months or years before the government gets to them. They're often fined by the courts, but there's no penalty for ignoring the fine.

Unfortunately, too few people will speak up about the operating practices of 3B6RF for fear of not getting a QSL card.

Can't speak about SSB, since I do CW only.

I observed the same on CW. First of all, it took them way too long to
copy and confirm a call and second they did just the same, i.e. calling
CQ, when gazillions of stations were still calling. Clear case of being
completely stressed out with the pile up. Also, it seemed to me that
their CT-configuration was completely out of sync with the necessities
of handling the pile up up in a decent manner. Calling CQ in order to
make one's callsign known to the pile up is hardly the way to do it.

> Where exactly were they listening? Who knows! Seems to me that
> they could easily say "QSX up 1 to 5".

In CW it was wild jumping abound without any chance of findinga pattern.
Totally unsatisfactory in comparison to experienced Expeditions.

> However, there can be no excuse for the kind of intentional and childish
> behavior exhibited by the Virginia station I mentioned in the original post.

I hope that I have made it clear enough to everyone that I certainly do
not defend or advocate any kind of jamming.

>
> Unfortunately, too few people will speak up about the operating practices of
> 3B6RF for fear of not getting a QSL card.

The logic behind that escapes me. Interestingly enough, I have found the
opposite true in some instances. I had a rather harsh "exchange of
ideas" with VK0MM *before* I had the QSO; yet the day conditions were
right he heard me allright ;-) Haven't asked for a QSL yet, yet I doubt
he would refuse confirming the QSO.

FYI on lower speed limits...

The NMA recently received a special report from the Montana Department of Transportation on highway accidents and fatalities. Chad Dornsife, NMA
Nevada Activist, has created a web page that compares Montana's last 12 months WITHOUT a speed limit to their first full year of experience WITH a speed limit.

The new information shows that fatalities have more than doubled on rural
interstates and has also increased on rural primary highways. This information contradicts the state officials who claimed speed limits, higher fines, and more enforcement would lower traffic deaths.

You can find the full story at

And although you may think you can safely drive on a particular road
at a particular speed, you may be over-judging your abilities.

I heard of a survey once that found that something like 90% of people
though they were above average drivers. Now if they were correct, it
means the distribution is very skewed; there must be some REALLY REALLY
awful drivers somewhere. It's more likely that they are just too
confident and can't properly judge their abilities.

The fastest speed limit in most states of Australia is 110km/hour,
which is about 69 MPH. It's fast enough for a legal limit.

1366. Can't get SWR on tuner to work at home; works in shop

Newsgroup: rec.radio.amateur.dx
Date: 2001-05-13 01:42:38 UTC
From: Ken Jacobs <tekwrite@mindspring.com>
Message-ID: <iEIL6.150$vp6.21132@newsread2.prod.itd.earthlink.net>
Source record: 16971

Hi all,
I recently put up a G5RV dipole hooked to an MFJ-949C tuner. The rig is a Kenwood TS-520S.

The rig seems to be working okay; I can pick up Europe and S. America on 20 meters today. But I want to check my SWR before I transmit anything. I tuned the rig per the oper manual. I cannot make the SWR meter budge on either the dummy load or live coax. Maybe I am missing something simple? I took it to the local ham store and it worked fine there. The ALC meter on the rig seems to work okay.

Appreciate any help.

Ken

Had one and didn't like it "personal preference".
Ended up using a SPIDER with GREAT results from a 2nd floor apartment.
2 of these hooked together makes a solid dipole and if you
put a pipe in the middle it's directional. 8 years later I still use
them for outdoor stuff and as a mobile a single is great.
Check it out you have nothing to loose and it's just a click away :')

Either your radio is not putting out any signal at all or the antenna is flat and resonant. I gather this radio is new to you. Make sure the heater is turned on and tuning into a dummy load, peak the power out. Reset the knobs and talk into the mic to the dummy load and verify that the mic itself is working. Check the cw circuit to verify that it is working as well. Just a plug and a couple wires to open and close a circuit will do if you don't have a key.

a) It's not a magnet.
b) It uses capacitive tuning which for the most part is pretty useless. A loop is better than nothing at all, but barely better than a dummy load.

>a) It's not a magnet.

That's true, it's a small antenna that radiates an electromagnetic
field just like any other antenna.

>b) It uses capacitive tuning which for the most part is pretty useless. A loop is
>better than nothing at all, but barely better than a dummy load.

That isn't true.

The capacitive tuning is the big advantage of using a small loop over
other small antennas....as a matter of fact it is the only advantage.

You have one single component that is very low loss that allows the
antenna to be tuned over a very wide frequency range.

The efficiency of the MFJ loop is from about 20% or so on the lowest
frequency to nearly 90% on the highest band, so loss is from about 6
dB on the lowest band to unnoticable on the highest frequency.

That's hardly a dummy load. It actually is better than some full sized
antennas.

1374. 3B6RF log error?

Newsgroup: rec.radio.amateur.dx
Date: 2001-05-13 15:11:58 UTC
From: on4bam@yahoo.com
Message-ID: <3afea399.21514751@news.easynet.be>
Source record: 16979

Hi,

I just checked the 3B6RF log on their webpage and found that I worked
them on 10 RTTY... good for me except I don't do RTTY :-((
My QSO on 15SSB however is not in the log. My guess is that 15SSB was
logged as 10RTTY (since they show the same date) Has anyone else
noticed this? My QSO was on May 11th around 17.00 UTC.

Bye Maurice

SB DX @ WW < KB8NW $OPDX.511
Ohio/Penn DX Bulletin No. 511

The Ohio/Penn DX PacketCluster
DX Bulletin No. 511
BID: $OPDX.511
May 14, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, W3RM, W3UR & The Daily DX, K4VUD, KO4MR, N4AA & QRZ DX, W4VQ, K6GNX, N6UB, K7BV, K8MR, K8YSE, KU9C, 4X6UO, 9A6AA, 9A7K, DL1EK & DX News Letter, E21EIC, EA5KB, F5NOD, G0KJW, G3XSV, G3XTT, HB9DLE, HP1AC, I2YSB, JA0DWY, OA4DJW, ON4BAM, PA1AW, RA4HT, SP5PB, UX7MA, UZ8RR, V31MX, VA3RJ and VK4CP for the following DX information.

FEW NOTES FROM EDITOR, TEDD, KB8NW: Because I will be attending the Dayton HamVention, I cannot guarantee that there will be a bulletin next week. If it does happen, it will probably be late Monday. Please, continue to send your information (you never know!).
The Northern Ohio DX Association (along with WVNO Radio) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Friday and Saturday evenings. All DXers/Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.

TIP OF THE YEAR (Get the hint!): When sending regular messages, turn OFF your "HTML" format in your mail programs and use plain text. This will save a lot of bandwidth. Using "HTML" usually makes the message twice as big and copies itself twice in one message!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6/May, through Sunday, 13/May there were 224 countries active. Countries available: 3A, 3B6, 3B8, 3B9, 3C, 3D2, 3D2/r, 3V, 3W, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A3, A4, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E3, E4, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J5, J6, J7, J8, JA, JD/m, JT, JW, JY, K, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY,

LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VK9N, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/n, ZK1/s, ZL, ZL7, ZP, ZS
There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2
There were 51 ITU Zones available during the past week.
ITU Zones that were not active are: 3,4,9,15,21,22,23,24,25,26,31, 34,35,43,58,59,68,69,70,71,72,73,74,75,90

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3B6RF THE AGALEGA DXPEDITION (Update). It seems this DXpedition is now going QRT early. According to Sigi, HB9DLE, Headpilot Station for the 3B6RF operation, a "Huriccan Warning for Agalega" will make the 3B6RF Agalega DXpedition go QRT on Monday, May 14th. Check for official news and updates on the team's Web page at: http://www.agalega2000.ch/

5U, NIGER. Jim, 5U7JK, has been active recently on 10 meters. He was heard this past Wednesday, May 9th, on 28495 kHz around 1630z where he has been heard sporadically over the past few weeks. QSL Manager is Silvano, I2YSB.

5V, TOGO. YL Elvira, 5V7SE, has been active over the past week on 12 meters as well as 10 and 15 meters SSB. Check the following frequencies after 1600z for activity: 21275, 24965 and 28495 kHz. She has also been on a 40 meters net with Daniel, 5V7TD, on 7045 kHz around after 2130z. Daniel has been active mainly on 20 meters but has also been heard on 17/12/10 meters. QSL both via IV3TDM.

6Y, JAMAICA. Look for 6Y6L to be active October 23-30th from IOTA NA-097. Operation will be on all bands 160-6 meters, CW, SSB and PSK-31. QSL via WA8LOW.

C9, MOZAMBIQUE. Joe, G3MRC, is now active as C91MR/3 from Beira. You can usually find him on 24901 kHz (sometimes on 21052 kHz) between 1600 and 1830z (sometimes as late as 0700z). QSL via home call.

E4, PALESTINE. Guenter, E4/OE1GZA, was expected to operate from Ramallah over the past week with a linear amp. He is mainly looking for stateside contacts.

EN, UKRAINE (Island Operations). Operators UX7MA, US5MPO, UR0ML and others will be active as EN1MKN from islands on the river "Severskyi Donets" (the Ukrainian Island Award references numbers are: SD-06 and SD-07). Their activity will be on all HF bands CW/SSB, from June 13-30th. QSL via UX7MA, by the bureau or direct to: P.O.Box 22, Stakhanov 94000 Ukraine.

HK3JJH/HK0M WRAP-UP. Pedro, HK3JJH, wrote to OPDX and informed us that he returned from Malpelo late Saturday evening (May 5th). He states that it was a little hard, but he is glad to be home. Pedro made approx. 15000 QSOs on SSB on all the bands, except 6 and 160 meter, which had bad propagation. He now has to translate the hand written log to the computer and send all the information to Carl, N4AA. He plans to write about his trip/activity and send it to Carl for the "DX Magazine".

HOSPITALITY SUITE IN THE SUN. The Mad River Radio Club is pleased to announce that it will again be hosting the "Suite in the Sun" at the Dayton Hamvention Friday and Saturday May 18th and 19th. Located in spaces 3858-3860, they will be there with chairs, cold soda, munchies, and a roof overhead (think protection from sun, not rain!). Stop by to take a break, talk contesting, or even look over their fine selection of radio junk for sale.

HS, THAILAND. Champ, E21EIC, will activate the RAST club station HS0AC in the CQ WPX CW Contest (possibly as a Single Op). He will be active on 80 and 160 meters. Suggested frequencies are 3.524 MHz and 1.834 MHz. QSL via G3NOM.

IOTA NEWS.....
EU-016. Look for the following operators/callsigns Alfred/9A5KV/p, Matija/9A3VM/p and Tom/9A2AA/p to be active from Sveti Andrija Island May 18-20th. This DXpedition will be active, weather permitting. QSL Manager for all callsigns is: Alfred Raguz, 9A5KV, P.O.BOX : 286, 20000 Dubrovnik , CROATIA. Other reference numbers good for this operation are:
World lighthouse Award : LH-388
Croatian lighthouse award : CLH-143
The "Lighthouse Sveti Andrija" is valid for the Croatian Light House Award. Hams interested in the Croatian Light House Award can get all the details on the following Web page at:
http://www.qsl.net/9a7k

EU-038. Maurice, ON4BAM, will be traveling to Holland on a holiday. While there, he will activate the "Island of Terschelling" from May 24-27th. He will be active from his car while signing PA/ON4BAM/mobile, using his TS-50S and Outbacker Perth. He mentions that if there's enough free space, he will put up his DK8SQ tower and some wire antenna(s). His activity will be on 15, 12, 10, 18, 20 meters in that order depending on propagation. QSL via CBA.

NA-073. Jay, V31MX, will be operating from Caye Caulker, Belize, starting the evening of May 15th through May 17th. He will be operating on 15 and 20 meters SSB. QSL Manager is K0BCN.

SA-052. A group of enthusiastc Peruvian hams are planning to activate San Lorenzo Island. They are currently trying to solve/finalize all the paperwork to operate from the island, including the use of the special 4T prefix callsign. They inform OPDX that the island is under Peruvian Navy control. The operators are expected

to be Manuel/OA4AHW, Sergio/OA4DKC and Pablo/OA4DJW. They planned to have 2 stations active on 80-10 meters. The prearranged date is June 29th through July 1st, but these dates can suffer changes depending of the paperwork. The QSLs will be via OA4DJW.

LIGHTHOUSE OPERATION (Lights Out!). The information OPDX received and reported on in last week's bulletin about Eric/G0KJW and Terry/G0OWE going to Longstone Lighthouse (LH 0234) is not true. Eric contacted OPDX and confirmed this. We are not sure who started the rumor, but we are sorry for reporting it.

PJ2, CURACAO. Nine members of the Bristol Contest Group will be here and active from July 19-31st. Operators G6YB, G3RFX, G3TKF, G3XSV, G4FKA, G4HFX, G0WKW, M0AXF and M0WLF will provide plenty of activity as PJ2/homecall on all bands CW/SSB. They will also be active during the IOTA Contest on July 28-29th, using the special callsign PJ2Y. A special QSL for PJ2Y will be issued with G3SWH as QSL Manager. QSL all other activity to the home callsigns.

PY0F, FERNANDO DE NORONHA (Update). Dennis, K7BV, will begin operation on May 24th as scheduled. After an All-Band/Single Op effort in the CQ WPX CW Contest, he will operate through June 1st on all bands 160-6 meters, primarily on CW. A special callsign PV0F will be used throughout the operation. Rod, WC7N, < E-mail: wc7n@gb.wave.net > is building up a 9BDXCC chasers "work list" for Dennis including long path 160 skeds for Asia. Carl, N4AA (editor of QRZ DX), has joined the team assisting Rod keeping in touch with Dennis frequently to insure that every effort is made to fill the needs of the deserving. Carl, K9LA, is brewing propagtion guru magic to predict the best path/time for those QSOs. QSL via Steve, KU9C. Check the following Web site which will be updated frequently with Dennis's current status: http://www.qth.com/py0f

QSL INFO AND NEWS.....
Alex, PA1AW, reports that he now has all of the 5A24PA logs. Cards will be printed during the next month. Cards will start going out mid June 2001. QSLs for 5A24PA go to: Alex van Hengel, PA1AW, Schoener 85, 2991JK Barendrecht, The Netherlands.

QSLs for all valid callsigns in the A52UD log not previously answered direct have been prepared and sent through the bureau system. Work is now proceeding on outstanding requests for QSLs from K4VUD's activity as HS0ZCW, XW1UD, 9N1UD and 9N7UD. Questions should be directed to K4VUD.

Don, G3XTT, (D68C Publicity Manager), reports: "Phil, G3SWH, is receiving a lot of phone calls and e-mails asking about the availability of QSLs for our February Dxpedition as D68C. As most folk will realise, with the biggest DXpedition of all time (168k QSOs!), getting the cards printed has been a major task, especially as we have gone for a high quality 4-sided card, which will look good in everyone's QSL collection. The cards are being printed in Germany, and should arrive with Phil late May. However, Phil and his xyl have a week's trip to 8Q7 scheduled for early

June, and doesn't expect to get into the QSL activity until after his return (even QSL managers deserve a break occasionally!). Please be patient. The cards will be well worth the wait. And remember that SWL cards do not go to Phil, but to Bob Treacher (see previous bulletins for his and Phil's address)."

Jose, EA5KB, informs OPDX that he is the QSL Manager for following stations: CO2FN, CO8EJ, CO8OT, CO3JR, CO8CY, CM6QN, CM6YD, CE2LZR, YV6AZC, TG9AMD, TG9AAK, CX2AQ, CX5AO, CX2SA, CX3VB, HP1AC, CX1CCC and CW0Z (SA-030). QSL is OK via the Bureau or CBA.

FR/F6KDF/T QSL STATUS. Gil, F5NOD, one of the FR/F6KDF/Tromelin CW operators, reports that around 1500 QSLs were supposed to be mailed last week (The major part of it are QSLs received last year). A second QSL package (around 800) will be sent at the end of this month (The last package of QSL received last year). Gil states again, "Do not resend QSL requests yet ... Save your green stamps .. I will inform you when all QSLs were mailed! Please do not send me E-mail 'Did you receive my QSL?': Because I really don't know! Don't worry about your QSL! All QSLs received will be returned!"

Cam, HP1AC, informs OPDX that he now has a QSL Manager handling his cards after May 1, 2001. QSL HP1AC via his QSL Manager EA5KB:
Jose Ardid, P.O.Box 5013, 46080 VALENCIA, SPAIN.

Members of the United Amateur Radio Club (URAC), operated using the callsign N6UB from Catalina Island (IOTA NA-066) during last weekend (May 11-14th). Please QSL using a SASE or enclose an envelope with green stamps or an IRC to cover postage, direct to N6UB (good in the callbooks). URAC operates a Club Station at the Los Angeles Maritime Museum in San Pedro, CA (part of Los Angeles). Operators from the club will include Martin/N6UB, Dale/W7IXL, Neal/N7NW and Doug/WB6ROH.

Steve, KU9C, states that the PW0S QSLs have began to hit the mail. He is working hard to get as many out as he can before the Dayton HamVention. Some of the PW0S team will be there, and if you want to see them, look for them at the DX forum on Saturday morning or at the QRZ DX booth on Saturday 2-3 pm (booth #313). The PW0S QSL can be viewed at the following Web site: http://www.ku9c.com

Thanks to Vladimir, UZ8RR, for providing a short list of QSL routes.
SO8ZZ via UY5ZZ EM10UCC via UY5ZZ
EM7Q via UY5ZZ US0Q via UY5ZZ
QSL only direct to UY5ZZ: Box 4850, Zaporozhye, 69118, UKRAINE

The VK9ML QSL Cards have been received back from the printer. The card can now be seen on the VK9ML website (Go to News Bulletin #21) at:
http://www.qsl.net/vk9ml/

VK9XY QSL UPDATE. OPDX was informed of the following: Stefan, DH1SGS, has stated in late April that all VK9XY cards have not been sent out yet. There is some problem with mailing the cards at present, but when this is cleared up, all cards will go out.

RG, RUSSIA. Slava, UA4HTT, will be active as RG4H in the CQ-M, WPX and all major contests. QSL manager for Slava is RW4HB. Bureau cards are OK, for sending direct, send to: Serge Golobokov, P.O.Box 37, Samara, 443099, Russia.

S2, BANGLADESH. RASHID, S21AR, is active almost daily on 15 meters. Check around or inbetween 21260 and 21290 kHz, from 1100 and 1530z or after 0430z. QSL via JA1UT.

SPECIAL EVENT. Gil, JA0DWY, informs OPDX that a special event station for "International Telecommunications Day" will be active from Nagano, Japan (JCG: 09008), now through May 20th. The callsign will be 8J0ITU. Gil told OPDX that he will operate this station May 17-20th. The station will be active on 80-10 meters (WARC bands too) CW/SSB (however, mainly CW). QSL via JARL bureau.

SPECIAL EVENT/IOTA OPERATION. A group of Italian operators will be active May 23-27th from Santo Stefano Island (IOTA EU-045) Pontinian Archipelago with the special callsign IB0S. This special event is to commemorate the century of the first radio contact made by Guglielmo Marconi between Cornwall and Newfoundland through the Atlantic Ocean. A contact will be made with VO1WET on SSB and also on CW Saturday, May 26th at 1300z. QSL Manager for this special callsign IB0S is I0YKN: Carmine Meoli,
Via della stazione snc, 04010 CORI (LT) ITALY.

SP, POLAND (Lighthouse Operation). Peter, SP5PB, will activate the Niechorze Lighthouse as SP5PB/1 from May 18-20th. Activity will be on CW/SSB. This operation is valid for the "SP Lighthouse Award", SPL 13. QSL via the bureau or CBA.

TT, CHAD. Chris, TT8DX, has been very active on 10 meters over the past weekend. Check 28495 kHz starting around 1330z as late as 1800z. QSL via F5OGL.

VP5, TURKS & CAICOS ISLANDS. Dick/W3RM and Mike/N3MT will be active from the Providenciales Island (NA-002) from May 31st through June 14th as VP5/W3RM and VP5/N3MT. Operation will be on 80-10 meters, mainly CW, some SSB. QSL via home calls.

XW, LAOS. Charly, K4VUD, who has been active as HS0ZCW over the past week, should be in Laos by the time you read this. He did not mention what his callsign would be, but he did state, " I will be searching for the correct license there to satisfy ARRL DXCC." Charly hopes to be on the air on 20 and 15 meters with 100 watts. Check on CW about 20 kHz up from bottom of band edge (plus or minus Asian pirate QRM) and on SSB, check the usual frequencies.

ZL7, CHATHAM ISLAND. Ed, K8VIR, is active as ZL7IR. His length of stay is unknown, but his activity seems to center around 20/17/12 meters. He reportedly is working on the island and will be active during his free time. Operations seem to start around 0100z and sometimes last as late as 0700z. There have been a few QSNs as early as 1030z on 20 meters. Check the following frequencies: 14260, 14270, 18130 and 24950 kHz. QSL via W8WC.

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

/EXIT

> Due to a hurricane warning for Agalega, the 3B6RF operation will QRT

There has never been any hurricane warning in that area! For whatever reason, the Mauritius government wants them to QRT and I suspect they made up the hurricane story as an excuse. The following site from Reunion Island has consistently said "Il n'y a pas de depression tropicale actuellement en cours sur le Sud-Ouest de l'Oci¿½an Indien." which means "There is no tropical depression heading for the Southwest Indian Ocean."

http://www.meteo.fr/temps/domtom/reunion/cyclone_cart/sous_panneaux.html

It's really too bad when guys go to this trouble and expense only to have the operation curtailed earlier than planned!

Easy, I made the QSO's on the same day and checked the log the day
after before making any other QSO with them.
I have worked them again on 15 but can't find that qso in their log
either eventhough my QSOs on 12 and 20 do show... well, I'll just have
to wait and see. I worked them on more bands than anticipated anyway
so I'm happy :-)

Bye Maurice

I worked 5R8EE in Sept 1998 and am still trying for a QSL.

I have wasted several $ in postage trying the various versions of addresses in QRZ and other sources.

These all included sending it to Reunion via France. It has been returned every time, once it took several months to come back even though I sent it via air.

Has anyone actually received a QSL from this guy and how?

73,

Wes N7WS

Ah, the subtle intricacies of it all; so much beyond the ken of this simple unschooled bumpkin! Actually, all of you folks need to begin top posting. This bottom stuff makes my scrolling finger so very tired ;-)

Hi Wes,

In addition to the Reunion route (FR5EL), I found one listing which
pointed to F5QT.

The good news: A little common courtesy in trimming the previous posts
not only makes scrolling unnecessary, but also makes it possible to
follow a discussion in a logical way.

Yep I figured that out when Heavens-above.com only showed the one track. I'm getting a weekly email from NASA with the tracking info. Unfortunatly so far the satellite has only made passes around 4 or 5 am which is a bit earlier than I would like to watch for it. :)

Thanks again for the info and 73!

I've tried all the routes also with out any luck. Been told he is no longer listed as licensed and does not QSL. I gave up and just worked another station and received the card pronto.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K2KW, AJ3M, K3EST, W3UR & The Daily DX, K4VUD, N4AA & QRZ DX, N5VT, WW5L, K7BV, K8YSE, KU9C, 9A6AA, DF6JC, DJ2MX, DL1GGT, DL1EK & DX News Letter, DL2VFR, DL5XAT, F5UJK, GW0ANA, HA0HW, IN3ZNR, JI3ERV, PA0RDY, PA3GIO, PY3DX, RN3OA, SQ9FMU, VE3EXY, VU2NTA and ZK1CG for the following DX information.

EDITOR'S NOTES: I know, just call me cazy! I returned from the Dayton HamVention about 4:45 PM (Sunday, local time) and decided to finish OPDX.512. "Just call me dedicated to my readers". BTW, I had a great time!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13/May, through Sunday, 20/May there were 229 countries active. Countries available: 3A, 3B6, 3B8, 3B9, 3C, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A9, AP, BV, BY, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E3, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HR, HS, HZ, I, IS, J2, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, SU, SV, SV5, SV9, T30, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZK2, ZK3, ZL, ZL7, ZP, ZS
There were 40 CQ Zones available during the past week.
There were 54 ITU Zones available during the past week. ITU Zones that were not active are: 4,15,21,22,23,24,25,26,31,34,35, 43,58,59,68,69,70,71,72,73,74,90

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

4W, EAST TIMOR. Thor, 4W6MM, is active again. Check 20 meters around 14002 kHz after 1200z.

6Y, JAMAICA (Change/Update). The DXpedition team activating 6Y1A in the CQ WPX CW Contest has a last minute change of operators. The group now consists of: KE7X, N6XG, K6ST, and K2KW. Activity will be from May 20-29th, on 80-6 meters with an emphasis on 6 meters and the WARC bands outside the contest. QSL 6Y1A and K2KW via WA4WTG, others via CBA.

CONTESTERS/DXERS HONORED. Bob, K3EST, from the CQ Hall of Fame, reported last week that the CQ Contest Hall of Fame Committee is pleased to announce the two inducees for 2001 will be Sig/N3RS and Algis/LY2NK. Both new members were officially inducted into the Contest Hall of Fame at the contest dinner on Saturday, May 19th, in Dayton. The DX Hall of Fame is also proud to announce the two inductees into the DX Hall of Fame for 2001 were Bob/K4UEE and Bob/W4DR. Both were officially inducted into the DX Hall of Fame by Steve, N8BJQ, during the DX dinner May 18th, also in Dayton. You can read their biographies in the June CQ and May/June CQ Contest.

EXTREME DXING (Bert will be one busy guy!). Bert, PA3GIO, has updated his plans for his DXpeditions in 2001. Here is his planned schedule:
1) Bert, PA3GIO, will be signing 5R8GY in Madagascar on Ile Sainte-Marie (Nosy Boraha), IOTA AF-090 (Rare), from May 30th or 31st through June 9th. He will be active on SSB only on 80/40/20/17/15/12/10 meters with 100w using a doublet with open feeder line. QSL (preferable by the Bureau) to PA3GIO. Website: http://www.pa3gio.nl/5R/

2) Bert will be signing FH/PA3GIO/p on Grande Terre, Mayotte Island (AF-027) from June 11-18th. He will be active on SSB only on 80/40/20/17/15/12/10 meters with 100w using a doublet with open feeder line. QSL (preferable by the Bureau) to PA3GIO.
Website: http://www.pa3gio.nl/FH/

3) Bert will be signing FR/PA3GIO/p on Reunion Island (AF-016), June 19-22nd (with LIMITED ACTIVITY). He will be active on SSB only on 80/40/20/17/15/12/10 meters with 100w using a doublet with open feeder line. QSL (preferable by the Bureau) to PA3GIO.
Website: http://www.pa3gio.nl/FR/

4) Bert, PA3GIO, will be active as VK9XV on Christmas Island (OC-002), from September 6-13th. He will be active on SSB only on 80/40/20/17/15/12/10 meters with 100w using a doublet with open feeder line. QSL (preferable by the Bureau) to PA3GIO.
Website: http://www.pa3gio.nl/VK9XV/

5) Bert, PA3GIO, will be active as VK9CQ Cocos-Keeling Island (OC-003) September 14-20th. He will be active on SSB only on 80/40/20/17/15/12/10m with 100w using doublet with open feeder line. QSL (preferable by the Bureau) to PA3GIO. Website: http://www.pa3gio.nl/VK9CQ/

6) Bert, PA3GIO, will be signing VK6GIO from Australia, September 22nd through October 8th (On route and VERY LIMITED ACTIVITY). He mentions that perhaps he may have a short visit to Kangaroo Island (OC-139) as VK6GIO/5.

7) Bert, PA3GIO, will be signing VK9LO on Lord Howe Island (OC-004) from October 9-15th. He will be active on SSB only on 80/40/20/17/15/12/10 meters with 100w using a doublet with open feeder line. QSL (preferable by the Bureau) to PA3GIO. Website: http://www.pa3gio.nl/VK9LO/

FG, GUADELOUPE. The Russian Contest Club is glad to announce that Jack/RW3QC and Igor/RN3OA will be active from here May 21-28th, as FG5BG (CQ WPX CW Conetst) and FG/KC8QKF (before and after contest). It will be their second RCC Contest\DXpedition. RW3QC will participate in the CQ WPX CW Contest as a Single Operator/Multi Bands/HP entry. RN3OA will operate out of the contest on 160-80 meters, including the WARC bands, RTTY and PSK-31. QSL via RN3OA, by the bureau or direct to: Igor Zakharov, P.O.Box 381, Voronezh, 394000, Russia. (They would like to thank Georges/FG5BG for his help.

HAM-COM 2001. The Lone Star DX Association will be sponsoring the DX program at this event in Arlington, Texas. Some of the guest speakers will be Wayne/N7NG (ARRL), Wes/W3WL (D68C) and John/ON4UN (Topband DXing), The featured speaker will be Martti Laine, OH2BH. The LSDXA will also have a Hospitality Suite available June 8th (7-11PM) at the Wyndham Hotel. For more details, check the Web page: http://www.dxer.org/lsdxa
Also, check the Web page: http://hamcom.org

HB0, LIECHTENSTEIN. A group from Germany will be active for four days from the Principality of Liechtenstein starting Friday, June 1st, ending on Monday, June 4th. They will participate in IARU Region 1 Field Day. In addition, they will be active on 6 meters and on 10 GHz looking for ES and Rainscatter openings. The operators will be DF5UL, DL1GGT, DL5EBT and DL6SAQ and their callsigns will be HB0/homecall. QSL via their homecall.

HB0, LIECHTENSTEIN. Rob, PA0RDY, will be active as HB0/PA0RDY from May 25-29th, especially for the CQ WPX Contest. He will be running 100 watts into a vertical on 10/15/20 meters, plus a dipole on 40 meters. There will be some activity on RTTY and SSB before and after the CW contest. QSL via homecall.

HS0, THAILAND. Charly, K4VUD, is back here again for a few days as HS0ZCW (ed. may be waiting for his XW license -- See XW below). He has announced that he will be active on 40 meters CW (maybe some SSB). Check around 7015 to 7020 kHz between: 2300-2400z, 0900-1000z and 1100-1200z. (ADDED NOTE TO CHARLY: The group from NODXA missed you at their Dayton HamVention hospitality suite this year. Hope you can make it next year.)

IOTA CONTEST 2001. Ric, DL2VFR, informs OPDX that once again you can find this year's summary of activities for the IOTA CONTEST 2001 on the Web page: http://www.iota-post.com
Last year he had 123 announcements - which was very useful for DXers/

Contests looking for a new one in the contest, and a good source for contesters having a look to see if the island they want to go to was already occupied. The list is growing daily.

IOTA NEWS.....
EU-048. Members of Clipperton DX Club, Fabrice/F5NBQ (CDXC1050), Pierre/F5RRW (CDXC942 and UFT 978), Eric/F5LOW and Christian/ F1SDQ will activate the Island of Houat in Morbihan, May 31st through June 4th. They will use the callsign TM1H and will be operational from 160-10 meters (including WARC) on SSB and CW on the usual IOTA frequencies. They will use two IC-706MKII and TS-50 (100 watts), a vertical line antenna on 40 meters, a G5RV for the WARC bands, a sloper for the low bands and Yagi TH3MK3 for 10/15/20 meters. QSL via F6ANA (operator of A52FH) to the bureau or direct to Alain Mesnier, Les Grands Bois, Chemin De La Bussiere, 16440 Mouthiers, France.

EU-110. Operators DF9MV, DL1GEO, DL9CHR and DE0MST will be active from the lighthouse on Porer Island (Rock, south of Pula) on August 12-17th. Other reference numbers are: CI-090 and WLHA 0240. QSL via bureau (DARC) to DE0MST. Direct-address is: Fredy Stippschild, P.O.Box 1406, D-83657, Germany

EU-128. Kurt/DF4XX and Holger/DL5XAT will be active from Fehmarn Island for the WPX Contest weekend. They will participate as a Multi-Operator/Mixed Mode entry. The callsign will be DF4XX/p. All incoming QSLs will be answered through the bureau or direct.

EU-177. Thomas/SM5NGK, Stefan/SM5WAF and Jorg/DF6JC, will be operating from Harstena Island between May 24-27th, signing 8S5T. QSL via DF6JC.

SA-026. Paul, PY3DX, informs OPDX that he is going to take part in the upcoming CQ WPX CW Contest as PU3A (special contest callsign), portable on Santa Catarina Island in southern Brazil. Some other DX friends from his area (PY3KK/Koetz, PY3FOX/Xris and PY3YY/Andy) will also be going with him, but as they are not contest enthusiasts, their goal is to activate this island on the WARC bands, mainly on SSB mode. Paul adds, "Thus, while I'm suffering under big CW pile-ups performing my contest, they plan to drink a coconut water, watch the girls hanging around and make some DX from the island, hi hi hi. I think as time goes by I'm becoming less smart than I use to be, hi hi hi." QSL cards for PU3A will be OK either through the bureau or direct via Paul's home call, which is OK on the www.QRZ.com or Buckmaster at www.buck.com .

J49, CRETE. Laci/HA0HW, Tamas/HA4DX and Bandi/HA5NG will be here between May 25th and June 7th. They will use the special callsigns J49HW (HA0HW), J49DX (HA4DX) and J49NG (HA5NG). They will take part in the CQ WPX Contest (just for fun). It was also mentioned that they will try to go to one of the islands of the newly created "Crete Coastal Islands Group" (EU-187),

June 2-3rd. QSL via home calls.

KH2, GUAM. Operators Ban/JF2WXS, Yoshi/JE2EHP, Michy/JH2CYU, Aki/JH2QFY, Yasu/JJ2CYO and JS2ITP will be active June 9-12th. Activity will be on 160-6 meters SSB/CW. QSL N3WW/KH2 via JF2WXS, K1HP/KH2 via JE2EHP, KH2/JH2CYU via CBA, KH2/JH2QFY via CBA, KH2/JJ2CYO via CBA and KH2/JS2ITP via CBA.

KH2/AH2, GUAM. Aki, JI3ERV/NH2C, Chairman of Guam Contest Club, informs OPDX that after being absent in the CQ WPX SSB Conetst, the Guam Contest Club (GCC) has decided to be on the air during CQ WPX CW Contest at the end of this month. This time they plan to set a target as the Oceanic leader in a Multi-Single category and World Top 5. Also, they are trying to build an Oceanic record in Muliti-Single category. Look for operators JG3RPL/N1BJ, JI3ERV/NH2C, JR7OMD/WI3O and JR8VSE/NH2N to sign AH2R in the contest from Guam Island (Zone 27,IOTA OC-26). Their Sunrise/Sunset is 1953/0843z. QSL via JH7QXJ (Direct or JA bureau, NOT KH2 bureau).

NEW LIGHTHOUSE AWARD. The "German Lighthouse Award" is out now and has been approved as an official DARC Club Award. You can find it detailed on the Web page:
http://www.lighthouse-award.de (Deutsches Leuchtturm Diplom)
Rules are available in German, English and Danish (TNX OZ2ZB). The award consists of 57 landbased LHs in Germany at the moment.

PY0F, FERNANDO DE NORONHA (Correction). Dennis, K7BV, reports that he is very sorry for making a mistake in listing the Web site for his PY0F DXpedition. Last week's announcement read " <http://www.qth.com/py0f> ". It should have been < http:.//www.qth.com/k7bv/py0f >. Please accept Dennis' apologies. Remember, he will begin his operation on May 24th. Look for him as an All-Band/Single Op effort in the CQ WPX CW Contest He will operate through June 1st on all bands 160-6 meters, primarily on CW. A special callsign PV0F will be used throughout the operation. QSL via KU9C.

QSL INFO AND NEWS.....
Mario, DJ2MX (aka T94DX, N0MX), QSL Manager for 9A/OE1EMS (Krk Island, IOTA EU-136, IOCA CI-046), reports that he has the logs and QSL cards. QSL will be OK via DARC bureau or direct to him. He is also QSL Manager for his last activity from Bosnia as T94DX in the 2001 ARI Contest. Please Note: If you send your QSL direct, please enclose 2 USD or 1 IRC (outside Europe) for air-mail return postage. Europe is 1 USD or 1 IRC.

Ric, DL2VFR, reports that QSL cards for his and DL2SWW latest DXpedition to EU-037 (SM7) and EU-002 (OH0) will be sponsored by the magazine "Funkamateur". QSLs should be printed within the next 8 weeks. They plan to answer the direct requests first. Logs are available at:
http://www.iota-expedition.com

OPDX received a request to find out, "What is the QSL status of FT5WH?" Can anyone help?

Steve Wheatley, KU9C, reported on the evening of May 13th, that about 70% of the direct QSL card requests for the February PW0S operation, roughly 2000 cards, are in the hands of the U.S. Postal Service.

QSL Manager Glyn, GW0ANA, reports that the final updated logs for ZD7K and ZD8K are on the Web site: http://www.dxpedition.co.uk He also states that they have sorted out the photographs that they are going to use for the QSL card. These will be sent off to their Italian printer as per the sponsors list ASAP. Once he has received them back, the QSL cards will go out.

Fabrizio, IN3ZNR (aka XW3ZNR, XU7AAY etc.), informs OPDX that all direct QSLs for his operations in the Kingdom of Cambodia and the Laos People Democratic Republic have been answered. If you did not receive yours, please contact Fabrizio via E-mail at: xu7aay@qsl.net

Uwe/DL9NDS (ZK1NDS) and Klause/DLNFK (ZK1NFK) have uploaded the logs for both their North and South Cook Islands on the Web. Check the following Web site to see if you are in the log: http://www.dl9nds.de

SPECIAL EVENT. Station SN45KDU will be active now through May 31st and again November 1-18th to celebrate the 45th anniversary of the Radio Club (SP5KDU) in Tarnowskie Gory, Poland. Activity will be on CW/SSB. QSL via bureau via SP9KDU.

VU4, ANDAMAN & NICOBAR ISLANDS. Nat, VU2NTA, announced again this week that no foreign amateur radio operators are allowed to operate from VU4. He has indicated that just the sheer number of foreigners attempting to put VU4 on the air is making the authorities say NO. There is hope, however. Nat states that, after working two years with the government and asking for suggestions for certain ammendments to the AMATEUR RADIO rules in India, they have just about succeeded. So, maybe something may come through, but he requests to please not press for the VU4 since right now even citizens of India are not allowed to carry radios there. Nat says, "I hope you understand the problems we face."

XW, LAOS (Update). As this bulletin was being prepared, Charly, K4VUD, is staying in the Saylom Yen Guest House in Vientaine and he is currently trying to obtain a license. He reported that he spent a couple of hours at the Lao's equivalent of the PTT office and was told that it may be a month or more before he is assigned a real XW ham license. Charly mentioned that three separate offices must touch/look at his application papers, and he may have to appear in person for an interview for the last step. He is expected to be here until August. (NOTE FROM EDITOR: This was written before I left for Dayton, however, Charly is back in HS0-land for a few days. Please see HS0 above.)

ZONE 2. Nenad, VE3EXY, reports that he has received confirmation authorizing him access to the Indian reserve in ZONE 2. He will be active 4 days (and 5 nights) from Wednesday, May 23rd evening to Monday, May 28th morning, around the CQWW WPX CW Contest weekend. Nenad will be active on the following modes: CW, RTTY, and PSK31 possible, but not guaranteed outside contest. Most of the CW will be during the contest (Not much phone at

all). From ZONE 2 (Loc. FO20), Nenad will sign VE3EXY/2 (Counts as VE2
in the contest). His sunrise will be 0912z and sunset 0035z. Suggested
frequencies will be (he will always work split -2 kHz CW, 5 kHz RTTY or
Phone):
CW - 1827, 3510, 7010, 14025, 18077, 21025, 24897 and 28025.
RTTY - 14090, 21090.
There will be no 6 meters. Reports will be something like "599Z2" which
will indicate Nenad is there. Outside of the contest, he will be active
on the WARC, RTTY and LF. During the CQ WPX CW Contest, look for him on
80/40/10 meters. Check around the greyline times. He will be either on
80 or 160 meters. There are some chances for EU and JA on those two bands.
QSL via VE3EXY (Home call). Nenad's QSL Policies: "For all my DXpedition,
I do not do blanket cover of all QSOs in my log. Instead I answer QSLs
when I receive them. You can send them direct with SASE (SAE +postage),
via the bureau, or direct without postage. QSLs with sufficient return
postage will be answered the same day (if in the log), or via the bureau
otherwise. QSL cards are already printed, and there is no reason to wait.
No special cards waiting for sponsors. E-mail requests are not accepted.
However, elQSL requests will be confirmed electronically, subject to
receiving notification and electronicQSL server address."

Sorry from Casey, but very little of our ops use HF and we have no
Radio Hams on station this year. Most station HF operations are
carried out on 5400 KHz USB. You may here one of the stations on the
odd occasion. Note that Macca does do regular scheds at 0700z or
0800z on 2300 KHz.
Good luck,
Cheers - Al.

FS: by Fred WA5WZD
Reduced price, need the cash! ICOM IC-706 Mk1 in excellent condition
with box and packing. Power cord (about 6 ft) and all written material.
Included is a good working screwdriver antenna with the mounts used on a
pickup tool box and braces. Also included is an MFJ-815B HF peak reading
SWR/Wattmeter. This is the cross needles meter and makes tune up very easy.
The tuning system uses the inductor shunt at the base that allows tune up
any where within the HF range instead of having to switch caps with relays.
I'm an ex ICOM manager in Dallas so it's been treated with kid gloves.
Most operation has been on 40m and 2m ssb.
Asking $650 for the package and buyer pays a nominal shipping fee of $25
insured. Fred fred-palmer@msn.com 940-321-2029

1418. QSLs from BQ9P (2000) and 4W6GH??????

Newsgroup: rec.radio.amateur.dx
Date: 2001-05-22 05:37:53 UTC
From: thompson@mindspring.com
Message-ID: <9ecu05$8lp$1@slb2.atl.mindspring.net>
Source record: 16822

With multiple QSOs with both countries I was hoping to get the cards in hand by March 31 for the DXCC Honor Roll
Update. I sent cards last fall and sent a follow up in late Feb/early march 2001 but to date nothing from either KU9C or CT1EGH.
I was offered the statement that BQ9P card were not back from the printer but this is for the 2001 operation not last years. I worked BQ9P again this year so maybe I will finally get a card for this operation. I see where KU9C is sending out PW0S cards and I worked that so maybe I should send the BQ9P cards along with the ones for PW0S.

There is hope for 4W6GH as a local got his cards a couple of weeks ago and he sent for his right away not in the fall as I did. I always put the main contact info on the front of the envelope (time/date/mode) so the QSL manager does not have to open it to look at my QSOs. I hope everyone has not had the problem with QSLs that I have encountered.

73 Dave K4JRB

1419. Please lets get back to using the QSL Bureaus!

Newsgroup: rec.radio.amateur.dx

From: thompson@mindspring.com
Message-ID: <9ecu9jlfg1@slb6.atl.mindspring.net>
Source record: 16823

Almost no one sends via the bureau and more. The most notable are the former USSR countries...since 1991 I have worked thousands but perhaps received 75 or 100 QSLs. Most of the cards received this way have been for my IOTA operations from NA-058 and they wanted my card. Except for the OH DX gang and a few other exceptions its gotten so the average ham can't afford to work toward band countries...its just to expensive to always send IRC's or greenbacks plus pay the airmail postage. Multiply that by the band countries and you have a sizeable fortune! Lets get back to using the bureaus so we can afford to DX again!

> countries and you have a sizeable fortune! Lets get back to using

Its my beleif that DX has become a big business. Ive heard more and more stations on saying 1 - 5 greenbacks for cards. Ive become disinterested in collecting QSL's now because of it. I still DX and if people want to see my countries worked I show them my Computer log.

If people send me a card I try my best to send one back. I keep envelopes at the Buro for those that use it. If they have a manager that will accept SASE's I will go that route if I want a card.

Getting harder though as it seems more and more require big bucks for cards.

Which is why I don't bother with the "paper chase". I ain't payin' anyone $2-5 USD for a stinkin' card ... I KNOW I worked 'em. I work 'em, I log 'em, that's all that matters to me. If someone wants my card, they can ask (but who the hell needs Connecticut? ... grin!) and I'll promptly reply, via the same route I receive their card, or I'll put a post card rate stamp on my card and get it right out if they ask on the air. DX, I don't bother unless something comes in via the bureau.

I have about 250 countries in the log on 100W, and nearly 60 in just 2 months of QRP operating. Just a few hundred cards over the years though, mostly from when I thought I cared, but what does it matter?

Hello Dennis,
You summed up my feelings to a tee. I collected enough cards to submit for DXCC and then I dropped the ARRL and the paper chase. As you know it can be expensive and a source of stress to qsl via mail either direct or bureau.

Now once I have them worked and in my computer log (DXBase 2002) that is all the confirmation I need.

I

Well ... I still belong the ARRL. I AM getting interested in FISTS,
which has its own QSL bureau, and it works well, I'm told. As 99.9%
CW operator, FISTS cards sound like something I might like to collect.

Dave, not sure what qso you're looking for BQ9P....I have cards and logs
for all operations except the March 2001 operation.
I see you in the 2000 log, but no activity on your call. This means I have
not received your card as of this date.....so that's why you haven't seen
a card in return.

If you want, send me an email (ku9c@arrl.net) with the qso detail and your
address, and I can mail a card. You can catch me on the sase next time u
need a card.

Couldn't agree more! I don't need some bozo sitting at a
desk in the ARRL HQ to agree that I've worked ANYONE,
DX or otherwise, and that I can claim it in public.

Likewise, I KNOW what I've worked...stuff 'em !

And as for the thieves who demand several bucks for a QSL...
.....well, the second word is "off " !!

Guess I'll chime in after trying most of the major logging programs such as LogPlus , Log Windows , DX4WIN , and Logic 5 I have settled on DXBase 2002. Here is a snippet about the product....

<snip>

Designed for those who demand the best, DXbase 2002 by Scientific Solutions, Inc. is the premiere amateur radio logging software for 32bit Windows. One look and you'll wonder how you ever managed without it. Whether you want to custom design your own QSL cards and labels, operate PSK mode and log directly into DXbase, perfect CW output with the direct interface to the W5XD external keyer, automatically create award submission forms, create your own reports, monitor VHF Packet and Internet Packet letting DXbase tell you when you need one, or just log a QSO with the greatest of ease, DXbase 2002 is the software for you.

<snip>

I have used this product since DXBase 2000 and it is a reliable and extremely high-performance logging program
That can do everything the other loggers do plus much more.....

Download the informational demo at http://www.dxbase.com

Chuck Brady spoke at the Dayton DX Banquet. He said that he had the logs with him in Dayton, and wanted to turn them over to his manager. His manager was at that time somewhere in Ohio building a house for Habitat for Humanity.

Sounds like we need to be patient. What Chuck went through to give out those contacts and get the logs back was amazing. He got a standing ovation.

hey charles
that software looking really good on there website
but i am not paying $100 for software with out getting to try it first there are
to many variables in computers and radios and such that would render the thing
usless
i wish they would offer a trail program for 2 weeks to a month like everyone
else does to give you a chance to see if it will work on your system and that if
the software is what your looking for
i am glad you find it useful happy hamming

I know what you mean, I had a trouble when I was "new" to CW, too. I
can do it now, but it's tiring.

I always laugh when I hear some station calling CQ at 35 wpm
(evidently to make more and faster contacts) when there's absolutely
NO ONE coming back. What's the hurry then? grin!

I have for sale a used Force12 EF-320x/240s. 28' boom, 3 el on 20m, 2 el on 40m, dual feed. Antenna has only been up for about 2 years, has been stored since then. I just re-did
all the hardware, antenna is in excellent shape. Was going to put up but is too big for present tower. Asking $450 plus shipping. I also have a Cushcraft A3S that I retuned to 10/15/17m, can be tuned back to 10/15/20m. I'm asking $200 plus shipping. Both antennas' for $600 plus shipping. I'm in the Atlantic City New Jersey area.

The hurry is called Q-Rate (number of contacts per hour)- gotta have a high
one to win the contest.
Here is what works for me - practice with your computer sending your call at
high speeds. You should
be able to copy your call at any speed -- just from the sound.
Next copy the contest callor as best you can -- one or more characters, then
listen for the rest until you get it.
Now transmit your call only -- by hand or memory keyer.
When you hear your call -- send TU 59(9) and contest info (zone, serial#, etc)
Memory keyers will increment the serial# or remember the zone, etc
If received Ok the contester will send QSL or TU or QRZ for the next caller.
Many contesters will slow down at the end of a contest or when there are no
takers -- to entice the slower copiers.
And guess what -- after a day or two of contesting as the Caller -- your code
speed will increase quite a bit.
And the callor is happy to get the Q, and doesn't care how sloppy or nervous
your code is.

Call them at whatever speed you feel comfortable copying. Many will slow
down to match your speed. If they don't, send "QRS PSE". If they don't
respond to *that*, they're a lid & don't deserve your point<g>.

Usually the higher up in the band you go, the slower the CW is.
Listening to the stuff that's a little too fast for you is a great way
to increase your speed. And, if you aren't sending in a log, it
doesn't matter that you might miss their serial number :.)

Here is a snip from The Daily DX which in it's May 23 issue had some remarks about P5DX

<snip>

P5DX - PIRATE - Kan, JA1BK, confirms this was someone playing games. Don't even bother to send a QSL for yesterday's activities.

<snip>

As I undewrstood " P5DX " was claiming JA1BK as his qsl mgr thus the remarks from JA1BK mentioned

Hi dr OMs,

I just moved all content of my website to www.on4cay.com and updated several pages ...
So please visit it, and report me all missing links and/or errors !!

Do not forget to sign the new guestbook please ....

Thanks and 73s de ON4CAY, Ronny

1478. BeaconSee Users

Newsgroup: rec.radio.amateur.dx
Date: 2001-05-27 20:47:18 UTC
From: Bev M Ewen-Smith <coaa@mail.telepac.pt>
Message-ID: <9erpem$2kr$1@venus.telepac.pt>
Source record: 16883

There is a new version of BeaconSee, the real-time hf propagation monitoring program, at

http://sapp.telepac.pt/coaa/beaconsee.htm

It now has a new mode where you can display the signal strength from one NCDXF/IARU beacon on all bands as well as the existing mode of displaying the signal received from all the beacons on selected bands.

746 is a great radio - bang for the dollar the best I've
seen in the hundred watt class. Performance on VHF with
6 and 2 meters, full general coverage receiver, keyer,
tuner, DSP, etc. all really work very well and nice clean
user interface. I looked at the manual maybe twice
and the rest is just intuitive. Nice large display
yet radio has relatively small footprint on desk.

But....if you go QRP....spend half the money and
get a K2. Thats my favorite!

73!

The Ohio/Penn DX PacketCluster
DX Bulletin No. 513
BID: $OPDX.513
May 28, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, W3UR & The Daily DX, K4VUD, WN3VAW, N4AA & QRZ DX, N4GN, N4PL, NT4TT, K8YSE, WA9YYY, CO8TW, DJ2PJ, DL1EK & DX News Letter, DL2VFR, DL8AAM, EA7FTR, EI4GK, F5NOD, G3XDV, G4KHU, GM4SUC, I2WIJ, I2YSB, JH4RHF, JI3DST, LU5FF, OH2BH, OH6LI, OH6NJ, ON4AAC, ON4ADN, RZ9OU, SP5UAF, SV1IO, UA9UAX, UX2RY, VE2MBS and VE3EXY for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20/May, through Sunday, 27/May there were 228 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3D2/r, 3V, 3W, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH4, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T5, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VQ9, VR, VU, XE, XT, XU, XX9, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS
All 40 CQ Zones were available during the past week.
There were 55 ITU Zones available during the past week. ITU Zones that were not active are: 21,22,23,24,25, 26,31,34,35,43,58,59, 68,69,70,71,72,73,74,75,90

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3C, EQUATORIAL GUINEA. Martin, 3C5J, continues to be very active from the oil platform in Equatorial Guinea, especially on 15 and 20 meters CW/SSB. It is great to see that he is an active operator, but he would please many if he could operate from the mainland for a few days so it wpuld count for DXCC. His main activity seems to be around 1300-1630z and again between 0530 and 0830z. QSL via MW0BRO.

CF2/CG2/VC2, CANADA (Special Prefixes). In celebration of the 50th anniversary of the founding of the "Radioamateurs du Quebec, Inc." (RAQI), Canadians have obtained from Industry Canada permission for all VA2/VE2s to use a special commemorative prefix. Effective from June 15, 2001, to July 15, 2001, all holders of callsigns with VE2 prefixes may use the special prefix CG2, and holders of VA2 prefixed callsigns may use the special prefix CF2. Daniel A. Lamoureux, VE2KA, president of the RAQI, also reports that they have obtained from Industry Canada a special callsign which can also be used between June 15th and July 15th. This callsign is VC2A, which can be used by an individual or group. Look for this callsign probably in contests. For more details and the latest RAQI bulletin, check the Web page at: http://www.marc.qc.ca/raqi0105.html

CQ AWARD SPONSORED. Ed, NT4TT (ex-AH2BE/KH9, KB6DAW/KH2/KH9, HL9MM, 8P9GI and HZ1AB), announced at the Dayton HamVention that starting this year in memory of those who loved Ed, W2MIG, he was sponsoring the CQ WPX Mulit Single Asia Plaque. Ed considered "MIG" a friend and appreciated all the help he gave him working the Carribean while he was out on some of Ed's (NT4TT) DXpeditions. Ed also sponsors the CQWW Multi Asia Plaque in memory of his ex-QSL Managers AA6BB and KA6V who have passed on due to cancer.

HS, THAILAND. Charly, W4VUD, continues to be active from here as HS0ZCW. He was heard this past weekend in the CQ WPX Contest. However, he reported this past weekend to "Please tell everyone...NO OPERATION ALLOWED ON THE WARC BANDS IN THAILAND. I am still getting requests for WARC contacts. NOT LEGAL IN THAILAND!!!"

ILLW/2001 WEEKEND (Update). Mike, GM4SUC, reminds everyone that the International Lighthouse/Lightship Weekend will take place from 0001z on Saturday, August 18th through 2359z on Sunday, August 19th. Already over 100 stations have confirmed their participation from either a lighthouse, lightship or maritime beacon. You can find the list of stations at: http://vk2ce.com/illw/2001.htm
Have a look and see if your station is mentioned and that the details are correct. If you have any questions or if there are any errors, please notify Mike at: gm4suc@compuserve.com

IOTA NEWS.....
AS-147. Takeshi, JI3DST, will be active from Okushiri Island (Okushiri-cho Okushiri-gun Hokkaidou) starting 0700z, June 2nd through 0200z, June 5th. His callsign will be JI3DST/8. Activity will be on 17/15/12/10/6/2 meters SSB. He requests to QSL ONLY via the bureau. Direct QSL will be mailed later.

EU-007. Sean/EI4GK and Declan/EI9HQ hope to operate from the Blasket Islands between June 1st and 3rd using the call signs EJ4GK and EJ9HQ. Operations will be mainly SSB on all bands 80-10 meters. QSL to home calls direct or via the Bureau.

EU-017. Stromboli Island will be activated by a group of Italians from May 31st through June 3rd using the special callsign ID9S. Operations will be on 160/80/40/20/15/10/6 meters in addition to 2 meters and 70 cm. Other reference numbers for this island are: I.I.A. (Italian Island Award) - ME 16, W.A.I.P. (Worked All Italian Provinces) - MESSINA (ME), and WW Locator - JM78. QSL Manager is IZ0EUI.

EU-037. Guenter, DL5CX, will be signing SM7/DL5CX from the Kalmar District, June 9-16th. Activity will be on 80-10 meters CW/SSB/PSK31/RTTY. QSL via home call.

EU-174. Frank, ON4AAC, reports that they will use the special callsign J48T on the Greek island Thassos now through June 3rd.

EA-184. A group of Finnish opeators will be active from Hailuoto Island as OH6AW/8 between June 29th and July 5th. Operations will be on HF, 6m, 2m and 70cm. Operators are Pertti/OH6HJE, Jarno/OH6NJ, Markku/OH6UV and Juha/OH6MTG.

NA-057. Ray, WA9YYY, will be operating as HR6/WA9YYY from Roatan Island, Honduras, from June 16-23rd. His primary bands will be 20 and 12 meters, mostly CW. His rig will be a FT-900 (and a memory keyer) to wire antennas up in the palm trees. QSL to his home callsign; bureau cards are OK.

OC-046. Kaoru, JA3MCA, will be on Tahiti from May 27-29th. Activity will be on 80-10 meters CW/SSB. QSL via JA3MCA.

J49, CRETE. Bob, I2WIJ, reports that he will be active from here July 23rd through August 6th. He will also participate in the 2001 IOTA Contest as J49R as a 24H CW 100w DXpedition entry. Activity outside the contest will be mostly SSB and on WARC bands. He hopes to be able to have a 160m dipole up, even if conditions in July may not be so good for that band. For more info and news, check his web site at: http://www.qsl.net/i2wij/

JW, SVALBARD ISLANDS (Reminder/Rare IOTA). Remember to look for JW0PK next weekend (June 1-9th) to be active from a rare Artic IOTA in the Spitsbergen's Coastal Islands (EU-063). The island is called Prins Karls Forland. Activity will be on all bands and modes. For more details, please refer to OPDX.509. QSL via SP5DRH. QSLs via the bureau are ok. If you prefer direct, QSL via: Mr. Jacek Kubiak, P.O.Box 4, 00-957 Warszawa - Poland.

LIGHTHOUSE ACTIVITY. The Nieuwpoort Lighthouse (BEL-004) will be activated for the very first time during the coming "Lighthouse-Lightship" weekend (August 18-19th), by ON4ADN, ON4CJK, ON5FP, ON6HH, ON1DPX and some other operators. They have been granted the special callsign OS4LHN. Activity will be on all bands (80-10 meters) mainly SSB and CW. QSL goes to ON4ADN, either direct or through the UBA bureau. There will be a multi-color QSL.

All replies to direct QSLs will be posted in Nieuwpoort and will bear the special "Nieuwpoort Lighthouse" postmark wich can be considered as a real collector's item. QSL Manager Geert, ON4ADN, states that he only needs reply postage, no envelope, and of course your address.

OH0, ALAND ISLAND. DL5FF/OH0JWL (Peter) and DJ2PJ/OH0JWH (Hadi) will be in their log cabin on the Aland Islands (in JP30TF), from June 10-22nd. Activity will include all bands, CW, PSK31, RTTY, and SSB. Special attention will be given to 50 MHz with 90 watts into a 6 element yagi. QSL only to their German callsigns, NOT via the OH0 Bureau!

OJ0, MARKET REEF. A united team of OH and JA operators are planning an operation from here during the 2001 IARU Contest. Activity will be from July 12-16th. Operators listed are: OH1VR/Seppo, OH1NX/Timo, OH1TX/Jaakko, OH0RJ/Lasse, JH1ARJ/Massy, JP1NWZ/Yo, OE1ZKC/JH4RHF/Jun and JR4PMX/Hiro. The contest callsign will be OJ0U. Outside of the contest operators will use OJ0/homecall (before and after the contest). Three stations will be active with activity on 160-6 meters CW/SSB/RTTY (possibly SSTV). QSL Manager for OJ0U will be JP1NWZ. For all others, QSL via their home callsign for other individual callsign.

P5 PIRATE. A station signing P5DX was having a real fun time this week with many individuals chasing him/her on 40/20/15 meters CW. Save your green stamps on this one!

QSL INFO AND NEWS.....
Last week OPDX received a request to find out, "What is the QSL status of FT5WH?" According to Gil, F5NOD, a F6KDF Club member and Chairman of the "Lyon DX Gang" Association, states all QSLs that were received direct have been sent (a long time ago...). They received a batch of monthly FT5WH QSL requests, and they answered them. A big batch of bureau QSLs had also been sent some months ago. So, the log is still open and you can resubmit a QSL if you didn't receive yours. QSL via F6KDF.

QSL 4G1A, which was active in the CQ WPX Contest, to VE7DP or DX1CW (the CW Philippines in Manila).

5U7JK's LOG is now available on Silvano's, I2YSB, Web page at: http://digilander.iol.it/i2ysb

Juan, CO8TW, states that his CQ WPX Contest log is available on the Web at: http://www.qsl.net/co8tw/
He was active as a Single Band (20m)/Low Power entry.

Javi, LU5FF, participated in the CQ WPX CW Contest as LQ0F on 10/15/20 meters. QSL via LU5FF.

NOT THE QSL MANAGER. Silvano, I2YSB, reports that he has been receiving QSLs for 3D2AG/p and Z21CS. He is NOT the QSL Manager for these stations. QSL both these stations to their CBA.

OG3M/0 was active on all bands in the CQ WPX CW Contest from Aland Islands. All QSLs will be sent via the bureau, no card needed. If a

direct QSL is wanted, send request via OH1VR's home address:
Ojakatu 3A18, 33100 Tampere, Finland.

OH0B was active from Aland Island in the CQ WPX CW Contest as a Multi-Single category. There were three stations on the air manned by young operators and old-timers. Operators were OH2BH, OH2JTE, OH2MM, OH2PM, OH2TA and OH8SR. QSL OH0B via OH1BV.

OH0V was active on all bands in the CQ WPX CW Contest. QSL via OH6LI: Jukka Klemola, Aarontie 5, 31400 SOMERO, Finland or via bureau.

Igor, RZ9OU (Asiatic Russia - CQ zone 18), was active as RG9O in the CQ WPX CW Contest as an All Band/Low Power category. QSL via home call. Bureau cards are OK, send direct QSL to: Igor Naumov, P.O.Box 69, Novosibirsk-90, 630090, Russia.

Fran, EA7FTR, informs OPDX that he is now the QSL Manager for Ratul, S21RA, in Dhaka Bangladesh, and Andrew, 5Z4FT (he has the previous log for 5Z4FT). Send QSL to the bureau or direct to: Francisco Liyez Suero, Asturias 23, 21110, Aljaraque, Huelva, Spain.

RUSSIAN MOUNTAIN DXPEDITION. Oleg, UA9UAX, reports that operators Vladimir/EY8HB, EY8AV, Nodir/EY8MM and a group of mountaineers are planning to be active/work from one of the anonymous mountains on the Pamirs (near Sarez lake), July 3rd. They will only be active for ONE hour from the peak (5800-5900m above sea level). Operations will be on SSB on 40 or 20 meters using an IC-706MK2G. INTERESTING NOTE: After the expedition, the mountain will be named "Radio Amateur's Peak"!

SILENT KEY. George Vernadakis, SV1AB (ex F9QN), became a "SK" on May 24th, 2001. George was born in Paris in the twenties and stayed in Marseilles, France, as F9QN until the mid-fifties. Then, he settled in Athens, Greece, as SV1AB and became a pionneer and a well known DXman on RF and mainly on VHF/UHF all modes and ways. He was an excellent technician as well and a founder of the "Radio Amateur Association of Greece" (RAAG: a IARU member), which he presided over during several years. OPDX and its readers would like to send out our deepest sympathy to his family and friends.

SPECIAL ACTIVITY ON LF. The RSGB LF Group reports: "Listeners may be aware that the UK Royal Navy are celebrating the Centenary of the Royal Navy Submarine service with a gathering of UK and overseas submarines in the Clyde. This year is also the 75th anniversary of operation of the GBR transmitter (Rugby). As part of this celebration 'It is hoped' that a special A1A Morse code transmission from the GBR long wave transmitter will be made. For those with an interest in VLF reception please listen to 16kHz (yes 16 > not 60kHz!) on Tuesday, May 29th, 2001, at 1200 GMT and 1345 GMT."

TX0, CHESTERFIELS ISLAND. It has been reported that an Oceania DX Group is planning a DXpedition to this newest DXCC entity later this year, possibly in September. The plan is to have at least five stations active 24 hours a day on 160-6 meters CW, SSB and RTTY. Apparently, Bill Horner,

VK4FW, is heading up the group and is looking for operators. If interested, contact him at: vk4fw@spiderweb.com.au

UR, UKRAINE (New UIA). Operators Andy/UX2RY, Alex/UY2RO, George/UY2RA, Irina/UY2RY, Witaly/UX2RV, Yuri/UT0RW, George/UY5XE, Eugen/US5UM, Vlad/U5UG, Vlad/UR4UKV and others will operate as UR4RZA/p from Pravednyi Island (not IOTA, UIA DN 051 [newone]) on June 14-17th. Activity is expected to take place on 80-10 meters CW/SSB and also the satellites. QSL via UX2RY either direct (Andy Asriyanz, P.O.Box 14, Slavutich-3, Kiev obl., 07100, Ukraine) or through the bureau.

VIETNAM PIRATE. Tom, 3W7CW, has confirmed that his callsign has been recently used by a PIRATE (i.e. on May 19th, 2001 on 18073 kHz, starting around 2200z). Tom has been QRT for the past several weeks due to a relocation from Hanoi to Saigon. His antennas at the new QTH will be ready in/around September-October. Tom will change his prefix from 3W7 to 3W5, so look out for him as 3W5CW.

ZONE 2 (UPDATE). Nenad, VE3EXY, is now active as VE3EXY/2. He started a day late than expected, however, he will be staying a day later than expected (May 29th, 1200z).

Anyone have any success or or suggestions about the method and equipment used to recover spread spectrum cordless telephone transmissions? They are in the 902 to 927 mHz range. Thanks for answering here, so that all may benefit.

Well, I undersand what you say, but you need to appreciate
that by working these people you are condoning and supporting
illegal operations.

As far as P5 is concerned: there would certainly be the most
enormous world-wide publicity for any legal operation from
N Korea. There is just NO way a legit P5 is going to simply
appear out of the blue. So P51DX was an obvious slim.

Amateur Radio has enough problems with the general reduction
in standards and "dumbing-down" of the hobby without actually
encouraging piracy of our limited band-space.

Dave

You're not supposed to be able to decode spread spectrum. It is a secure mode!

I worked on RF hardware and software design of spread spectrum phones. The US government would have a serverly hard time decoding a spread spectrum signal phone (its easier to just tap the line...hehehe). The base unit passes the handset a "seed" this seed corresponds to a psuedo-random high speed code on which the multichipped audio stream is EX-OR'ed with. Also there are control signals passed back and forth between base and handset....not to mention channel selection...etc. Sounds complicated yet?.....well there is more.....Your receiver archetecture only takes care of the physical radio demodulation......there is the software layer that is the BIG unknown, that layer takes care of EVERYTHING, if you have no clue how or what it does you will be spinning your wheels for years.

Best Regards,
MacGmaN

Well I live in South Bend IN, and am putting up a little system (under 50 feet). The neighbor said I could have his old tower if I took it down...well its in my backyard ready to clean. Probably going to wash with 50/50 vinagar water than POR-15 with a white top coat.

My design so far is placing the tower into a 6' deep hole, fill with 2' of gravel (for drainage) than pore 4' of cement. I have 3 - 8' radials buried 4" in the ground and hope to place 8' ground rods on the end going down deep. (debating adding 4 - 20' radials with ground rods to help lighting and grounding). these get hooked up to a box with polyphaser arastors about 18" from the ground on the tower. Going to use RG-8XF cable on the tower thru garage with RG-213 from basement shack to garage (about 70'). .

Antennas will be top to bottom;
a "black bullet" 2 meter 4el quad beem
a "discone" scanner/2 meter and up
a Antron 99 (CB 5/8 wave with ground plane)
I will put the beam on top and the others will be on stand offs with pulleys to add dipoles and others later. (I only have a tech licence, KB9YMX) HF is not a priority for awhile but the pulleys will help.

From the tower it goes into the garage than underground to the basement ham shack. I have very little idea what I am doing....CB never took all this it was strap it to a pipe and run coax!

Please steer me in the right direction... thank you!

Build a cage of rebar before pouring in the concrete. Put at least 2 -3
good ground rods off the tower itself.

If you are using a rotator...put in some disconnect between the tower and
the control box. Amazing the number of operators who religiously
disconnect all their coax and forget this one piece of wire(s) running
into their shack.

That is not a "demo." It is the help file. Often I have found the help file to be of little "help" even having the program. It is no substitute for a working demo.

Well said Doug! I always slow down to match the speed of a much slower speed station. Also, high speeds work well only if you have a very good signal. With all the QRN this weekend, I had to ask many very weak callers to QRS so I could copy their numbers through the noise.

Don't know if Charles is, but I'm not, and I agree completely. I tried a few different programs before I settled on this one. My decision was easy when I called in the evening to leave a message and got a the real developer of the product. We talked and he answered all my questions. He and his assistant (the YL shown on the front of his web page), have done a great job. I have emailed for help once and got a reply within an hour. I think these people will be around a while.

I really do appreciate all the features and I don't think I'll outgrow this program.

Depends on what you're looking to do with the rig. The TS870 is the best DX rig by far. The other two don't have enough dynamic range to handle strong nearby signals in contesting and DXing.

The IC-746 is a pretty good rig with an OK receiver front end and offers the best bang for the buck. I've heard that the FT-847 has a mediocre HF receiver, but is decent as a VHF/UHF sattelite rig.

have to agree with scot..
i have an 847 for 2 yrs and it's excellent on v/uhf.
it's ok on hf but have been told the 2.1 inrad filter really works well.
it does not compare on hf compared to my 1000mp but it does have other
advantages. i have used it on hf and i like it except the tinny sounding
speaker...the mp has a fuller sound...nothing major and an external speaker
will solve this .
i will be going portable in the summer with a topband di pole / atu and
v/uhf set up and taking the 847. this is what the radio is all about...one
rig all bands in a small size.
cheers
paul mw0dct

This rig seems quite inriguing. Light enough to backpack yet a full featured transceiver. Currently, is there anything comparable on the market?

I currently own a Kenwood TS-430s. I may have to sell the current rig to purchase the FT-817. Any opinions on if this is a wise choice? I go camping monthly with the Boy Scouts so the back packer makes sense, but I do like the power of the base station.

Thanks,

73

Exactly. You're 59+ on this one :-))

Same with me. I actually had a huge problem with echoing longpath signals on
15m. Some stations from EU were 599+ (I'd better say 199+) but they had to
slow down to 10 wpm for me to be able to copy their number. It just didnt
work any other way.

One thing I learned over the years of contesting (only abt 15, hi) is that
the very high speed actually helps me to copy weak signals trough qrm/qrn
sometimes. If I am the weak one and have to repeat the call or number I
usually send it once at 10 - 15 wpm and twice at 40 - 45 wpm. If the OM on
the other end is "speedy" it works very good.

Gary,

I have the same problem - and noticed another trend this weekend that was more prevalent this year than ever before - these keyers with varying send rates that auto-slow for some portion of the report and speed up to about 50 WPM for others. C'mon, how much time are you saving by sending "599" at 30 WPM versus 50 WPM???

ANYWAY, regarding your "too fast" problem... I can normally handle about 35 WPM in burst mode, but I have a real problem differentiating long streams of bits: was that an HB4xx or 5B4xx??

To help me with this, I have a small, cheap cassette tape recorder on the bench in the shack, and set for high-speed record. I'll record the contest QSOs, and if I have trouble with Ss, Hs and 5s (or a serial number that comes whizzing by...) I just rewind the tape a few feet, replay the exchange at s-l-o-w speed off-line, and then log it. I find this much better than trying to maintain contact with a marginal-connection contester who would much rather move on to his next QSO than bother with me.

Works for me... your mileage may vary

Yes, this is important. When bursty QRM or QRN are the problem, sending slowly increases the chances that a burst is going to clobber enough of your transmission to make copy impossible.

Also, don't send unrequested information in response to a fill request. If I send "NR AGN PSE" don't send "DE ZA0DX 5NN 583". First, I'm likely to suspect I got your call wrong. If I sent your call correctly in response to your call, I don't expect to hear it again. Secondly, if there's bursty QRM/QRN/QSB, the chances that it'll take out the number again are much greater if you're sending less time sending the number. If I send "NR AGN PSE", please respond *only* with "583 583". (*unless* I had your call wrong in which case you certainly should send it again)

You are asking way too much here. Most contest logging programs take
away all the flexibilty necessary to react to what you would need in a
less than perfect situation. There are people around who don't even have
a "real" key connected to the rig anymore. Sad. The automization
actually can slow you down, unless you are really fit with a keyboard
and know your way around its topography with blindfolded eyes. I find it
most painful to listen to people in contests who are seemingly unable to
even say hello to a friend, because they don't even know Alt-K.

TRLog has a "repeat S&P exchange" setting which allows you to send a
different exchange if you've already sent it to the same station. It's also
got a *bunch* of programmable F-keys, so you could have F3 send "DL7ANR TU
5NN 583", F4 could send "583", and F5 could slow down 10wpm, send "583 583
583", and then speed back up to where you started.

I don't remember NA or CT having that functionality though.

Operating without a hard key in parallel is a dangerous (though common!)
practice. Computers *do* crash. I've saved many a QSO by quickly switching
to the paddle.

(And yes, you do need a way to say "hi" to your friends! (TR does give the
advantage of reminding you who your friends are and what their names are, as
long as they don't change calls<g>))

IMHO typing has become an important part of the skill set of the successful
contester. Indeed, I know several contesters who believe their typing
ability has improved significantly since they started using computers in the
station!

Since I said something nasty about eQSL.cc a month or two back, it's
probably just fair to mention...

that they've addressed the problem. It is now possible to archive multiple
eQSLs with a single action - you no longer have to reload your entire inbox
after archiving each "card". It is also no longer necessary to reload the
entire inbox after confirming a "card". The result is to significantly
speed the process of answering "cards" - making it practical for those of us
with large numbers of "cards" pending.

CT does that, at least the exchange part.

> Operating without a hard key in parallel is a dangerous (though common!)

> to the paddle.

I guess it all boils down to personal preferences. CT is a great program
and it has features that I really love. The bandmap is one the things
that you don't want to live without once you worked with it. The keyer,
however, is most annoying, wrong dot/dash length and incorrect spacing
between certain letters.

I prefer handling my QSOs with a keyer and use my left hand for logging
at the same time. That gives me the opportunity of a) being able to
correct typos without having them sent on the air and having to repeat
an entire exchange for that and b) appearing as a human being on the
air, because you can say hello, gl, 73s and "QSO 3r5?" without
programming any weird keyboard hacks ;-)

How do you figure? I thought RTTY was a machine decoded FSK where operators do not have to copy anything by ear. Why is using a keyboard so much more "honest" than using a memory keyer? One can run an entire contest without so much as touching a paddle on his memory keyer, yet by your definition he would not be cheating like the CT users.

Source record: 16924

I would like to hear from US hams with the call suffix of 8C, 8C-, or 8C- -. I mainly want to hear from those who are into contesting and DXing. What I am wondering is if anyone with this call suffix has gotten any cards from the 8C manager/bureau lately? I am fairly new to the 8 bureau, having gotten my call last summer. I DX and contest alot so this past Feb. I sent envelopes and postage to the 8 bureau. As of yet I have not gotten anything back. My husband, who is also a ham, has already gotten 2 envelopes full of cards. As we work mostly the same stations I should have that coming too but as I stated I have gotten nothing yet. Is it common for the 8C manager to take this long to deliver cards? I have repeatly tried to contact the 8C manager but have heard back nothing to this date. Any help or info you can give me would be greatly appreciated! As I don't get a chance to read the newsgroups please respond direct to me at: NZ8C@aol.com. Thanks!

Aw, c'mon, Walt. Surely it's the decoding skill that matters most, not the encoding. When someone invents an automatic Morse decoder that can cope with "TEST DE DL7ANR" at 45 WPM, then an exchange containing "G3NYY" at 30 WPM, followed by "5NN" at 50 WPM, followed by "583" at 15 WPM and repeated at 45 WPM, all in the presence of contest QRM and QRN on 80M, well, then we'll really have to worry about cheating!

Huh? He was there, he had a license in writing and he operated within the limits of this license. What could possibly be illegal about that, other than not working the bunch of guys who needed P5 as their last one.

> And to a certain extent that
> continues to this day.

Only among those who didn't work him.

> The point I was trying to make is still valid.

No, it is not. The nexr lgal P5 will be another one out of the blue and not a big expedition announced months in advance. Unless, of course, that country collapses _before_ any such activity, in which case P5 won't be an extra DXCC entity anymore.

There was absolutely no controversy about the legality of that operation. Some people moaned because he didn't let them know he was going to be there; that continues to this day, but that is all.

His second operation was equally legal and uncontroversial.

I dunno where you get all your information, but it's not where most of us do!

From: Richard Eckman <NOr.s.eckmanSPAM@larc.nasa.gov.invalid>
Message-ID: <9f8balggb1@reznor.larc.nasa.gov>
Source record: 16936

Rick,
Not sure if this helps much, but I built a small interface (fits in a DB25 shell) for my Icom 756 based on an article from a QST in 1995, I think. It uses a MAX231, not a 232. If you're interested, I could scan in the article tonight and send it to you.

Regards,

Rich Eckman KO4MR
Hampton, VA

Thanks Rich
I would appreciate it, Ill see if i can use 1/2 the 232 for the circuit
:)

Rick

take a look here:

http://www.qsl.net/ok1rr/control.html

Might help, don't know...
I built one too, for my TS-850...

Good luck, 73!

1536. Complete list of $ or IRCs for direct QSLs

Newsgroup: rec.radio.amateur.dx
Date: 2001-06-01 20:57:08 UTC
From: "Dennis P. Stahr" <irfutures@earthlink.net>
Message-ID: <EkTR6.10296$S2.730670@newsread2.prod.itd.earthlink.net>
Source record: 16941

Does anybody know a website with a COMPLETE listing of the dollars or IRCs needed for direct return of QSL cards from different countries?

Have found a few sites with partial lists, but none with full.

Thanks
Dennis - W6NYC

1537. List of Tropical radiostations

Anyone know how to get a card out of this station? Worked him in March of 2000. Have sent numerous Emails which were responded to in a kindly manner. But all indicated he was very backlogged (thousands of cards with apparently no help to complete them.) Photo showed mail spread around the floor of the shack.

It seems I worked him just after he became very active in March of 2000. Prior to that there are reports of cards coming out and some sporadic cards after that. Now I see XW0X operating with XW2A the QSL route so that will add to the collection. Guess my luck ran out on this one.

It's all real personal and there are no wrong answers. I'm right handed and the left paddle sends dots and the right paddle sends dashes. I think this is how most people learn to do it, but if you are used to the reverse, that is great. I have my adjusting set screws backed off just enough not to close the circuit and very little more, so that it takes very little movement to send the signal. I think if you are feeling or hearing a lot of clickitty clack, then they might be set too wide, but again, it is personal preference.

Gary

Set the gap to zero and then back off about and eight of a
turn. This is a good staring reference. You can make final
adjustments from there.

There were 40 CQ Zones available during the past week.
There were 55 ITU Zones available during the past week.
ITU Zones that were not active are: 15,21,22,23,24,25,
26,31,34,35,43,58,59,68,69,70,71,73,74,75,90

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3B6RF OPERATION MAY BE QRT, BUT HELP IS NEEDED! The 3B6RF team managed to log 64,207 QSOs in 8.5 days, but all of these QSOs came with a big price tag. The 3B6RF's operation time was expected to be 15 days but had to be cut back due to transportation problems. These problems caused an unexpected expense. Preliminary estimates have put their travel expenses at approximately $48,000 over cost just to get to Agalega and back. OPDX was told the team still does not know how this is going to be covered and is still up in the air. The 3B6RF team is counting on the generousity of the ham community with QSL donations and possibly some added donations from DX associations. Please remember to possibly add something a little extra in your SASE for your 3B6RF. Steve, N3SL, is handling the N.A. QSLs, all other areas QSL via HB9AGH.

4W, EAST TIMOR. Thor, 4W6MM, can usually be found on 15 or 20 meters a few kHz up from the band edge between 0930 and 1300z.

7Q, MALAWI. Five Japanese operators will be active from here June 6-19th. Operators will be Mizuho/JG6BKB (7Q7CW), Yoshiki/JR6XIW (7Q7DU), JJ6VOV (7Q7EN), Kazuaki/JA2LZF (7Q7KZ) and Okabe/7Q7YL (who will stay there for the next two years). Activity is expected on HF and 6 meters. QSL all to JG6BKB, except 7Q7KZ is via JA2LZF.

BX5, TAIWAN (New Prefix). Jimmy, BX5AA, has activated the new prefix and has been on 15/20 meters SSB/ MFSK16. Watch between 1500 and 1800z, around 14079.5 kHz for MFSK16 and between 21250 and 21275 kHz for SSB.

CE0Z, JUAN FERNANDEZ ISLAND. Elias, CE0ZIS, has been active on 15/12/10 meters this past week. Check around 21260, 24936 and 28495 kHz between 1330 and 2200z.

CQ7, PORTUGAL. Now through possibly June 10th, look for the Moscatel Radio Group will be active as CQ7MRG from Mouchao da Povoa (reference number RI-008 for the Portuguese Island Award). Activity will be mainly 40 meters.

EM, UKRAINE (Free Award!). The Ukranian Amateur Radio League (UARL) will be active in the IARU HF World Championship, July 14-15th, from the UARL Headquarters using the special callsign EM0HQ. The HQ station's site (UR4MZL) is in Lisichansk city. The team leader is Vladimir, UX2MM. The QSL Manager for the team is Shevchenko Alexader, UR5EAW. The team is hoping to hit the World record. A "FREE" award is availble for working this station with "NO APPLICATION" to fill out. To receive the UARL's "Ukraine 2000" award, the rules are simple:
1) Work EM0HQ during theWorld Championship
2) For DX stations - 2 QSOs any mode
3) For European station - 4 QSOs any mode.
Again, NO award application is needed. The award application is the log of EM0HQ. The award is free and is sent through the bureau. This information was provide by Alexander, UR5EAW, QSL Manager for EM0HQ. For any questions, send E-mail to: em0hq@qsl.net

EP, IRAN. Yar, EP3SP, can sometimes be found on 20 meters CW/SSB/RTTY between 1500 and 2030z. Check above 14200 (SSB) or 14090 (RTTY) and

14002 (CW) kHz. QSL via W3HC. Mohsen, EP3SMH, is also active and usually looking for the U.S. on 15 meters. Check around 21300 kHz and above after 1730z. For Europe, look on 10 meters around 28495 kHz beginning around 1730z. QSL via CBA.

FP, ST. PIERRE AND MIQUELON ISLAND. Wendell, K4JZ, reports that his "Poor Boy DX-Pedition" is on schedule. He will be leaving Kentucky on June 9th and hopes to arrive on St. Pierre et Miquelon Island on June 14th or 15th. His callsign will be FP/K4JZ. His activity will be on 40-10 meters SSB.

IOTA NEWS.....
NA-125. Gilles, VE2MAM, will sign VE2MAM/p from an island in the Quebec Province (St. Lawrence Gulf) West Group, June 16-21st. Activity will be on 20-10 meters SSB, possibly 80/40 meters also. QSL via the bureau to the homecall.

J49, CRETE. Operators Laci/HA0HW, Tamas/HA4DX and Bandi/HA5NG continue to be active as J49HW, J49DX and J49NG, respectively, until June 7th. The four operators were active over the past weekend from one of Crete's coastal islands named Chrysi Island (EU-187) using J49HW/P, J49DX/P and J49NG/P. QSL via their homecall or via HA Bureau.

KG4, GUANTANAMO BAY. Tip, N4SIA, informs OPDX that he will be active as KG4AS from July 3-10th. There were no details provided on what bands and modes of activity. QSL to N4SIA.

KG4, GUANTANAMO BAY. Pat Rose, W5OZI, and Dale Richardson, AA5XE, will operate from Guantanamo Bay, Cuba (FK29, NA015), during the period of June 29th through July 5th. Area clearance has been granted and callsigns will be announced later. Operation will be primarily on SIX meters with possible activity on HF. Proposed frequencies will be 50.102 MHz for CW/SSB, QSX 50.115 or operators instructions if pileups are large. There will be a breakable beacon on 50.102 MHz and the operators will man the station to the maximum extent possible. Equipment will be an Icom IC-706MKIIG and a Kenwood TS-60, both running 100 watts to an 8 element yagi. QSL to home callsigns, SASE or SAE plus 1 IRC please. This is a bare bones trip and they will not have computer logging or logs on the internet. They hope to put as many stations in the log as possible. Dupes are OK. Full calls ONLY! They do NOT care about your grid, just callsign and signal report. They will make an effort to work Europe, Africa, N. and S. America. Questions can be submitted to:
W5OZI < w5ozi@ktc.com > -or- AA5XE < aa5xe@ktc.com >

MOUNTAIN DXPEDITION (Update). In July, a group of Tajik Hams/Tourists are planning to climb a nameless peak on the Central Pamir mountainous system and name it "Radio Amateur's Peak". At the present, paperwork is in progress, but the actual name can be allocated only after the expedition, and this will involve many other factors. Altitude of this mountain is about 5800 meters above sea level. The ham operators involved are Vladimir/EY8HB, Faruh/EY8AV and Nodir/EY8MM. Faruh/EY8AV will stay in the base camp and coordinate the trip for EY8HB and EY8MM who will attack the mountain's

peak. A special callsign was requested and they hope to sign EY1ARP. It will be used only from the top of the mountain. All other times the operators will sign homecall/4. The equipment to be used is an IC-706MK2G and QMAC-HF90 TXCVRS. For 20 meters, they will have a wire vertical made from a light weight fishing rod. For 40 meters, they will use an Inverted Vee. This expedition will be limited to battery power for which they will carry 7AH batteries to the peak. They will save the power for the mountain top operations and for emergencies. For a few more details, pictures of the moutain, and possible updates, check the following Web page: http://www.qsl.net/ey8mm/ey1arp.html

OY, FAROE ISLANDS. Ari, OH7KA/OH3KAV, will be active from the Faroe Islands during his vacation there from June 6-10th. This is not a high profile DXpedition, but he will try to be on the air at least few hours each day, mainly on 20 meters CW. His callsign will be OY/OH7KA. QSL via OH3KAV.

QSL INFO AND NEWS.....
Miichi, JA3MZB, thanks the many who called and logged 8J3EAG, the special event station promoting East Asian Games in Osaka City and for seeking publicity for Osaka City to be a candidate for the next Olympic Games in 2008. They made a total of 12664 QSOs with 4625 DX QSOs. They will send out QSL cards beginning on the middle of June. You can check the online log search on this special event station by visiting the Web site: http://www.qsobank.net/cgi-bin/logserch.pl
QSL via JARL Bureau or directly to the JA3DBD: Souichi MIYAMOTO, 6-9-2 Habikigaoka Habikino Osaka 583-0864 Japan.

Robert, AP2ARS (S53R), informs OPDX that his logs are now available for searching online. They can be viewed at the following Web page provide by Andy, VE9DX: http://www.ve9dx.com/ap2ars/ap2ars.html
His QSL information is: Robert Kasca, S53R, Beblerjeva 2, SI-5280 Idrija, SLOVENIA, EUROPE. Robert will handle all cards when he returns home in July on holiday. Cards are already printed. Please note that Andy now has links to 1610 + searchable logs on his log search page: http://www.ve9dx.com/logs.html

QSL Manager Fritz, DL7VRO, informs OPDX that the DF0RU/p QSL cards for IOTA expedition to Usedom Island (EU-129, May 24-27th) have all been sent out. QSL cards are not necessary.

It has been reported that the QSLs for the 2000 October/November FO0WEG and FO0POM operations are now being received. QSL via SP9FIH.

Vladimir, RV1CC, informs OPDX that he is now the QSL Manager for Dima, UA1ACX, who is active as PJ5/UA1ACX from Sint Eustatius, Netherlands Antilles. He will confirm direct or bureau QSL cards. His address is: Vladimir Sidorov, P.O.Box 7, St.Petersburg, 191011 RUSSIA. It is also possible to receive a QSL card from Dima via his direct address on the island: Dmitri Tonkopi, UNIVERSITY OF SINT EUSTATIUS SCHOOL OF MEDICINE, Golden Rock, P.O. BOX 73, ST. EUSTATIUS, NETHERLANDS ANTILLES. Vladimir is waiting for the PJ5/UA1ACX QSL cards from the printer and expects them in the middle of June. A view of the QSL card

can be seen on his Web page at: http://www.qsl.net/rv1cc

Rod, WC7N, informs the DX community that the logs for PV0F are now on the Web at: http://www.qth.com/k7bv/py0f
Dennis, K7BV, reportedly is on his way back home.

Dennis, RZ1AK, is providing some tips on how to send direct QSLs to Russia and CIS on his Web page. His Web service is so useful, that he has received many thank you E-mails. You might want to check it out at: http://www.qsl.net/rz1ak/mail.html

QSL REQUEST. OPDX has been asked to find out what the QSL status is of the XR0ZY operation that took place in April 2000. Apparently, a bunch of Minnesota DXers have tried everything they can think of, including E-mails to the QSL Manager, etc. and haven't gotten this one confirmed. Can anyone help?

SPECIAL EVENT (Promoting Amateur Radio). Peter/W1DAD and Jeanne/K1MOM Schipelliti will activate the special 1-by-1 callsign "K1D" now through June 17th to promote getting children into amateur radio and remind all operators to participate in "Kid's Day" on June 16th. Look for K1D on 28350, 21380, 14270, 7230 and 3895 kHz. QSL via W1DAD or direct to: 7 Dearborn Ridge Rd, Atkinson, NH 03811, USA. For more info on Kid's Day checkout the Web page: http://www.arrl.org/FandES/ead/kd-rules.html

SPECIAL EVENT. Look for special event station 3Z0GI to be active June 10th through July 30th. Activity will be on HF and UHF bands CW/SSB. Operationals will take place from Gorowo Ilaweckie, Poland, to celebrate the 666th aniversary of the city. QSL via SP4CUF.

V31, BELIZE. Rick, W7AV, informs OPDX that he will be operating from here June 22-29th. His activity will be on SSB and CW, 80-10 meters. Rick will be on Ambergris Caye (NA-073) for the entire operation. He will pick up his callsign when he arrives in Belize. QSL is direct to W7AV. His XYL, Darleen, K6JEN, may be active on PSK31 if they can get a laptop.

XU, CAMBODIA. Four members of the "DX Water-Club" will be active from here July 17th through August 2nd. The four German operators, Angelo/ DC9KZ, Framk/DL4KQ, Bernd/DL5OAB and Siggi/DL8KBJ, will be active as XU7ABR and possibly other callsigns. They also plan to participate in the IOTA Contest from AS-133 while there. Activity will be on all bands 160-6 meters including the WARC bands, CW/SSB/RTTY and PSK31. For more details, check out their nice new Web site at: http://www.dx-pedition.de

XW0, LAOS. Hiro, JA2EZD (aka XW2A), is now active as XW0X for about a month. His activity will be on 80-6 meters CW/SSB. Most of his activity has been on 15 meters CW/SSB, with spots also on 20/17 meters. Operations seem to center around 1930-0100z and again after 1030z for a few hours. QSL via XW2A (P.O. Box 2659, Vientiane, Laos).

ZD9, TRISTAN DA CUNHA. It was reported this week by "The Daily DX" that the island was hit by a powerful hurricane and Andy/ZD9BV and Lorraine/ ZD9YL have lost all of their antennas, tower and transceivers in the

storm. The two operators were lucky enough to be in England when the hurricane hit. Colin, GM6HGW/ZD9HGW, reported, "The devastation has been greater than the volcanic eruption in 1961, which foreced the evacuation of the island." Anyone who can help supply any surplus equipment is urged to contact Colin by E-mail at: gm6hgw@hotmail.com

ZONE 18. Yuri, UA0SJ, lives in Bratsk City, which is 600 kilometers north of Lake Baikal. He can sometimes be found on 17 or 20 meters SSB after 0000z and again after 1200z. His equipment is a Kenwood TS-50S with AT-50 and KT-34a antenna. He does participate in contest. QSL only direct to: Yuri A. Maltsev, P.O. Box 2304, Bratsk-City, 665700, Russia / Asiatic / His E-mail address is: ua0sj@windoms.sitek.net

1554. Beacon-Time Wizard

Newsgroup: rec.radio.amateur.dx
Date: 2001-06-04 17:00:42 UTC
From: J Tabor <denews@taborsoft.com>
Message-ID: <thnfm6sucppac9@corp.supernews.com>
Source record: 17009

Greetings,

The Beacon-Time Wizard, BTW, is a group of beacon information views and tools to enhance the enjoyment and usefulness of the NCDXF/IARU International Beacon Network and HF radio operation.

BTW occupies a small portion of the desktop and at the click of a button provides various tools and alternate "views" with information on each beacon and additional information for the currently active beacon station.

The Control Palette is the main user interface element. It's configurable, occupies only a small portion of the desktop, and at the click of a button various tools and views are available.

Alternate beacon views include:
1) BW - an enhanced version of our traditional "Beacon Wizard" palette

2) Clocks - analog clocks display time for each beacon location

3) Map - an accurate, sizable geographic display with solar "gray line".

Additionally, BTW provides:
1) HF propagation and forecast - a convenient method to retrieve and view current, and predicted, HF propagation condition reports from The Space Environment Center.

2) SNTP - Simple Network Time Protocol tool for keeping the system clock adjusted.

3) KCal - a special version of our calendar for viewing sunrise/sunset and moon rise/moon set times for any day, along with general seasonal information.

4) Time Zone Browser - a tool for viewing available system time zone information.

The BTW web page:
http://www.taborsoft.com/btw/

This is a fully-functional 30-day trial. Any comments welcome.

Regards,
Jim, KU5S

I'm just getting on this NG for curiosity today for the first time, because i love ham radio and i have been an operator for almost 20 years now, so everything about radio i check and read.

IT IS INCREDIBLE TO SEE SO MUCH CRAP AND BAD COMMENTS AND ATTITUDES ON THIS NG.
You see poor beginners asking questions and the answer are nothing more than a fight of opinions from childish users...needless to say that the poor guy usually never gets an answer.

I was interrested to join and maybe share with others my ideas and comments but now i'm gonna press "UNSUSCRIBE"

Sorry for you all...

You gotta be kidding!

This is actually one of the better newsgroups
in the rec.radio.heirarchy!

If you think this is bad, you never looked at:
rec.radio.amateur.misc
.policy
.equipment

For a real sewer check out r.r.cb...

Talk about a waste of bandwidth!

> usually never gets an answer.

You are obviously posting to, and about, the wrong news group. You were
probably reading the rec.radio.shortwave or rec.radio.cb news groups.
But this news group, although quiet, is one of the best.

> I was interrested to join and maybe share with others my ideas and comments
> but now i'm gonna press "UNSUSCRIBE"

There is no real joining a usenet news group. You either read it, or you
don't.
It's your choice. You can also use the filters built into your news
reader
to filter out any jerks. But your news reader might not have filters,
seeing
that they can't even spell "UNSUBSCRIBE" on their buttons correctly.

> Sorry for you all...

Your the one to feel sorry for. You'll be missing out on a lot of good
stuff.

Or, in the end, you may just be one of them news group trolls!!!!

1566. Need Advice...Vertical as Spotting Antenna???

Newsgroup: rec.radio.amateur.dx
Date: 2001-06-06 18:59:15 UTC
From: aidehua@aol.com
Message-ID: <20010606145915.09342.00002951@ng-cp1.aol.com>
Source record: 17021

I am designing my antenna system. Do you recommend having a vertical in addition to Yagi/Tower systems??? My justification would be for diversity reception and omni-directional capability for listening...

Thanks,

Ed NI6S

The DEC is a MIPS R3000 @ 25 MHz... it'd be a little slow with 2k, IF Micro$loth even ported it for MIPS The Alpha is my fileserver, and migrating it would be a bad thing. The Sparc is my mail server, and again, migrating it would be more trouble than it's worth. They're all stable as they are, and I'm not especially fond of the idea of putting M$ software on them when I can get a more robust and stable OS that does the job better for free.

See, that's the difference between you and me. I have just had breakfast:
Baked beans on toast with fried eggs on top. And I have even had the
pleasure of eating boar with peppermint sauce once and, uhm, somehow ate
it ;-)

If you "per s" want to draw the language-card, let me inform you that
I live in the north-western part of Belgium which happens to be in Dutch
speaking aerea...

It's not that because I mastered the French language,
I suddenly should be labelled "Walloon" (whatever that may be)...
They don't call me "Tommy" either, nor "Fritz"...

Does anyone have a copy of this and a little time to do some
research for me? K1ZM and I are working on a project as part of ARRL's
160 Bandplan Committee and we need to document increased activity on 160
over the past 20 years. I believe what we need could be done quickly
with access to the data on the above CD-ROM. Please contact me directly
at btippett@alum.mit.edu if you have one and would be willing to help.

IMHO the resources you would spend on a good vertical system in
addition to the yagi/tower system would be better spent in making the
yagi/tower system one notch better, such as a stronger tower or
heavier duty rotator. Packet or telnet spotting will tell you what
bands are open and to where.

Dear OMs,

We plan to run a China DX net, we would like to let many DX station work China and help more China DXer and novice work DX. The net will run once a week, frequency is 21.410MHz, time will start at 1300z or 2300z saturday, we will pickup a better time depend on the propagation, we will send the notice on thursday or firday, if no any notice, that's mean at 1300z. We welcome any DX station check in to our net make QSO with China station, if you have time on weekend, please looking for us on the air. This is weekend, is the first time for net runing, hope see you in net, time is UTC1300z on 21.410MHz.

BD4ED(AS-136) and BD7YC(AS-129) will on the net this weekend.

To search China station QSL information, go to URL http://www.chinaqrz.com .

I have listed my Beale Electronics HF Mobile antenna on
EBAY.

In the 1980s Beale made the Mercedes-Benz of mobile
antennas. Each coil was hand made and hand tuned.

Click on the link to see the description:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1243785950

1582. Selling LW MAX; 60-190KHz, CW (BPSK), up to 2W output power.

Newsgroup: rec.radio.amateur.dx
Date: 2001-06-08 15:09:10 UTC
From: PCS ELECTRONICS <you@know.me>
Message-ID: <9fqq2k$4o4$1@planja.arnes.si>
Source record: 17037

60-190KHz, CW (BPSK), up to 2W output power.

Explore the world of LF. Amateurs and experimenters are using beacons to push the boundaries of weak signal communications, with beacons being heard out to over 1000 miles during rare openings! The LW-MAX supports both CW and QRSS (slow speed CW) operation, with BPSK support coming in a future software upgrade. You simply set your operating frequency, type in your message, and select your transmission speed and you're on the air!

Features:

USA band: 160-190KHz (100Hz steps)
EU band: Supported
Power: 1W (up to 2W with external power supply)
No tuning required
Instructions and antenna designs included
8-bit PC ISA card format
Versatile software support (cw-keyer, sequencer, power and freq. control)
This is the last transmitter you may ever buy!
BPSK currently not yet supported by software

This is the web page with additional information:
http://www.pcs-electronics.com/Products/hams.shtml

1583. Heathkit SB-230 P.S. Transformer Testing.

Newsgroup: rec.radio.amateur.dx
Date: 2001-06-08 15:44:24 UTC
From: Michael Fenton <mfent@voyager.net>
Message-ID: <3b20f3fa$0$62152$bbae4d71@news.net-link.net>
Source record: 17038

Picked up an SB-230 at a rummage sale and I suspect the p.s. transformer is bad. When I first and second time I hit the switch it trips the breaker. The third time it will stay on. I have the transformer disconnected from everything but the supply. It draws 2 amps with nothing connected to it and it seems to draw over 10 amps when I first hit the switch. Am I correct to assume it is bad? 3 of 6 of the electrolytics are leaking badly also and I suspect may have put a strain on the transformer. Can it be rebuilt or rewound? Any insights would be appreciated.

Thanks Mike
